Mineola, New York 11501

Subject: Phase I Environmental Site Assessment  
8 Somerset Lane  
Edgewater, New Jersey 07020  
Partner Project No. 22-359701.1

Dear Sheila Young-Graham:

Partner Assessment Corporation (Partner) is pleased to provide this *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 and E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Client Agreement.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate your trust in Partner and the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (908) 229-4824.

Sincerely,

Lisa R. Sauer  
Relationship Manager

## EXECUTIVE SUMMARY

---

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13 and E1527-21, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 8 Somerset Lane in Edgewater, Bergen County, New Jersey (the "subject property").

### Property Description

The subject property is located on the northwest side of Somerset Lane and the northeast side of Pembroke Place within a mixed commercial and residential area of Bergen County. Please refer to the table below for further description of the subject property:

#### **Subject Property Data**

<b>Address(es):</b>	8 Somerset Lane, Edgewater, New Jersey
<b>Historical Address(es):</b>	45 River Road associated with former Unilever facility
<b>Property Use:</b>	Multi-Family Residential
<b>Land Acreage (Ac):</b>	0.6
<b>Number of Buildings:</b>	One
<b>Number of Floors:</b>	Six
<b>Gross Building Area (SF):</b>	70,000 SF (Total)
<b>Date of Construction:</b>	2021
<b>Assessor's Parcel Number (APN):</b>	Block 99 Lot 1.13 and 1.19
<b>Type of Construction:</b>	Concrete
<b>Current Tenants:</b>	Somerset Apartments with a total of 77 units
<b>Site Assessment Performed By:</b>	Bridget Connolly of Partner
<b>Site Assessment Conducted On:</b>	April 13, 2022
<b>Regulatory Radius Report Date:</b>	April 11, 2022
<b>Lien Search Date:</b>	N/A
<b>Report Date:</b>	April 29, 2022
<b>FOIAs Date:</b>	April 2022

The subject property is currently occupied by the Somerset Apartments for residential use. Onsite operations consist of general multi-family living activities and associated property maintenance. The subject property consists of one six-story building. In addition to the current structure, the subject property is improved with asphalt-paved driveways and parking lots, paved walkways, and associated landscaping.

According to available historical sources, the subject property was undeveloped as early as 1887; developed with an industrial facility (Bulls Ferry Chemical Co.) between 1911 and *circa* 1922; vacant land in 1928; developed with buildings associated with a larger industrial facility (Lever Bros Pilot Plant/Unilever Research & Development) that occupied the subject property and adjoining properties between *circa* 1953 and 2006; and redeveloped with the current structure in 2021. Tenants on the subject property have included Lever Bros Research & Development Division (1971); Lever Bros Soaps & Shortenings Research & Development (1981); Lever Bros Co Packaging Machine (1986); Lever Bros Co Perfume Manufacturing

(1986); Lever Bros Co Research & Development Center (1986); Lever Esrch Inc (1986); Edgewater Test Circle Sensory Evaluation Lab (1991); Edgewater Test Center Sensory Evaluation (1991); Lever Brothers Expansion Center Pilot Plant (1991); Schmidhamer Max Industrial & Mechanical (1991); Unilever Research U S Inc Packaging Machinery Development (1991); Unilever Research U S Inc Perfume Manufacturing (1991); Lever Bros Co (1991-1996); Unilever Research Us Inc (1991-1996); Lever Research Inc (1991-2016); Edgewater Test Center Sensory Evelator (1996); Edgewater Test Center Sensory Evelator Lab (1996); Lever Research Inc (1996); Unilever Research Us Inc Perfume Manufacturing (1996); Unilever Research Info Service (2000); Unilever Research (2000-2003); Lever Brothers Metro FCU (2000-2003).

The adjoining properties are tabulated below:

### ***Adjoining Properties***

<b>North:</b>	Parking garage (45 River Road)
<b>Northeast:</b>	Parking garage (45 River Road)
<b>East:</b>	Somerset Lane beyond which is The Pearl condominiums (9 Somerset Lane/45 River Road)
<b>Southeast:</b>	Somerset Lane beyond which is The Pearl condominiums (9 Somerset Lane/45 River Road)
<b>South:</b>	Somerset Lane and Pembroke Place beyond which is The Glass House condominiums (3 Pembroke Place)
<b>Southwest:</b>	Pembroke Place beyond which is Spencer Savings Bank (2 Pembroke Place)
<b>West:</b>	The Courtyard Marriott hotel (3 Pembroke Place)
<b>Northwest:</b>	The Courtyard Marriott hotel (3 Pembroke Place)

According to the United States Geological Survey, the physical setting features of the subject property identify the terrain as sloping to the southeast with the depth to groundwater in the vicinity of the subject property inferred to be 9 and 10 feet below ground surface (bgs) and groundwater flow inferred to be toward the southeast.

## **Findings and Opinions**

### ***Recognized Environmental Condition***

A *recognized environmental condition (REC)* refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- The subject property historically operated as the Bulls Ferry Chemical Co. for the manufacturing of cotton and silk from as early as 1911 to *circa* 1922; and also operated as Lever Bros Pilot Plant and research labs, built in 1952. According to historical resources, this facility, as well as Unilever Research and Development Inc., occupied the subject property until 2006. This former industrial facility also included the north/northeast, east, and west-adjoining properties (formerly addressed as 45 River Road) and manufactured edible oils, soaps, and detergents, etc.

The former 45 River Road industrial facility (which includes the subject property) is currently active with the New Jersey Department of Environmental Protection (NJDEP) Site Remediation and

Brownfield Programs under Program Interest (PI) Number 015891 since March 2003. A multi-phased Remediation Agreement (RA) for soil and groundwater was established on August 26, 2003. The site is also identified as a New Jersey Industrial Site Recovery Act (ISRA) site under Case Numbers E20030062 and E20040267. Partner was provided with a copy of a recorded Deed Notice for the 45 River Road property, dated December 2012, and filed with the County in August 2013 which indicated that i.Park Edgewater, LLC had conducted remediation of contaminated soils with NJDEP approval, allowing for residual impacts to remain onsite. As a result, a statutory requirement for institutional and engineering controls was established in order to protect public health and safety and the environment. Institutional controls are reportedly in place to limit potential exposure to the soils in the restricted areas. Engineering controls consist of building foundations, asphalt, concrete, and vegetative caps which limit the potential for direct contact with contaminants. Prior to redevelopment, arsenic-impacted soils over 600 parts per million (ppm) were reportedly excavated. Although the Deed Notice was filed and recorded with the County in 2013 which identified subject property parcel Lot 1.13, the Remedial Action Permit status is noted as withdrawn according to the DataMiner website.

Partner contacted the NJDEP Case Manager who indicated remedial work for the former Unilever property is ongoing. Additional clarification on the status of any Remedial Action Permits and proposed conditional closure were requested by Partner and a response is pending. The subject property was redeveloped with current apartment building in December 2021. The inclusion of the subject property within the former Unilever Research & Development facility with an open NJDEP case represents a REC to the subject property.

### ***Controlled Recognized Environmental Condition***

A *controlled recognized environmental condition (CREC)* refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any CRECs during the course of this assessment.

### ***Historical Recognized Environmental Condition***

A *historical recognized environmental condition (HREC)* refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any HRECs during the course of this assessment.

### ***Business Environmental Risk***

A *Business Environmental Risks (BER)* is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.

- Partner did not identify any BERs during the course of this assessment.

### ***Significant Data Gaps***

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

### **Conclusions and Recommendations**

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 and E1527-21 of 8 Somerset Lane in Edgewater, Bergen County, New Jersey (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of a REC in connection with the subject property. Based on the conclusions of this assessment, Partner recommends continued implementation of the property use restrictions established by the institutional and engineering controls, as well as allowance for access to the subject property by the responsible party (or their assigned representatives) for investigative or remedial activities.

## 1.0 INTRODUCTION

---

Partner Assessment Corporation (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 8 Somerset Lane in Edgewater, Bergen County, New Jersey (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

### 1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13 and E1527-21) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

### 1.2 Scope of Work

The scope of work for this ESA is in accordance with and to the extent necessary to achieve the goal of the requirements set forth in the ASTM Standard E1527-13 and E1527-21. This assessment included: 1) a property and adjoining site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments to obtain readily ascertainable information to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched readily available information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-21, AULs include both legal (that is, institutional) and physical (that is, engineering) controls that may include legal

or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, or surface water on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

### **1.3 Limitations**

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment, or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the compliance and safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

## 1.4 User Reliance

Hanover Community Bank engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope, and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Hanover Community Bank. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

## 1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13 and E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of the AAI User Questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner was not able to document the historical use of the subject property prior to 1887. The following sources were reviewed during the course of this assessment and found to be limited: aerial photographs were not available prior to 1931; city directories were not available prior to 1971; topographic maps prior to 1888 were not reasonably ascertainable from local agencies; and fire insurance maps were not available prior to 1887. This data failure is not considered critical and does not change the conclusions of this report, as the 1887 fire insurance map revealed the subject property to be unimproved land. In addition, the adjoining and surrounding areas are also shown mostly as unimproved land with a small residential development to the west of the subject property.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.

- Partner submitted Freedom of Information Act (FOIA) requests to the Township Public Works Department for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjoining properties. In addition, based on the limited nature of files during a May 3, 2022 file review at the NJDEP, a follow-up FOIA request was submitted for additional document access associated with the former Unilever facility (45 River Road). As of this writing, the Public Works agency and the NJDEP have not responded to Partner's requests. Based on information obtained from other historical resources, this limitation is not expected to alter the overall findings of this assessment.
- Partner observed approximately 10% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (residential), this limited method of survey is not expected to alter the overall findings of this assessment.
- Partner's view of the ground during the site assessment was obstructed due to parked cars. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

## 2.0 SITE DESCRIPTION

---

### 2.1 Site Location and Legal Description

The subject property at 8 Somerset Lane in Edgewater, New Jersey is located on the northwest side of Somerset Lane and the northeast side of Pembroke Place. According to the Bergen County Assessor, the subject property is legally described as Block 99 Lots 1.13 and 1.19. According to the site contact, ownership is currently vested in 45 River Road Urban Renewal associates, LLC since 2020.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

### 2.2 Current Property Use

The subject property is currently occupied by the Somerset Apartments for residential use. Onsite operations consist of general multi-family living activities and associated property maintenance. The subject property consists of one six-story building with a total of 7 apartment units. In addition to the current structure, the subject property is improved with asphalt-paved driveways and parking lots, paved walkways, and associated landscaping.

The subject property is designated for redevelopment by the Borough of Edgewater.

The subject property address, 8 Somerset Lane, was not identified in the regulatory database report. However, the subject property was historically part of a larger industrial facility with an address of 45 River Road, which was identified as an Underground Storage Tank (UST), Known Contaminated Sites in New Jersey (SHWS), Historic Incidents (HIS SPILL), Delisted Known Contaminated Sites (DSHW), SEMS List 8R Archive Sites (SEMS ARCHIVE), Brownfields (BROWNFIELDS), Resource Conservation and Recovery Act Corrective Action (RCRA CORRACTS), RCRA non-CORRACTS TSD Facilities (RCRA TSD), RCRA Large Quantity Generators (RCRA-LQG), Major Facilities (MAJOR FAC), Voluntary Cleanup Program (VCP), Data Miner Sites (ALL SITES), and New Jersey Environmental Management System (NJEMS) site in the regulatory database report of Section 4.2.

### 2.3 Current Use of Adjoining Properties

The subject property is located within a mixed commercial and residential area of Bergen County. During the vicinity reconnaissance, Partner observed the land uses on adjoining properties as defined in ASTM E1527-13 and E1527-21 as any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them. The adjoining properties are tabulated below:

<b><i>Adjoining Properties</i></b>	
<b>North:</b>	Parking garage (75 River Road)
<b>Northeast:</b>	Parking garage (75 River Road)
<b>East:</b>	Somerset Lane beyond which is The Pearl condominiums (9 Somerset Lane)
<b>Southeast:</b>	Somerset Lane beyond which is The Pearl condominiums (9 Somerset Lane)
<b>South:</b>	Somerset Lane and Pembroke Place beyond which is The Glass House condominiums (3

## **Adjoining Properties**

Somerset Lane)

**Southwest:** Pembroke Place beyond which is Spencer Savings Bank (2 Pembroke Place)

**West:** The Courtyard Marriott hotel (3 Pembroke Place)

**Northwest:** The Courtyard Marriott hotel (3 Pembroke Place)

The adjoining property to the west was identified as an ALL SITES and NJEMS site in the regulatory database report of Section 4.2.

The adjoining property to the east was identified as a SPILLS site in the regulatory database report of Section 4.2

## **2.4 Physical Setting Sources**

### **2.4.1 Topography**

The 2016 United States Geological Survey (USGS) *Weehawken, New Jersey* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 9 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the southeast.

A copy of the most recent topographic map is included as Figure 3 of this report.

### **2.4.2 Hydrology**

While under natural and undisturbed conditions shallow groundwater flow most frequently follows the topography of the land surface, natural or man-made features can affect flow direction, and the presumed flow may not match the actual flow directions at the subject property and vicinity. Topographic map interpretation suggests the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the southeast.

Information specific to the subject property regarding the depth to groundwater and direction of groundwater flow was not available for the subject area. However, according to information obtained from online research, depth to the water table is anticipated between 9 and 10 feet below ground surface (bgs).

The nearest surface water to the subject property is the Hudson River located approximately 253 feet southwest of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by SUEZ serves the subject property vicinity. The sources of public water for Bergen and Hudson counties are from four reservoirs – the Oradell, Woodcliff Lake, and Lake Tappan reservoirs in Bergen County, New Jersey, and Lake DeForest in Rockland County, New York.

### **2.4.3 Geology/Soils**

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land. Urban land is described as an area where more than 85% of the surface is covered by asphalt, concrete, buildings, or other impervious surfaces. Soils and foundation materials are highly variable. Urban structures and works cover so much of this land type that identification of the soils is not practical. Most areas have been smoothed and the original soil material has been disturbed, filled over, or otherwise destroyed.

The subject property is located within the Piedmont physiographic province, which consists of an area of varied topography that ranges from lowlands to peaks and ridges of moderate altitude and relief. The metamorphic and igneous rocks of this province range in age from Precambrian to Paleozoic and have been sheared, fractured, and folded. The stratigraphy underlying the soils at the subject property consist of reddish brown, yellow, light gray silty sand to silty clay with shale, mudstone, or sandstone fragments. As much as 10 feet thick on shale and mudstone, 30 feet thick on sandstone.

### **2.4.4 Flood Zone Information**

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 34003C0286H, dated August 28, 2019, the subject property appears to be located in Zone AE, defined as areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods.

### 3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

<b>Historical Use Information</b>		
<b>Years</b>	<b>Resource</b>	<b>Description/Use</b>
1887-1900	Fire Insurance Maps, Topographic Maps	Unimproved land
<i>Circa</i> 1911-1922	Fire Insurance Maps, Topographic Maps	Industrial (Bulls Ferry Chemical Co.)
<i>Circa</i> 1928-2006	Aerial Photographs, Building Records, City Directories, Interviews, Previous Report, Fire Insurance Maps	Industrial (Lever Bros Pilot Plant/Unilever Research and Development)
2007-2019	Aerial Photographs, Building Records, City Directories	Demolition/vacant land/construction
2021	Aerial Photographs, Building Records, Interviews, Onsite Observations	Multi-Family Residential (Somerset Apartments)

Tenants on the subject property have included Lever Bros Research & Development Division (1971); Lever Bros Soaps & Shortenings Research & Development (1981); Lever Bros Co Packaging Machine (1986); Lever Bros Co Perfume Manufacturing (1986); Lever Bros Co Research & Development Center (1986); Lever Esrch Inc (1986); Edgewater Test Circle Sensory Evaluation Lab (1991); Edgewater Test Center Sensory Evaluation (1991); Lever Brothers Expansion Center Pilot Plant (1991); Schmidhamer Max Industrial & Mechanical (1991); Unilever Research U S Inc Packaging Machinery Development (1991); Unilever Research U S Inc Perfume Manufacturing (1991); Lever Bros Co (1991-1996); Unilever Research Us Inc (1991-1996); Lever Research Inc (1991-2016); Edgewater Test Center Sensory Evelator (1996); Edgewater Test Center Sensory Evelator Lab (1996); Lever Research Inc (1996); Unilever Research Us Inc Perfume Manufacturing (1996); Unilever Research Info Service (2000); Unilever Research (2000-2003); Lever Brothers Metro FCU (2000-2003).

The subject property historically operated as the Bulls Ferry Chemical Co. for the manufacturing of cotton and silk from as early as 1911 to *circa* 1922; and also operated as Lever Bros Pilot Plant and research labs, built in 1952. According to historical resources, this facility, as well as Unilever Research and Development Inc., occupied the subject property until 2006. This former industrial facility also included the north/northeast, east, and west-adjoining properties (addressed as 45 River Road) and manufactured edible oils, soaps, and detergents, etc.

The former 45 River Road industrial facility (which includes the subject property) is currently active with the New Jersey Department of Environmental Protection (NJDEP) Site Remediation and Brownfield Programs under Program Interest (PI) Number 015891 since March 2003. A multi-phased Remediation Agreement (RA) for soil and groundwater was established on August 26, 2003. The site is also identified as a New Jersey Industrial Site Recovery Act (ISRA) site under Case Numbers E20030062 and E20040267. According to available information from the online DataMiner website, various remedial investigation, remedial action, and associated workplans have been completed. The inclusion of the subject property

within the former Unilever Research & Development facility with an open NJDEP case represents a REC to the subject property.

### 3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Risk Information Services (ERIS) on April 11, 2022. The inferred uses of the subject property and adjoining properties as interpreted from the aerial photographs in Appendix B are tabulated below:

<i>Date:</i>	<i>1931</i>	<i>Scale:</i>	<i>1"=500'</i>
<b>Subject Property:</b>	Appears to be undeveloped land		
<b>North:</b>	Appears to be developed with an industrial facility with several bulk storage ASTs		
<b>Northeast:</b>	Appears to be developed with an industrial facility with several bulk storage ASTs		
<b>East:</b>	Appears to be undeveloped land		
<b>Southeast:</b>	Appears to be undeveloped land		
<b>South:</b>	Appears to be undeveloped land		
<b>Southwest:</b>	Appears to be undeveloped land		
<b>West:</b>	Appears to be undeveloped land		
<b>Northwest:</b>	Appears to be undeveloped land		
<i>Date:</i>	<i>1953</i>	<i>Scale:</i>	<i>1"=500'</i>
<b>Subject Property:</b>	Appears to be developed with industrial structures, associated with the facility to the north/northeast		
<b>North:</b>	No significant changes visible		
<b>Northeast:</b>	No significant changes visible		
<b>East:</b>	Appears to be developed with industrial structures, associated with the subject property and facility to the north/northeast		
<b>Southeast:</b>	Appears to be developed with a parking lot		
<b>South:</b>	Appears to be developed with a parking lot		
<b>Southwest:</b>	Appears to be developed with a parking lot		
<b>West:</b>	Appears to be developed with a parking lot		
<b>Northwest:</b>	Appears to be developed with a parking lot		
<i>Date:</i>	<i>1959, 1966</i>	<i>Scale:</i>	<i>1"=500'</i>
<b>Subject Property:</b>	No significant changes visible		
<b>North:</b>	No significant changes visible		
<b>Northeast:</b>	No significant changes visible		
<b>East:</b>	No significant changes visible		
<b>Southeast:</b>	No significant changes visible		
<b>South:</b>	No significant changes visible		
<b>Southwest:</b>	No significant changes visible		
<b>West:</b>	Appears to be developed with an industrial warehouse-like structure		
<b>Northwest:</b>	Appears to be developed with an industrial warehouse-like structure		
<i>Date:</i>	<i>1976</i>	<i>Scale:</i>	<i>1"=500'</i>
<b>Subject Property:</b>	No significant changes visible		
<b>North:</b>	No significant changes visible		

<b>Date:</b>	<b>1959, 1966</b>	<b>Scale:</b>	<b>1"=500'</b>
<b>Northeast:</b>	No significant changes visible		
<b>East:</b>	No significant changes visible		
<b>South/southeast:</b>	No significant changes visible		
<b>West/Southwest:</b>	No significant changes visible		
<b>Northwest:</b>	Depicted as developed with an additional industrial-like structure		

<b>Date:</b>	<b>1979 - NETR</b>	<b>Scale:</b>	<b>1"=500'</b>
<b>Subject Property:</b>	No significant changes visible		
<b>North:</b>	The previous bulk storage ASTs are no visible, the former industrial factory appears to be vacant in certain areas however the factory buildings are still visible		
<b>Northeast:</b>	The previous bulk storage ASTs are no visible, the former industrial factory appears to be vacant in certain areas however the factory buildings are still visible		
<b>East:</b>	No significant changes visible		
<b>Southeast:</b>	No significant changes visible		
<b>South:</b>	No significant changes visible		
<b>Southwest:</b>	No significant changes visible		
<b>West:</b>	No significant changes visible		
<b>Northwest:</b>	No significant changes visible		

<b>Date:</b>	<b>1985, 1995</b>	<b>Scale:</b>	<b>1"=500'</b>
<b>Subject Property:</b>	No significant changes visible		
<b>North:</b>	No significant changes visible

<b>West:</b>	Appears to be redeveloped with current improvements	
<b>Northwest:</b>	No significant changes visible	

Copies of select aerial photographs are included in Appendix B of this report.

### 3.2 Fire Insurance Maps

Partner reviewed the collection of Fire insurance maps (FIMs) from ERIS on April 11, 2022. The following inferred uses of the subject property and adjoining properties interpreted from the FIMs in Appendix B are tabulated below:

<b>Date:</b> 1887, 1900	
<b>Subject Property:</b>	Depicted as undeveloped
<b>North:</b>	Depicted as undeveloped
<b>Northeast:</b>	Depicted as undeveloped
<b>East:</b>	Depicted as undeveloped
<b>Southeast:</b>	Depicted as undeveloped
<b>South:</b>	Depicted as undeveloped
<b>Southwest:</b>	Depicted as undeveloped
<b>West:</b>	Depicted as developed with a small structure
<b>Northwest:</b>	Depicted as undeveloped

<b>Date:</b> 1911	
<b>Subject Property:</b>	Depicted as developed with the Bull's Ferry Chemical Co., manufacturers of "cotton and silk sizes," which consists of a boiler house, mill & dyeing house, mill room, storeroom, air tanks, offices, an open shed for barrels, storage area, stable, and manufacturing area
<b>North:</b>	No significant changes depicted
<b>Northeast:</b>	No significant changes depicted
<b>East:</b>	No significant changes depicted
<b>Southeast:</b>	No significant changes depicted
<b>South:</b>	No significant changes depicted
<b>Southwest:</b>	No significant changes depicted
<b>West:</b>	The previous structure is not depicted
<b>Northwest:</b>	No significant changes depicted

<b>Date:</b> 1921, 1922	
<b>Subject Property:</b>	Depicted as developed with additional industrial structures including several storage rooms, a tanning building, two experiment/experimental buildings, oil rooms, mill & dry room, blue room, four castor oil tanks, and a Strome's building which expand into the adjoining properties

**Date:** 1921, 1922

<b>North:</b>	No significant changes depicted
<b>Northeast:</b>	No significant changes depicted
<b>East:</b>	Depicted as developed with additional Bulls Ferry Chemical Co. industrial structures including several storage rooms, a tanning building, two experiment/experimental buildings, and a Strome's building
<b>Southeast:</b>	Depicted as developed with additional Bulls Ferry Chemical Co. industrial structures including several storage rooms, a tanning building, two experiment/experimental buildings, and a Strome's building
<b>South:</b>	No significant changes depicted
<b>Southwest:</b>	No significant changes depicted
<b>West:</b>	Depicted as developed with additional industrial structures including a blue room, oil room, two experiment/experimental buildings and four castor oil tanks
<b>Northwest:</b>	Depicted as developed with additional industrial structures including a blue room, oil room, two experiment/experimental buildings and four castor oil tanks

**Date:** 1928, 1930

<b>Subject Property:</b>	The previous Bulls Ferry Chemical Co. is not depicted, identified as vacant land
<b>North:</b>	No significant changes depicted
<b>Northeast:</b>	No significant changes depicted
<b>East:</b>	The previous Bulls Ferry Chemical Co. is not depicted, identified as vacant land
<b>Southeast:</b>	The previous Bulls Ferry Chemical Co. is not depicted, identified as vacant land
<b>South:</b>	No significant changes depicted
<b>Southwest:</b>	No significant changes depicted
<b>West:</b>	The previous Bulls Ferry Chemical Co. is not depicted, identified as vacant land
<b>Northwest:</b>	The previous Bulls Ferry Chemical Co. is not depicted, identified as vacant land

**Date:** 1950

<b>Subject Property:</b>	No significant changes depicted
<b>North:</b>	Appears to be developed with an addition to the existing Lever Bros Co. facility for the manufacturing of edible oils. The adjoining features consist of three one-million-gallon seed oil tanks, several 376,000-gallon seed oil tanks, one 252,000-gallon fuel oil tank, water tanks, a boiler room, refinery, Acidulation building, a water tower, fire pump house, and several railroad spurs (these areas built in 1930s-50s)
<b>Northeast:</b>	No significant changes depicted
<b>East:</b>	No significant changes depicted
<b>Southeast:</b>	No significant changes depicted
<b>South:</b>	No significant changes depicted
<b>Southwest:</b>	No significant changes depicted
<b>West:</b>	No significant changes depicted
<b>Northwest:</b>	No significant changes depicted

**Date:** 1968

<b>Subject Property:</b>	Depicted as developed with the Lever Bros Pilot Plant and research labs, built in 1952, which also expands into the adjoining properties
--------------------------	--

**Date:** 1968

<b>North:</b>	No significant changes depicted
<b>Northeast:</b>	No significant changes depicted
<b>East:</b>	Depicted as developed with the Lever Bros research labs, built in 1952
<b>Southeast:</b>	Depicted as developed with the Lever Bros research labs, built in 1952
<b>South:</b>	No significant changes depicted
<b>Southwest:</b>	No significant changes depicted
<b>West:</b>	Depicted as developed with the Lever Bros Pilot Plant warehouse, built in 1952, and a warehouse
<b>Northwest:</b>	No significant changes noted

Copies of reviewed FIMs are included in Appendix B of this report.

### 3.3 City Directories

Partner reviewed historical city directories obtained from ERIS on April 14, 2022, for past names and businesses that were listed for the subject property and adjoining properties. The findings are tabulated below:

#### *City Directory Search for 8 Somerset Lane/45 River Road (Subject Property)*

<b>Year(s)</b>	<b>Occupant Listed</b>
1971	Industrial listing; Lever Bros Research & Development Div. (45 River Road)
1976	No listings
1977	No listings
1981	Industrial listing; Lever Bros Soaps & Shortenings Resch & Development (45 River Road)
1986	Industrial listings; Lever Esrch Inc, Lever Bros Co Packaging Machine, Lever Bros Co Perfume Manufacturing, Lever Bros Co Research & Dev Ctr (45 River Road)
1991	Industrial listings; Edgewater Test Cir Sensory Evaluation Lab, Edgewater Test Ctr Sensory Evaluation, Lever Bros Co, Lever Brothers Expansion Ctr Pilot Plant, Lever Research Inc, Schmidhamer Max Industrial & Mechanical, Unilever Research U S Inc Packaging Machinery, Development, Unilever Research U S Inc Perfume Manufacturing, Unilever Research Us Inc (45 River Road)
1996	Industrial listings; Edgewater Test Ctr Sensory Evelator, Edgewater Test Ctr Sensory Evelator Lab, Lever Bros Co, Lever Research Inc, Unilever Research Us Inc, Unilever Research Us Inc Perfume Manufacturing (45 River Road)
2000	Industrial listings; Unilever Research, Unilever Research Info Svc, Lever Brothers Metro FCU (45 River Road)
2003	Industrial listings; Unilever Research, Lever Brothers Metro FCU (45 River Road)
2008	Industrial and commercial listings; Association Corp Pat Counsel, Lever Brothers Metro FCU, Unilever Metro Federal Cr Un (45 River Road)
2012	Industrial and commercial listings; Bergen Engineering Co, Lever Research Inc, Peoples First Choice FCU (45 River Road)
2016	Industrial, residential, and commercial listings; 1 Main St Edgewater LLC, Brian Buccio, Edgewater Lofts LLC, Edgewater Tutti Nails & Spa, Five Guys Burgers & Fries, Great Clips, Home Goods, John Wadibia, Lever Brothers Metro FCU, Lever Research Inc, Michael Sanford, National Resources, NJ Wax 2 LLC, One Main Street LLC, Peoples First Choice FCU, Scott Mc Govern, View at Edgewater (45 River Road)
2020	Commercial and residential listings; 1 Main St Edgewater LLC, Brian Buccu, Edgewater Lofts

## 4.0 REGULATORY RECORDS REVIEW

---

### 4.1 Regulatory Agencies

#### 4.1.1 State Department

##### *Regulatory Agency Data*

<b>Name of Agency:</b>	New Jersey Department of Environmental Protection (NJDEP)
<b>Point of Contact:</b>	Matthew J. Coefer and Keith Harley
<b>Agency Address:</b>	401 East State Street, PO Box 420, Mail Code 401-06Q Trenton, New Jersey 08625
<b>Agency Phone Number:</b>	(609) 341-3121
<b>Date of Contact:</b>	April 25, 2022 and May 3, 2022
<b>Method of Communication:</b>	Email
<b>Summary of Communication:</b>	

Partner submitted an initial request citing the subject property parcels with address 8 Somerset Lane and noted the address of the former Unilever facility, 45 River Road. A response was received provided the following documents:

- The subject property (addressed as 45 River Road) was issued several violations with the Bureau of Coastal and Land Use Compliance and Enforcement in 2015 and 2017. In 2016, a permit was issued by the Site Remediation Program for the remediation of offshore sediments through environmental dredging related to the former industrial facility.
- A Grant of Conservation Restriction was issued to i.Park Edgewater LLC on February 12, 2014.
- The NJDEP Division of Land Use Regulation issued a permit citing the subject property and adjoining properties authorizing the expansion of an existing police station, conversion of two existing vacant laboratory buildings into residential lofts, construction of a new stormwater system, and the construction of Phase II Redevelopment which included the construction of 10 mixed-use buildings, parking garages, parking lot areas, the renovation of an existing building, the Hudson River Waterfront Walkway, a 10-foot-wide perpendicular access to the walkway, 700 linear feet of rip-rap stabilization, three stormwater outfall systems, and related stormwater facilities/amenities (Unilever Site Redevelopment).

A file review was conducted at the NJDEP offices on May 3, 2022 and documents available included several NJPDES/Discharge to Surface Water General Remediation Cleanup (BGR) permits and a Groundwater Characterization Report associated with NJPDES Permit No. NJG0168840 and NJG002143 and a Water Quality Program Compliance Evaluation and Assistance Inspection related to the Unilever Research & Development facility. The information was found to be limited and did not provide a current environmental status for the open NJDEP case.

A review of the online DataMiner website for the Unilever Research & Development Inc facility (PI No. 015891) identified listings as follows:

- Unilever Research & Development Inc. – Active status – ISRA Case No. E20030062 and Case No. 10-07-29-1548-59 with an assigned to program date of March 2003; case manager listed as

#### **Regulatory Agency Data**

Arturo Romua. Partner reached out to Mr. Romua who confirmed ongoing remedial work. Partner requested a current status on any remedial action permits and/or closure and a response is pending. A supplemental Remedial Funding Source listing for ISRA Case No. E20030062 was noted.

- Unilever Research & Development Inc. – Withdrawn status – Remedial Action Permit Set – no other details provided
- Unilever Research & Development Inc. – Terminated status – UST Registration – no other details provided

#### **4.1.2 Health Department**

##### **Regulatory Agency Data**

**Name of Agency:** Bergen County Department of Health Services (BCDOHS)  
**Point of Contact:** Winnie Asa-Awuku  
**Agency Address:** 1 Bergen County Plaza, Hackensack, NJ 07601  
**Agency Phone Number:** (201) 634-2600  
**Date of Contact:** April 10, 2022  
**Method of Communication:** Online Request Portal  
**Summary of Communication:**

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the BCDOHS.

#### **4.1.3 Fire Department**

##### **Regulatory Agency Data**

**Name of Agency:** Edgewater Fire Department/Fire Prevention Bureau (EFD/EFPR)  
**Point of Contact:** Nikki D'Anna  
**Agency Address:** 838 River Road, Edgewater, New Jersey 07020  
**Agency Phone Number:** (201) 943-1700, ext. 4117  
**Date of Contact:** April 22, 2022  
**Method of Communication:** Online Request form  
**Summary of Communication:**

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the EFD/EFPR.

#### **4.1.4 Building Department**

##### **Regulatory Agency Data**

**Name of Agency:** Edgewater Building Department (EBD)  
**Point of Contact:** Nikki D'Anna  
**Agency Address:** 55 River Road, 2nd Floor, Room 223, Edgewater, New Jersey 07020  
**Agency Phone Number:** (201) 943-1700  
**Date of Contact:** April 20, 2022  
**Method of Communication:** Online Request Form  
**Summary of Communication:**

Records were available for review, as further discussed in the following table.

### **Building Records Reviewed for 45 River Road (Subject Property)**

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description</b>
1994	Unilever Research	Construction permit for the demolition of a UST
1996	Conopco, Inc. D/B/A Unilever	Construction permit to contain sewerage treatment holding tanks and equipment
1997	Unilever Research	Construction permit for the installation of one 1,500-gallon AST
1997	Unilever Research	Construction permit for the demolition of one 250,000-gallon AST

\*\*Partner notes that the available permits were issued for the former 45 River Road industrial facility and based on block and lot designations do not include our subject property parcels Block 99, Lots 1.13 and 1.19.

#### **4.1.5 Planning Department**

##### **Regulatory Agency Data**

**Name of Agency:** Edgewater Building Department (EBD)  
**Point of Contact:** Zoning Map  
**Agency Address:** 55 River Road, 2nd Floor, Room 223, Edgewater, New Jersey 07020  
**Agency Phone Number:** (201) 943-1700  
**Date of Contact:** April 21, 2022  
**Method of Communication:** Zoning Map  
**Summary of Communication:**

According to records reviewed, the subject property is zoned SWR (Southern Waterfront Redevelopment) for redevelopment by the Borough of Edgewater.

#### **4.1.6 Oil & Gas Exploration**

##### **Regulatory Agency Data**

**Name of Agency:** New Jersey Division of Water Supply and Geoscience (NJDWSG)  
**Point of Contact:** Online Map  
**Agency Address:** P.O. Box 420, Trenton, New Jersey 08625  
**Agency Phone Number:** (609) 292-1185  
**Date of Contact:** April 14, 2022  
**Method of Communication:** Online Map  
**Summary of Communication:**

According to NJDWSG, no oil or gas wells are located on or adjoining to the subject property.

#### **4.1.7 Assessor's Office**

##### **Regulatory Agency Data**

**Name of Agency:** Bergen County Assessor  
**Point of Contact:** Online Research  
**Date of Contact:** April 21, 2022  
**Method of Communication:** Online Research  
**Summary of Communication:**

According to records reviewed, the subject property is identified by Block 99 Lots 1.13 and 1.19 currently owned by 45 River Road Urban Renewal Associates, LLC since 2020. The current building was

### Regulatory Agency Data

constructed in 2021 and total(s) approximately 70,000 square feet on a 0.6-acre lot.

#### 4.1.8 Public Works Department

### Regulatory Agency Data

**Name of Agency:** Edgewater Public Works & Recycling Department (EPWRD)

**Point of Contact:** TBD

**Agency Address:** 540 River Road, Edgewater, New Jersey 07020

**Agency Phone Number:** (201) 943-1700

**Date of Contact:** TBD

**Method of Communication:** Online Request Form

**Summary of Communication:**

As of the date of this report, Partner has not received a response from the EPWRD for inclusion in this report.

Copies of pertinent documents from the above referenced regulatory agencies are included in Appendix B of this report.

#### 4.2 Mapped Database Records Search

The regulatory database report provided by Environmental Risk Information Services (ERIS) documents the listing of sites identified on federal, state, county, city, and tribal (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM E1527-13 and E1527-21. The data from these sources are updated as these data are released and integrated into one database. The information contained in this report was compiled from publicly available sources.

The environmental database information is used to identify environmental concerns in connection with the subject property. The listings also serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the subject property and the potential for contaminants to migrate onto the subject property from off-site sources in groundwater or soil in the form of liquids or vapor.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

##### 4.2.1 Regulatory Database Summary

The following table lists the number of sites as categorized by the regulatory database within the prescribed AMSD. The locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

### Radius Report Data

Database	AMSD Radius (mile)	Listings Identified		Surrounding Area Sites of Concern
		Subject Property	Adjoining Properties	

## Radius Report Data

Database	AMSD Radius (mile)	Listings Identified		Surrounding Area Sites of Concern
		Subject Property	Adjoining Properties	
Federal NPL	1.00	N	N	N
Delisted NPL Site	0.50	N	N	N
Federal SEMS Site	0.50	N	N	N
Federal SEMS-ARCHIVE	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSD Facility	0.50	Y	Y	N
Federal RCRA Generators Site (LQG, SQG, VSQG, CESQG)	Subject and Adjoining	Y	Y	N/A
Federal IC/EC Registries	Subject Property	N	N/A	N/A
Federal ERNS Site	Subject Property	N	N/A	N/A
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST/LPST)	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	Subject and Adjoining	Y	Y	N/A
State/Tribal IC/EC Registries	Subject and Adjoining	N	N	N/A
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	Y	Y	N
State/Tribal Spills	0.125	Y	Y	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	Y	Y	N
ALL SITES	Varies	Y	Y	N
NJEMS	Varies	Y	Y	N

### 4.2.2 Subject Property Listings

The subject property address, 8 Somerset Lane, was not identified in the regulatory database report. However, the subject property was historically part of a larger industrial facility with an address of 45 River Road, which was identified as an Underground Storage Tank (UST), Known Contaminated Sites in New Jersey (SHWS), Historic Incidents (HIS SPILL), Delisted Known Contaminated Sites (DSHW), SEMS List 8R Archive Sites (SEMS ARCHIVE), Brownfields (BROWNFIELDS), Resource Conservation and Recovery Act Corrective Action (RCRA CORRACTS), RCRA non-CORRACTS TSD Facilities (RCRA TSD), RCRA Large Quantity Generators (RCRA-LQG), Major Facilities (MAJOR FAC), Voluntary Cleanup Program (VCP), Data Miner Sites (ALL SITES), and New Jersey Environmental Management System (NJEMS) site in the regulatory database report, as discussed below:

- The subject property historically operated as the Bulls Ferry Chemical Co. for the manufacturing of cotton and silk from as early as 1911 to *circa* 1922; and also operated as Lever Bros Pilot Plant and

research labs, built in 1952. According to historical resources, this facility, as well as Unilever Research and Development Inc., occupied the subject property until 2006. This former industrial facility also included the north/northeast, east, and west-adjointing properties (addressed as 45 River Road) and manufactured edible oils, soaps, and detergents, etc. The facility was historically equipped with an UST; however, no information regarding the tank capacity or contents was included in the database report. Building department records identified a construction permit for the demolition/removal of an UST in 1994. Unilever Research and Development was cited as a Large Quantity Generator of ignitable/corrosive/reactive wastes, arsenic, barium, chromium, lead, mercury, selenium, silver, carbon tetrachloride, chloroform, various spent halogenated solvents including, but not limited to, tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane, and 1,1,2, trichloroethane, various spent nonhalogenated solvents including but not limited to xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, methanol, and various other compounds/solvents from 1980 to 2007. The facility was issued several violations due to generator and compliance issues. Unilever Research US was also identified in the Solid Waste Program as a Solid Waste Facility, Air Program, Water Quality Program for NJPDES, and Lab Certification Program as an environmental lab.

I.Park Edgewater LLC was cited as a Large Quantity Generator in 2008 and also referenced in the Land Use Program for Coastal Land Use, in the Hazardous Waste Program for hazardous waste generation, and in the Water Quality Program for New Jersey Pollutant Discharge System (NJPDES) permitting related to redevelopment activities.

Multiple spills/release incidents have been reported, as listed below:

- A release of an unknown amount of fuel oil #6 reported on November 21, 1989 at the Unilever Research facility (Case Number 89-11-21-1552). No additional information was provided regarding this incident.
- A release reported on April 23, 1992, after a painter spilled a can of water-based paint, which entered the storm drain running into the Hudson River (Case Number 92-4-23-1301-13). Cleanup was conducted.
- On October 9, 1992, an oil sheen was observed on the Hudson River in the area of the Unilever Research facility (Case Number 92-10-9-1022-48). No additional information was provided regarding this incident.
- A release of fuel oil due to sloppy housekeeping was reported on December 31, 1992, at the Lever Bros Co site (Case Number 92-12-31-0842-50). No cleanup was completed at that time. There is no additional information provided regarding this incident.
- A sloppy housekeeping incident was reported on October 27, 1995, during the restoration of old barges south of the Unilever site. The materials, including solid waste,

construction debris, and tree parts, were reportedly not contained, and were impacting the land in a sloppy containment issue (Case Number 95-10-27-1556-34).

- On September 30, 1996, the facility was pressure testing a two-inch pipeline and a leak was discovered (Case Number 96-9-30-1520-11). Approximately 3-5 gallons of hydraulic oil was released. Cleanup was completed by Raimondo Bros. The site was assigned to the Voluntary Cleanup Program (VCP) following this incident, with a Memorandum of Agreement (MOA) execution date of August 1, 2001, between Unilever Research and Conopco Incorporated (PI Number 572153). Conopco Inc was identified in the Right-to-Know Program for pollution prevention.
- On October 21, 1996, an NJPDES permit violation was filed after a 77 ppm total petroleum hydrocarbons (TPH) exceedance was reported (Case Number 96-10-21-1604-39).
- On October 1, 1997, an oil sheen on the Hudson River was observed coming from a seepage site at low tide (97-10-1-1453-13). No cleanup was completed regarding this incident.
- On October 29, 1999, a release was reported after an individual absorbed 15 microcuries of carbon 14 from the site. The individual was reportedly taken to the hospital (Case Number 99-10-29-1728-06).
- On September 10, 2006, the Unilever facility reported a problem with the wastewater pre-treatment equipment caused a bypass of wastewater (Case Number 04-10-06-1154-05). There is no additional information provided regarding this incident.
- On March 10, 2010, soil contamination was reported onsite after a soil test (Case Number 10-07-29-1548-59).
- A wetlands/stream encroachment incident was reported on November 14, 2016, after the property owner placed signs that restrict nighttime access to the walkway (Case Number 16-11-14-1041-08).
- Spill/release events on file regarding snow disposal into the Hudson River (Case Numbers 15-01-26-1248-20, 16-01-25-1556-37, 16-01-24-0732-37, 16-01-22-1549-11, 17-03-13-1006-41).

The former 45 River Road industrial facility (which includes the subject property) is currently active with the New Jersey Department of Environmental Protection (NJDEP) Site Remediation and Brownfield Programs under Program Interest (PI) Number 015891 since March 2003. A multi-phased Remediation Agreement (RA) for soil and groundwater was established on August 26, 2003. The site is also identified as a New Jersey Industrial Site Recovery Act (ISRA) site since July 2003, under Case Number E20030062. According to available information from the online DataMiner website, various remedial investigation, remedial action, and associated workplans have been completed.

Partner was provided with a copy of the recorded Deed Notice for the 45 River Road property. The document indicated that i.Park Edgewater, LLC had conducted remediation of contaminated soils with NJDEP approval issued on July 9, 2012, allowing for residual impacts to remain onsite which would not allow for the unrestricted use of the property. As a result, a statutory requirement for institutional and engineering controls was established in order to protect public health and safety and the environment. Institutional controls are in place to limit potential exposure to the soils in the restricted areas and include zoning of the site and recording of a deed notice (filed in August 2013). Engineering controls consist of building foundations, asphalt, concrete, and vegetative caps which eliminate the potential for direct contact with contaminants. The caps function as a barrier to keep contaminated soil from spreading and resurfacing due to site activities or soil erosion. Prior to redevelopment, subsurface areas were excavated to remove pitch impacting groundwater and arsenic-impacted soils over 600 parts per million (ppm). Although a Deed Notice was filed and recorded with the County in 2013 which identified subject property parcel Lot 1.13, the Remedial Action Permit status is noted as withdrawn according to the DataMiner website.

The subject property was redeveloped with current apartment building in December 2021. The inclusion of the subject property within the former Unilever Research & Development facility with an open NJDEP case represents a REC to the subject property.

#### **4.2.3 Adjoining Property Listings**

The adjoining property to the west is identified as an ALL SITES and NJEMS site in the regulatory database report, as discussed below:

- Courtyard by Marriott is located adjoining to the west of the subject property and identified as an ALL SITES and NJEMS site related to its presence in the Water Supply Program for physical connection. These listings are presumably associated with redevelopment/construction with the hotel facility.

Based on the nature of the permitting, these listings are not expected to represent a significant environmental concern to the subject property.

The adjoining property to the east is identified as a SPILLS site in the regulatory database report, as discussed below:

- The residential condominium building addressed as 9 Somerset Lane is located adjoining to the east of the subject property. On March 2, 2018, a caller reported odors of tar fumes causing dry red eyes and vision issues from the nearby Quanta Superfund site (Case Number 18-03-02-1748-29). On June 6, 2018, another caller reported a very strong oil odor in the area. The caller suspected the odors were coming from contaminated soil piles from a demolition/remediation site (Case Number 18-06-06-1815-21). Lastly, a caller reported strong toxic odors in the area of their residence on March 27, 2018, coming from the nearby Quanta Superfund site (Case Number 18-03-27-1902-01).

Based on the nature of the SPILLS incidents and closed/inactive status, redevelopment activities, and the relative distance of the former Quanta Superfund site from the subject property, these listings are not expected to represent a significant environmental concern to the subject property.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

#### ***4.2.4 Surrounding Area Listings of Concern to Subject Property***

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

#### ***4.2.5 Unplottable Listings***

No unplottable listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

## 5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13 and E1527-21, Partner requested the following site information.

<b>User Responsibilities</b>		
<b>Item</b>	<b>Provided By User</b>	<b>Not Provided By User</b>
AAI User Questionnaire	X	
Title Records, Environmental Liens, and AULs		X
Specialized Knowledge	X	
Actual Knowledge	X	
Valuation Reduction for Environmental Issues	X	
Identification of Key Site Manager	X	
Reason for Performing Phase I ESA	X	
Prior Environmental Reports	X	

### 5.1 Interviews

#### 5.1.1 Interview with Owner

A representative of the subject property owner entity since 2020, identified as 45 River Road Urban Renewal Associates, LLC, was not available to be interviewed at the time of the assessment.

#### 5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would

significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

### **5.1.3 Interview with Key Site Manager**

Ms. Rania Fragoso, property manager, indicated that she had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Ms. Fragoso, the subject property was developed in 2021 for residential use and purchased from a large commercial and residential development project known as the i.Park Edgewater, LLC. Ms. Fragoso was unaware of the previous use(s) of the subject property. Ms. Fragoso further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of her knowledge.

### **5.1.4 Interviews with Past Owners, Operators, and Occupants**

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

## **5.2 User Provided Information**

### **5.2.1 Title Records, Environmental Liens, and AULs**

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

### **5.2.2 Specialized Knowledge**

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

### **5.2.3 Actual Knowledge of the User**

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

### **5.2.4 Valuation Reduction for Environmental Issues**

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

### **5.2.5 Commonly Known or Reasonably Ascertainable Information**

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

## **5.2.6 Previous Reports and Other Provided Documentation**

The following information was provided to Partner for review during the course of this assessment:

### Deed Notice, GZA GeoEnvironmental, Inc. (December 6, 2012)

Partner was provided with a copy of the recorded Deed Notice for the property identified as 45 River Road under ISRA Case #E20030062 and #E20040267. GZA GeoEnvironmental Inc. prepared the deed notice on behalf of i.Park Edgewater, LLC, and Edgewater Lofts LLC.

According to the deed notice, the River Road property consists of Blocks 98, 99, and 100 and Lots 1.11, 1.13, 1.14, and 1.15, situated across 5.218 acres. The document identified i.Park Edgewater, LLC as the responsible party for the remediation of contaminated soil at the property, with NJDEP approval of remedial action on July 9, 2012, citing soil contamination remaining onsite in certain areas with contaminants in concentrations that do not allow for the unrestricted use of the property. As a result, a statutory requirement for the deed notice and engineering controls was established in order to protect public health and safety and the environment.

Since the site has contaminants above the residential and non-residential direct contact soil cleanup criteria, institutional and engineering controls have been established. Institutional controls consist of the zoning of the site and the recording of the deed notice. Institutional controls are in place to limit potential exposure to the soils in the restricted area. The deed notice acts as an institutional control by placing use restrictions at the site and limiting disturbance onsite. Engineering controls consist of building foundations, asphalt, concrete, and vegetative caps and eliminating the potential for direct contact with contaminants. The caps function as a barrier to keep contaminated soil from spreading and resurfacing due to site activities or soil erosion. Prior to redevelopment, areas were excavated to remove pitch impacting groundwater and arsenic-impacted soils over 600 ppm. Areas that were excavated were reportedly backfilled with clean fill.

### Remedial Action Report Approval – RAA's 1, 2 and 5, NJDEP Letter (June 19, 2017)

NJDEP issued a Remedial Action Report Approval letter to Mr. Joseph Cotter of i.Park Edgewater regarding the Unilever Research & Redevelopment area. The NJDEP completed a review of the Remedial Action Report (RAR) for Remedial Action Areas 1, 2 and 5 (dated August 2012) and Technical Memo (dated February 23, 2017). NJDEP found that the reviewed documents were in compliance with the Technical Requirements for Site Remediation and other applicable requirements. Soil excavation was conducted for RAAs 1, 2, and 5 with vapor barriers and passive venting systems planned for all new building construction. A final soil cap was installed and institutional controls consisting of a deed notice and Remedial Action Permit were established.

The letter indicated that final documentation of groundwater remedial actions including the establishment of a CEA and an application for a Remedial Action Permit for groundwater for the entire site will be included with the RAR to be submitted for RAA 4.

\*\* Partner notes that the Remedial Action Permit listing for PI No. 015891 is noted with a withdrawn status according to the online DataMiner website.

Phase I Environmental Site Assessment, Horizon Environmental & Contracting, Inc. (July 14, 2021)

Horizon Environmental & Contracting, Inc. (Horizon) prepared this report on behalf of Spencer Savings Bank. The assessment was reportedly performed in accordance with ASTM Standard E1527-13. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, a review of federal, state, and local regulatory databases. Pertinent information contained in this report is summarized below:

- At the time of the 2021 assessment, the subject property was occupied by a 76-unit residential apartment building under construction.
- No evidence of ASTs or USTs were observed during the 2021 site reconnaissance.
- According to Horizon, the subject property was formerly occupied by a combination of residential and commercial development from 1954 until 2006 with Fire Insurance Maps noting the use of Lever Bros Pilot Plant in 1968.
- Horizon did not identify any RECs or BERs during onsite reconnaissance, the review of regulatory records, or historical sources.

Horizon identified no RECs and recommended no further investigation.

Copies of pertinent pages reviewed are included in Appendix B of this report.

## 6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

### *Site Assessment Data*

**Site Assessment Performed By:** Bridget Connolly  
**Site Assessment Conducted On:** April 13, 2022

The table below provides the subject property personnel interviewed during the field reconnaissance:

### *Site Visit Personnel for 8 Somerset Lane (Subject Property)*

<b>Name</b>	<b>Title/Role</b>	<b>Contact Number</b>	<b>Site Walk* Yes/No</b>
Rania Fragoso	Property Manager	(201) 840-0050	No
Najwa DeMartino	Assistant Property Manager	Unknown	Yes

\* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No environmental concerns were identified during the onsite reconnaissance.

### **6.1 General Site Characteristics**

#### **6.1.1 Solid Waste Disposal**

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the west side of the subject property. An independent solid waste disposal contractor, Waste Management, removes solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

#### **6.1.2 Sewage Discharge and Disposal**

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The Borough of Edgewater services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

No septic systems were observed on the subject property during the Partner site reconnaissance.

#### **6.1.3 Stormwater and Surface Water Drainage**

Stormwater is removed from the subject property primarily by sheet flow action across the paved surfaces towards stormwater drains located throughout the subject property and in the public right-of-way. Site stormwater drains from roofs, landscaped areas, and paved areas and is directed to the onsite stormwater drains located throughout the property and in the public right-of-way. On-site stormwater drains discharge to a municipal-owned and maintained storm sewer system.

#### **6.1.4 Source of Heating and Cooling**

Heating and cooling systems as well as domestic hot water equipment are fueled by natural gas electricity provided by Public Service Electric and Gas (PSE&G). The mechanical system is comprised of a rooftop unit and individual packaged terminal air conditioner (PTAC) units which provide heating and cooling located in the apartments. Hot water is provided by three central natural gas water heaters.

#### **6.1.5 Wells and Cisterns**

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

#### **6.1.6 Wastewater**

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

#### **6.1.7 Septic Systems**

No septic systems were observed or reported on the subject property.

#### **6.1.8 Additional Site Observations**

No additional general site characteristics were observed during the site reconnaissance.

### **6.2 Potential Environmental Hazards**

#### **6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Subject Property**

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

#### **6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)**

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

#### **6.2.3 Evidence of Releases**

No spills, stains, or other indications that a surficial release has occurred at the subject property were observed.

#### **6.2.4 Polychlorinated Biphenyls (PCBs)-Containing Items**

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The

manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The on-site reconnaissance included observations of indoor and outdoor transformers and other hydraulic equipment that may contain PCBs as tabulated below:

<b>Transformers and Hydraulic Equipment</b>				
<b>Type of Equipment</b>	<b>Location</b>	<b>Number</b>	<b>PCB Containing</b>	<b>Concern</b>
<b>Pad-Mounted Transformers</b>	North Side of Building	One	N	N
<b>Trash Compactor</b>	Maintenance Area	One	Unlikely	N

The transformer is labeled indicating non-PCB content. No staining or leakage was observed in the vicinity of the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

Partner observed one hydraulic trash compactor located on the subject property. No stains, leaks, or releases were observed in the vicinity of the compactor equipment. Based on the good condition of the equipment, and age of the subject property building, the compactor is not expected to represent a significant environmental concern.

The apartment building is serviced by two traction elevators. Based on the non-PCB nature and installation during construction in 2021, the presence of these elevators is not expected to represent a significant environmental concern.

#### **6.2.5 Strong, Pungent, or Noxious Odors**

No strong, pungent, or noxious odors were evident during the site reconnaissance.

#### **6.2.6 Pools of Liquid**

No pools of liquid were observed on the subject property during the site reconnaissance.

#### **6.2.7 Drains, Sumps, and Clarifiers**

No drains, sumps, or clarifiers, other than those associated with stormwater removal, were observed on the subject property during the site reconnaissance.

#### **6.2.8 Pits, Ponds, and Lagoons**

No pits, ponds or lagoons were observed on the subject property.

#### **6.2.9 Stressed Vegetation**

No stressed vegetation was observed on the subject property.

#### **6.2.10 Additional Potential Environmental Hazards**

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

## 6.3 Non-Scope ASTM Considerations

### 6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building was constructed in 2021. As such, only a visual asbestos evaluation was conducted.

### 6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm<sup>2</sup> (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property building, it is unlikely that LBP is present.

### 6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

<b>EPA Radon Zones</b>		
<b>EPA Zones</b>	<b>Average Predicted Radon Levels</b>	<b>Potential</b>
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

#### **6.3.4 Lead in Drinking Water**

According to available information, a public water system operated by SUEZ serves the subject property vicinity. The sources of public water for Bergen and Hudson counties are from four reservoirs – the Oradell, Woodcliff Lake, and Lake Tappan reservoirs in Bergen County, New Jersey, and Lake DeForest in Rockland County, New York. According to the SUEZ 2020 Annual Drinking Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

#### **6.3.5 Mold**

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g., in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

#### **6.3.6 Wetlands**

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property.

### **6.4 Adjoining Property Reconnaissance**

No items of environmental concern were identified on the adjoining properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

## 7.0 VAPOR ENCROACHMENT CONDITIONS

Partner conducted a limited non-intrusive vapor screening on the subject property to identify, to the extent feasible, the potential for vapor encroachment conditions (VECs) in connection with the subject property. This included consideration of chemicals of concern (COC) that may migrate as vapors into the subsurface of the subject property as a result of contaminated soil and groundwater on or near the property.

This screening utilized readily available data sources previously discussed in this Phase I ESA that includes:

- the physical setting of the subject property (Section 2.4),
- standard historical sources for the subject property, adjoining, and surrounding area (Section 3.0),
- known or potentially contaminated sites as identified from information from regulatory agencies and sites on Federal, State, tribal and local databases (Section 4.0), and
- information from the site reconnaissance (Section 6.0) of the subject property and observations of the surrounding properties.

The results of our data collection, reconnaissance, and analysis are tabulated below:

<i>Potential for Vapor Encroachment to Impact the Subject Property</i>	
<b>Area of Concern</b>	<b>Likely or Known VEC to Subject Property</b>
Subject Property Existing Operations or Conditions	None identified that impact the subject property.
Historical Uses of the Subject Property	Refer to Section 3.0 Historical Use and discussion below.
Adjoining Property Operations or Existing Conditions	None identified that impact the subject property.
Historical Uses of Adjoining Properties or Nearby Properties	Refer to Section 3.0 Historical Use and discussion below.
Regulatory Review of sites identified on Federal, State, tribal and Local Environmental Databases which were located in the AMSD	Refer to Section 4.0 Regulatory Review and discussion below.

The inclusion of the subject property within the former Unilever Research & Development facility with an open NJDEP case represents a REC to the subject property. The institutional and engineering controls are anticipated to eliminate and/or reduce any potential VEC. Partner recommends continued implementation of the property use restrictions established by the institutional and engineering controls, as well as allowance for access to the subject property by the responsible party (or their assigned representatives) for investigative or remedial activities.

## 8.0 FINDINGS AND CONCLUSIONS

---

### Findings and Opinions

A *recognized environmental condition (REC)* refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- The subject property historically operated as the Bulls Ferry Chemical Co. for the manufacturing of cotton and silk from as early as 1911 to *circa* 1922; and also operated as Lever Bros Pilot Plant and research labs, built in 1952. According to historical resources, this facility, as well as Unilever Research and Development Inc., occupied the subject property until 2006. This former industrial facility also included the north/northeast, east, and west-adjointing properties (formerly addressed as 45 River Road) and manufactured edible oils, soaps, and detergents, etc.

The former 45 River Road industrial facility (which includes the subject property) is currently active with the New Jersey Department of Environmental Protection (NJDEP) Site Remediation and Brownfield Programs under Program Interest (PI) Number 015891 since March 2003. A multi-phased Remediation Agreement (RA) for soil and groundwater was established on August 26, 2003. The site is also identified as a New Jersey Industrial Site Recovery Act (ISRA) site under Case Numbers E20030062 and E20040267. Partner was provided with a copy of a recorded Deed Notice for the 45 River Road property, dated December 2012, and filed with the County in August 2013 which indicated that i.Park Edgewater, LLC had conducted remediation of contaminated soils with NJDEP approval, allowing for residual impacts to remain onsite. As a result, a statutory requirement for institutional and engineering controls was established in order to protect public health and safety and the environment. Institutional controls are reportedly in place to limit potential exposure to the soils in the restricted areas. Engineering controls consist of building foundations, asphalt, concrete, and vegetative caps which limit the potential for direct contact with contaminants. Prior to redevelopment, arsenic-impacted soils over 600 parts per million (ppm) were reportedly excavated. Although the Deed Notice was filed and recorded with the County in 2013 which identified subject property parcel Lot 1.13, the Remedial Action Permit status is noted as withdrawn according to the DataMiner website.

Partner contacted the NJDEP Case Manager who indicated remedial work for the former Unilever property is ongoing. Additional clarification on the status of any Remedial Action Permits and proposed conditional closure were requested by Partner and a response is pending. The subject property was redeveloped with current apartment building in December 2021. The inclusion of the subject property within the former Unilever Research & Development facility with an open NJDEP case represents a REC to the subject property.

### ***Controlled Recognized Environmental Condition***

A *controlled recognized environmental condition (CREC)* refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any CRECs during the course of this assessment.

### ***Historical Recognized Environmental Condition***

A *historical recognized environmental condition (HREC)* refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any HRECs during the course of this assessment.

### ***Business Environmental Risk***

A *Business Environmental Risks (BER)* is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.

- Partner did not identify any BERs during the course of this assessment.

### ***Significant Data Gaps***

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

### **Conclusions and Recommendations**

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 and E1527-21 of 8 Somerset Lane in Edgewater, Bergen County, New Jersey (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of a REC in connection with the subject property. Based on the conclusions of this assessment, Partner recommends continued implementation of the property use restrictions established by the institutional and engineering controls, as well as allowance for access to the subject property by the responsible party (or their assigned representatives) for investigative or remedial activities.

## 9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

---

Partner has performed a Phase I Environmental Site Assessment of the property located at 8 Somerset Lane in Edgewater, Bergen County, New Jersey in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

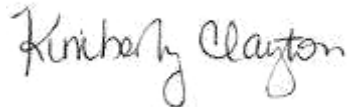

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

RE: CITY DIRECTORY RESEARCH  
8 Somerset Lane  
EDGEWATER, NJ 07020

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

**Search Criteria:**

ALL of Pembroke Pl  
1-100 of River Rd  
ALL of Somerset Ln

**Search Notes:**

## CONSUMER CONFIDENCE REPORT

SUEZ Water New Jersey Operations PWSID # NJ0238001

**2020 ANNUAL DRINKING WATER QUALITY Report** - Issued May 2021

### INTRODUCTION

Providing clean, safe drinking water to you is our top priority. That's why we're pleased to present your annual Consumer Confidence Report (CCR) that details the results of the most recent water quality tests performed on your drinking water through the end of 2020. If at any time you have questions about your water quality or delivery, please call us at **800.422.5987**. We want you to be informed about your water supply. **This system is reporting under PWSID # NJ0238001.**

### WHERE DOES OUR WATER SUPPLY COME FROM?

Our customers in portions of Bergen and Hudson counties receive their water primarily from four reservoirs – the Oradell, Woodcliff Lake, and Lake Tappan reservoirs in Bergen County, New Jersey, and Lake DeForest in Rockland County, New York. Lake DeForest and Lake Tappan reservoirs are located on the upper or freshwater portion of the Hackensack River. Woodcliff Lake reservoir is located on the Pascack Brook, while the Oradell reservoir is fed by both the Hackensack River and the Pascack Brook. Together they hold about 14 billion gallons of water and cover nearly 6,000 acres. Water from these surface supplies is treated to meet safe drinking water standards at the Haworth Water Treatment Plant. We also operate wells in Upper Saddle River, which supplement our supply.

In addition, we are partners with the North Jersey District Water Supply Commission in the Wanaque South Project. This is a regional network of pipelines, pumping stations and reservoirs that can provide up to 60 million gallons of water per day to our customers. From time to time, you may receive water from sources through interconnections with other water suppliers including the Boonton, Wanaque and Monksville reservoirs. Through these pipelines we are able to supplement water supplies to meet customer needs. You may also receive treated water from the City of Jersey City, SUEZ New York operations, the Park Ridge Water Department, the Passaic Valley Water Commission or the Ridgewood Water Department. The water quality for the sources used in 2020 is provided in this report.

### ABOUT THE TREATMENT PROCESS

At SUEZ, our goal is to provide you with drinking water that meets or surpasses all federal and state standards. Our water treatment plant in Haworth, New Jersey, uses ozone, a form of oxygen, to purify your water and high-rate dissolved air flotation (DAF) for sedimentation clarification. State-of-the-art DAF technology facilitates improved water quality, enhanced service reliability, reduced chemical and energy usage, and the protection of sensitive ecosystems. A corrosion inhibitor is added at the plant to reduce the possibility of lead and copper dissolving into the water of household plumbing. Water treated at the plant is also filtered and contains a small amount of chloramine — a combination of chlorine and ammonia — to help ensure the safety of your water. The water you receive from wells or interconnections with other water suppliers is purified with chlorine. To further ensure the safety of your water, we monitor it before, during and after the treatment process. For example, we routinely test the water at the rivers, lakes, streams and wells that supply drinking water. We also sample and test treated water directly from the distribution system in each community we serve. As you can see, we are committed to providing you with top quality water.

### SOURCE WATER ASSESSMENT PROGRAM

Under the Federal Safe Drinking Water Act, all states were required to establish a Source Water Assessment Program (SWAP). New Jersey's SWAP Plan incorporates the following four fundamental steps:

1. Determine the source water assessment area of each ground and surface water source of public drinking water.
2. Inventory the potential contamination sources within the source water assessment area.
3. Determine the public water system source's susceptibility to regulated contaminants. It is important to note, if a drinking water source's susceptibility is high, it does not necessarily mean the drinking water is contaminated. The rating reflects the potential for contamination of source water, not the existence of contamination.
4. Incorporate public education and participation.

In 2004, source water assessment reports were completed by NJDEP for all Community and Noncommunity Water Systems in New Jersey. The source water assessment reports and supporting documentation are available at <http://www.state.nj.us/dep/swap/index.html> or by contacting the NJDEP's Bureau of Safe Drinking Water at **609.292.5550** or [watersupply@dep.nj.gov](mailto:watersupply@dep.nj.gov).

## SUSCEPTIBILITY RATINGS FOR SUEZ WATER NEW JERSEY HACKENSACK SOURCES

The table below illustrates the susceptibility ratings for the seven contaminant categories (and radon) for each source in the system. The table provides the number of wells and intakes that rated high (H), medium (M), or low (L) for each contaminant category. For susceptibility ratings of purchased water, refer to the specific water system's source water assessment report.

The seven contaminant categories are defined at the bottom of this page. DEP considered all surface water highly susceptible to pathogens, therefore all intakes received a high rating for the pathogen category. For the purpose of Source Water Assessment Program, radionuclides are more of a concern for ground water than surface water. As a result, surface water intakes' susceptibility to radionuclides was not determined and they all received a low rating.

**If a system is rated highly susceptible for a contaminant category, it does not mean a customer is or will be consuming contaminated drinking water. The rating reflects the potential for contamination of source water, not the existence of contamination.** Public water systems are required to monitor for regulated contaminants and to install treatment if any contaminants are detected at frequencies and concentrations above allowable levels. As a result of the assessments, DEP may customize (change existing) monitoring schedules based on the susceptibility ratings.

If you have questions regarding the source water assessment report or summary please contact the Bureau of Safe Drinking Water at [swap@dep.state.nj.us](mailto:swap@dep.state.nj.us) or **609.292.5550**.

### SUEZ Water New Jersey Hackensack (PWSID # NJ0238001)

Surface water intakes - 6	6			2	4			1	5	2	3	1	5	1				6			6	6		

This system purchases water from Jersey City MUA. You can find a link to the source water assessment reports and supporting documentation are available at <http://www.state.nj.us/dep/swap/index.html> or by contacting the NJDEP's Bureau of Safe Drinking Water at **609.292.5550** or [watersupply@dep.nj.gov](mailto:watersupply@dep.nj.gov).

- **Pathogens:** Disease-causing organisms such as bacteria and viruses. Common sources are animal and human fecal wastes.
- **Nutrients:** Compounds, minerals and elements that aid growth, that are both naturally occurring and man-made. Examples include nitrogen and phosphorus.
- **Volatile Organic Compounds:** Man-made chemicals used as solvents, degreasers, and gasoline components. Examples include benzene, methyl tertiary butyl ether (MTBE), and vinyl chloride.
- **Pesticides:** Man-made chemicals used to control pests, weeds and fungus. Common sources include land application and manufacturing centers of pesticides. Examples include herbicides such as atrazine, and insecticides such as chlordane.
- **Inorganics:** Mineral-based compounds that are both naturally occurring and man-made. Examples include arsenic, asbestos, copper, lead, and nitrate.
- **Radionuclides:** Radioactive substances that are both naturally occurring and man-made. Examples include radium and uranium.

- **Radon:** Colorless, odorless, cancer-causing gas that occurs naturally in the environment. For more information go to <http://www.nj.gov/dep/rpp/radon/index.htm> or call **800.648.0394**.
- **Disinfection Byproduct Precursors:** A common source is naturally occurring organic matter in surface water. Disinfection byproducts are formed when the disinfectants (usually chlorine) used to kill pathogens react with dissolved organic material (for example leaves) present in surface water.

## TAP OR BOTTLED WATER?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA Safe Drinking Water Hotline at **800.426.4791**.

The sources of drinking water (for both tap and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or human activity. Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.
- Inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are byproducts of industrial processes and petroleum production and can also come from gas stations, urban stormwater runoff and septic systems.
- Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production, and mining activities.

In order to ensure that the water is safe to drink, the EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health. So, what's the bottom line? If bottled and tap water meet the federal standards, they are both safe to drink. However, your tap water is substantially less expensive than bottled water.

## MONITORING YOUR WATER

We routinely monitor for contaminants in your drinking water according to **USEPA** regulations. The following tables in this report show the results of our monitoring for the period of January 1, 2020 to December 31, 2020. Some of our data is from prior years in accordance with the Safe Drinking Water Act. The date has been noted on the sampling results table.

## DEFINITIONS:

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

Not Analyzed or Not Applicable (NA): Analysis of the constituent is not required.

Nephelometric Turbidity Unit (NTU): A measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

Parts per million (ppm) or milligrams per liter (mg/L): Corresponds to one part of liquid in one million parts of liquid.

Parts per billion (ppb) or micrograms per liter (µg/L): Corresponds to one part of liquid in one billion parts of liquid.

Parts per trillion (ppt) or nanograms per liter (ng/L): Corresponds to one part of liquid in one trillion parts of liquid. Equivalent of one grain of sand in an Olympic-size swimming pool.

Picocuries per liter (pCi/L): Picocuries per liter is a measure of the radioactivity in water.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectant to control microbial contamination.

Running Annual Average (RAA): TTHMs and HAA5 are reported by the annual average of four consecutive quarterly samples.

ND: Not detectable.

CU: Color unit.

S.U.: Standard unit.

<: This means "less than."

## 2020 WATER QUALITY RESULTS - TABLE OF DETECTED CONTAMINANTS

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline **800.426.4791**.

Contaminant	Violation Yes/No	Highest Level Detected (Range of Results)	Unit of Measure	MCLG	Regulatory Limit (MCL, TT or AL)	Likely Source of Contamination
<b>Primary Standards – directly related to the safety of drinking water.</b>						
<b>Microbiological Contaminants (2020 Data)</b>						
Turbidity <sup>1</sup>	No	Highest level <sup>2</sup> detected = 0.20 Range = 0.05 - 0.20 100% of samples < 0.3NTU	NTU	NA	TT = < 1.0 NTU 95% of samples < 0.3NTU	Soil runoff
Total Coliforms	No	0 - 2%	% Positive	0	TT = < 5% Positive Samples/Month	Naturally present in the environment
<b>Inorganic Contaminants (2020 Data)</b>						
Arsenic	No	Highest level detected = 0.72 Range of results = ND - 0.72	ppb	0	5	Erosion of natural deposits; runoff from orchards; runoff from glass and electronics production wastes
Barium	No	Highest level detected = 0.17 Range of results = 0.08 - 0.17	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Chromium (Total)	No	Highest level detected = 5.3 Range of results = 1.8 - 5.3	ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
Nickel	No	Highest level detected = 2.9 Range of results = 1.0 - 2.9	ppb	NA	NA	Erosion of natural deposits
Nitrate as nitrogen	No	Highest level detected = 4.13 Range of results = ND - 4.13	ppm	10	10	Runoff from fertilizer usage; leaching from septic tanks, sewage; erosion of natural deposits
Total Nitrate and Nitrite	No	Highest level detected = 4.13 Range of results = ND - 4.13	ppm	10	10	Runoff from fertilizer usage; leaching from septic tanks, sewage; erosion of natural deposits
<b>Organic Contaminants - Volatile (2020 Data)</b>						
Toluene	No	Highest level detected = 0.763 Range of results = ND - 0.763	ppb	1000	1000	Discharge from petroleum refineries
<b>Organic Disinfection By-Products – Stage 2 (2020 Data)</b>						
TTHM (Total Trihalomethanes)	No	Range of results = 11.9 - 43.3 LRAA <sup>3</sup> = 38.7	ppb	NA	80	By-product of drinking water disinfection
HAA5 (Haloacetic Acids)	No	Range of results = 3.2 - 28.2 LRAA = 17.8	ppb	NA	60	By-product of drinking water disinfection
Bromate	No	Range of results = ND - 5.5 RAA = 1.1	ppb	0	10	By-product of drinking water disinfection

Disinfectant Residual (2020 Data)						
Chloroamines	No	Range of results = 0.02 – 3.93 Highest RMA = 2.37	ppm	4	4	Water additive to control microbes
Lead and Copper (2020 Data)						
Copper						
1/1/2020 – 6/30/2020 <sup>4</sup>	No	90th percentile = 0.0657 Range of results = ND - 0.353 # samples above Action Level = 0 of 128	ppm	1.3	AL = 1.3	Corrosion of household plumbing systems; erosion of natural deposits
7/1/2020 – 12/31/2020 <sup>4</sup>	No	90th percentile = 0.0518 Range of results = ND - 0.208 # samples above Action Level = 0 of 127				
Lead						
1/1/2020 – 6/30/2020 <sup>5</sup>	No	90th percentile = 9.14 Range of results = ND – 25.8 # samples above Action Level = 4 of 128	ppb	0	AL = 15	Lead service lines, corrosion of household plumbing including fittings and fixtures; erosion of natural deposits
7/1/2020 – 12/31/2020 <sup>5</sup>	No	90th percentile = 0.11 Range of results = ND – 198 # samples above Action Level = 4 of 127				
Lead and Copper – Water Quality Parameters						
Haworth Water Treatment Plant Point-of-Entry (TP011020) (2020 Data)						
Parameter	Minimum Level Detected	Maximum Level Detected	Unit Measure	MCLG	Required Minimum Level	Number of Excursions

Orthophosphate (as Total P)	0.8	1.13	ppm	NA	NA	NA
<i>Secondary Standards – water quality parameters related to the aesthetic quality of drinking water.</i> (2020 Data)						
Parameter	RUL Exceeded Yes/No	Highest Level Detected (Range of Results)	Unit Measure	MCLG	RUL	Likely Source
Aluminum	No	Highest level detected = 91 Range of results = ND – 91	ppb	NA	200	Naturally occurring element
Chloride	No	Highest level detected = 168 Range of results = 70 – 168	ppm	NA	250	Naturally occurring element
Color	No	Highest level detected = 3 Range of results = ND – 3	CU	NA	10	Naturally occurring organic matter
pH	No	Highest level detected = 8.19 Range of results = 7.28 – 8.19	s.u.	NA	6.5 – 8.5	Natural property of water
Sodium <sup>6</sup>	Yes	Highest level detected = 103 Range of results = 43 – 103	ppm	NA	50	Naturally occurring element; Road salt runoff (See SODIUM Section on page 10)
Hardness (as CaCO <sub>3</sub> ) <sup>6</sup>	Yes	Highest level detected = 265 Range of results = 86 – 265	ppm	NA	250	Naturally occurring element

Iron	No	Highest level detected = 92 Range of results = ND - 92	ppb	NA	300	Naturally occurring element, leaching from metal pipes
Sulfate	No	Highest level detected = 18 Range of results = 13 - 18	ppm	NA	250	Naturally occurring element
Total Dissolved Solids	No	Highest level detected = 419 Range of results = 195 - 419	ppm	NA	500	Minerals and salts dissolved in the water
Zinc	No	Highest level detected = 0.44 Range of results = ND - 0.44	ppm	NA	5	Naturally occurring element
<b>Unregulated Substances – for which the USEPA and/or NJDEP requires or recommends monitoring.</b>						
Parameter	Violation Yes/No	Highest Level Detected (Range of Results)	Unit Measure	MCLG		Likely Source
<b>Substance (Haworth 2019 Data)</b>						
HAA5	No	Highest level detected = 28.64 Range of results = 6.67 - 28.64 Average = 15.08	ppb	NA		By-product of drinking water disinfection
HAA6Br	No	Highest level detected = 14.51 Range of results = 4.20 - 14.51 Average = 9.56	ppb	NA		By-product of drinking water disinfection
HAA9	No	Highest level detected = 41.47 Range of results = 11.38 - 41.47 Average = 23.59	ppb	NA		By-product of drinking water disinfection
Manganese	No	Highest level detected = 37.7 Range of results = ND - 37.7 Average = 5.7	ppb	NA		Naturally occurring element
<b>Perfluoroalkyl Substance (2020 Data)</b>						
PFOA <sup>7</sup>	No	Highest level detected = 14.0 Range of results = 6.6 - 14.0	ppt	NA		Used in manufacturing of fluoropolymers, firefighting foams, cleaners, cosmetics, greases, lubricants, paints, polishes, adhesives and photographic films
PFOS <sup>7</sup>	No	Highest level detected = 8.7 Range of results = 2.5 - 8.7	ppt	NA		Used in firefighting foam, circuit board etching, cleaners, floor polish, and pesticides

PFBS <sup>7</sup>	No	Highest level detected = 3.3 Range of results = ND - 3.3	ppt	NA	Used in products to make them stain, grease, heat and water resistant
PFHpA <sup>7</sup>	No	Highest level detected = 4.7 Range of results = 2.2 - 4.7	ppt	NA	Used in products to make them stain, grease, heat and water resistant
PFHxS <sup>7</sup>	No	Highest level detected = 3.2 Range of results = ND - 3.2	ppt	NA	Used in products to make them stain, grease, heat and water resistant

**NOTES:**

1. Turbidity is a measure of the cloudiness of the water. We test it because it is a good indicator of the effectiveness of our filtration system. State regulations require that turbidity must always be below 1 NTU at the treatment system. State regulations require that turbidity must always be below 5 NTU in the distribution system and that 95% of the turbidity samples collected (at the treatment system entry point) have measurements below 0.3 NTU.
2. Highest Level Detected is based upon the highest single sample.
3. LRAA=the highest locational running annual average results.
4. The Copper level presented represents the 90th percentile of the sites tested. A percentile is a value on a scale of 100 that indicates the percent of a distribution that is equal to or below it. The 90th percentile is equal to or greater than 90% of the copper values detected at your water system.
5. The Lead level presented represents the 90th percentile of the sites tested. A percentile is a value on a scale of 100 that indicates the percent of a distribution that is equal to or below it. The 90th percentile is equal to or greater than 90% of the lead values detected at your water system.
6. Note on exceedences: Secondary standards are non-mandatory guidelines to assist public water systems in managing their drinking water for aesthetic considerations, such as taste, color and odor. These contaminants are not considered to present a risk to human health.
7. These contaminants were not regulated in 2020. PFOA and PFOS are regulated as of 1/1/2021.

**WAIVER INFORMATION**

The Safe Drinking Water Act (SDWA) regulations allow monitoring waivers to reduce or eliminate the monitoring requirements for asbestos, volatile organic chemicals (VOCs) and synthetic organic chemicals (SOCs). Our system received monitoring waivers for asbestos because we are not vulnerable to this type of contamination. NJDEP issued SOC waivers to many community water systems in the 3-year cycle (2017-2019). We expect to complete the next round of sampling or receive a waiver prior to the end of the cycle.

**LEAD**

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Your water is lead-free when it leaves our treatment plant. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. SUEZ is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking and cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline at **800.426.4791** or at <http://www.epa.gov/safewater/lead>.

## SODIUM

For healthy individuals, the sodium intake from water is not important because a much greater intake of sodium takes place from salt in the diet. However, elevated levels of sodium may be a concern for persons on a sodium-restricted diet. If you have any concerns, please consult your health care provider. Road salt run-off affecting our source water quality is the leading cause of elevated sodium levels in the drinking water supply. We are meeting with communities within our source water area to discuss options for minimizing use of and/or alternatives to road salt.

For more information, please call **800.422.5987**.

State Water System ID#: NJ0238001 (SUEZ Water New Jersey Hackensack and Upper Saddle River Wells)

## SUPPLEMENTAL SOURCE OF SUPPLY DATA

In 2020, SUEZ purchased water from neighboring SUEZ Jersey City to supplement its source of supply. This insert contains the water quality data from that source. Additional information about this supplement supply source can be found by visiting the following website: <https://www.mysuezwater.com/sites/default/files/JerseyCityCCR2020.pdf>.

## SUEZ Jersey City Operations | PWSID # NJ0906001 | 2020 Water Quality Data

### 2020 WATER QUALITY RESULTS - TABLE OF DETECTED

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline

Regulated Contaminants									
Inorganic Contaminants	Units	MCLG	MCL	Min	Max	Avg	Year	Violation	Sources in Drinking Water

PFO5	ppt	N/A	N/A	5.82	8.43	2020	no	Used in firefighting foam, circuit board etching, cleaners, floor polish, and pesticides
PFOA	ppt	N/A	N/A	5.76	6.1	2020	no	Used in manufacture of fluoropolymers, firefighting foams, cleaners, cosmetics, greases, lubricants, paints, polishes, adhesives and photographic films

### NOTES:

1. Turbidity is a measure of the cloudiness of the water. We test it because it is a good indicator of the effectiveness of our filtration system. State regulations require that turbidity must always be below 1 NTU at the treatment system. State regulations require that turbidity must always be below 5 NTU in the distribution system and that 95% of the turbidity samples collected (at the treatment system entry point) have measurements below 0.3 NTU.
2. The Copper level presented represents the 90th percentile of the 60 sites tested. A percentile is a value on a scale of 100 that indicates the percent of a distribution that is equal to or below it. The 90th percentile is equal to or greater than 90% of the copper values detected at your water system. In this case, 60 samples were collected at your water system and the 90th percentile value was 0.117 ppm value with the highest being 0.321 ppm. The action level for copper was not exceeded at any of the sites tested.
3. The Lead level presented represents the 90th percentile of the 60 sites tested. A percentile is a value on a scale of 100 that indicates the percent of a distribution that is equal to or below it. The 90th percentile is equal to or greater than 90% of the lead values detected at your water system. In this case, 60 samples were collected at your water system and the 90th percentile value was 4.39 ppb with the highest value being 17.9 ppb. One site exceeded the action level for lead.
4. Health Note for Sodium: Water containing more than 20 ppm of sodium should not be used for drinking water by people on diets that severely restrict sodium. Water containing more than 270 ppm of sodium should not be used for drinking by people on diets that moderately restrict sodium.
5. LRAA=the highest locational running annual average results.
6. Data presented is from the most recent sampling done in accordance with regulations.

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER  
Monitoring Requirements Not Met for SUEZ Water New Jersey  
Hackensack Water System**

Our water system violated a drinking water requirement over the past year. Even though this was not an emergency, as our customers you have a right to know what happened and what we did to correct the situation.

\*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. This violation notice applies to the Upper Saddle River Wells, which served as a supplemental supply to the Hackensack system until May 15, 2020, when they were removed from service. On April 2, 2020, the US Environmental Protection Agency (EPA) initiated a sanitary survey of the SUEZ Water NJ Hackensack Water System, including an inspection of system facilities and a file review of records from January 2017 – March 2020. Upon completion of the sanitary survey, the following violations were noted:

- 1.) Failure to determine if representative samples of the source water exceeded 5 NTU for turbidity.
- 2.) Failure to report total/fecal coliform source water monitoring data and associated analysis.
- 3.) Failure to comply with annual on-site inspection requirements to assess the watershed control program and the disinfection treatment process. Inspections are required by the State or a party approved by the State.
- 4.) Failure to submit validation test results demonstrating operating conditions that achieve the required UV dose and failure to monthly report the percentage of water entering the distribution system that was not treated by UV reactors operating within validated conditions.

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

The Upper Saddle River Wells were removed from service on May 15, 2020 and remain offline for reasons unrelated to this violation. The violations refer to source water reporting; any water taken from these wells would have been treated prior to distribution. While the wells remain out of service, there will be no monitoring/inspections. Prior to being put back in service, the wells will be tested for compliance.

For more information, please contact the SUEZ Customer Service Center at **800.422.5987** or email us at [sueznjcustserv@suez.com](mailto:sueznjcustserv@suez.com).

\*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.\*

This notice is being sent to you by SUEZ Water New Jersey – Hackensack Water System.  
State Water System ID#: NJ0238001

**IMPORTANT INFORMATION - This report contains important information about your drinking water. Have someone translate it for you, or speak with someone who understands it.**

## Bergen County, New Jersey

### UR—Urban land

#### Map Unit Setting

*National map unit symbol:* b0ss

*Elevation:* 0 to 170 feet

*Mean annual precipitation:* 30 to 64 inches

*Mean annual air temperature:* 46 to 79 degrees F

*Frost-free period:* 131 to 178 days

*Farmland classification:* Not prime farmland

#### Map Unit Composition

*Urban land:* 95 percent

*Minor components:* 5 percent

*Estimates are based on observations, descriptions, and transects of the mapunit.*

#### Description of Urban Land

##### Setting

*Parent material:* Surface covered by pavement, concrete, buildings, and other structures underlain by disturbed and natural soil material

##### Interpretive groups

*Land capability classification (irrigated):* None specified

*Land capability classification (nonirrigated):* 8s

*Hydric soil rating:* Unranked

#### Minor Components

##### Udorthents

*Percent of map unit:* 5 percent

*Landform:* Low hills

*Down-slope shape:* Linear

*Across-slope shape:* Linear

*Hydric soil rating:* No

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at scales ranging from 1:12,000 to 1:24,000.

**Warning:** Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Bergen County, New Jersey

Survey Area Data: Version 18, Aug 30, 2021

Soil Survey Area: Hudson County, New Jersey

Survey Area Data: Version 11, Aug 31, 2021

Your area of interest (AOI) includes more than one soil survey area. These survey areas may have been mapped at different scales, with a different land use in mind, at different times, or at different levels of detail. This may result in map unit symbols, soil properties, and interpretations that do not completely agree across soil survey area boundaries.

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 12, 2020—Nov 4, 2020

## MAP LEGEND

## MAP INFORMATION

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
UR	Urban land	11.6	74.0%
WATER	Water	1.6	10.2%
<b>Subtotals for Soil Survey Area</b>		<b>13.2</b>	<b>84.2%</b>
<b>Totals for Area of Interest</b>		<b>15.7</b>	<b>100.0%</b>

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
RNHF	Rock outcrop-Holyoke complex, 45 to 60 percent slopes	0.3	2.2%
URBEDB	Urban land, bedrock substratum, 0 to 8 percent slopes	2.1	13.5%
<b>Subtotals for Soil Survey Area</b>		<b>2.5</b>	<b>15.8%</b>
<b>Totals for Area of Interest</b>		<b>15.7</b>	<b>100.0%</b>

## Digital Geodata Series

### DGS17-1 Oil and Natural Gas Exploration Wells Drilled In New Jersey

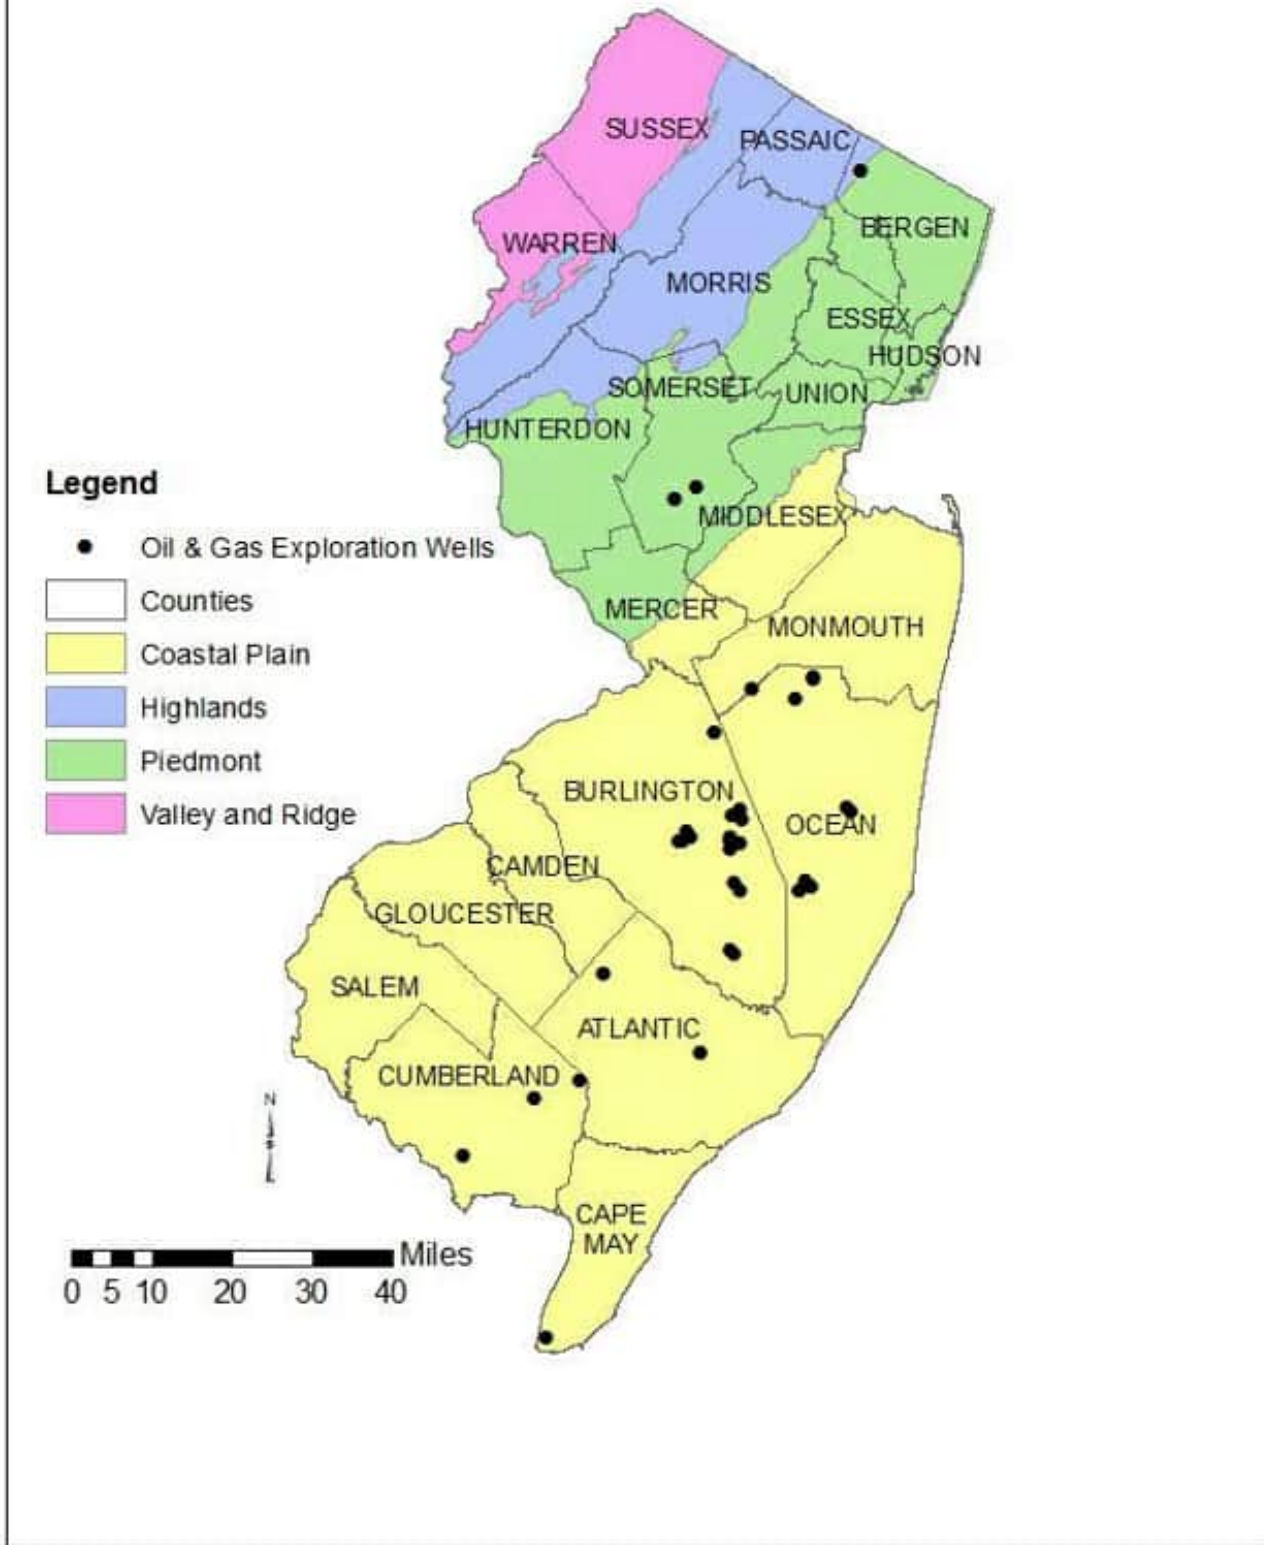

#### Abstract

The first well drilled specifically looking for oil and natural gas in New Jersey was completed before 1868. Since that time 35 additional oil or gas exploration wells have been drilled in the state, with 33 of them being drilled between 1915 and 1966. The first well and two later wells were drilled in the Triassic-Jurassic sandstones and shales of the Piedmont Province, with the rest being located in the sands and clays of the New Jersey Coastal Plain. None of the oil and natural gas exploration wells encountered anything to warrant further exploration.

No oil or natural gas exploration wells have been drilled in either the Valley and Ridge or the Highlands Provinces.

**This Sample Image is for illustration purposes only.**

Hazardous Waste Facility Permit

Under the provisions of N.J.S.A. 13:1E-1 et seq. known as the Solid Waste Management Act, this permit is hereby issued to:

Unilever Research U.S.  
45 River Road  
Edgewater, New Jersey 07020

For the Purpose of Operating a:	Hazardous	Waste	Storage
Facility			
On Lot No.:	5		
Block No:	99		
In the Municipality of:	Edgewater Borough		
County:	Bergen		
Under Facility Permit No.:	0213C1HP04		
EPA ID No.:	NJD 001 495 753		

This permit is subject to compliance with all conditions specified herein and all regulations promulgated by the Department of Environmental Protection.

This permit shall not prejudice any claim the State may have to Riparian land nor does it permit the registrant to fill or alter, or allow to be filled or altered, in any way, lands that are deemed to be Riparian, Wetlands, stream encroachment or flood plains, or within the Coastal Area Facility Review Act (CAFRA) zone or allow the discharge of pollutants to waters of this State without first acquiring the necessary grants, permits, or approvals from the Department of Environmental Protection or the U.S. Environmental Protection Agency.

### Scope of Permit

The hazardous waste rules at N.J.A.C. 7:26G were adopted by the New Jersey Department of Environmental Protection on October 21, 1996. By this adoption, the Department "incorporated by reference" (with limited exception) the July 1, 1993 version of the Federal hazardous waste regulations found at Parts 124, 260-266, 268 and 270, Title 40 of the Code of Federal Regulations (C.F.R.). Those provisions of the Federal regulations which were not incorporated by reference are listed in the State regulatory adoption. Additional changes to the New Jersey hazardous waste rules will be necessary to address Federal regulations adopted subsequent to July 1, 1993. The Department anticipates addressing these subsequent Federal regulations in a regulatory adoption sometime in 1997. At that time, the Department will adopt amendments to N.J.A.C. 7:26G to incorporate by reference those changes to the Federal regulations that have been made since July 1, 1993, and a prospective incorporation by reference which will incorporate all future amendments and supplements to the Federal regulations automatically. Within 180 days of the effective date of these amendments to N.J.A.C. 7:26G, the Department will initiate a modification of this permit to incorporate such provisions as are made necessary by the newly adopted rules.

The conditions of this permit are based on the New Jersey hazardous waste regulations at N.J.A.C. 7:26G and on the permit application submitted by the permittee. In order to eliminate confusion, and to clearly describe the precise obligations which are imposed upon the permittee, only the specific Federal regulatory citations as of July 1, 1993 are listed in the conditions of this permit. For the applicable State regulatory citations, refer to N.J.A.C. 7:26G.

This permit, along with the referenced permit application documents herein specified, shall constitute the sole Hazardous Waste Facility Permit for the construction and operation of a hazardous waste storage facility by Unilever Research U.S. located in Edgewater Borough, Bergen County, New Jersey. Any registration, Approval or Permit previously issued by the Office of Permitting or its predecessor agencies is hereby superseded. The permittee need not comply with the conditions of this permit to the extent and for the duration such non-compliance is authorized by an emergency permit (40 C.F.R. § 270.61).

Section I of this permit contains the general conditions applicable to all hazardous waste facilities. Section II of this permit contains general conditions applicable to hazardous waste management activities. Section III of this permit contains specific conditions applicable to the Unilever Research U.S. facility.

### Description of Hazardous Waste Activities

Issuance (renewal) of the hazardous waste facility permit will authorize Unilever Research U.S. (facility) to conduct business as a hazardous waste container storage facility. The facility

generates hazardous and non-hazardous waste from research and development activities, including discarded consumer products from consumer panel testing. Waste is also periodically generated from a perfume blending operation and routine plant maintenance.

The facility stores on-site generated hazardous waste and liquid non-hazardous waste at one indoor building that has a maximum storage capacity of 5,500 gallons. All waste is shipped off-site to authorized facilities.

Section I

General Conditions Applicable to All Permits (40 C.F.R. § 270.30)

1. Duty to Comply

The permittee must comply with all conditions of this permit, except that the permittee need not comply with the conditions of this permit to the extent and for the duration such noncompliance is authorized in an emergency permit. (See 40 C.F.R. § 270.61). Any permit noncompliance, except under the terms of an emergency permit, constitutes a violation of the appropriate Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

2. Duty to Reapply

(a) If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee must apply for and obtain a new permit.

(b) A complete application for a new permit shall be submitted at least one hundred eighty (180) days prior to the expiration date of this permit.

3. Need to Halt or Reduce Activity Not a Defense

It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

4. Need to Mitigate

In the event of noncompliance with the permit, the permittee shall take all reasonable steps to minimize releases to the environment, and shall carry out such measures as are reasonable to prevent significant adverse impacts on human health or the environment.

5. Proper Operation and Maintenance

The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of the permit.

6. Permit Actions

This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.

7. Property Rights

The permit does not convey any property rights of any sort, or any exclusive privilege.

8. Duty to Provide Information

The permittee shall furnish to the Department, within a reasonable time, any relevant information which the Department may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The permittee shall also furnish to the Department, upon request, copies of records required to be kept by this permit.

9. Inspection and Entry

The permittee shall allow an authorized representative of the Department upon the presentation of credentials and other documents as may be required by law to:

- (a) Enter at reasonable times upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit;
- (b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
- (c) Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and
- (d) Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by RCRA, any substances or parameters at any location.

10. Monitoring and Records

- (a) Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.

- (b) The permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, the certification required by 40 C.F.R. § 264.73(b)(9) of this chapter, and records of all data used to complete the application for this permit, for a period of at least 3 years from the date of the sample, measurement, report, certification, or application. This period may be extended by request of the Department at any time. The permittee shall maintain records from all ground-water monitoring wells and associated ground-water surface elevations, for the active life of the facility, and for disposal facilities for the post-closure care period as well.
- (c) Records for monitoring information shall include:
1. The date, exact place, and time of sampling or measurements;
  2. The individual(s) who performed the sampling or measurements;
  3. The date(s) analyses were performed;
  4. The individual(s) who performed the analyses;
  5. The analytical techniques or methods used; and
  6. The results of such analyses.

#### 11. Signatory Requirements

All applications, reports, or information submitted to the Department shall be signed and certified. (see 40 C.F.R. § 270.11).

#### 12. Reporting Requirements

##### (a) Planned Changes

The permittee shall give notice to the Department as soon as possible of any planned physical alterations or additions to the permitted facility.

##### (b) Anticipated Noncompliance

1. The permittee shall give advance notice to the Department of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements. For a new facility, the permittee may not treat, store, or dispose of hazardous waste; and for a facility being

modified, the permittee may not treat, store, or dispose of hazardous waste in the modified portion of the facility except as provided in 40 C.F.R. § 270.42, until:

- (i) The permittee has submitted to the Department by certified mail or hand delivery a letter signed by the permittee and a registered professional engineer stating that the facility has been constructed or modified in compliance with the permit; and
- (ii) (A) The Department has inspected the modified or newly constructed facility and finds it is in compliance with the conditions of the permit; or
  - (B) If, within 15 days of the date of submission of the letter in paragraph 12(b)1i of this section, the permittee has not received notice from the Department of his or her intent to inspect, prior inspection is waived and the permittee may commence treatment, storage, or disposal of hazardous waste.

(c) Transfers

This permit is not transferable to any person except after notice to the Department. The Department may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary under RCRA. (See 40 C.F.R. § 270.40).

(d) Monitoring Reports

Monitoring results shall be reported at the intervals specified elsewhere in this permit.

(e) Compliance Schedules

Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 14 days following each schedule date.

(f) Twenty-four Hour Reporting

1. The permittee shall report any noncompliance which may endanger health or the environment orally within 24 hours from the time the permittee becomes aware of the circumstances, including:

- (i) Information concerning the release of any hazardous waste that may cause an endangerment to public drinking water supplies.
  - (ii) Any information of a release or discharge of hazardous waste or of a fire or explosion from the HWM facility, which could threaten the environment or human health outside the facility.
2. The description of the occurrence and its cause shall include:
- (i) Name, address, and telephone number of the owner or operator;
  - (ii) Name, address, and telephone number of the facility;
  - (iii) Date, time, and type of incident;
  - (iv) Name and quantity of material(s) involved;
  - (v) The extent of injuries, if any;
  - (vi) An assessment of actual or potential hazards to the environment and human health outside the facility, where this is applicable; and
  - (vii) Estimated quantity and disposition of recovered material that resulted from the incident.
3. A written submission shall also be provided within 5 days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance. The Department may waive the five day written notice requirement in favor of a written report within fifteen days.
4. Oral Notification shall be provided to the NJDEP Hotline at (609) 292-7172. Written notification shall be provided to the Bureau of Hazardous Waste and Transfer Facilities and the Bureau of Hazardous Waste Enforcement at the addresses provided in Condition 11 of Section II of this permit.

(g) Biennial Report

A biennial report must be submitted covering facility activities during odd numbered calendar years. (See 40 C.F.R. § 264.75).

(h) Other Noncompliance

The permittee shall report all instances of noncompliance not reported under paragraphs (d), (e) and (f) of this section, at the time monitoring reports are submitted. The reports shall contain the information listed in paragraph (f) of this section.

(i) Other Information

Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the Department, it shall promptly submit such facts or information.

End of Section I

Section II

General Conditions Applicable to Unilever Research U.S. Facility Permit

1. Permit Modification or Revocation and Reissuance

Cause for, and procedures of, modification, or revocation and reissuance of this permit shall be as provided under 40 C.F.R. § 270.41.

2. Personnel Training (40 C.F.R. § 264.16)

- (a) Facility personnel shall successfully complete a program of classroom instruction or on-the-job training that teaches them to perform their duties in a way that insures the facility's compliance with the requirements of 40 C.F.R. § 264.16, as stated in the facility's Part B permit application, and as referenced in Condition 12(b) of Section II of this permit. New employees shall be trained within six (6) months of the date of employment.
- (b) The training program shall be maintained with records and documentation describing the type and amount of both introductory and continuing training that has been and will be given to each person engaged in hazardous waste management at the facility.
- (c) The permittee shall keep the training records on current personnel until closure of the facility; training records on former employees shall be kept for at least three (3) years from the date the employee last worked at the facility. Personnel training records may accompany personnel transferred within the same company.

3. Preparedness and Prevention (40 C.F.R. § 264.30 through § 264.37)

The facility shall be designed, constructed, maintained and operated to minimize the possibility of fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, surface water or groundwater which could threaten human health or the environment.

- (a) The facility shall be equipped with emergency equipment, including but not limited to:
  - 1. An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel;
  - 2. A device, such as a telephone (immediately available at the scene of operations) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams;
  - 3. Portable fire extinguisher, fire control equipment,

spill control equipment, and decontamination equipment; and

4. Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.

(b) All facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment, where required, shall be tested and maintained as necessary to assure its proper operation in time of emergency.

4. Contingency Plan (40 C.F.R. § 264.50 through § 264.56)

(a) The provisions of the Contingency Plan included in the Part B permit application plus all amendments, revisions and modifications thereof subsequently submitted for review and accepted by the Department, and as referenced in Condition 12(b) of Section II of this permit, shall be carried out immediately whenever there is a fire, explosion or release of hazardous waste constituents which could threaten health or the environment.

(b) When an emergency coordinator determines that the facility has had a discharge, fire, or explosion which could threaten human health or the environment outside the facility, the emergency coordinator shall immediately notify the local Fire Department and local Police Department if an assessment indicates that evacuation of local areas may be advisable. The emergency coordinator shall be available to help officials decide if local areas should be evacuated. The telephone numbers are:

Fire Department: (201) 945-2600

Police Department: (201) 943-2200

(c) 1. If the facility has a discharge, fire, or explosion which could threaten human health or the environment, the following shall be notified immediately:

New Jersey Department of Environmental Protection  
Communication Center/Trenton Dispatch  
Bureau of Communication and Support Services  
Trenton, NJ 08625  
Telephone (609) 292-7172 (24 Hours)

2. Additionally, if the emergency coordinator determines that the facility has had a discharge, fire or explosion which could threaten human health or the environment outside the facility, the emergency coordinator shall immediately notify:

National Response Center  
2100 Second Street, SW  
Washington, D.C. 20593  
Telephone 1-800-424-8802 (24 Hours)

- (d) If the emergency coordinator determines that the facility has had a discharge, fire, or explosion which would threaten human health or the environment, the emergency coordinator shall immediately notify the agencies listed in Condition 4(c). When notifying these agencies, the coordinator shall report the type of substance and the estimated quantity discharged, if known; the location of the discharge; actions the person reporting the discharge proposes to take to contain, clean up and remove the substance if any and any other information concerning the discharge which the Department may request at the time of notification.
  - (e) The owner or operator shall note in the operating record the time, date, and details of any incident that requires implementing the contingency plan. Within 15 days after the incident, the owner or operator shall submit a written report on the incident to the Department. The report shall include, but not be limited to:
    - 1. Name, address, and telephone number of the owner or operator;
    - 2. Name, address, and telephone number of the facility;
    - 3. Date, time, and type of incident;
    - 4. Name and quantity of material(s) involved;
    - 5. The extent of injuries, if any;
    - 6. An assessment of actual or potential hazards to human health or the environment, where this is applicable; and
    - 7. An estimated quantity and disposition of recovered material that resulted from the incident.
5. Security (40 C.F.R. § 264.14)
- (a) The permittee must maintain the security procedures as described in the facility's Part B permit application plus all amendments, revisions and modifications thereof subsequently submitted for review and accepted by the Department, and as referenced in Condition 12(a) of Section II of this permit.
  - (b) The permittee shall prevent the unknowing entry, and

minimize the possibility for the unauthorized entry, of persons or livestock onto the active portion of the facility.

1. A facility shall have:
  - i. A 24-hour surveillance system which continuously monitors and controls entry onto the active portion of the facility; or
  - ii. An artificial or natural barrier, which completely surrounds the active portion of the facility; and a means to control entry, at all times, through the gates or other entrances to the active portion of the facility.
2. The requirements of paragraph (b)1 are satisfied if the hazardous waste storage, treatment or disposal site is located in a facility which itself has a surveillance system, or a barrier and a means to control entry, which complies with the requirements of subparagraph (b)1i or (b)1ii.
3. The owner or operator shall post a sign with the legend, "Danger - Unauthorized Personnel Keep Out", at each entrance to the active portion of a facility, and at other locations, in sufficient numbers to be seen from any approach to this active portion. The legend shall be written in English and in any other language prevalent in the area surrounding the facility and must be legible from a distance of at least twenty five (25) feet. Existing signs with a legend other than "Danger - Unauthorized Personnel Keep Out" may be used if the legend on the sign indicates that only authorized personnel are allowed to enter the active portion, and that entry onto the active portion can be dangerous.

6. Termination of a Permit (40 C.F.R. § 270.43)

The following are causes for terminating a permit during its term or for denying a permit renewal application:

- (a) Noncompliance with any condition of this permit; or
- (b) The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time; or
- (c) A determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination.

7. Operating Record (40 C.F.R. § 264.73)

The permittee shall keep a written operating record at the facility in which the information required under 40 C.F.R. § 264.73(b) shall be recorded. The information shall be recorded as it becomes available and maintained in the operating record until closure of the facility.

8. Permit Limitations (40 C.F.R. § 270.4(c))

The issuance of this permit does not authorize any injury to persons or property or invasion of other private rights or any infringement of applicable Federal, State, or local laws or regulations.

9. Financial Requirements (40 C.F.R. Part 264, Subpart H)

- (a) The permittee shall maintain financial responsibility for bodily injury and property damage to third parties caused by sudden accidental occurrences arising from operations of the facility. The permittee shall have and maintain liability coverage for sudden occurrences in the amount of at least \$1 million per occurrence with an annual aggregate of at least \$2 million exclusive of legal defense costs. The permittee shall demonstrate financial responsibility for sudden accidental occurrences according to the mechanisms given in 40 C.F.R. § 264.147 paragraphs (a)(1), (2), (3), (4), (5) or (6).
- (b) The permittee shall establish financial assurance for closure of the facility. The permittee shall use a financial assurance mechanism approved by the Department, from the options specified in paragraphs (a) through (f) of 40 C.F.R. § 264.143.
- (c) The permittee shall have a detailed written closure cost estimate for the facility in accordance with 40 C.F.R. § 264.142(a). The permittee shall adjust the closure cost estimate for inflation within sixty (60) days prior to the anniversary date of the establishment of the financial instrument(s) used to comply with 40 C.F.R. § 264.143. If the permittee uses the financial test or corporate guarantee, the closure cost estimate shall be updated for inflation within thirty (30) days after the close of the firm's fiscal year and before submission of the updated information to the Department. The adjustment may be made by recalculating the maximum costs of closure in current dollars, or by using an inflation factor derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its *Survey of Current Business*. The inflation factor is the result of dividing

the latest published annual Deflator by the Deflator for the previous year.

- (1) The first adjustment is made by multiplying the closure cost estimate by the inflation factor. The result is the adjusted closure cost estimate.
  - (2) Subsequent adjustments are made by multiplying the latest adjusted closure cost estimate by the latest inflation factor.
- (d) During the active life of the facility, the permittee shall revise the closure cost estimate no later than (30) days after the Department has approved the request to modify the closure plan, if the change in the closure plan increases the cost of closure. The revised closure cost estimate must be adjusted for inflation as specified in 40 C.F.R. § 264.142(b).
- (e) The permittee shall keep at the facility during the operating life of the facility, the latest closure cost estimate prepared in accordance with 40 C.F.R. § 264.142(a) and (c) and, when this estimate has been adjusted in accordance with 40 C.F.R. § 264.142(b), the latest adjusted closure cost estimate.
- (f) The wording of all financial documents (except for the insurance policy itself) that are submitted under paragraphs (a), (b) and (c) of this Condition must be as per 40 C.F.R. § 264.151 with the changes specified at N.J.A.C. 7:26G-8.1(c)8.

10. Compliance with Other State Regulations and Statutes

The permittee shall comply with all regulations of the Department of Environmental Protection and other State Statutes applicable to the facility. Regulations are effective upon publication in the New Jersey Register or as otherwise indicated in the Notice of Adoption in the New Jersey Register.

11. Submission of Documents Required by Permit Conditions

The permittee shall submit all permit compliance documents required by this permit to the following:

- (a) New Jersey Department of Environmental Protection  
Office of Permitting  
Bureau of Hazardous Waste and Transfer Facilities  
CN 421  
Trenton, NJ 08625-0421
- (b) New Jersey Department of Environmental Protection  
Solid and Hazardous Waste Enforcement

Bureau of Hazardous Waste Enforcement - Metro Section  
 2 Babcock Place  
 West Orange, NJ 07052-5504

12. Referenced Permit Application Documents

(a) The permittee shall operate the facility, and construct or install associated appurtenances thereto, in accordance with the regulations contained in 40 C.F.R. Parts 260-270, the conditions of this permit, and the following permit application documents:

1. December 1, 1987, Part A and B permit application for a hazardous waste storage facility signed by Frank H. Healy, Vice President, Lever Brothers Company, subsequently revised April 8, 1988.
2. June 30, 1994, Part B permit renewal application for a hazardous waste storage facility signed by Frank H. Healy, Vice President, Unilever Research U.S. subsequently revised August 29, 1994.
3. Engineering designs signed and sealed by James N. Blake, P.E.:

<u>Drawing Title</u>	<u>Issue or Revision</u>	<u>Drawing Number</u>
Proposed Layout Of Hazardous Chemical Waste Storage Area	1	RG-735
Waste Storage Building Sump & Foundation Plan	0	RE-1492
Boundary & Topographic Map	0	RE-Y-19

In case of conflict, the applicable hazardous waste management regulations contained in 40 C.F.R. shall have precedence over the conditions of this permit, and the conditions of this permit shall have precedence over the Part B permit application documents listed above.

(b) One complete set of the permit application documents listed in Condition 12(a) above, this Hazardous Waste Facility Permit, and all records, reports and plans as may be required pursuant to this permit shall be kept on-site and shall be available for inspection by authorized representatives of the Department upon presentation of credentials. The records, reports and plans required pursuant to this permit include the following:

1. The description of the personnel training program and the records required by Condition 2 of Section II of this permit and 40 C.F.R. § 264.16.
2. The Contingency Plan required by Condition 4 of Section II of this permit and 40 C.F.R. § 264.50, and specifically the plan prepared by Unilever Research U.S. dated December 1, 1987, subsequently revised April 8, 1988, and June 30, 1994.
3. The written Operating Record required by Condition 7 of Section II of this permit and 40 C.F.R. § 264.73.
4. Copies of the financial documents and closure cost estimate required by Condition 9 of Section II of this permit and 40 C.F.R. 264.140.
5. The Waste Analysis Plan outlined in Condition 3 of Section III of this permit and as required by 40 C.F.R. § 264.13, and specifically the plan prepared by Unilever Research U. S. dated December 1, 1987, subsequently revised April 8, 1988.
6. The Inspection schedule required by 40 C.F.R. § 264.15(b) and the records required by Condition 4 of Section III of this permit and 40 C.F.R. § 264.174.
7. The Closure Plan required by Condition 5 of Section III of this permit and 40 C.F.R. § 264.112 and specifically the plan prepared by Unilever Research U.S. dated December 1, 1987 subsequently revised April 8, 1988, June 30,1994, and August 29, 1994.

End of Section II

Section III

Specific Facility Conditions Applicable to Unilever Research U.S.

1. Authorized Activities

Container Storage

- (a) The permittee is authorized to store on-site generated hazardous waste in containers for a facility maximum of five thousand five hundred (5,500) gallons as detailed on engineering drawings cited in Condition 12(a) of Section II of this permit and as follows:

		Maximum	Minimum
<u>Drum Storage Area I.D.</u>	<u>Design Capacity (gallons)</u>	<u>Container Volume (gallons)</u>	<u>Aisle Space (inches)</u>
Hazardous Waste Storage Building	5,500	450	18

- (b) A secondary containment system, constructed of concrete, shall be maintained free of cracks or gaps and of adequate capacity and be sufficiently impervious to contain leaks, spills and accumulated rainfall until the collected material is detected and removed. The base shall have adequate structural integrity to withstand the maximum stress applied to the base due to activities or structures placed in the containment area. The secondary containment system shall be maintained and operated to efficiently drain and remove liquids resulting from leaks, spills and precipitation.
- (c) Spilled or leaked waste or accumulated precipitation shall be removed from the sump or collection area in a timely manner, to prevent blockage or overflow of the collection system.
- (d) The containers shall be managed in compliance with all provisions of 40 C.F.R. § 264.173.
- (e) The permittee shall not place a waste which is incompatible with waste already in a container, or incompatible with a material of construction of a container, in that container. The permittee shall not place a hazardous waste in an unwashed container which previously held an incompatible waste or material. The

permittee shall evaluate each waste, prior to its addition to any container, to ensure compliance with 40 C.F.R. § 264.17(b).

(f) Hazardous waste containers may be stacked as follows:

1. Containers smaller than eighty five (85) gallons shall be stacked no higher than the equivalent of two (2) eighty five (85) gallon containers;
2. Eighty five (85) gallon containers shall be stacked no greater than two (2) high; and
3. Containers greater than eighty five (85) gallons shall be stacked no greater than one (1) high.

(g) If a container holding hazardous waste is not in good condition (e.g., severe rusting, apparent structural defects) or if it begins to leak, the permittee must transfer the hazardous waste from this container to a container that is in good condition or manage the waste in some other way that complies with the requirements of 40 C.F.R. § 264.171.

## 2. Authorized Wastes

The permittee is authorized to store the following on-site generated hazardous wastes types in containers, prior to transfer to an authorized off-site treatment, storage or disposal facility:

<u>Hazardous Waste Codes</u>	<u>Description</u>
All "D" Codes D001 through D043	Characteristic hazardous waste
F002 through F005 F027	Hazardous waste from non and specific sources
All "P" Codes	Commercial chemical products or manufacturing chemical intermediates identified as acute hazardous waste
All "U" Codes	Commercial chemical products or manufacturing chemical intermediates identified as toxic waste
ID-72	Bulk liquids and semi-liquids as defined at N.J.A.C. 7:26-2.13(h)1i

The permittee may store non-hazardous wastes which were previously classified as hazardous waste (All "C" Codes, X721, X725 and X726) in the hazardous waste container storage area.

The combined volume of non-hazardous waste and hazardous waste in the permittee's authorized facility shall not exceed the capacity listed in Condition 1(a) of Section III of this permit.

3. Waste Analysis and Quality Assurance Requirements

- (a) The permittee shall adhere to the provisions of the waste analysis plan cited in Condition 12(b) of Section II of this permit, and any subsequent revisions approved by the Department's Office of Permitting.
- (b) Each hazardous waste generated at this location shall be fully identified and classified in accordance with 40 C.F.R. § 261.3. At a minimum, the permittee shall develop all of the information which must be known to store the waste in accordance with the provisions of this permit, as well as to treat or dispose of the waste at an authorized facility. If any hazardous waste cannot be fully identified and classified from the company knowledge of the process through which the waste was generated, then the permittee shall have proper samples of the waste analyzed in accordance with the permittee's waste analysis plan cited in Condition 12(b) of Section II of this permit and any Quality Assurance/Quality Control methodology established by the Department.
- (c) Sampling methods shall be in accordance with the procedures as outlined in the waste analysis plan cited in Condition 12(b) of Section II of this permit, and shall employ equipment as prescribed in the latest edition of EPA Manual SW 846.
- (d) The permittee shall maintain in the written Operating Record required by Condition 7 of Section II of this permit, as per 40 C.F.R. § 264.73(b)(3), records and results of all waste analyses performed. Such records and results shall be entered into the written Operating Record as they become available and shall be maintained until closure of the facility.
- (e) The permittee shall maintain the following information as per 40 C.F.R. § 270.30(j)(3) in the written Operating Record:
  - 1. The date, exact place, and time of sampling or measurements;
  - 2. The individual(s) who performed the sampling or measurements;
  - 3. The date(s) the analyses were performed;

4. The individual(s) who performed the analysis;
5. The analytical techniques or methods used; and
6. The results of the analysis.

(f) No changes shall be made to the waste analysis plan without the prior approval of the Division of Solid and Hazardous Waste.

4. Inspection Requirements (40 C.F.R. § 264.15, § 264.174 and § 270.14(b)(5))

The permittee shall inspect the areas and items listed in item (a) below at least weekly for deterioration or malfunction which may cause discharge of hazardous waste or a threat to human health or the environment. The results of the inspection shall be maintained for at least three (3) years from the date of inspection at the Unilever Research U.S. facility.

(a) Container Storage Area

1. All containers sealed
2. Any leaking containers or spills
3. Any deteriorating containers
4. Any containers swollen or bulged
5. Any containers concave due to internal vacuum building up
6. Any containers with corrosion
7. All containers properly labeled, identified and stacked
8. All containers compatible with waste stored in them
9. Indications of cracks or leaks in concrete floor, concrete sump, concrete curbs, or concrete vehicle ramps
10. Aisle space access - minimum 18"

(b) All container storage safety/emergency equipment shall be inspected as outlined in Inspection Plan section of the Part B permit application referenced in Condition 12(b) of Section II of this permit.

(c) The permittee shall remedy any deterioration or malfunction of equipment or structures which the inspection reveals, on a schedule which ensures that the problem does not lead to an environmental or human health hazard. Where a hazard is imminent or has already occurred, remedial action must be taken immediately.

(d) A log shall be kept of the inspections and any remediation actions described under paragraphs (a) through (c) above to confirm adequate maintenance of the hazardous waste storage area and all appurtenances.

5. Closure of Hazardous Waste Management Units (40 C.F.R. § 264.110)

- (a) At the time of final closure, the permittee shall close the Hazardous Waste Container Storage Unit in the manner that is stated in 40 C.F.R. § 264.110, and the closure plan referenced in Condition 12(b)7 of Section II of this permit, and the following:
1. All hazardous waste and hazardous waste residues shall be removed from the hazardous waste storage, unit authorized by this permit within ninety (90) days from the date of implementation of the closure plan;
  2. Decontamination of the hazardous waste structure authorized by this permit, within ninety (90) days after the removal of hazardous waste, by steam cleaning and rinsing with water. The steam condensate and rinse water resulting from the decontamination shall be collected and shipped off-site to an authorized facility;
  3. Soil sampling and analysis shall be conducted in accordance with the closure plan referenced at Condition 12(b)8 of Section II of this permit. Soil sampling shall be completed within one hundred eighty days (180) days from the date of implementation of the closure plan. Sampling shall not be conducted prior to the removal of all hazardous waste from the area undergoing closure. Thereafter, the permittee shall not place waste in the area undergoing closure until the Department has accepted the certifications of closure required by Condition 5(a)6 of Section III of this permit. The permittee shall notify in writing the party listed at Condition 11(a) of Section II of this permit at least fourteen (14) calendar days prior to initiation of soil sampling so that an auditor from the Department can be present during the soil sampling episode. Two (2) copies of all soil sampling analytical results required by this closure plan shall be submitted to the address listed at Condition 11(a) of Section II of this permit within ninety (90) days from the date of the sampling;
  4. Decontamination, sampling and analysis activities shall be conducted in accordance with the closure plan referenced at Condition 12(b)8 of Section II of this permit and as follows:
    - i. Testing of the final steam condensate/rinse water and wash water blank for the hazardous waste storage unit undergoing closure for the

parameters listed in the closure plan referenced at Condition 12(b)8 Section II of this permit. Decontamination methods shall be repeated until the concentrations of the rinse water test parameters are equal to the amount present in a wash water blank. Rinse water and wash water blanks analysis results shall be submitted to the address listed in Condition 11 of Section II of this permit within sixty (60) days from the date of sampling;

- ii. Structures that required decontamination by the closure plan referenced at Condition 12(b)8 of Section II of this permit shall be retained on-site until the facility has received a written determination from the Department that the permittee has satisfied the closure performance standard and the decontamination analytical results are acceptable to the Department, unless the permittee decides to dispose of the structures as hazardous waste; and
  - iii. All waste materials generated from the decontamination and sampling of the hazardous waste management unit shall be collected and disposed of properly.
- 5. Closure activities shall be completed within one hundred eight (180) days from the date of implementation of the closure plan;
  - 6. Within two hundred forty (240) days from the date of implementation of the closure plan, when closure is completed, the owner or operator shall submit to the Department, at the address listed in Condition 11(a) of Section II of this permit, by registered mail, a certification that the hazardous waste management unit or facility, as applicable, has been closed in accordance with the specifications in the approved closure plan and the conditions of this permit. The certification must be signed by the owner or operator and signed and sealed by an independent professional engineer registered in the State of New Jersey.
- (b) The permittee shall keep a copy of the closure plan and all revisions to the plan at the facility until closure is completed.
  - (c) The permittee shall amend the closure plan any time changes in operating plans or facility design affect the closure plan or whenever there is a change in the expected year of closure of the facility. The permittee must comply with the requirement cited at 40 C.F.R. 9

264.112(c)(3) for amendment of closure plan.

- (d) The permittee shall notify the Department at least forty five (45) days prior to the date the permittee expects to begin closure, except in cases where the facility's permit is terminated or if the facility is otherwise ordered by judicial decrees or compliance order to close. The date when the owner or operator "expects to begin closure" shall be within thirty (30) days after the date on which the owner or operator expects to receive the final volume of wastes.

**DEED NOTICE**

This Deed Notice is made as of the <sup>9th day</sup> day of October, 2012, by *i.Park Edgewater, LLC* and *Edgewater Lofts LLC* (together with his/her/its/their successors and assigns, collectively "Owner").

1. **THE PROPERTY.** *i.Park Edgewater, LLC* and *Edgewater Lofts LLC* are the owners in fee simple of certain real property designated as Blocks 98, 99 and 100 and Lot 1.3 on the tax map of the Borough of Edgewater, Bergen County; the New Jersey Department of Environmental Protection Program Interest Number (Preferred ID) for the site 015891; and the property is more particularly described in Exhibit A, which is attached hereto and made a part hereof (the "Property").

2. **DEPARTMENT'S ASSIGNED BUREAU.** The Bureau of Industrial Site Remediation was the New Jersey Department of Environmental Protection program that was responsible for the oversight of the remediation of the Property. The matter was Case No. #E20030062 and E20040267.

3. **SOIL CONTAMINATION.** *i.Park Edgewater, LLC* has remediated contaminated soil at the Property, and the New Jersey Department of Environmental Protection approved a remedial action on the 9 day of July 2012, such that soil contamination remains in certain areas of the Property which contains contaminants in concentrations that do not allow for the unrestricted use of the Property; this soil contamination is described, including the type, concentration and specific location of such contaminants, in Exhibit B, which is attached hereto and made a part

hereof. As a result, there is a statutory requirement for this Deed Notice and engineering controls in accordance with N.J.S.A. 58:10B-13.

4. **CONSIDERATION.** In accordance with the New Jersey Department of Environmental Protection's approval of the remedial action work plan for the remediation of the site which included the Property, and in consideration of the terms and conditions of that approval, and other good and valuable consideration, Owner has agreed to subject the Property to certain statutory and regulatory requirements which impose restrictions upon the use of the Property, to restrict certain uses of the Property, and to provide notice to subsequent owners, lessees and operators of the restrictions and the monitoring, maintenance, and biennial certification requirements outlined in this Deed Notice and required by law, as set forth herein.

5A. **RESTRICTED AREAS.** Due to the presence of these contaminants, the Owner has agreed, as part of the remedial action for the Property, to restrict the use of certain parts of the Property (the "Restricted Areas"); a narrative description of these restrictions, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C, which is attached hereto and made a part hereof. The Owner has also agreed to maintain a list of these restrictions on site for inspection by governmental enforcement officials.

5B. **ENGINEERING CONTROLS.** Due to the presence and concentration of these contaminants, the Owner has also agreed, as part of the remedial action for the Property, to the placement of certain engineering controls on the Property; a narrative description of these engineering controls, along with the associated monitoring and maintenance activities and the biennial certification requirements are provided in Exhibit C.]

**6A. ALTERATIONS, IMPROVEMENTS, AND DISTURBANCES.**

i. Except as provided in Paragraph 6B, below, no person shall make, or allow to be made, any alteration, improvement, or disturbance in, to, or about the Property which disturbs any engineering control at the Property without first obtaining the express written consent of the Department of Environmental Protection. Nothing herein shall constitute a waiver of the obligation of any person to comply with all applicable laws and regulations including, without limitation, the applicable rules of the Occupational Safety and Health Administration. To request the consent of the Department of Environmental Protection, contact:

Department of Environmental Protection  
Division of Remediation Management and Response  
Bureau of Operation, Maintenance, and Monitoring  
Deed Notice Inspection Program  
P.O. Box 413  
401 E. State Street  
Trenton, NJ 08625-0413

ii. Notwithstanding subparagraph 6A.i., above, the Department of Environmental Protection's express written consent is not required for any alteration, improvement, or disturbance provided that the owner, lessee or operator:

(A) Notifies the Department of Environmental Protection of the activity by calling the DEP Hotline, at 1-877-WARN-DEP or 1-877-927-6337, within twenty-four (24) hours after the beginning of each alteration, improvement, or disturbance;

(B) Restores any disturbance of an engineering control to pre-disturbance conditions within sixty (60) calendar days after the initiation of the alteration, improvement or disturbance;

(C) Ensures that all applicable worker health and safety laws and regulations are followed during the alteration, improvement, or disturbance, and during the restoration;

(D) Ensures that exposure to contamination in excess of the applicable remediation standards does not occur;

(E) Submits a written report, describing the alteration, improvement, or disturbance, to the Department of Environmental Protection within sixty (60) calendar days after the end of each alteration, improvement, or disturbance. The owner, lessee or operator shall include in the report the nature of the alteration, improvement, or disturbance, the dates and duration of the alteration, improvement, or disturbance, the name of key individuals and their affiliations conducting the alteration, improvement, or disturbance, a description of the notice the Owner gave to those persons prior to the disturbance, the amounts of soil generated for disposal, if any, the final disposition and any precautions taken to prevent exposure. The owner, lessee, or operator shall submit the report to:

Department of Environmental Protection  
Division of Remediation Management and Response  
Bureau of Operation, Maintenance, and Monitoring  
Deed Notice Inspection Program  
P.O. Box 413  
401 E. State Street  
Trenton, NJ 08625-0413

**6B. EMERGENCIES.** In the event of an emergency which presents, or may present, an unacceptable risk to the public health and safety, or to the environment, any person may temporarily breach any engineering control provided that that person complies with each of the following:

i. Immediately notifies the Department of Environmental Protection of the emergency, by calling the DEP Hotline at 1-877-WARN-DEP or 1-877-927-6337;

ii. Limits both the actual disturbance and the time needed for the disturbance to the minimum reasonably necessary to adequately respond to the emergency;

iii. implements all measures necessary to limit actual or potential, present or future risk of exposure to humans or the environment to the contamination;

iv. Notifies the Department of Environmental Protection when the emergency has ended by calling the DEP Hotline at 1-877-WARNDEP or 1-877-927-6337;

v. Restores the engineering control to the pre-emergency conditions as soon as possible, and provides a written report to the Department of Environmental Protection of such emergency and restoration efforts within sixty (60) calendar days after completion of the restoration of the engineering control. The report must include all information pertinent to the emergency, potential discharges of contaminants, and restoration measures that were implemented, which, at a minimum, should specify: (a) the nature and likely cause of the emergency, (b) the potential discharges of or exposures to contaminants, if any, that may have occurred, (c) the measures that have been taken to mitigate the effects of the emergency on human health and the environment, (d) the measures completed or implemented to restore the engineering control, and (e) the changes to the engineering control or site operation and maintenance plan to prevent reoccurrence of such conditions in the future. The owner, lessee, or operator shall submit the report to:

Department of Environmental Protection  
Division of Remediation Management and Response  
Bureau of Operation, Maintenance, and Monitoring  
Deed Notice Inspection Program  
P.O. Box 413  
401 E. State Street  
Trenton, NJ 08625-0413

**7A. MONITORING AND MAINTENANCE OF DEED NOTICE, AND PROTECTIVENESS CERTIFICATION.** The persons in any way responsible, pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11a et seq., for the hazardous substances that remain at the Property, the persons responsible for conducting the remediation, the Owner, and the subsequent owners, lessees, and operators, shall monitor and maintain this Deed Notice, and certify to the Department on a biennial basis that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment. The subsequent owners, lessees and operators have this obligation only during their ownership, tenancy, or operation. The specific obligations to monitor and maintain the deed notice shall include all of the following:

i. Monitoring and maintaining this Deed Notice according to the requirements in Exhibit C, to ensure that the remedial action that includes the Deed Notice continues to be protective of the public health and safety and of the environment;

ii. Conducting any additional remedial investigations and implement any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the site prior to the date that the certification is due

to the Department pursuant to iii, below, in order to ensure that the remedial action that includes this Deed Notice remains protective of the public health and safety and of the environment.

iii. Certify to the Department of Environmental Protection as to the continued protectiveness of the remedial action that includes this Deed Notice, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the deed notice that indicates when the deed notice was recorded:

**7B. MONITORING AND MAINTENANCE OF ENGINEERING CONTROLS, AND PROTECTIVENESS CERTIFICATION.** The persons in any way responsible, pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11a et seq., for the hazardous substances that remain at the Property, the person responsible for conducting the remediation, and, the Owner, and the subsequent owners, lessees, and operators, shall maintain all engineering controls at the Property and certify to the Department on a biennial basis that the remedial action of which each engineering control is a part remains protective of the public health and safety and of the environment. The subsequent owners, lessees and operators have this obligation only during their ownership, tenancy, or operation. The specific obligations to monitor and maintain the engineering controls shall include the following:

i. Monitoring and maintaining each engineering control according to the requirements in Exhibit C, to ensure that the remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment;

ii. Conducting any additional remedial investigations and implement any additional remedial actions, that are necessary to correct, mitigate, or abate each problem related to the protectiveness of the remedial action for the Property prior to the date that the certification is due to the Department pursuant to iii, below, in order to ensure that the remedial action that includes the engineering control remains protective of the public health and safety and of the environment.

iii. Certify to the Department of Environmental Protection as to the continued protectiveness of the remedial action that includes the engineering control, on a form provided by the Department and consistent with N.J.A.C. 7:26C-1.2 (a)1, every two years on the anniversary of the date stamped on the deed notice that indicates when the deed notice was recorded.

**8. ACCESS.** The Owner and the subsequent owners, lessees and operators agree to allow the Department, its agents and representatives access to the Property to inspect and evaluate the continued protectiveness of the remedial action that includes this Deed Notice and to conduct additional remediation to ensure the protection of the public health and safety and of the environment if persons responsible for monitoring the protectiveness of the remedial action, as described in Paragraph 7, above, fail to conduct such remediation pursuant to this Deed Notice as required by law. The Owner, and the subsequent owners and lessees, shall also cause all leases,

subleases, grants, and other written transfers of an interest in the Restricted Areas to contain a provision expressly requiring that all holders thereof provide such access to the Department.

#### 9. NOTICES.

i. The Owner and the subsequent owners and lessees, shall cause all leases, grants, and other written transfers of an interest in the Restricted Areas to contain a provision expressly requiring all holders thereof to take the Property subject to the restrictions contained herein and to comply with all, and not to violate any of the conditions of this Deed Notice. Nothing contained in this Paragraph shall be construed as limiting any obligation of any person to provide any notice required by any law, regulation, or order of any governmental authority.

ii. Owner and all subsequent owners and lessees shall notify any person intending to conduct invasive work or excavate within the Restricted Areas at the Property, including, without limitation, tenants, employees of tenants, and contractors of the nature and location of contamination in the Restricted Areas, and, of the precautions necessary to minimize potential human exposure to contaminants.

iii. The Owner and the subsequent owners shall provide written notice to the Department of Environmental Protection at least thirty (30) calendar days before the effective date of any conveyance, grant, gift, or other transfer, in whole or in part, of the owner's interest in the Restricted Area.

iv. The Owner and the subsequent owners shall provide written notice to the Department within thirty (30) calendar days following the owner's petition for or filing of any document initiating a rezoning of the Property. The Owner and the subsequent owners shall submit the written notice to:

Department of Environmental Protection  
Division of Remediation Management and Response  
Bureau of Operation, Maintenance, and Monitoring  
Deed Notice Inspection Program  
P.O. Box 413  
401 E. State Street  
Trenton, NJ 08625-0413.

#### 10. ENFORCEMENT OF VIOLATIONS.

i. This Deed Notice itself is not intended to create any interest in real estate in favor of the Department of Environmental Protection, nor to create a lien against the Property, but merely is intended to provide notice of certain conditions and restrictions on the Property and to reflect the regulatory and statutory obligations imposed as a conditional remedial action for this site.

ii. The restrictions provided herein may be enforceable solely by the Department against any person who violates this Deed Notice. To enforce violations of this Deed Notice, the

Department may initiate one or more enforcement actions pursuant to N.J.S.A. 58:10-23.11u and require additional remediation and assess damages pursuant to N.J.S.A. 58:10-23.11g.

11. **SEVERABILITY.** If any court of competent jurisdiction determines that any provision of this Deed Notice requires modification, such provision shall be deemed to have been modified automatically to conform to such requirements. If a court of competent jurisdiction determines that any provision of this Deed Notice is invalid or unenforceable and the provision is of such a nature that it cannot be modified, the provision shall be deemed deleted from this instrument as though the provision had never been included herein. In either case, the remaining provisions of this Deed Notice shall remain in full force and effect.

12. **SUCCESSORS AND ASSIGNS.** This Deed Notice shall be binding upon Owner and upon Owner's successors and assigns, and subsequent owners, lessees and operators while each is an owner, lessee, or operator of the Property.

13. **MODIFICATION AND TERMINATION.**

i. Any person may request in writing, at any time, that the Department modify this Deed Notice where performance of subsequent remedial actions, a change of conditions at the Property, or the adoption of revised remediation standards suggest that modification of the Deed Notice would be appropriate.

ii. Any person may request in writing, at any time, that the Department terminate this Deed Notice because the conditions which triggered the need for this Deed Notice are no longer applicable.

iii. This Deed Notice may be revised or terminated only upon filing of an instrument, executed by the Department, in the office of the County Clerk of Bergen County, New Jersey, expressly modifying or terminating this Deed Notice.

14A. **EXHIBIT A.** Exhibit A includes the following maps of the Property and the vicinity:

i. Exhibit A-1: Site Location Map - A map that identifies the location of the Site and important geographical features in the area of the Property;

ii. Exhibit A-2: Metes and Bounds Description - A metes and bounds description of the Property, including reference to tax lot and block numbers for the Property;

iii. Exhibit A-3: Property Map - A scaled map of the Property, scaled at one inch to 200 feet or less, and if more than one map is submitted, the maps shall be presented as overlays, keyed to a base map; and the Property Map shall include diagrams of major surface topographical features such as buildings, roads, and parking lots.

14B. **EXHIBIT B.** Exhibit B includes the following descriptions of the Restricted Areas:

**i. Exhibit B-1: Restricted Area Map - A separate map for each restricted area that includes:**

**(A) As-built diagrams of each engineering control, including caps, fences, slurry walls, ground water monitoring wells, and ground water pumping system;**

**(B) As-built diagrams of any buildings, roads, parking lots and other structures that function as engineering controls; and**

**(C) Designation of all soil and sediment sample locations within the restricted areas that exceed any soil or sediment standard that are keyed into one of the summary data tables on the figures described in the following paragraph.**

**ii. Exhibit B1-1 through B1-8: Restricted Area Summary Data Table Figures - A separate summary table for each sample location that includes:**

**(A) Sample location designation from Restricted Area map (Exhibit B-1);**

**(B) Sample depth below ground surface;**

**(C) Name of each detected contaminant;**

**(D) The restricted direct contact soil clean up criteria and impact to groundwater soil clean up criteria for each contaminant in the table; and**

**(E) The remaining concentration of each contaminant at each sample location at each depth or if historic fill, include data from the Department's default concentrations at N.J.A.C. 7:26E-4.6, Table 4-2.**

**14C. EXHIBIT C. Exhibit C includes narrative descriptions of the institutional controls and engineering controls as follows:**

**i. Exhibit C-1: Deed Notice as Institutional Control: Exhibit C-1 includes a narrative description of the restriction and obligations of this Deed Notice that are in addition to those describe above, as follows:**

**(A) General Description of this Deed Notice;**

**(1) Description and estimated size of the Restricted Areas as described above;**

**(2) Description of the restrictions on the Property by operation of this Deed Notice; and**

**(3) The objective of the restrictions.**

(B) Description of the monitoring necessary to determine whether:

(1) Any disturbances of the soil in the Restricted Areas did not result in the unacceptable exposure to the soil contamination;

(2) There have been any land use changes subsequent to the filing of this Deed Notice or the most recent biennial certification, whichever is more recent;

(3) The current land use on the Property is consistent with the restrictions in this Deed Notice;

(4) Any newly promulgated or modified requirements of applicable regulations or laws apply to the site; and

(5) Any new standards, regulations, or laws apply to the site that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) Land use at the Property is consistent with the restrictions in this Deed Notice; and

(3) The remedial action that includes this Deed Notice continues to be protective of the public health and safety and of the environment.

ii. Exhibit C-2: Asphalt Capped Areas: Exhibit C-2 includes a narrative description of asphalt capped areas as follows:

(A) General Description of the engineering control:

(1) Description of the engineering control;

(2) The objective of the engineering control; and

(3) How the engineering control is intended to function.

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;

(4) This engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of this engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/ performance of this engineering control; and

(6) Any new standards, regulations, or laws apply to the site that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering controls continue to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

iii. Exhibit C-3: Concrete Capped Areas: Exhibit C-3 includes a narrative description of concrete capped areas as follows:

(A) General Description of the engineering control:

(1) Description of the engineering control;

(2) The objective of the engineering control; and

(3) How the engineering control is intended to function.

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;

(4) This engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of this engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/ performance of this engineering control; and

(6) Any new standards, regulations, or laws apply to the site that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering controls continue to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

iv. Exhibit C-4: Paver Capped Areas: Exhibit C-2 includes a narrative description of paver capped areas as follows:

(A) General Description of the engineering control:

(1) Description of the engineering control;

(2) The objective of the engineering control; and

(3) How the engineering control is intended to function.

**(B) Description of the operation and maintenance necessary to ensure that:**

**(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;**

**(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;**

**(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;**

**(4) This engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;**

**(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of this engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/ performance of this engineering control; and**

**(6) Any new standards, regulations, or laws apply to the site that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.**

**(C) Description of the following items that will be included in the biennial certification:**

**(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;**

**(2) The engineering controls continue to operate as designed; and**

**(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.**

**v. Exhibit C-5: Building Capped Areas: Exhibit C-5 includes a narrative description of building capped areas as follows:**

**(A) General Description of the engineering control:**

**(1) Description of the engineering control;**

**(2) The objective of the engineering control; and**

(3) How the engineering control is intended to function.

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;

(4) This engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of this engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/ performance of this engineering control; and

(6) Any new standards, regulations, or laws apply to the site that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering controls continue to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

vi. Exhibit C-6: Landscaped Capped Areas: Exhibit C-6 includes a narrative description of landscaped capped areas as follows:

(A) General Description of the engineering control:

(1) Description of the engineering control;

(2) The objective of the engineering control; and

(3) How the engineering control is intended to function.

(B) Description of the operation and maintenance necessary to ensure that:

(1) Periodic inspections of each engineering control are performed in order to determine its integrity, operability, and effectiveness;

(2) Each engineering control continues as designed and intended to protect the public health and safety and the environment;

(3) Each alteration, excavation or disturbance of any engineering control is timely and appropriately addressed to maintain the integrity of the engineering control;

(4) This engineering control is being inspected and maintained and its integrity remains so that the remedial action continues to be protective of the public health and safety and of the environment;

(5) A record of the self-inspection dates, name of the inspector, results of the inspection and condition(s) of this engineering control. Sampling, for example, may be necessary if it is not possible to visually evaluate the integrity/ performance of this engineering control; and

(6) Any new standards, regulations, or laws apply to the site that might necessitate additional sampling in order to evaluate the protectiveness of the remedial action which includes this Deed Notice, and conduct the necessary sampling.

(C) Description of the following items that will be included in the biennial certification:

(1) A monitoring report that describes the specific activities, pursuant to (A) and (B), above, conducted in support of the biennial certification of the protectiveness of the remedial action that includes this Deed Notice;

(2) The engineering controls continue to operate as designed; and

(3) The remedial action that includes the engineering control continues to be protective of the public health and safety and of the environment.

15. SIGNATURES. IN WITNESS WHEREOF, Owner has executed this Deed Notice as of the date first written above.

STATE OF New York )  
 ) SS.  
COUNTY OF Westchester )

I, the undersigned, a Notary Public, do hereby certify that JOSEPH COTTER, personally known to me or proved to me on the basis of satisfactory evidence to be the President of Edgewater Lofts LLC, a Delaware limited liability company (the "Company"), whose name is subscribed to the foregoing document, appeared before me this day in person and acknowledged that as such President he signed and delivered the said document on behalf of said Company, pursuant to authority given by the members of said Company, and as the free and voluntary act and deed of said Company, for the uses and purposes therein set forth.

Given under my hand and notarial seal, this 9 day of October, 2012.

## EXHIBIT A

### Site Description

#### *Site Vicinity*

The property is designated as a portion of Lot 1, Block 99 in the Borough of Edgewater, Bergen County, New Jersey (hereinafter "Site"). A site vicinity map locating the Property is attached as **Exhibit A-1**. The vicinity around the Site is developed primarily with commercial and residential properties.

#### *Property Description*

The Site has the address 45 River Road, Edgewater, New Jersey. A metes and bounds plan of the property is provided as **Exhibit A-2**.

The Site consists of all that certain tract, parcel and lot of land lying and being situated in the Borough of Edgewater, County of Bergen, State of New Jersey, being more particularly described as follows:

**BEGINNING** at a point in the northerly line of Lot 1.14, Block 99, said point being South 59°59'03" East a distance of 86.50 feet from the northwesterly corner of said Lot 1.14, as shown on a map entitled "LPark Edgewater, LLC, Proposed Lot 1.14 Subdivision Block 99, Lot 1, Borough of Edgewater, Bergen County, New Jersey," prepared by Paulus, Sokolowski and Sartor, LLC, and filed in the Bergen County Clerk's office on July 22, 2011 as map no. 9540, and running thence;

1. South 59°59'03" East a distance of 112.48 feet to a point, thence;
2. South 30°00'57" West a distance of 250.42 feet to a point, thence;
3. North 59°59'03" West a distance of 112.87 feet to a point, thence;
4. South 30°00'57" West a distance of 269.68 feet to a point, thence;
5. North 59°59'03" West a distance of 20.81 feet to a point, thence;
6. South 30°00'57" West a distance of 34.94 feet to a point, thence;
7. North 59°59'03" West a distance of 48.88 feet to a point, thence;
8. South 56°45'51" West a distance of 154.38 feet to a point thence;
9. South 30°00'57" West a distance of 177.16 feet to a point, thence;
10. South 24°49'33" East a distance of 10.23 feet to a point, thence;
11. South 59°59'03" East a distance of 10.47 feet to a point, thence;
12. South 30°00'57" West a distance of 33.71 feet to a point of curvature, thence;
13. On a curve to the left having a radius of 25.00 feet, an arc length of 39.27 feet, whose chord bears South 14°59'03" East a chord distance of 35.36 feet to a point of tangency, thence;

14. South  $59^{\circ}59'03''$  East a distance of 4.05 feet to a point, thence;
15. South  $30^{\circ}00'57''$  West a distance of 22.33 feet to a point, thence;
16. North  $59^{\circ}59'03''$  West a distance of 6.73 feet to a point, thence;
17. North  $12^{\circ}59'45''$  West a distance of 174.19 feet to a point of cusp, thence;
18. On a curve to the left having a radius of 1066.30 feet, an arc length of 57.24 feet whose chord bears North  $03^{\circ}53'48''$  East a chord distance of 57.23 feet to a non-tangential point, thence;
19. North  $65^{\circ}09'51''$  East a distance of 38.14 feet to a point of cusp, thence;
20. On a curve to the right having a radius of 1106.32 feet, an arc length of 386.96 feet whose chord bears North  $04^{\circ}16'00''$  West a chord distance of 384.99 feet to a non-tangential point, thence;
21. South  $59^{\circ}59'03''$  East a distance of 88.04 feet to a point, thence;
22. North  $30^{\circ}00'57''$  East a distance of 288.74 feet to a point, thence;
23. South  $59^{\circ}59'03''$  East a distance of 349.28 feet to a point, thence;
24. North  $30^{\circ}00'57''$  East a distance of 140.19 feet the **POINT OF BEGINNING**.

Containing an area of 227,276 square feet or 5.218 acres more or less.

## **EXHIBIT B**

### **Description of Affected Areas *Current***

#### ***Site Conditions***

The Site is approximately 5.218 acres parcel located on Lot 1.11, 1.13, 1.14 and 1.15. The Site is located in the southwest section of the Property situated on portions of Block 98, 99 and 100. The Property is currently in the process of redevelopment for mixed use residential and commercial purposes. Land use in the vicinity of the Property is a mix of residential, industrial and commercial uses. The ongoing redevelopment of the Hudson River waterfront in Edgewater has shifted the predominant land use from industrial to a mix of residential and commercial.

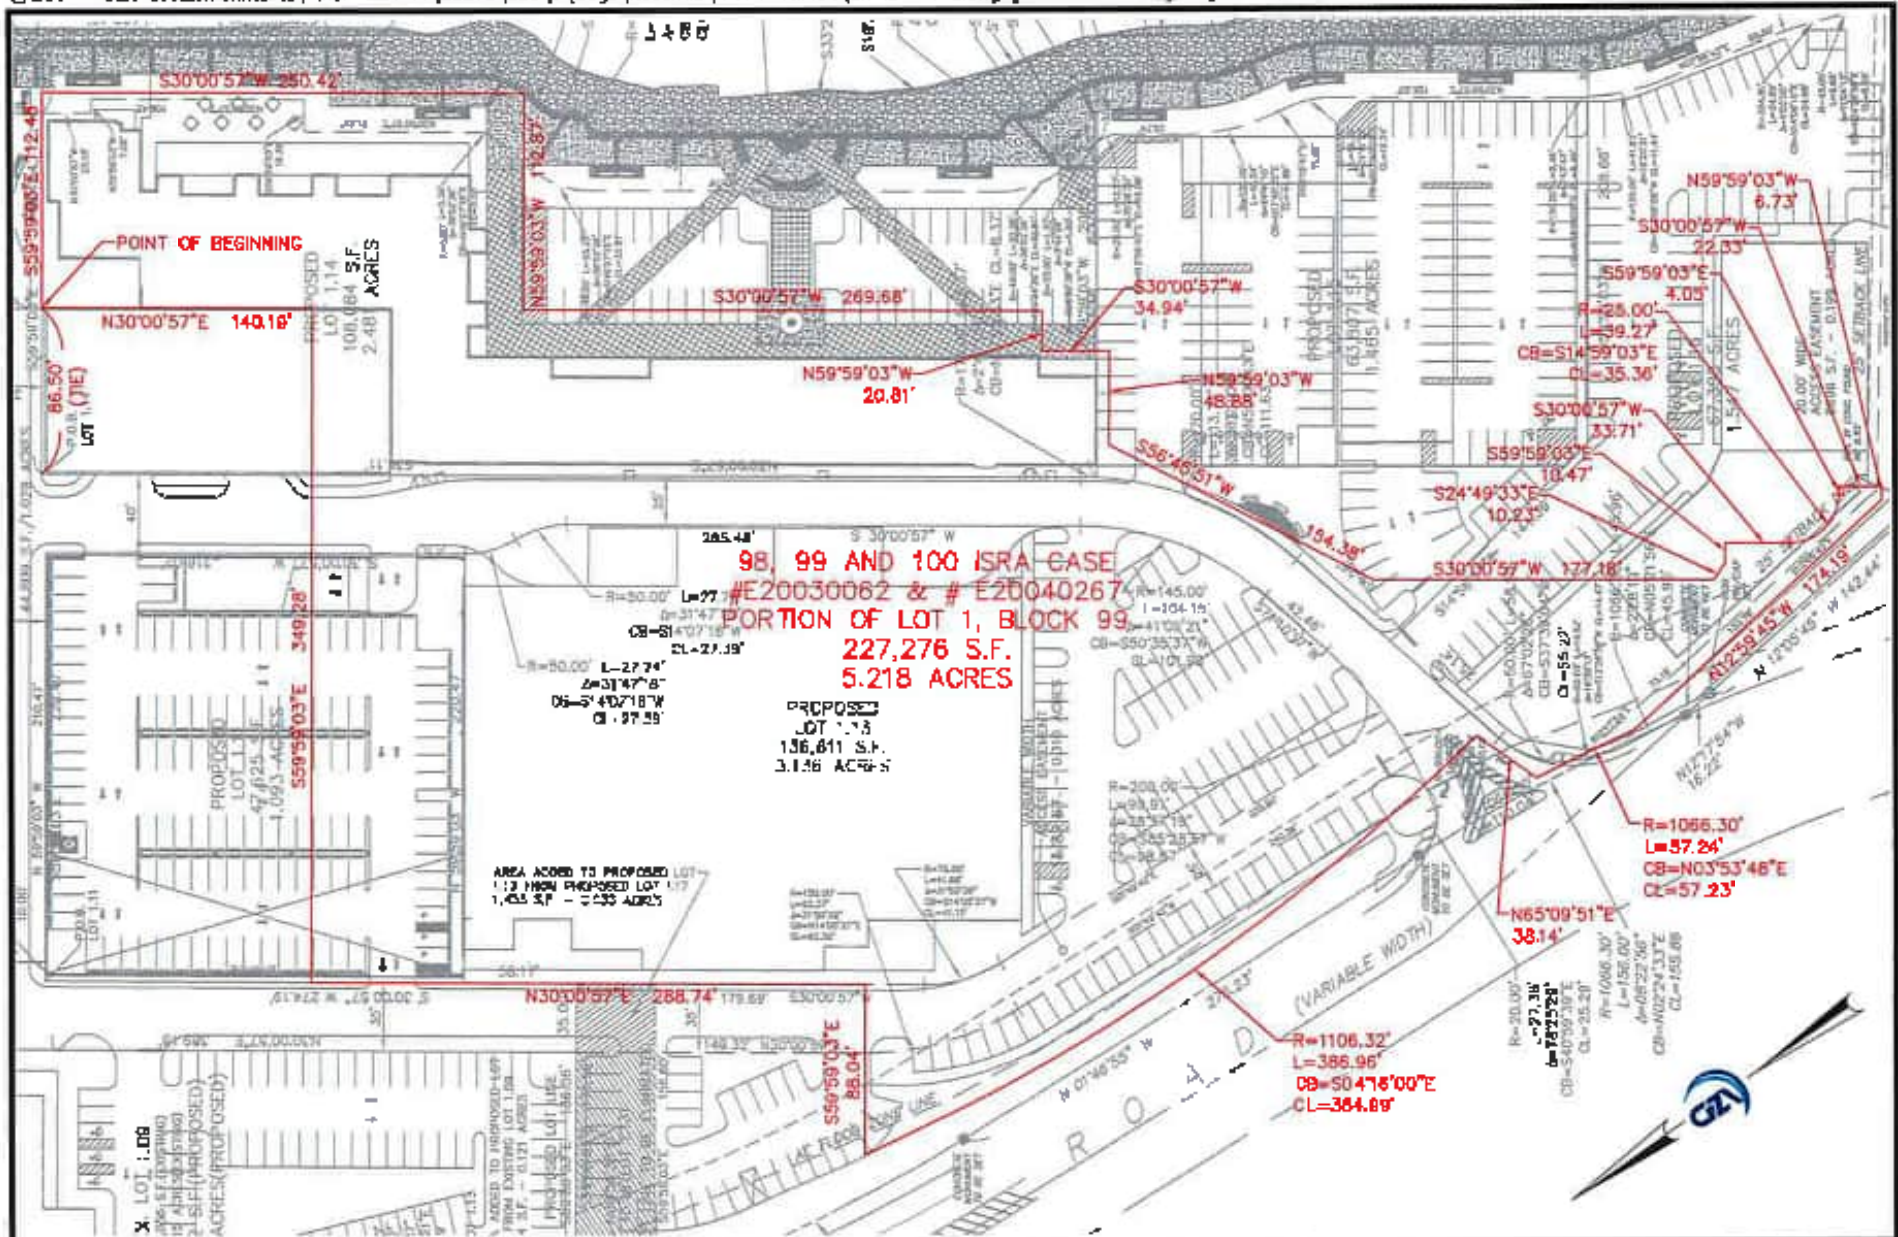

Proposed Site conditions are depicted on Exhibit A-3.

#### ***Commercial Use Area Descriptions***

The Property redevelopment plan calls for utilizing the Property as residential and retail commercial facility. One new structure (Supermarket) will be built partially on-Site as shown on Exhibit A-3. The proposed redevelopment plan incorporates engineered controls to eliminate exposure scenarios.

#### ***Remaining Contamination***

Soil sample locations are shown on **Exhibit B-1**. Exhibits **B1-1** through **B1-8** summarize the analytical results of soil samples and lists detected compounds and exceedances of the New Jersey Department of Environmental Protection's Soil Cleanup Criteria (NJDEP NRSCC or IGWSCC).

<b>Deed Notice</b>			

## **Exhibit C**

### **Institutional and Engineering Controls**

The Site has contaminants above the residential direct contact soil cleanup criteria; therefore the entire 3.6-acre parcel will be discussed in this deed notice. Institutional and engineering controls are both in place to prevent contact with the contaminated areas on-Site and to safeguard the health of the public and the environment due to the presence of historic fill material, residual roofing pitch, and soils with arsenic above direct contact soil remediation standards. Institutional controls include the zoning of the site and the recording of this Deed Notice. Engineering controls consist of building foundations, asphalt, concrete and vegetative caps and eliminating the potential for direct contact with contaminants.

The Site is currently being redeveloped for retail commercial purposes with buildings for retail spaces. Prior to the start of constructing the residential retail buildings, areas were excavated to remove pitch impacting groundwater and arsenic in soils over 600 ppm. These areas are shown on Exhibit B-1. Areas that were excavated were backfilled with clean fill.

The majority of the Site, with the exception of the footprint of the existing building, will be paved with an asphalt or concrete cap which will be used as parking lots and sidewalks as part of development. Various areas will also be capped with landscaping. These caps function as a barrier to keep the contaminated soil from spreading and resurfacing due to site activities or soil erosion.

All current and subsequent owners, operators, and lessees will be advised of the conditions on this Site and will be provided copies of the Deed Notice. Until the areas of contamination are remediated to the New Jersey unrestricted use standards, the institutional and engineering controls and restrictions shall remain in place.

#### ***Exhibit C-1: Deed Notice and Institutional Controls***

Institutional controls are in place to limit potential exposure to the soils in the restricted area. The Site is currently zoned for commercial purposes. Placement of this Deed Notice constitutes an institutional control, as described below.

This Deed Notice acts as an institutional control by placing use restrictions at the Site. First, the restricted areas must not be disturbed in order to prevent human contact with soil. The existing engineering controls shall remain in place and shall be maintained as needed to prevent contact with the contaminated soil. If the restricted area is to be disturbed, necessary and appropriate health and safety measures must be used when working within the restricted areas. At a minimum measures must include notifying the NJDEP and monitoring for dust and volatile organic compounds. A Soil Management Plan will be established prior to any soil intrusive work at the Site. Following any work,

the restricted areas must be completed with engineering controls providing equivalent protection against direct contact as do the existing controls, or remediated to unrestricted use levels.

***Exhibit C-2: Engineering Controls – Pavement Capped Areas***

The pavement cap covering the roads and parking lot areas of the Site, shall consist of compacted existing subgrade to 95% modified proctor density, 5-inch sub-base dense graded aggregate, 4-inch bituminous stabilized base course, topped with a 2-inches of bituminous concrete surface course.

***Exhibit C-3: Engineering Controls – Concrete Capped Areas***

The concrete cap covering the sidewalk areas, will consist of compacted existing subgrade, topped with a 4-inches of ¾-inch clean crushed stone and 4-inches class B concrete.

***Exhibit C-4: Engineering Controls – Paver Area***

The paver cap covering the walkway areas, will consist of compacted subgrade, a stabilization fabric layer, 6-inches of dense graded aggregate, 1-inch of concrete sand and topped with a 2-inch thick concrete precast pavers.

***Exhibit C-5: Engineering Controls – Building Capped Area***

The buildings will be brought up approximately 3-4 feet from ground surface with clean fill and gravel. The concrete slab will be 8-inches thick and have a gas vapor barrier and ventilation system consisting of 8-inches of crushed stone, a nonwoven drainage geotextile layer and a minimum of 25-mil HDPE and 5-inches of concrete on top of the gas vapor barrier and ventilation system. Schedule 40 PVC embedded in the coarse granular layer will elbow 90 degrees penetrating the concrete slab. At the 90 degree elbow there will be a sealant applied on top of the HDPE.

***Exhibit C-6: Engineering Controls – Landscape Capped Areas***

Landscaped areas will consist of a 6-inch drainage layer and 18-inches of certified clean fill/top soil to protect the public from direct exposure to contaminants in the soil. The vegetation will consist of evergreen trees such as, White Pine and Serbian Spruce, ornamental trees such as Shadblow Serviceberry and Himalayan Birch, shade trees such as Chanticleer Pear and shrubs such as Skyrocket Juniper, Morning Light Miscanthus, Blue Knoll Caryopteris.

A diagram of the engineering controls is included as Exhibit C-2 and C-6.

### ***Monitoring and Inspection***

At a minimum, the responsible party will monitor the engineering controls, including the Deed Notice, Fenced Areas and Capped Areas, (in the spring and in the fall) of the entire Site. During the site inspection, the integrity of the caps over the restricted use areas will be evaluated. Impermeable capped areas including the building foundation, sidewalks and asphalt will be examined for cracking, damage, loss and wear. Vegetative capped areas will be routinely evaluated for erosion and stressed vegetation. The responsible party will maintain a regular schedule for mowing and maintaining vegetative growth and reseeding/replanting on an as needed basis.

The results of each inspection and any maintenance of or disturbances to the engineering controls shall be documented either in a logbook retained on-Site and shall include dates of the inspection, name of the inspector, results of the inspection and condition of the engineering controls. If it is not possible to visually evaluate the integrity/performance of the engineering controls, sampling may be necessary. Documentation shall be maintained on-Site and made available to NJDEP on request.

If any new standards, regulations or laws applying to the Site necessitate additional sampling at the Site in order to evaluate the protectiveness of the remedial action a sampling plan will be established with a health and safety plan.

### ***Maintenance***

Maintenance will be conducted as necessary to maintain the integrity of the caps and fencing. Following the required inspections, as detailed above, the caps over the restricted use areas will be maintained, and any unacceptable cracks, damage, or missing pavement will be repaired or replaced. Fencing will be repaired, after inspection, as necessary to ensure unauthorized site access.

### ***Reporting***

Pursuant to N.J.S.A. 58:10B-13.1, the responsible party shall submit to the NJDEP, a certification of the continued protectiveness of the institutional and engineering controls, on a biennial schedule. The biennial certification shall document the specific monitoring and maintenance activities conducted to maintain the engineering controls; that the current land use at the Property is consistent with the restrictions in the Deed Notice; and that the institutional and engineering controls at the Property continue to be protective of the public health and safety and of the environment.

- The Gas Vapor Barrier System including membrane, surface/protective layer, leveling agent, and other auxiliary material, labor, and materials not listed to penetration detail/notes, shall be as submitted by the Contractor and approved by the Owner and Engineer.
- Gas vent header piping shall consist of both perforated and non-perforated 2-inch inside diameter schedule 40 PVC pipe. PVC Ventilation piping shall be manufactured from a Type I, Grade 1 Polyvinyl Chloride (PVC) compound with a wall classification of 12434 per ASTM. The Pipe shall be manufactured to strict compliance to ASTM D2688 (extra application), consistently meeting and/or exceeding the quality tolerance and requirements of these standards with regard to material, manufacturing, joint pressure, finishing, and material quality. All pipe shall be stored indoors after production at the manufacturing site until shipped. This pipe shall carry the National Sanitation Foundation seal of approval for potable water applications. All PVC piping shall be embedded in a venting layer of crushed stone and shall be wrapped in filter sock. All pipe shall be as manufactured by Marvel Plastics, Inc. or approved equivalent.
- Installation of the vapor barrier system shall be performed in strict accordance with the National Sanitation Foundation recommendations. A protective surface or protection layer shall be installed over the installed vapor barrier prior to the vapor barrier material installation, unless specifically indicated from the manufacturer's recommendations. Perforated metal mesh around personnel penetrating compatible with the vapor barrier and in accordance with the material manufacturer.
- Crushed stone venting layer shall be composed of rounded particles. Stone shall have the following gradation:
 

Sieve Size	Percent Passing by Weight
3"	100
1 1/2"	80-100
1"	35-70
1/2"	0-15
1/4"	0-5

 Material shall be uniform in quality and free of wood, iron, clay, dirt, roots, bark, and any other deleterious material. Material shall not contain salts or foreign materials of any kind.
- This drawing to be used in conjunction with architectural, structural, and mechanical drawings.
- If the contractor decides to utilize steel deck application by GZA or Pre-Frame application by GZA or installation to the HDPE, a steel deck application, the use proposed system shall be submitted to the engineer for review.

## **Exhibit D**

### **As-Built Conditions Engineering Controls**

The entire Site contains contaminants above the non-residential direct-contact soil cleanup criteria. Soft pitch was excavated from areas around the former groundwater monitoring wells MW-1 and MW-70 and around the boring GZA-156. PCB impacted soils above 10 ppm were excavated from areas around IB-10 and GZA-34/MW-54. Areas that were excavated were filled with 1/4-inch gravel. Impermeable caps and a vegetative cap will completely cover the Site.

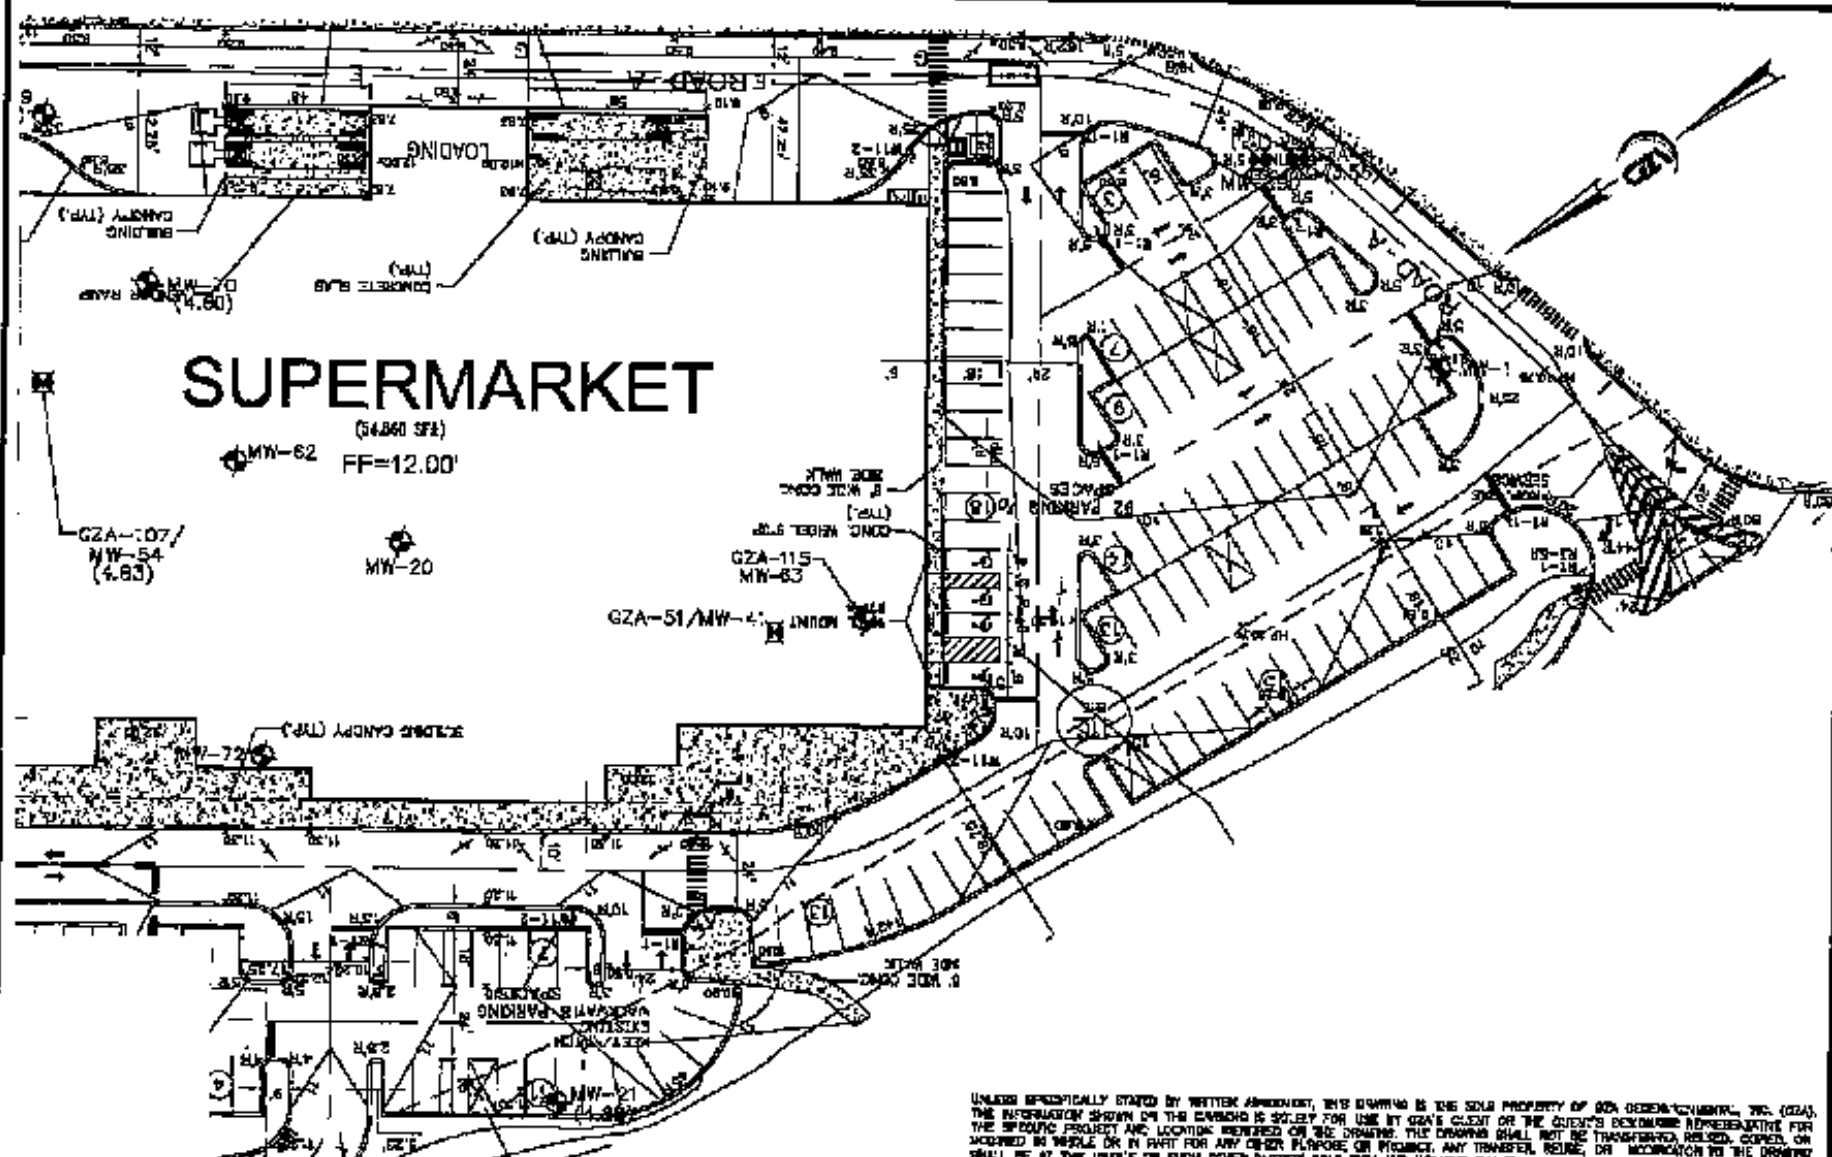

#### ***Capped Areas***

The entire Site will be covered with pavement, concrete sidewalks, pavers, landscaping and/or the Supermarket building, as shown on **Exhibit D-1**.

The building will be brought up approximately 3-4 feet from ground surface with clean fill and gravel. The concrete slab will be 8-inches thick and have a gas vapor barrier and ventilation system consisting of 8-inches of crushed stone, a nonwoven drainage geotextile layer and a minimum of 25-mil HDPE and 5-inches of concrete on top of the gas vapor barrier and ventilation system. Schedule 40 PVC embedded in the coarse granular layer will elbow 90 degrees penetrating the concrete slab. At the 90 degree elbow there will be a sealant applied on top of the HDPE.

The pavement cap covering the roads and parking lot areas of the Site, shall consist of compacted existing subgrade to 95% modified proctor density, 5-inch sub-base dense graded aggregate, 4-inch bituminous stabilized base course, topped with a 2-inches of bituminous concrete surface course. The concrete cap covering the sidewalk areas, will consist of compacted existing subgrade, topped with a 4-inches of 3/4-inch clean crushed stone and 4-inches class B concrete. The paver cap covering the walkway areas, will consist of compacted subgrade, a stabilization fabric layer, 6-inches of dense graded aggregate, 1-inch of concrete sand and topped with a 2-inch thick concrete precast pavers.

Landscaped areas will consist of a 6-inch drainage layer and 18-inches of certified clean fill/top soil to protect the public from direct exposure to contaminants in the soil. The vegetation will consist of evergreen trees such as, White Pine and Serbian Spruce, ornamental trees such as Shadblow Serviceberry and Himalayan Birch, shade trees such as Chanticleer Pear and shrubs such as Skyrocket Juniper, Morning Light Miscanthus, Blue Knoll Caryopteris.

### Remedial Action Report Approval – RAA's 1, 2 and 5

RE: Unilever Research & Development Inc., AKA iPark  
**Remedial Action Areas 1, 2 and 5**  
45 River Rd  
Edgewater, Bergen  
PI #: 015891  
Activity Number: RPC120001

Dear Mr. Cotter:

The New Jersey Department of Environmental Protection (Department) has completed a review of the Remedial Action Report for Remedial Action Areas 1, 2 and 5 (RAR for RAA's 1, 2 and 5) dated August 2012 and Response to DEP comments Technical Memo dated February 23, 2017 (Technical Memo), submitted pursuant to the Site Remediation Reform Act (N.J.S.A.58:10C-1 et seq.), the Administrative Requirements for the Remediation of Contaminated Sites (N.J.A.C. 7:26C), and the NJDEP Technical Requirements for Site Remediation at N.J.A.C. 7:26E. The Department has determined that the RAR for RAA's 1, 2 and 5 and the Technical Memo are in compliance with the Technical Requirements for Site Remediation, N.J.A.C. 7:26E and other applicable requirements. The Department hereby approves the RAR for RAA's 1, 2 and 5 and the Technical Memo, effective the date of this letter.

Excavation was conducted to address contaminated soils in RAA's 1, 2 and 5, and installation of vapor barriers and passive venting systems are planned for all new building construction. A final soil cap has been installed and institutional controls will include deed notices and Soils Remedial Action Permits for each individually owned parcel. Groundwater monitoring wells were replaced following remediation in these remedial action areas, however final documentation of groundwater remedial actions, establishment of a CEA and an application for a Remedial Action Permit for Groundwater for the entire site will be included with the Remedial Action Report for RAA #4. A RCRA public notice will be issued for the entire site when all RAA's are completed.

Pursuant to the schedule applicable to the site, iPark shall submit applications for Remedial Action Permits for Soils within 30 days of final recording of the deed notices. For your convenience, the regulations concerning the Department's remediation requirements can be found at <http://www.state.nj.us/dep/srp/regs/> .

If you require copies of Department Guidance Documents or applications, many of these are available on the internet <http://www.state.nj.us/dep/srp>. Thank you for your cooperation in this matter. If you have any questions, please call Erica Bergman at (609)292-7406, or email at [erica.bergman@dep.nj.gov](mailto:erica.bergman@dep.nj.gov).

Sincerely,

Gwen B. Zervas, Section Chief

Spencer Savings Bank  
611 River Drive  
Elmwood Park, NJ 07410  
Attn: Mr. L. David DeNooyer V. P. & CRE Team Leader

Subject: Phase I Environmental Site Assessment  
45 River Rd Urban Renewal Associates, LLC  
8 Somerset Ln.  
Edgewater, NJ 07020  
Block: #99 Lot: #1.19 & 1.13

Dear Mr. DeNooyer

At your request, Horizon Environmental & Contracting, Inc. (HEC) completed a Phase I Environmental Site Assessment (PHI) of the above-referenced subject property. The property improvement consists of a six-story elevator residential building containing a total of seventy-six apartment units and a paved parking lot in front, to the left and the right. The building is currently under construction.

This assessment has been prepared for Spencer Savings Bank as part of its operating procedures in connection with the financing of the subject property. It was conducted to assess the environmental condition of the referenced property above and not intended to provide CERCLIS Landowner Liability Protections (LLP). It is primarily used as a commercially prudent or reasonable approach to conducting an inquiry designed to identify potential environmental concerns. The assessment has been done following the standards set forth by the ASTM 1528-14, Standard Practice for Phase I Environmental Site Assessment and modified to the requirements of the bank.

There are no intended or unintended third-party beneficiaries to this report, except Spencer Savings Bank.

Summary of findings and recommendations

From these observations, we offer no further recommendations at this time.

Based on these findings, there is a minimal risk that contamination exists at the site, and no further investigation is warranted.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices outlined in 40 CFR part 312.

Sincerely,

A handwritten signature in black ink, appearing to read "RD Rieselmann". The signature is written in a cursive, somewhat stylized font with a long horizontal stroke at the end.

Robert D. Rieselmann, President

# **I. INTRODUCTION**

## **1.1 Objectives of the Phase I Assessment**

Objectives of the Assessment are to:

- Determine if any hazardous or contaminated materials or conditions may be present in the building and construction materials, equipment, or materials used in on-site operations.
- Determine the potential for soil or groundwater contamination caused by present or past operations at the site, or contamination caused by neighboring facility operations.
- Identify any observed items in non-compliance with applicable environmental, local, state, or federal laws and regulations and specify corrective action required to bring a facility into compliance. This does not qualify as a complete environmental compliance audit but is limited to the apparent observations made during the assessment as described herein.

## **1.2 Format of the Assessment**

This Phase I Environmental Site Assessment has been prepared for Spencer Savings Bank as part of their operating procedures in connection with the financing of the subject property. This assessment has been conducted following the standards set forth by the American Society for Testing and Materials (ASTM 1527-13), Standard Practice for Phase I Environmental Site Assessments. It was conducted to identify the presence of “recognized environmental conditions” (RECs) at the target property (TP). The goal of the environmental assessment process as specified in ASTM E1527-13 is to identify RECs and, therefore, satisfies one of the requirements of the innocent landowner defense.

## **1.3 Assessment Methodology**

Chris Richardson of Spencer Savings Bank ordered this assessment on June 18, 2021.

Mr. Robert D. Rieselman, President of Horizon Environmental & Contracting, Inc. (HECI) and an Environmental Professional, conducted the following assessment activities:

- A. The assessment took place between the dates June 18, 2021 and July 14, 2021. Access to the site was arranged in advance. Mr. Robert Rieselman, President of HECI and an Environmental Professional, met with Tom Telagreeno and conducted the site reconnaissance on July 1, 2021.
- B. Records Review, including the review of the following:
  - Federal, state, county, and local government databases
  - County Health Department records
  - Local Building, Fire, and Health Departments records
  - Fire Insurance Maps
  - City Directories
  - Topographic Maps
  - Aerial Photographs
- C. Interviews with available relevant parties.
- D. Preparation of assessment report.

#### **1.4 Non-Scope Considerations**

This assessment included a preliminary visual survey of the building's (if any) interior and exterior for asbestos and lead-based paint and report radon tier level.

## **II. SITE RECONNAISSANCE**

### **2.1 Property Location**

The TP is situated west of Somerset Ln. and north of Pembroke Pl., in Edgewater, New Jersey.

County: Bergen

Tax Block: 99

Tax Lot: 1.19 & 1.13

General views of the property are shown in the photographs contained in *Appendix A*.

The plot location is shown on the tax map contained in *Appendix B*.

### **2.2 Description of Structures/Property Improvements**

The Target Property (TP) improvements are described as follows:

#### **General Description:**

The property improvement consists of a six-story elevator residential building containing a total of seventy-six apartment units and a paved parking lot in front, to the left and the right. The building is currently under construction.

#### **Construction Materials:**

Interior of the building contains laminate, ceramic tile and concrete floors, sheetrock walls, sheetrock ceilings, and vinyl frame windows.

The exterior of the building contains concrete and brick surfaces and flat tar roofing materials.

There are paved lots in front, to the left and to the right side of the building.

#### **Heating & Hot Water:**

Provided by electric PTAC units & gas water heaters.

### **2.3 Site Activities / Business Operations**

The property is residential use only. There are no business operations conducted on site other than those required for the normal maintenance and upkeep of the building and grounds.

None of the activities observed cause concern from an environmental standpoint as observed during the site visit.

### **2.4 The Neighborhood**

Properties immediately surrounding the target property (TP) are as follows:  
North of the TP: Parking garage

South of the TP: Residential across Pembroke Pl.

East of the TP: Residential across Somerset Ln.

West of the TP: Hotel

None of the activities observed in the neighboring properties cause concern for the impact on the target property from an environmental standpoint, as seen during the site visit.

## **2.5 Summary of Site Visit Findings**

### Polychlorinated Biphenyls (PCB)

None observed.

### Asbestos-Containing Material (ACM)

None observed.

### Aboveground and Underground Storage Tanks (AST & UST)

None observed.

### Water Sources & Discharges

Incoming Water:	Municipal water service
Wastewater:	Civil sewer service
Floor Drains:	N/A
Storm Drains:	N/A

### Solids and Hazardous Waste

The solid waste generated is stored in on-site trash receptacles and disposed of under contract with carting service. No hazardous waste was observed.

### Radon

The review of the Federal radon zone indicates that Bergen County has been designated as a tier 2 area and is considered as a moderate risk area.

### Paint

All observed painted surfaces were found to be in good condition.

### Vegetation/Stains

None observed

### Wetlands

N/A

## **Environmental Professional Comments to Summary of Site Visit Findings**

No recognized environmental conditions were encountered during the site visit.

### III. RECORDS REVIEW

#### 3.1 Government Historic Database Review

A review of reasonably ascertainable records was conducted to evaluate recognized, or possible environmental conditions for the TP based on current and past users of the property and adjoining properties. Environmental Data Resources (EDR), a commercial database service, was engaged in providing computer database records for review by **HECI**.

The following Federal databases were provided by EDR and reviewed by **HECI** during this assessment. The approximate minimum search distances from the Target Property (TP) according to ASTM E 1527-05 are also provided:

<b>FEDERAL ASTM STANDARD</b>		
<b>Database</b>	<b>Name</b>	<b>Min. Search Dist. (miles)</b>
NPL	National Priority List	1.0
Delisted NPL	National Priority List Deletions	.5
CERCLIS	Comprehensive Environmental Response, Compensation & Liability Information System	.5

FIC/ECR	Federal Institutional Control/Engineering Control Registries	Property Only
ERNS	Emergency Response Notification System	Property Only

In addition to the Federal ASTM Standard databases, supplemental Federal databases may have been provided by EDR and reviewed by **HECI** during this assessment. Relevant findings, if any, we're limited to the Target Property and adjoining properties. Please refer to section 3.2.1.2.2 for these findings, if appropriate.

EDR provided the following State/Tribal databases and reviewed by **HECI** during this assessment. The approximate minimum search distances from the Target Property (TP) according to ASTM E 1527-05 are also provided:

<b>STATE/TRIBAL ASTM STANDARD</b>		
<b>Database</b>	<b>Name</b>	<b>Min. Search Dist. (miles)</b>
SHWS	State Hazardous Waste-State Response	1.0
HWS RE-EVAL	State Hazardous Waste Re-Evaluation	1.0
NJ PF	Publicly Funded Cleanups Site Status Report	.5
NJ Release	Hazardous Material Incident Database	.5
NJ Spills	Spills	.5
SWF/LF	Solid Waste Facilities and Landfill Sites	.5
HIST LF	Historic Landfill Sites	.5
LUST	Leaking Underground Storage Tank Report	.5

<b>STATE/TRIBAL ASTM STANDARD (cont.)</b>		
<b>Database</b>	<b>Name</b>	<b>Min. Search Dist. (miles)</b>
HIST LUST	Historic Leaking Underground Storage Tank Sites	.5
UST	Regulated Underground Storage Tank Sites	Property & Adjoining
ENG CONTROL	Declaration Environmental Restriction/Deed Notice Sites	Property Only
INST CONTROL	Classification Exception Area Sites	Property Only
VCP	Voluntary Cleanup Program Sites	.5
NJ BROWNFIELDS	NJ Brownfields Sites	.5

In addition to the State/Tribal ASTM Standard databases, supplemental State/Tribal databases may have been provided by EDR and reviewed by **HECI** during this assessment. Relevant findings, if any, we're limited to the Target Property and adjoining properties. Please refer to section 3.2.1.2.4 for these findings, if appropriate.

The following Proprietary and Other Supplemental databases were provided by EDR and reviewed by **HECI** during this assessment. The search distances were limited to the Target Property and adjoining properties:

<b>PROPRIETARY &amp; OTHER HISTORICAL DATABASES</b>
<b>Database Name</b>
Former Manufactured Gas Plants (Coal Gas)
EDR Historical Auto Stations
EDR Historical Dry Cleaners
NJ, CT, NY, PA, RI, VT, and WI Manifest
Oil/Gas Pipelines
Electric Power Transmission Line Database
Sensitive Receptors (i.e., AHA Hospitals, Medical Centers, Nursing Homes, Public Schools, Private Schools, Daycare Centers)
Flood Zone Data
NWI – National Wetlands Inventory
State Wetlands Inventory
Scanned Digital USGS 7.5' Topographical Maps

### **3.2 Records Review Findings**

#### Government Records and Database Search

##### Target Property (TP):

##### Federal Records and Database Search

The TP was not identified in any of the researched Federal government records or databases.

##### State/Tribal Records and Database Search

The TP address was not identified in any of the researched State/Tribal government records or databases.

Surrounding Sites:

ASTM Standard Federal Records and Database Search

- A. NPL Site List (within approximate minimum search distance of 1 mile from TP):  
There are two (2) NPL facilities within the minimum search distance of the TP as follows:

<b>Elevation in relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	2	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.

- B. CERCLIS Site List (within approximate minimum search distance of 1/2 mile from TP):  
There are two (2) CERCLIS facilities within the minimum search distance of the TP as follows:

<b>Elevation in relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	2	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.

- C. CERCLIS NFRAP Site List (within approximate minimum search distance of 1/2 mile from TP):  
There are four (4) CERCLIS NFRAP facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	3	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	1	

- D. RCRA CORRACTS Facilities List (within approximate minimum search distance of 1 mile from TP):  
There are four (4) RCRA CORRACTS facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	3	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	1	

- E. RCRA non-CORRACTS TSD Facilities List (within approximate minimum search distance of 1/2 mile from TP):  
There are three (3) RCRA non-CORRACTS TSD facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	3	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	1	

F. RCRA Generators List (within approximate minimum search distance of 14 mile from TP):

There are three (3) RCRA-LQG Generators facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	2	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	1	

There is one (1) RCRA-SQG Generators facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	1	This site is not directly adjacent or in close proximity to the TP and as such no adverse environmental impacts is anticipated.

There are two (2) RCRA-VSQG Generators facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	2	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.

G. Federal Institutional Control Registry (property only):

There are two (2) Institutional Control facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	2	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.

H. Federal Engineering Control Registry (property only):

There are two (2) Engineering Control facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	2	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.

ASTM Supplemental Federal Records and Database Search

Only the property and adjacent property listings are discussed in this section.

No supplemental Federal records were found for the TP or adjoining properties.

ASTM Standard State/Tribal Records and Database Search

- A. SHWS (within approximate minimum search distance of 1 mile from TP):  
There are three hundred and eighty-five (385) SHWS facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	368	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	17	

- B. HWS RE-EVAL (within approximate minimum search distance of 1 mile from TP):  
There are eight (8) HWS RE-EVAL sites within the minimum search distance from the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	7	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	1	

- C. LUST (within approximate minimum search distance of 1/2 mile from TP)  
There are five (5) LUST facilities within the minimum search distance of the TP as follows:

<b>Elevation in Relation to TP</b>	<b>Number of sites</b>	<b>Comments</b>
Equal/Higher	5	These sites are located at a distance 1/8 of a mile or greater from the TP. As such no adverse environmental impacts to the TP are anticipated.

- D. HIST LUST (within approximate minimum search distance of 1/2 mile from TP)  
There are seven (7) HIST LUST facilities within the minimum search distance of the TP as follows:

Elevation in Relation to TP	Number of sites	Case Status
Equal/Higher	6	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	1	

- E. VCP (within approximate minimum search distance of 1/2 mile from TP):  
There are twelve (12) VCP sites within the minimum search distance from the TP as follows:

Elevation in Relation to TP	Number of sites	Comments
Equal/Higher	8	None of the sites are directly adjacent to the TP and as such no adverse environmental impacts are anticipated.
Lower	4	

- F. NJ BROWNFIELDS DATABASE (within approximate minimum search distance of 1/2 mile from TP):  
There are ten (10) NJ BROWNFIELDS sites within the minimum search distance from the TP as follows:

Elevation in Relation to TP	Number of sites	Comments
Equal/Higher	6	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	4	

- G. SWF/LF (within approximate minimum search distance of 1/2 mile from TP)  
There is one (1) SWF/LF facilities within the minimum search distance of the TP as follows:

Elevation in Relation to TP	Number of sites	Comments
Equal/Higher	1	This site is located at a distance 1/4 of a mile or greater from the TP. As such no adverse environmental impacts to the TP are anticipated.

- H. HIST LF (within approximate minimum search distance of 1/2 mile from TP)  
There is one (1) HIST LF facilities within the minimum search distance of the TP as follows:

Elevation in Relation to TP	Number of sites	Comments
Lower	1	This site is not directly adjacent or in close proximity to the TP and as such no adverse environmental impacts is anticipated.

- I. ENG CONTROLS (within approximate minimum search distance of 1/2 mile from TP):  
There are seven (7) ENG CONTROLS facilities within the minimum search distance of the TP as follows:

Elevation in Relation to TP	Number of sites	Comments
Equal/Higher	2	None of the sites are directly adjacent to or in close proximity the TP and as such no adverse environmental impacts are anticipated.
Lower	5	

- J. INST CONTROLS (within approximate minimum search distance of 1/2 mile from TP):  
 There are five (5) INST CONTROLS facilities within the minimum search distance of the TP as follows:

Elevation in Relation to TP	Number of sites	Comments
Equal/Higher	3	These sites are located at a distance 1/8 of a mile or greater from the TP. As such no adverse environmental impacts to the TP are anticipated.
Lower	2	

Additional Environmental Records and Database Search

Only the property and adjacent property listings are discussed in this section.

No Additional Environmental Records databases or records were found for the TP or adjoining properties.

EDR High-Risk Historical Records

Only the TP and adjoining property listings are discussed in this section.

No EDR High-Risk Historical\_records were found for the TP or adjoining properties.

Orphan Summary review

Only the property and adjacent property listings are discussed in this section.

Based upon the available information, it appears that none of the listings within the orphan sites are for the TP or adjoining properties.

Physical Source Setting Information

Based on the limited geology and hydrogeology study conducted during this assessment, we present the following findings:

The geology conditions for the general area containing the TP are classified as variable soil textures. The dominant soil composition is identified as URBAN LAND within the region, including the TP.

The hydrogeology conditions for the area containing the TP do not indicate the presence of any sites as potential sources of environmental impact within a ¼ mile radius of the TP.

There are water wells or public water supply sources within a ¼ mile radius of the TP.

No specific recognized environmental conditions were detected during the review of this particular data.

### Environmental Professional Comments to Government Records and Database Search

The potential for environmental impact to the TP from the surrounding and adjoining facilities identified in the various preceding databases are not considered to represent a significant Environmental concern.

Contained in *Appendix C* is an abridged copy of the EDR Radius Map Report, which includes information HECI believes is relevant to the reader of this Phase I Environmental report. HECI will be pleased to provide an electronic (PDF format) copy of the full map report if required.

### **3.3 County and Local Government Records Search**

#### County Government Records:

This office requested in writing for public records to the County Health Department. The file search conducted by the county revealed no environmental response actions or environmental records or violations. *Appendix D* contains a copy of the request letter and the department's response.

#### Local Government Records:

The local municipality was contacted in writing during this assessment to provide relevant information about the TP. No documents have been obtained to the date of the filling of this report. If any relevant environmental documents are obtained in the future, we will forward them with our comments as necessary. All documents obtained during this part of the evaluation, including all correspondence, are contained in *Appendix E*.

### Environmental Professional Comments to County & Local Government Records and Database Search

No specific environmental conditions or concerns were identified during a review of this information.

### **3.4 Historical Review**

Based on a review of reasonably available historical records (Aerial Photographs, Fire Insurance Maps, and Local City Directories), the following findings were encountered:

#### Aerial Photograph Review (*Appendix F*)

Aerial Photographs are available for the area containing the TP as follows:

<b>Year</b>	<b>Comments</b>
2017, 2013 & 2010	The target property appears to be vacant land. No structures are present.
2006, 1995, 1984, 1976, 1974, 1966, 1961 & 1954	A different structure appears in all photos and the area containing the subject property appears to be a combination of residential and commercial development for all years identified, which has become increasingly populated over the years. No discernible environmental issues detected in the area of the TP.
1951, 1940 & 1931	The target property appears to be vacant land. No structures are present.

Environmental Professional Comments to Aerial Photography

No specific recognized environmental conditions were detected during the review of this particular data.

Sanborn Fire Insurance Map Review (Appendix G)

Sanborn Maps are available for the area containing the TP as follows:

<b>Year</b>	<b>Comments</b>
2006, 2005, 2002, 2001, 1999, 1995, 1994, 1991, 1988, 1979, 1950, 1936, & 1910	The map does not include the subject property area.
1968	A large structure labeled Lever Bros Pilot Plant appears on the TP. There are no listings for the property in the Radius report.
1950, 1930, 1928, 1911 & 1900	No structures appear on the TP.
1922	Multiple structures appear on the TP.

Environmental Professional Comments to Sanborn Fire Insurance Map Review

No specific recognized environmental conditions were detected during the review of this particular data.

City Directory Review (Appendix H)

City Directories for the area containing the TP were reviewed as part of this project. The review of these directories indicated the following information for the target property (TP):

The following business operations were listed within this resource as having occupied the TP address within the years specified:

<b>Year</b>	<b>Listing</b>
2003	Koyama Shinji & Rachwal Wieslaw
1989	Blum Allen, Halstater & Sparano David
1986	Sabina, Blum Allen & Dec Mary
1981	Blum Allen
1976	Dudek Anthony & Levy Ted
1971	Marrocco
1960	Woltowicz
1937	Hazuda John Helen, Hazuda Olga & Michaline
1926 & 1920	Faley Samuel & Hazuda John

Environmental Professional Comments to City Directory Review

No specific recognized environmental conditions were detected during the review of this particular data.

Contained in *Appendix H* is an abridged copy of the EDR City Directory Report, which includes information HECL believes is relevant to the reader of this Phase I Environmental report. HECL will be pleased to provide an electronic (PDF format) copy of the full map report if required.

### **3.5 Topographical Information**

We have included herein as *Appendix I* topographic maps for the quadrangle containing the TP for the following years:

<b>Year</b>	<b>Comments</b>
2013-2014, 1995-1997, 1979-1981, 1966-1967, 1956, 1947, 1900, 1898 & 1897	The topography of the land surrounding and including the TP appears to have remained relatively unchanged in terms of land elevations and nearby bodies of water.
1940, 1935, 1905, 1903 & 1888	The Target Property is not depicted within these maps.

#### **Environmental Professional Comments to Topographical Information**

The topography of the land surrounding and including the TP appears to have remained relatively unchanged concerning land elevations and nearby bodies of water.

No specific environmental conditions or concerns were identified during a review of this information.

### **3.6 Vapor Encroachment Screen**

HECI conducted a vapor migration screening and did not identify any sites within the prescribed area that would indicate a REC related to vapor migration existing at the subject property.

### **3.7 Environmental Lien Search**

It is HECI understanding that the Spencer Savings Bank will be performing a lien search; therefore, an environmental lien search was not included in the scope of work of this assessment and consequently was not completed. However, if the finding of a lien search conducted by any other party does reveal the presence of an environmental-related lien on the subject property, this information should be forwarded to HECI for review, and any significant findings will be added to this assessment as an addendum.

## **IV. Interviews**

Interviews with appropriate parties were conducted throughout this assessment process and had been commented on within the applicable sections of this report.

#### **Environmental Professional Comments to Interviews**

No specific environmental conditions or concerns were revealed during the interview process.

## **V. Summary of Identified Recognized Environmental Conditions**

We have performed a Phase I Environmental Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of 8 Somerset Ln., Edgewater, NJ 07020, the property. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions (REC), Historical REC or Controlled REC in connection with the property:

## **VI. Requirements and Recommendations**

From these observations, we offer no further recommendations at this time.

Based on these findings, there is a minimal risk that contamination exists at the site, and **no further investigation is warranted.**

## **VII. Conclusions**

In conclusion, having interviewed all the parties listed and inspected the site visually, we did not observe, nor did we identify any known environmental contaminants or conditions inherent in the property. Nor did we note any known or potential noncompliance with the applicable local, state and federal environmental laws and regulations as appropriate under this assessment, other than those listed under *Section VI, Summary of RECs*.

Corrective measures, if applicable, have been recommended under *Section VII, Requirements & Recommendations*.

## **VIII. Limitations & Disclaimer, Reliance & Use of Report**

### Limitations & Disclaimer

The findings in this report are limited in scope to that which was requested and spelled out in the report, and in time to the date of the site survey.

The opinions presented in this report are based on best observations, measurements, and skills applied, as they would be by any environmental professional performing similar reviews.

No warranties or guarantees, expressed or implied, are made as to the professional opinions expressed in this project.

### Reliance & Use of Report

This report has been prepared for the exclusive use of Spencer Savings Bank for specific application to the subject property described in this assessment. HECI does not warrant or bear any responsibility for the use of this report by a third party.

The opinions presented in this report are based on best observations, measurements, and skills applied, as they would be by any environmental professional performing similar reviews.

This environmental assessment is not an appraisal or property value judgment. HECI will not be held liable for any use of the assessment and report that results in property value loss or gain.

No warranties or guarantees, expressed or implied, are made as to the professional opinions expressed in this project.

**IX. Environmental Professional Certification**

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices outlined in 40 CFR part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

NPL: A review of the NPL list, as provided by EDR, and dated 04/27/2021 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

45 RIVER RD URBAN RENEWAL ASSOCIATES LLC  
8 SOMERSET LN  
EDGEWATER, NJ 07020

### TARGET PROPERTY COORDINATES

Latitude (North):	40.802613 - 40° 48' 9.41"
Longitude (West):	73.992569 - 73° 59' 33.25"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	584981.7
UTM Y (Meters):	4517122.5
State Plane X (Feet):	632596.2
State Plane Y (Feet):	717693.6
Elevation:	12 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	5940599 CENTRAL PARK, NY
Version Date:	2013
West Map:	6049416 WEEHAWKEN, NJ
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era:	Mesozoic
System:	Triassic
Series:	Triassic
Code:	Tr ( <i>decoded above as Era, System &amp; Series</i> )

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

---

#### Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:  
Hydrologic Group: Not reported

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

---

#### Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture:  
Hydrologic Group: Not reported

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

---

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New Jersey Public-Community Water-Supply Wells

Source: Department of Environmental Protection, Geological Survey

Telephone: 609-984-6587

#### New Jersey Ambient Ground Water Quality Network Data

Source: Department of Environmental Quality

Telephone: 609-984-6587

Ambient Groundwater Quality of the New Jersey Part of the Newark Basin. Natural groundwater quality in the Newark Basin summarize natural groundwater quality in sedimentary bedrock formations of the Newark basin part of the Piedmont physiographic province of New Jersey.

#### STORET Water Quality Monitoring Stations

Source: Department of Environmental Protection

Telephone: 609-984-6831

STORET maintains the locations of water quality monitoring stations from NJDEP's NJ STORET (Modernized) database.

A station is a location at which a data collection event takes place, such a collection of a field sample, measurement of field parameters or evaluation of environmental habitats.

#### Water Well Permit Information

Source: Department of Environmental Protection

Telephone: 609-984-6831

Permits to drill wells. Once constructed, the driller must submit a well record document with the as-built description of the well. Drillers also submit a well abandonment report whenever a well has been decommissioned.

Dear Robert Rieselma:

Due to the recent COVID-19 pandemic in Bergen County, our Offices are closed to non-essential personnel and as such, responses may be delayed.

Thank you for your interest in the public records of Bergen County. Your request has been received and is being processed. Your request was received in this office on 6/22/2021 and given the reference number B008956-062221 for tracking purposes.

Record Requested: Horizon Environmental & Contracting, Inc. is currently conducting a Phase I Environmental Site Assessment for 8 Somerset Ln., Edgewater, Block: 99 Lot: 1.19 & 1.13. As part of the due diligence inquiry for this property transaction, we are writing to request a records search targeted for any incidents to which the County Health Dept. and HAZMAT may have responded and/or documented (i.e., tank removal or abandonment, spills, leaks, releases). Specifically, we are seeking information on such incidents that may have resulted in an environmental impact to either soil, water or air quality. Thank you in advance for your cooperation and assistance in this matter. Please do not hesitate to contact our office if any further information or clarifications are required at this time or if you encounter any obstacles to providing the requested information.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the Bergen County OPRA Information Center.

RE: PUBLIC RECORDS REQUEST of 6/22/2021, Reference # B008956-062221

Dear Mr./Mrs./Ms. Rieselman,

This letter responds to your request for information to the County of Bergen, dated and received in our office on 6/22/2021.

Description of Records Requested: Environmental-Other - Horizon Environmental & Contracting, Inc. is currently conducting a Phase I Environmental Site Assessment for 8 Somerset Ln., Edgewater, Block: 99 Lot: 1.19 & 1.13. As part of the due diligence inquiry for this property transaction, we are writing to request a records search targeted for any incidents to which the County Health Dept. and HAZMAT may have responded and/or documented (i.e., tank removal or abandonment, spills, leaks, releases). Specifically, we are seeking information on such incidents that may have resulted in an environmental impact to either soil, water or air quality.

Thank you in advance for your cooperation and assistance in this matter. Please do not hesitate to contact our office if any further information or clarifications are required at this time or if you encounter any obstacles to providing the requested information.

The County has reviewed its files and has determined that there are no responsive documents to your request.

If you have any questions, or wish to discuss this further, you may contact me at [kdabal@co.bergen.nj.us](mailto:kdabal@co.bergen.nj.us).

Sincerely,

Kelly Dabal  
Environmental

**REQUEST FOR RECORDS UNDER THE COMMON LAW**

*If, in addition to requesting records under OPRA, you are also requesting the government records under the common law, please check the box below. A public record under the common law is one required by law to be kept, or necessary to be kept in the discharge of a duty imposed by law, or directed by law to serve as a memorial and evidence of something written, said, or done, or a written memorial made by a public officer authorized to perform that function, or a writing filed in a public office. The elements essential to constitute a public record are that it be a written memorial, that it be made by a public officer, and that the officer be authorized by law to make it.*

---

I am also requesting the documents under common law.

*Field not completed.*

---

If the information requested is a "public record" under common law and the requestor has a legally recognized interest in the subject matter contained in the material, then the material must be disclosed if the individual's right of access outweighs the State's interest in preventing disclosure. Please set forth your interest in the subject matter contained in the requested material:

*Field not completed.*

---

Note that any challenge to a denial of a request for records under the common law cannot be made to the Government Records Council, as the Government Records Council only has jurisdiction to adjudicate challenges to denials of OPRA requests. A challenge to the denial of access under the common law can be made by filing an action in Superior Court.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Contact: Robert Rieselman

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Horizon Env. & Contracting, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

Sanborn® Library search results

Certification #: EB29-45B6-A22B

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

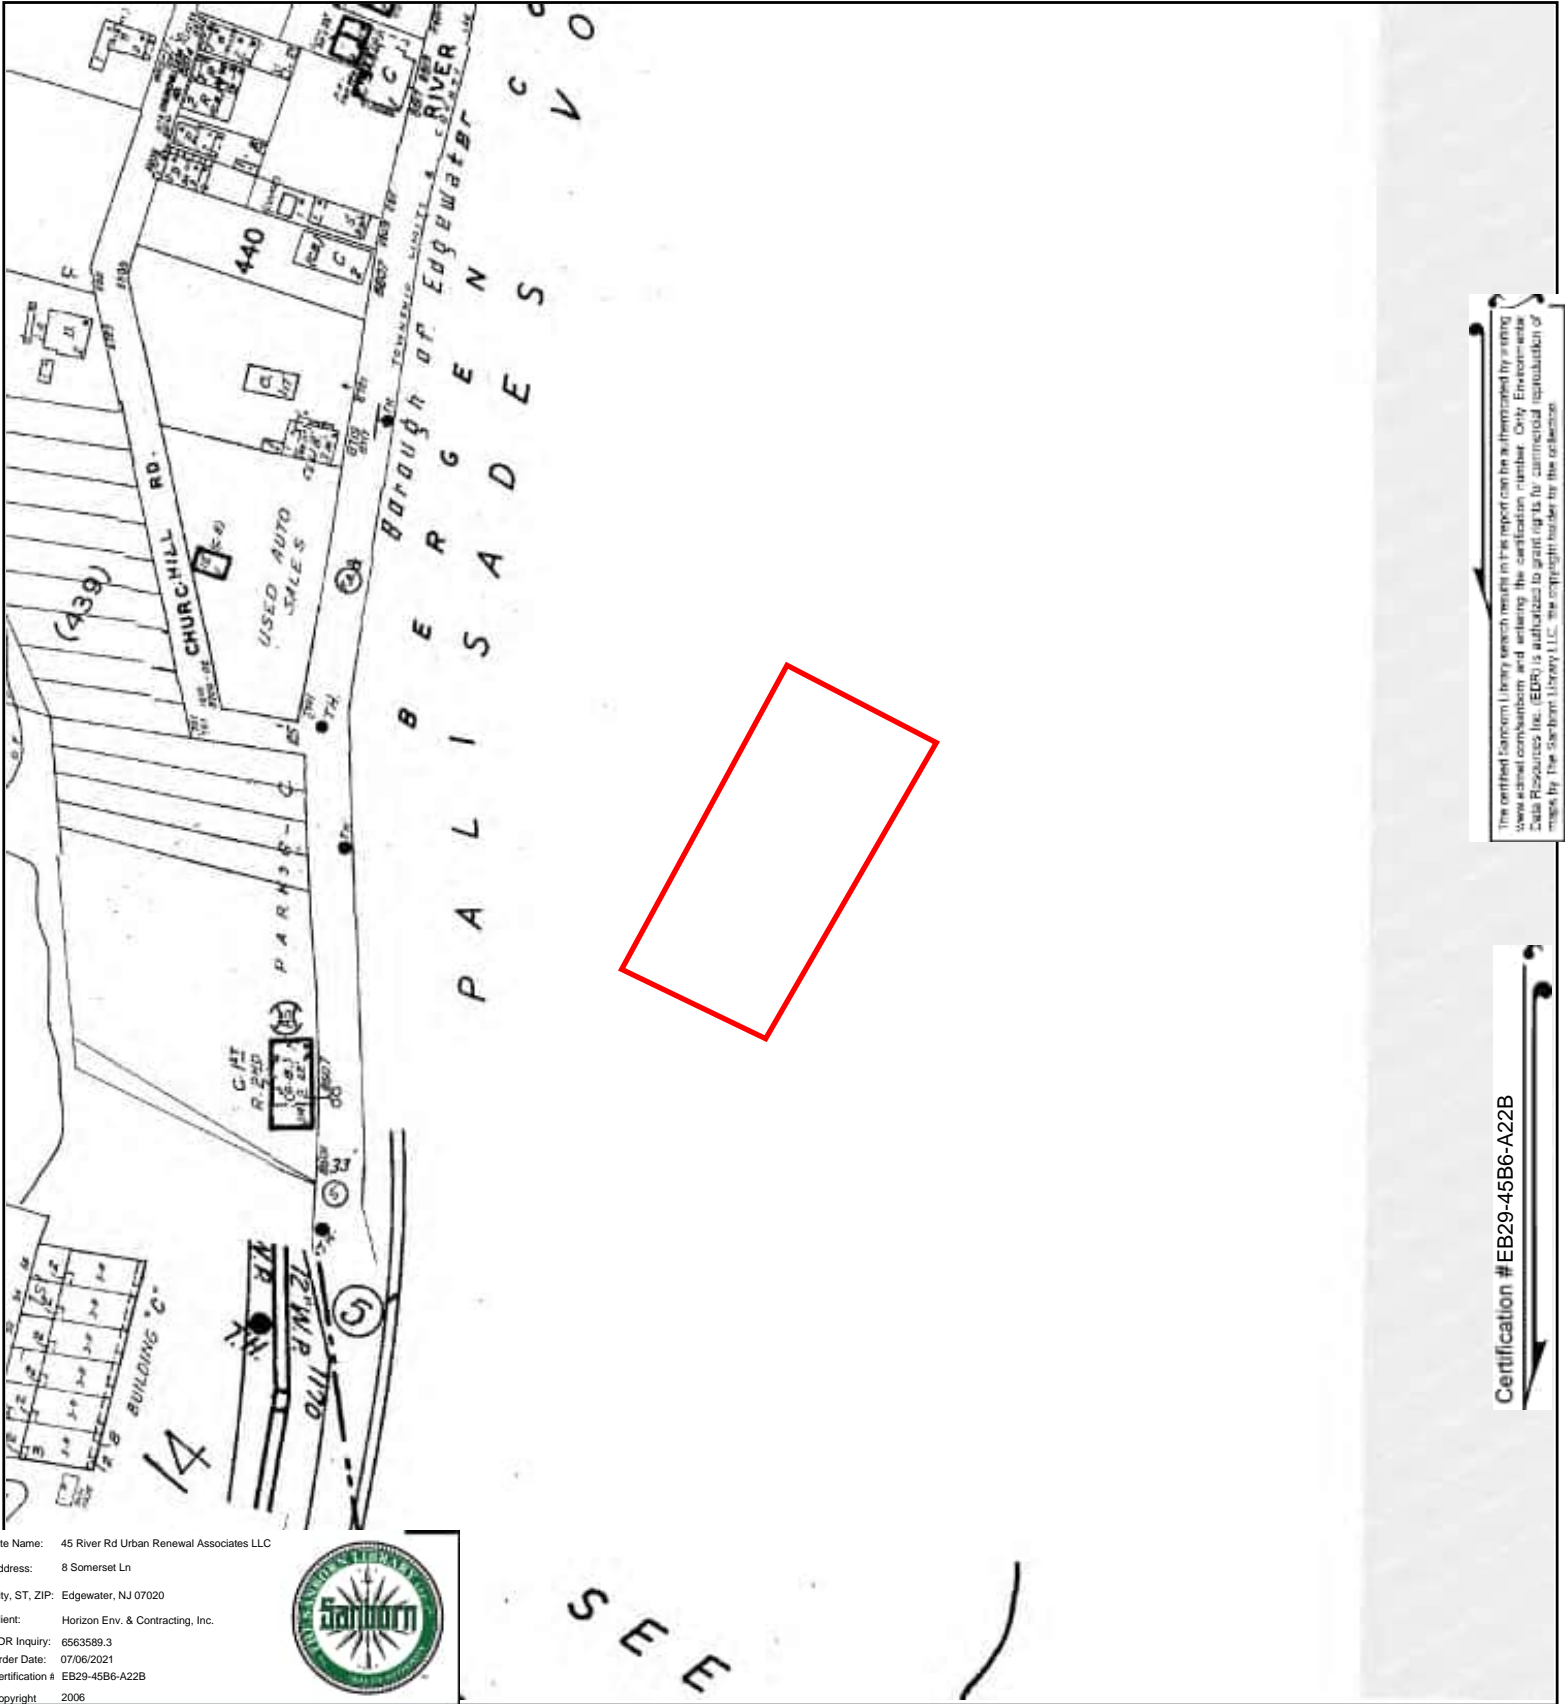

## Limited Permission To Make Copies

Horizon Env. & Contracting, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

		<b>Categories:</b>	BGR -General Remediation Clean-up (GP)		
		<b>Facility Class:</b>	Major [ ] Minor [ X ]		
		<b>DSW/PER #:</b>	100001		
<b>Facility Name:</b>	L PARK EDGEWATER	<b>Permit Class:</b>	Surface Water GPA Modification		
<b>Township:</b>	Edgewater Boro	<b>Receiving Stream Classification:</b>	SE2		
<b>County:</b>	Bergen				

**Dates of Importance:**

Existing Permit Exp. Date	Pre-Draft Issuance Date	DEP Publ. Date (Actual)	Newspaper Publ. Date (for Majors)	Draft Issuance Date	Public Comment Period Ends
5/31/2010	NA	NA	NA	NA	NA

**Permit Details:**

1. Were comments received on the draft permit?  Yes  No  Not Applicable
2. Does the permit action deal with an expansion or re-rating (i.e. staged flows)?  Yes  NA No
3. Does the facility discharge to an impaired waterbody as identified on the 303(d) list?  Yes  NA No  
If Yes, for what pollutants? \_\_\_\_\_
4. Are new effluent limitations included in this permit action?  Yes  No  
If Yes, in the following table indicate the name of the pollutant under the appropriate new limitation type.

New Limit Type	Technology Based Limit (1)	Loading Limit Only	WQBEL	End-of-Pipe Criteria Limit	Surface Water Quality Standard	TMDL Based Limitation	EEQ Limitation
Pollutants							

(1) Effluent Standard from N.J.A.C. 7:14A-12 or N.J.A.C. 7:9-5.7, Effluent Limitation Guideline, DRBC, IEC, etc...

5. For all the pollutants listed in 4 above, is there a compliance schedule included in this permit action?  Yes  No  
If No, which pollutants *do not* have a compliance schedule? \_\_\_\_\_
6. Additional Comments/Issues (if applicable): This is an extension for a temporary dewatering BGR permit. And to add parameters based on updated groundwater data review.

Re: Surface Water GPA Mod  
Category: BGR -General Remediation Clean-up (GP)  
NJPDES Permit No. NJG0168840  
I.PARK EDGEWATER  
Edgewater Boro, Bergen County

Dear Mr. Monheit:

Enclosed is a modification to the individual NJPDES/DSW General Groundwater Remediation Cleanup permit (BGR) authorization which was issued on May 28, 2010 for a temporary dewatering project. This modification is being issued in response to an email on October 21, 2010 from Brett Engard, P.G., Assistant Project Manager, GZA GeoEnvironmental of New York to Brian Salvo, of the Bureau of Surface Water Permitting.

The I Park Edgewater site is located on approximately twenty-three acres of historically filled land situated in the Borough of Edgewater, Bergen County, NJ. The property was formerly the location of Conopco's Research and Development facility that developed the science base and core product technologies for Conopco's household and personal care consumer goods product categories. The site is currently in the process of redevelopment for mixed use residential and commercial purposes. Based on Mr. Engard's email, remedial activities at the site, including excavation of impacted soil and dewatering, were delayed. Since the discharge did not occur as scheduled, an extension to the existing BGR is hereby being granted. And since the project will be completed in phases and treated groundwater will be discharged to surface water on an intermittent basis, the Department is extending the permit expiration duration to coincide with the Master BGR, June 30, 2015.

This individual General Permit Modification allows for the temporary discharge of groundwater through outfall DSN 001A. The May 28, 2010 authorization includes additional outfalls 002, 004, 005 and 008, but since the requirements are the same and the effluent is discharged to the same area of the Hudson river, only one sampling point (DSN001A) is being designated as part of this modification. In other words, all required effluent sample results shall be reported on the DSN001A form. The limits and monitoring requirements in Part III of this authorization are included in accordance with N.J.A.C. 7:14A-12, Appendix B and are based on MW-52 groundwater samples collected May 23, 2007 and MW-78 samples collected September 2, 2010. Please refer to Part III for specific sampling requirements. Be advised that based on the additional review of this data, the Department has added the following parameters to Part III: **Chrysene, Fluorene, Naphthalene, Phenanthrene, Benzo[a]anthracene, Benzo[b]fluoranthene, Benzo[k]fluoranthene, Benzo[a]pyrene, Indeno[1,2,3-dc]pyrene, Cadmium, Chromium, Copper, Mercury, Nickel, and Zinc.** Violation of any condition of this authorization may subject the permittee to significant penalties.

The individual General Permit Authorization also sets forth residuals (sludge) monitoring required under the Sludge Quality Assurance Regulations (SQAR, N.J.A.C. 7:14C). Analysis of the industrial sludge for the parameters found on Table III-F-1 of Part III is required because they are parameters required to be analyzed for the discharge to surface water. The frequency of monitoring is dependent on the amount of sludge produced. Since the amount of sludge generated is less than 290 dry metric tons per year the monitoring frequency is annual.

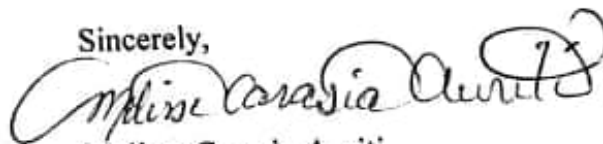

The NJPDES Monitoring Report Form (MRF) Reference Manual can be accessed at "[http://www.state.nj.us/dep/dwq/pdf/MRF\\_Manual.pdf](http://www.state.nj.us/dep/dwq/pdf/MRF_Manual.pdf)" for further information regarding reporting of monitoring data. Please note that if there is a discrepancy between the General Permit Authorization and the MRF Reference Manual, the General Permit Authorization always takes precedence.

All monitoring shall be conducted in accordance with 1) the Department's "Field Sampling Procedures Manual" applicable at the time of sampling (N.J.A.C. 7:14A-6.5(b)4). The Field Sampling Procedures Manual can be found on the Department's website at "<http://www.state.nj.us/dep/srp/guidance/fspm/>".

This document includes those pages that are directly affected by this modification, namely Part III, which shall replace the corresponding pages of the renewal final permit. Note that the Department has specified an effective date of January 1, 2011 so as not to disrupt the quarterly discharge monitoring report requirement as set forth in the existing BGR permit authorization. With the exception of Part III all other pages of your permit are unaffected and therefore remain in full force and effect.

If you have questions or comments regarding the final action, please contact Brian Salvo at (609) 292-4860.

Sincerely,

Melisse Carasia-Auriti  
Supervising Environmental Specialist  
Bureau of Surface Water Permitting

**WHO MUST SIGN** The highest ranking official having day-to-day managerial and operational responsibilities for the discharging facility shall sign the certification or, in his absence a person designated by that person. For a local agency, the highest ranking operator of the treatment works shall sign the certification. Where the highest ranking operator does not have the ability to authorize capital expenditures and hire personnel, a person having that responsibility or person designated by that person shall also sign the second certification at the bottom of this page. If the local agency has contracted with another entity to operate the treatment works, the highest-ranking official of the contracted entity shall sign the certification.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment, pursuant to N.J.A.C. 7:14A-6.9(B). The New Jersey Water Pollution Control Act provides for penalties up to \$50,000 per violation.

## 1.0 INTRODUCTION

The following *Groundwater Characterization Report* present the results of groundwater sampling performed in support of i.park Edgewater, LLC's New Jersey Pollutant Discharge Elimination System (NJPDES) application for the property identified as i.park Edgewater located at 45 River Road in Edgewater, New Jersey (Site). Specifically, this *Groundwater Characterization Report* provides the information required in *Form C – Supplemental Application Form to NJPDES-1 for Industrial NJPDES DSW Permits*.

### 1.1 Site Information

The Site is located on approximately twenty-three acres of historically filled land situated on Block 99 Lots 1, 3, 4 and 5 (formerly Blocks 96, 97, 98, 99 and 100) in the Borough of Edgewater, Bergen County, New Jersey (see Figure 1). The property was formerly the location of Conopco's Research and Development facility that developed the science base and core product technologies for Conopco's household and personal care consumer goods product categories. The Site is currently in the process of redevelopment for mixed use residential and commercial purposes. The Site is bounded by the Hudson River to the east, the Bergen County - Hudson County line to the south, relocated River Road to the west, and the 115 River Road, LLC property to the north. Land use in the vicinity of the Site is a mix of residential, industrial and commercial uses. The ongoing redevelopment of the Hudson River waterfront in Edgewater has shifted the predominant land use from industrial to a mix of residential and commercial uses.

### 1.2 Project Description

Conventional excavation methods will be used to remove impacted soil at various locations throughout the Site. Dewatering of some of the excavations will be required as soil excavation will extend below the water table in some areas. Groundwater will be collected from within the active work area using temporary wells, sumps, and/or trenches. The collected water will be conveyed through a treatment system equipped with filter bags, activated carbon and organoclay.

Samples will be collected from the treated water temporarily staged in frac tanks for submittal to a New Jersey certified laboratory to confirm the efficacy of the treatment. Sample frequency and analytical parameters shall be determined by the NJDEP. Treated water will not be discharged until sample analysis has demonstrated compliance with permit requirements. Upon confirmation of compliance with permit requirements, treated water will be discharged to the nearest storm sewer. The storm sewer system on Site discharges to the Hudson River through five outfalls.

---

## 2.0 GROUNDWATER SAMPLING METHODOLOGY

On May 23, 2007, GZA collected a groundwater sample from monitoring well MW-52, located within the footprint of one of the proposed excavation areas (**Figure 2**). Well construction details for MW-52 are provided in **Appendix A**. Groundwater was purged and collected via low-flow sampling techniques.

The sample was placed into an ice-packed cooler maintained at a temperature of approximately 4° C following sample collection. The sample was then transported to Severn Trent Laboratories in Shelton, Connecticut (NJ Lab Certification CT410) and Edison, NJ (NJ Lab Certification 12028), under proper chain-of-custody procedures. The sample was analyzed for the following parameters:

- Volatile organic compounds (VOCs) via Environmental Protection Agency (EPA) methods 624 and 8270C;
- Semi-volatile organic compounds (SVOCs) per EPA method 625;
- Pesticides and PCBs per EPA method 608;
- Metals per EPA method 6000/7000 series;
- General chemistry parameters (pH, total organic carbon, and total suspended solids); and
- Oil and grease.

## 3.0 SAMPLING RESULTS

**Table 1** presents groundwater analytical results for MW-52 and compares them with the NJDEP Groundwater Quality Criteria for a Class II A aquifer (GWQC). The laboratory data package is included as **Appendix B**.

Re: Surface Water GPA Modification  
Category: BGR-General Remediation Clean-up (GP)  
NJPDES Permit No. NJG0168840  
LPARK EDGEWATER  
Edgewater Boro, Bergen County

Dear Mr. Monheit:

As you are aware, you were originally granted an individual NJPDES/DSW General Remediation Cleanup (BGR) permit which became effective on September 1, 2007 for a temporary dewatering project which expired on February 29, 2008. Then, in a letter dated March 3, 2008 the Department granted an extension of the BGR permit by modifying the permit with an effective date of February 1, 2008 and an expiration date of August 31, 2008.

As per your request dated August 27, 2008, this letter is written to hereby grant an extension for the above referenced authorization. Based on a phone conversation with Brian Salvo, BGR contact, on November 26, 2008, the dewatering project is estimated to start in the Spring of 2009. Therefore, this modification is being issued to accommodate a later expiration date, extended to July 31, 2009. All other conditions and requirements noted in the previous authorization remain in full force and effect. The attached permit authorization page replaces the authorization page issued on February 25, 2008. This individual General Permit Authorization allows for the discharge of treated groundwater through the discharge outfalls specified on your permit authorization page.

If you have questions or comments regarding the final action, please contact Margaret Elshans at (609) 633-3869.

Sincerely,  
  
Daveki Keymoore

### Dates of Importance:

Existing Permit Exp. Date	Pre-Draft Issuance Date	DEP Publ. Date (Actual)	Newspaper Publ. Date (for Majors)	Draft Issuance Date	Public Comment Period Ends
7/31/2009	NA	NA	NA	NA	NA

### Permit Details:

- Were comments received on the draft permit?  Yes  No  Not Applicable
- Does the permit action deal with an expansion or re-rating (i.e. staged flows)?  Yes  No
- Does the facility discharge to an impaired waterbody as identified on the 303(d) list?  Yes  No  
If Yes, for what pollutants? Dioxin, PCBs, Pollutant Unknown
- Are new effluent limitations included in this permit action?  Yes  No  
If Yes, in the following table indicate the name of the pollutant under the appropriate new limitation type.

New Limit Type	Technology Based Limit (1)	Loading Limit Only	WQBEL	End-of-Pipe Criteria Limit	Surface Water Quality Standard	TMDL Based Limitation	EEQ Limitation
Pollutants							

(1) Effluent Standard from N.J.A.C. 7:14A-12 or N.J.A.C. 7:9-5.7, Effluent Limitation Guideline, DRBC, IEC, etc...

Re: Surface Water GPA Mod  
Category: BGR-General Remediation Clean-up (GP)  
NJPDES Permit No. NJG0168840  
LPARK EDGEWATER  
Edgewater Boro, Bergen County

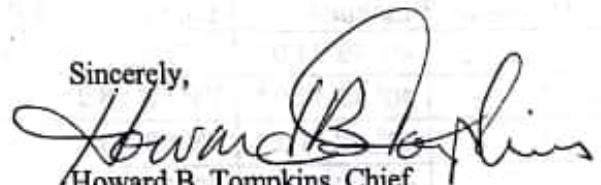

Dear Mr. Monheit:

As you are aware, you were granted an individual NJPDES/DSW General Remediation Cleanup (BGR) permit on August 29, 2007 for a temporary dewatering project which expires on February 29, 2008. This individual General Permit Authorization allows for the discharge of treated groundwater through the discharge outfalls specified on your permit authorization page.

As per your request dated December 26, 2007, this letter is written to hereby grant an extension for the above referenced authorization. The expiration date has been extended to August 31, 2008 and the effective date of this permit is made retroactive to February 1 2008. All other conditions and requirements noted in the previous authorization remain in full force and effect. The attached permit authorization page replaces the authorization page issued on August 29, 2007.

If you have questions or comments regarding the final action, please contact Margaret Elsishans at (609) 633-3869.

Sincerely,

  
Howard B. Tompkins, Chief  
Bureau of Point Source Permitting Region 1

Re: Surface Water GPA New  
Category: BGR -General Remediation Clean-up (GP)  
NJPDES Permit No. NJG0168840  
LPARK EDGEWATER  
Edgewater Boro, Bergen County

Dear Mr. Monheit:

Enclosed is an Individual NJPDES/DSW General Permit Authorization under the General Remediation Cleanup (BGR) permit which was issued by the Department on April 21, 2005. This General Permit Authorization is issued in accordance with the New Jersey Pollutant Discharge Elimination System (NJPDES) Regulations N.J.A.C. 7:14A-1 et seq. This permit authorizes the discharge of remediated groundwater to surface waters of the state.

This individual General Permit Authorization allows for the discharge of treated groundwater through the discharge outfall specified on your permit authorization page. Violation of any condition of this authorization may subject the permittee to significant penalties.

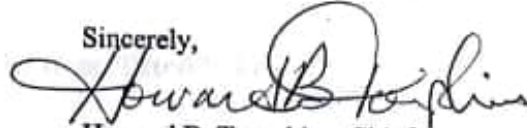

The enclosed Authorization to discharge groundwater under the General Permit shall expire on May 31, 2010 or the expiration date of the Individual Authorization Page. Applications for renewal of this Authorization must be submitted to the Department at least 180 days prior to expiration of the Individual Authorization pursuant to N.J.A.C. 7:14A-4.2(e)3.

A copy of the Department's most recently revised Discharge Monitoring Report (DMR) Instruction Manual is available if needed by contacting the Bureau of Point Source Permitting. Please note that if there is a discrepancy between the General Permit Authorization and the DMR Instruction Manual, the General Permit Authorization always takes precedence.

All monitoring shall be conducted in accordance with 1) the Department's "Field Sampling Procedures Manual" applicable at the time of sampling (N.J.A.C. 7:14A-6.5(b)4), and/or 2) the method approved by the Department in Part IV of the permit. The Field Sampling Procedures Manual is available through Maps and Publications Sales Office; Bureau of Revenue, PO Box 417, Trenton, New Jersey 08625, at (609) 777-1038.

If you have questions or comments regarding the final action, please contact Margaret Elsishans at (609) 633-3869.

Sincerely,

Howard B. Tompkins, Chief  
Bureau of Point Source Permitting Region 1

# NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM

The New Jersey Department of Environmental Protection hereby grants you a NJPDES permit for the facility/activity named in this document. This permit is the regulatory mechanism used by the Department to help ensure your discharge will not harm the environment. By complying with the terms and conditions specified, you are assuming an important role in protecting New Jersey's valuable water resources. Your acceptance of this permit is an agreement to conform with all of its provisions when constructing, installing, modifying, or operating any facility for the collection, treatment, or discharge of pollutants to waters of the state. If you have any questions about this document, please feel free to contact the Department representative listed in the permit cover letter. Your cooperation in helping us protect and safeguard our state's environment is appreciated.

RE: Administrative Revocation  
Discharge Category(s): 5G2  
NJPDES Permit #NJG0002143  
Unilever Research Us Inc  
Edgewater Boro, NJ

Dear Mr. Ramiza:

Please be advised that the Department has confirmed that you are no longer performing any activities requiring a permit under the New Jersey Pollutant Discharge Elimination System (NJPDES) permitting program. Therefore, your NJPDES permit is administratively revoked effective 05/23/05.

The Water Pollution Control Act prohibits the discharge of pollutants except as authorized by a NJPDES permit. If you plan to discharge pollutants to the surface or ground waters of the state of New Jersey, you must submit a new application at least 180 days before proposing to discharge.

If you have any questions please contact Annette DeBlois of my staff at (609) 984-4428.

Sincerely,

William F. Boehle, P.E., Chief  
Bureau of Permit Management

Edgewater Borough, Bergen County

Dear Mr. Monheit:

A Compliance Evaluation and Assistance Inspection of your facility was conducted on October 06, 2011. Please address any items or concerns noted on the comments section of the attached report.

The items noted in the attached report with a compliance status of "OC" or "ON" have placed your facility in violation of your NJPDES permit and/or the Water Pollution Control Act. A written report concerning specific details of remedial measures to be instituted for these items, as well as an implementation timetable, must be submitted to this Bureau within thirty (30) calendar days of receipt of this correspondence.

You are advised that the New Jersey Water Pollution Control Act (N.J.S.A. 58:10A-1 et seq.) provides for substantial penalties in cases of permit violations. Therefore, your prompt attention to this matter is anticipated.

Note that you may also review your inspection report as well as many other DEP reports online at [www.nj.gov/dep/inspections](http://www.nj.gov/dep/inspections). This website also gives you the opportunity to provide us feedback about our operations. We would appreciate your input and will share all results with you upon your completion of a survey.

If you have any questions concerning the attached report, contact me at (973) 656-4099 or by letter through this Bureau.

Very truly yours,

Maria Coppola  
Principal Environmental Specialist  
Northern Bureau of Water Compliance  
and Enforcement

## General Comments:

NJPDES - BGR - General Remediation Clean-up, Permit No.: NJG0168840. Extension and Modification EDP: 01/01/2011, ExpDP: 06/30/2015.

This Permit was issued for the purpose of treating groundwater which is pumped from a dewatering activity for the redevelopment site. Discharge to the Hudson River through DSN001A.

As a result of a Permit modification, the previous reporting requirements for outfall DSNs 002, 004, 005 and 008 have been eliminated and one sampling point is designated as DSN 001A. The new reporting requirements became effective January 1, 2011.

A review of Department records indicate that the following monthly Discharge Monitoring Reports have not been submitted:  
December 2010: DSNs 001A, 002A, 004A, 005A and 008A.  
January through June 2011 for DSN001A

The the following Sludge Wastewater Characterization Reports (WCRs) have not been submitted for S16A:  
RTR for calendar year 2010, Annual Residual DMR for 2010 and the Residuals Transfer Report for calendar year 2010 has not been submitted.

All reports must be submitted within 10 calendar days of receipt of this correspondence.

Although the dewatering activity has not taken place, the Permittee is still required to comply with the reporting requirements of the NJPDES Permit.

Also, as discussed, please contact the Division of Water Supply Permitting, at (609) 292-2957 for information on obtaining a Water Allocation Permit for the dewatering activities at the above location.

Dear Mr. Monheit:

A Compliance Evaluation and Assistance Inspection of your facility was conducted on December 07, 2007. Please address any comments or concerns noted in the attached report.

Note that you may also review your inspection report as well as many other DEP reports online at [www.nj.gov/dep/inspections](http://www.nj.gov/dep/inspections). This website also gives you the opportunity to provide us feedback about our operations. We would appreciate your input and will share all results with you upon your completion of a survey.

This Department appreciates the continued operation of your facilities in an environmentally responsible manner. If you have any questions concerning the attached report, contact me at (973) 656-4099.

Very truly yours,

*Charles Berry*

Responsible Entities: LPARK EDGEWATER LLC

---

Comments: The old Lever Brothers site at 45 River Road in Edgewater was issued a BGR - General Remediation Clean-up Permit, NJPDES Permit No.: NJG0168840 on 08/29/2007. EDP: 09/01/2007, Expiration 8/31/2008.

As of the date of this inspection, no treatment systems are in place and the site is not discharging. The facility does not expect to start discharging until the end of February of 2008.

This facility is reminded that the first quarterly DMR is to be submitted to the Department, on or before December 25, 2007.

Send a copy of the reports to: Dr. David Winslow at GZA GeoEnvironmental of New York.

Edgewater Borough, Bergen County

Dear Mr. Monheit:

A Compliance Evaluation and Assistance Inspection of your facility was conducted on August 9, 2012. Please address any items or concerns noted on the comments section of the attached report.

The items noted in the attached report with a compliance status of "OC" or "ON" have placed your facility in violation of your NJPDES permit and/or the Water Pollution Control Act. A written report concerning specific details of remedial measures to be instituted for these items, as well as an implementation timetable, must be submitted to this Bureau within thirty (30) calendar days of receipt of this correspondence.

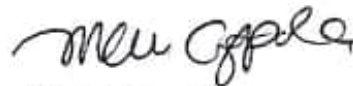

You are advised that the New Jersey Water Pollution Control Act (N.J.S.A. 58:10A-1 et seq.) provides for substantial penalties in cases of permit violations. Therefore, your prompt attention to this matter is anticipated.

Note that you may also review your inspection report as well as many other DEP reports online at [www.nj.gov/dep/inspections](http://www.nj.gov/dep/inspections). This website also gives you the opportunity to provide us feedback about our operations. We would appreciate your input and will share all results with you upon your completion of a survey.

If you have any questions concerning the attached report, contact me at (973) 656-4099 or by letter through this Bureau.

Very truly yours,

Maria Coppola  
Environmental Specialist - 3  
Northern Bureau of Water Compliance

NJPDES -BGR-General Remediation Clean-up, Permit No.: NJG0168840, Extension and Modification, EDP: 01/01/2011, ExpDP: 06/30/2015.

This Permit was issued for the purpose of treating groundwater which is pumped from a dewatering activity for the redevelopment site. Discharge to the Hudson River through DSN 001A.

Please be advised that any dewatering activities require approval by the NJDEP's Division of Water Supply. Failure to obtain the appropriate permit for dewatering activities is a violation of the Water Supply Management Act and may be subject to administrative penalty assessments.

A review of Department records indicates that I. Park Edgewater representatives failed to submit the following Discharge Monitoring Reports (DMRs) :  
 DMRs not submitted for DSN001A for January through July 2012.  
 Annual DMR for S16A: January through December 2010.  
 All reports must be submitted within 10 calendar days of receipt of this correspondence.

## **i.park EDGEWATER SITE EDGEWATER, NEW JERSEY**

### **NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT APPLICATION PROJECT DESCRIPTION**

The i.park Edgewater site (Site) is located on approximately 23 acres of historically filled land situated on Block 99 Lots 1, 3, 4 and 5 (formerly Blocks 96, 97, 98, 99 and 100) in the Borough of Edgewater, Bergen County, New Jersey, as shown on Figure 1. The property was formerly the location of Conopco's Research and Development facility that developed the science-base and core product technologies for Conopco's household and personal care consumer goods product categories. Several rounds of soil and groundwater sampling have been conducted at the Site and show that soil and groundwater have been impacted by prior activities at the Site.

Conventional excavation methods will be used to remove impacted soil at various locations throughout the Site. Excavations vary in size and range in depths from 4 to 13 feet below ground surface (bgs). Excavation equipment will excavate and load soil onto trucks for off-Site transportation and disposal. Due to the depth of excavation in some locations, earth support will be required and will consist of steel sheet pile sections to support the excavation sidewalls and to facilitate effective dewatering.

Dewatering of some of the excavations will be required as soil excavation will extend below the water table (5 feet bgs) in some areas. Groundwater will be collected from within the active excavations using temporary wells, sumps, and/or trenches. Pumps will be utilized to convey groundwater from the collection points(s) to a temporary untreated water storage vessel prior to treatment.

Water treatment will be performed by a portable, trailer-mounted system consisting of untreated water storage vessel, discharge pump, pre-treatment filtration system, totalizing flow meter, organoclay vessel, liquid-phase granular activated carbon vessels (GAC), liquid-phase activated alumina adsorption vessels, and post-treatment filtration system. Treated water will be discharged to a treated water storage vessel(s) for analysis prior to discharge to the nearest storm sewer, which ultimately flows into the Hudson River. Discharge to the POTW, if performed, will occur under a Significant Indirect User (SIU) permit. Treatment system operation will up to 24 hours per day, or as needed.

**ATTACHMENT 2**

**FACILITY DESCRIPTION AND USE**  
**NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM**  
**REQUEST FOR AUTHORIZATION (RFA-1 STORM)**

**Lpark Edgewater Site**  
**45 River Road**  
**Edgewater, New Jersey**

The Site is located on approximately twenty-three acres of historically filled land situated on Block 99 Lots 1, 3, 4 and 5 (formerly Blocks 96, 97, 98, 99 and 100) in the Borough of Edgewater, Bergen County, New Jersey. The property was formerly the location of Conopco's Research and Development facility that developed the science base and core product technologies for Conopco's household and personal care consumer goods product categories. The Site is currently in the process of redevelopment for mixed use residential and commercial purposes. The Site is bounded by the Hudson River to the east, the Bergen County - Hudson County line to the south, relocated River Road to the west, and the 115 River Road, LLC property to the north. Land use in the vicinity of the Site is a mix of residential, industrial and commercial uses. The ongoing redevelopment of the Hudson River waterfront in Edgewater has shifted the predominant land use from industrial to a mix of residential and commercial uses.

Dear Trent,

In follow up to our recent meeting with Joe Traum on the Riverwalk at I Park Edgewater, we confirm that the plexiglass wind protector will be removed from the pier no later than Labor Day. Please advise if this is acceptable.

Thank you for the time you have spent on this project.

Sincerely,

Dear Sir/Madame:

On 03/24/2017 a Representative of the Bureau of Coastal and Land Use Compliance and Enforcement conducted an inspection of the above referenced site. The purpose of the inspection was to assess the outcome of the restoration performed at the Department's request. The inspection revealed that the restoration work has been completed as required. More specifically, the signs stating that the Hudson River Waterfront Walkway closes at 10pm were removed.

You have hereby satisfied the requirements contained in the Department's 02/13/2017 Notice of Violation. As a result, the violation is resolved and this matter has been closed.

Please be advised that any future disturbance or alteration of this area may constitute a regulated activity and require a permit from the Department. In addition, the Department reserves the right to take enforcement action should a regulated activity occur on the site without the necessary approvals.

Should you have any questions regarding this matter, please contact Joe Traum, Case manager, at the telephone number or address at the top of this correspondence.

Sincerely,

Trent Todash, Environmental Specialist 3

**NOTICE OF VIOLATION**

BA ID #: PEA170002 0213-06-0001.2

Name of violator: 1 Park Edgewater, LLC

Location: 65 River Road  
 Edgewater Borough, NJ 07020

Block and Lot: Block 99, Lot 1  
 Identifying #: 0213-06-0001.2

You are hereby **NOTIFIED** that during a compliance evaluation at the above location on 03/24/2017, the following violation(s) the Waterfront Development Act (N.J.S.A. 12:5-3 and 12:5-6 et seq.) and the regulations (N.J.A.C. 7:7-1 et seq.) was/were observed.

Requirement: Pursuant to N.J.A.C. 7:7-2.3(c), any development activity as described in N.J.A.C. 7:7-2.3(c) undertaken within the waterfront area at or below the mean high waterline will require a waterfront development permit. [N.J.A.C. 7:7-2.3(c)]

Description of Noncompliance: the performance of unauthorized development activities within a regulated waterfront area. More specifically, the activities involve the installation of approximately 60 linear feet of white fencing on the waterward end of a private residential pier.

**ALL UNAUTHORIZED ACTIVITIES MUST CEASE IMMEDIATELY.**

You must take the following corrective actions:

- a. Comply with requirement within 30 days of receipt of this document; submit for and a waterfront development permit from the Division of Land Use Regulation and/or remove the unauthorized structure

Within 10 calendar days of receipt of this Notice of Violation, submit in writing to Joe Tramm, an explanation of the corrective measures you have taken or will take to achieve compliance.

This Notice of Violation serves as notice that the NJDEP, Bureau of Coastal and Land Use Compliance and Enforcement, has determined that a violation has occurred. It does not constitute final agency action and may not be appealed or contested. The issuance of this Notice of compliance therewith does not preclude the State of New Jersey or any of its agencies from initiating formal administrative and/or judicial enforcement action (including assessment of penalties), with respect to the violations listed above or for any other violations. You may appeal or contest such formal actions. Penalties may be assessed on a daily basis.

Dear Mr. Caretsky:

Enclosed, please find an approved construction permit. Please read the permit and its terms and conditions carefully. If you consider yourself aggrieved by our decision regarding your application, you may request a hearing by completing the requirements of the *administrative hearing request checklist and tracking form* available at the Division of Land Use website. Unless you request a hearing to contest this permit or its conditions, you have accepted its terms and conditions.

Please do not hesitate to contact the Office's project manager, listed on the first page of the permit, to discuss any concerns or questions you may have. Thank you for working with the staff of the Office to protect our state's natural resources.

Sincerely,

Municipality: Borough of Edgewater  
County: Bergen  
Block(s) & Lot(s): [100; 2]

Description of Authorized Activities:

The remediation of sediments off shore of a former industrial facility through environmental dredging. Environmental dredging will be performed as part of an approved Interim Remedial Measure in the impacted area with approximately 100 cubic yards of sediment being removed from the 0.40 acre project area. The proposed excavation depth is 1.5' below the mudline, up to a maximum depth of 3' below the mudline. Sediment removal will be accomplished via long reach excavator stationed on land and will be performed at low tide. Supernate will be containerized and transported offsite for disposal. Dredged material will be shipped to an offsite location that is approved to accept such material.

The remediation will result in the temporary impact of 0.40 acres of intertidal and subtidal shallows (ISS). To insure the restoration of ISS, clean sand shall be used to restore original topography for all areas excavated to a depth greater than 2 feet below the mudline.

This permit is issued under and in compliance with the Rules on Coastal Zone Management, N.J.A.C. 7:7.

Prepared by:

*[Signature]*  
Mary Nickerson

Received and/or Recorded by  
County Clerk:

THIS PERMIT IS NOT EFFECTIVE AND NO CONSTRUCTION APPROVED BY THIS PERMIT, OR OTHER REGULATED ACTIVITY, MAY BE UNDERTAKEN UNTIL THE APPLICANT HAS SATISFIED ALL PRE-CONSTRUCTION CONDITIONS AS SET FORTH HEREIN.

This permit is not valid unless authorizing signature appears on the last page.

**SPECIAL CONDITIONS:**

1. **Recording of Permit:** This permit shall be recorded in its entirety in the office of the County Clerk or the Registrar of Deeds and Mortgages for each county where this project is located. Verified notice of this action shall be forwarded to the Division immediately thereafter.

**STANDARD CONDITIONS:**

1. **Responsibilities:**
  - a. The permittee, its contractors and subcontractors shall comply with all conditions of this permit, authorizing and/or supporting documents and approved plans and drawings.
  - b. A copy of this permit, other authorizing documents, records and information including all approved plans and drawings shall be maintained at the authorized site at all times and made available to Department representatives or their designated agents upon request.
2. **Permit modification:** Plans and specifications in the application and conditions imposed by this permit shall remain in full force and effect as long as the proposed development or any portion thereof is in existence, unless modified by the Department. No change in plans or specifications upon which this permit is issued shall be made except with the prior written permission of the Department. The filing of a request to modify an issued permit by the permittee, or a notification of planned changes or anticipated noncompliance does not stay any condition of this permit.
3. **Duty to minimize environmental impacts:** The permittee shall take all reasonable steps to prevent, minimize or correct any adverse impact on the environment resulting from activities conducted pursuant to the permit, or from noncompliance with the permit. The permittee shall immediately inform the Department of any unanticipated adverse effects on the environment not described in the application or in the conditions of this permit. The Department may, upon discovery of such unanticipated adverse effects, and upon the failure of the permittee to submit a report thereon, notify the permittee of its intent to suspend the permit.
4. **Proper site maintenance:** While the regulated activities are being undertaken, neither the permittee, its contractors nor subcontractors shall cause or permit any unreasonable interference with the free flow of a regulated feature by placing or dumping any materials, equipment, debris or structures within or adjacent to the regulated area. Upon completion or abandonment of the work, the permittee, its contractors or subcontractors shall remove and dispose of in a lawful manner all excess materials, debris, equipment, silt fences and other temporary soil erosion and sediment control devices from all regulated areas. Only clean non-toxic fill shall be used where necessary.
5. **Sediment control:** Development which requires soil disturbance, creation of drainage structures, or changes in natural contours shall conduct operations in accordance with the latest revised version of "Standards for Soil Erosion Sediment Control in New Jersey," promulgated by the New Jersey State Soil Conservation Committee, pursuant to the Soil Erosion and Sediment Control Act of 1975, N.J.S.A. 4:24-42 et seq. and N.J.A.C. 2:90-1.3-1.14.
6. **Rights of the State:**
  - a. This permit does not convey any property rights of any sort, or any exclusive privilege.

- b. Upon notification and presentation of credentials, the permittee shall allow Department representatives or their designated agents, to enter upon the project site and/or where records must be kept under the conditions of this permit, inspect at reasonable times any facilities, equipment, practices or operations regulated or required under the permit, and sample or monitor for the purposes of determining compliance. Failure to allow reasonable access shall be considered a violation of this permit and subject the permittee to enforcement action.
  - c. The issuance of this permit shall in no way expose the State of New Jersey or the Department to liability for the sufficiency or correctness of the design of any construction, structure or structures. Neither the State nor the Department shall, in any way, be liable for the loss of life or property which may occur by virtue of the activity of development resulting from any permit.
7. **Duty to Reapply:** If the permittee wishes to continue an activity covered by the permit after the expiration date of the permit authorization, the permittee must apply for and obtain a new permit authorization.
  8. **Transfer of Permit:** This permit may not be transferable to any person unless the transfer is approved by the Department. Please refer to the applicable rules for more information.
  9. **Other Approvals:** The permittee must obtain any and all other Federal, State and/or Local approvals. Authorization to undertake a regulated activity under this permit does not indicate that the activity also meets the requirements of any other rule, plan or ordinance.
  10. **Noncompliance:**
    - a. Any noncompliance with this permit constitutes a violation, and is grounds for enforcement action, as well as modification, suspension and/or termination of the permit.
    - b. The permittee shall immediately report to the Department by telephone at (877) 927-6337 any noncompliance that may endanger health or the environment. In addition, the permittee shall report all noncompliance to Bureau of Coastal and Land Use Compliance and Enforcement, 401 E. State Street, 4th Floor, P.O. Box 420, Mail Code: 401-04C, Trenton, NJ 08625, in writing within five business days of the time the permittee becomes aware of the noncompliance. The written notice shall include: a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and, if the noncompliance has not been corrected, the anticipated length of time it is expected to continue; and steps taken or planned to reduce, eliminate and prevent recurrence of the noncompliance. Such notice shall not, however, serve as a defense to enforcement action if the project is found to be in violation of this chapter.
  11. **Appeal of Permit:** In accordance with the applicable regulations, any person who is aggrieved by this decision or any of the conditions of this permit may request a hearing within 30 days after notice of the decision is published in the DRP Bulletin. This request must include a completed copy of the Administrative Hearing Request Checklist. The DRP Bulletin is available through the Department's website at <http://www.nj.gov/dep/bulletin> and the Checklist is available through the Division's website at [http://www.nj.gov/dep/gpduse/download/lur\\_024.pdf](http://www.nj.gov/dep/gpduse/download/lur_024.pdf). In addition to your hearing request, you may file a request with the Office of Dispute Resolution to engage in alternative dispute resolution. Please see the website [www.nj.gov/dep/odr](http://www.nj.gov/dep/odr) for more information about this process.

**PROJECT SPECIFIC CONDITIONS:**

1. Issuance of this permit does not in any way relinquish the State's ownership interest in the subject property, if any exists. The project site is located on Tidclands Map(s) 714-2184.
2. This permit only authorizes the removal of sediment during low tide where sediments are not under water. Any change in this construction technique would require a minor permit modification.
3. The permittee shall comply with the Sediments Interim Remedial Measures Workplan (IRM) for this project, Program Interest number 015891 approved by the Department on November 16, 2015. The LSRP for the identified site in this permit is Mr. David Thompson, license number 591570. Any modification or changes to the construction activities authorized by this permit and/or the approved plans shall be approved in writing by the Department.
4. The sediment removed from this project is to be shipped to Clean Earth of North Jersey for disposal. The permittee shall notify the Office of Dredging of any change in disposal site.

**MITIGATION CONDITIONS:**

1. The remediation will result in the temporary impact of 0.40 acres of intertidal and subtidal shallows (ISS).
2. All areas of ISS excavated greater than a depth of two feet below the mudline shall be backfilled with clean sand.

**APPROVED PLANS:**

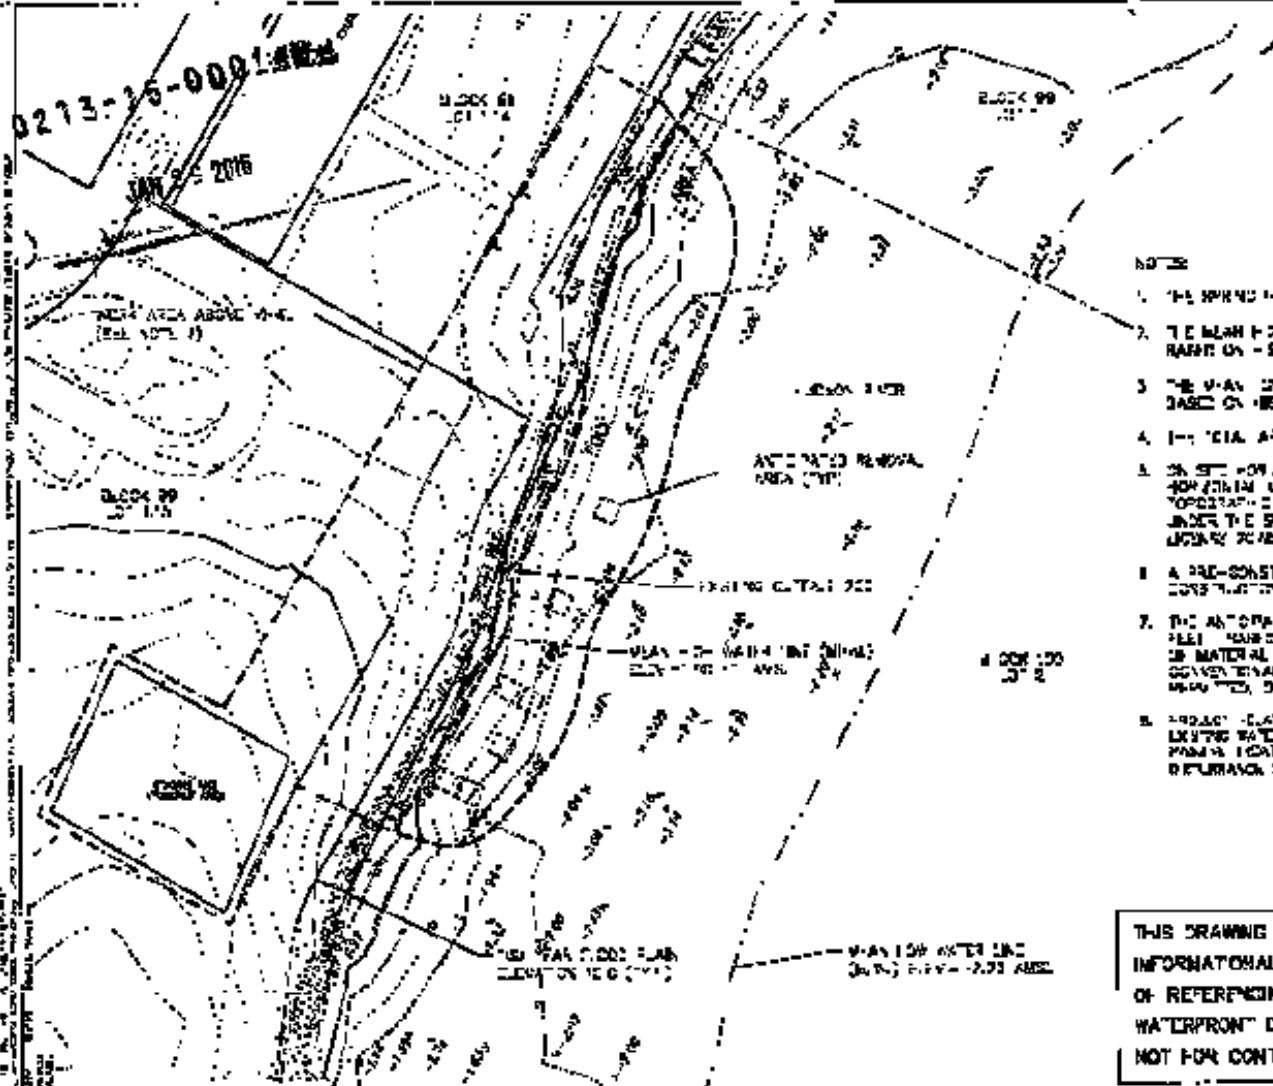

The drawings hereby approved are one (1) sheet prepared by Michael F. Bedard, signed May 12, 2015, dated March 2015, entitled: "SITE PLAN, WATERFRONT DEVELOPMENT INDIVIDUAL PERMIT APPLICATION PACKAGE, I-PARK EDGEWATER, LLC, EDGEWATER, BERGEN COUNTY, NEW JERSEY"

Approved By:

Mark Davis, Acting Supervisor  
Office of Dredging & Sediment Technology

NOTES

1. THE SPREAD TO THE ELEVATION 100 YEAR FLOOD MEAN HIGH WATER (MHW) (100%) (10000)
2. THE MEAN HIGH WATER LINE (MHW) AT THE SITE IS AT ELEVATION 100 FEET ABOVE THE BANK ON - HISTORICAL INFORMATION AND REMOVAL AREA DATA
3. THE MEAN LOW WATER LINE (MLW) AT THE SITE IS AT ELEVATION 77.2 FEET AWP (BASED ON HISTORICAL INFORMATION AND LOCAL NOAA TIDE DATA)
4. THE TIDE DATA WITHIN THE LINE OF DISTURBANCE IS AS FOLLOWS:
5. ON SITE PHOTOGRAPHS AND AERIAL PHOTOGRAPHS FOR THIS SITE WAS OBTAINED BY THE CONSULTING ENGINEER, BASED ON AERIAL PHOTOGRAPHS OBTAINED ON MARCH 11, 2006 UNDER THE SUPERVISION OF JOHN C. BEHARSON, JR. PROFESSIONAL LAND SURVEYOR LICENSE NO. 10000.
6. A PRE-CONSTRUCTION BATHYMETRY SURVEY SHALL BE CONDUCTED PRIOR TO A START OF ANY CONSTRUCTION ACTIVITIES.
7. THE ANTICIPATED REMOVAL AREA IS COMPOSED OF 8 SMALL AREAS WITH TOTAL 800 SQUARE FEET. BASED ON AN ANTICIPATED EXCAVATION DEPTH OF 15 FEET, THE ESTIMATED VOLUME OF MATERIAL TO BE REMOVED IS 12,000 CUBIC YARDS. REMOVAL WILL BE COMPLETED USING CONVENTIONAL PATH-MOVED EQUIPMENT AND REMOVED MATERIAL SHALL BE DEPOSITED AT A DESIGNATED OFF-SITE REMOVAL FACILITY.
8. PROJECT RELATED ACTIVITIES ABOVE THE MEAN HIGH WATER LINE SHALL BE CONDUCTED UNDER EXISTING WATERFRONT DEVELOPMENT PERMITS OR OBTAINMENT OF A PERMIT UNDER THE 100 YEAR FLOOD ELEVATION WHICH HAS BEEN INSTALLED IMMEDIATELY UPSTREAM OF THE LINE OF DISTURBANCE. (SEE PLAN SHEET 0213-16-0001-5000 & 0213-16-0001-5001)

THIS DRAWING HAS BEEN PROVIDED FOR INFORMATIONAL PURPOSES ONLY FOR THE SPECIFIC USE OF REFERENCING THE SEDIMENT EXCAVATION IN THE WATERFRONT DEVELOPMENT PERMIT APPLICATION AND NOT FOR CONTRACTOR BIDDING OR CONSTRUCTION.

Re: Warning Notification Edgewater Harbor  
NJDEP Land Use File #: WRN150001 0213-06 0001.2  
Block: 99, Lots: 1 & 1.05  
Edgewater Borough, Bergen County, NJ

Dear Sir/Madame:

On July 21, 2015, representatives of the Department's Bureau of Coastal and Land Use Compliance and Enforcement (hereinafter, "Bureau") conducted an inspection at the above referenced site. The inspection found that unauthorized regulated and/or prohibited activities have occurred at the site pursuant to the Waterfront Development Act ("WDA"), N.J.S.A. 12:3-1 et seq., and the Rules at N.J.A.C. 7:7 et seq. promulgated thereto. The activities in question involve:

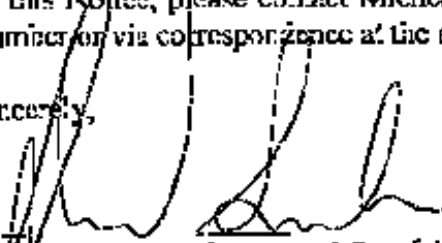

*The failure to comply with Special Condition 8 of Waterfront Development Permit, DLUR File No. 0213-06-0001.2, WFD 070001, which requires unrestricted access to the waterfront on a 24 hour basis. Specifically, the installation of a wrought iron fence with a gate as well as the placement of "No Trespassing" signs were observed by Bureau personnel between the edge of the Hudson River Waterfront Walkway and the pier in front of the Edgewater Harbor building, thereby, prohibiting the required 24 hour public access to the subject pier.*

The purpose of this Notice is to advise you of the above potential violation and to provide you with an opportunity to voluntarily comply with the above WDA Permit requirements by immediately allowing unrestricted 24 hour public access to the waterfront by removing the subject fence, gate, and "No Trespassing" signs. Please be advised that the Bureau will continue to monitor the site to assess compliance with the WDA and we are available to provide guidance as needed.

Should you have any questions regarding this Notice, please contact Michelle Agnoli, Environmental Specialist 2, of my staff at the telephone number or via correspondence at the address indicated above.

Sincerely,

David Sumbe, Environmental Specialist 3  
Bureau of Coastal & Land Use  
Compliance & Enforcement

GRANT OF CONSERVATION RESTRICTION / EASEMENT

REC-059236.01 Deed  
File: C1725 Doc: 1913-1963 Rec. Fee \$45.00  
John P. Nagay, Sussex County Clerk  
Reinstated 08/11/2014 09147188 NA

Prepared by: PS&S

NJDHP File No.: 0213-06-0001.2 WF11 070001

**GRANT OF CONSERVATION RESTRICTION / EASEMENT  
(Public Access To The Waterfront)**

This Grant of Conservation Restriction is made this 12th day of February 2014 by i.park Edgewater LLC, whose address is 485 W. Putnam Avenue, Greenwich, Connecticut 06830, hereinafter referred to as "Grantor", in favor of the State of New Jersey, Department of Environmental Protection, hereinafter referred to as the "Grantee".

**WITNESSETH:**

**WHEREAS**, the Grantor is the owner in fee simple of certain real property located in the Borough of Edgewater, County of Bergen, New Jersey designated as Lot(s) 1,3,4 and 5, Block 99 on the official Tax Map of the Borough of Edgewater County (hereinafter "the Property"); and

**WHEREAS**, the Grantee has issued to Grantor Permit #0213-06-0001.2 WF11 070001 (the "Permit"), attached hereto as Exhibit D made a part hereof, which permits certain construction described therein, and requires among other conditions public access to the waterfront, pursuant to the Waterfront Development Law, N.J.S.A. 12:5; and

**WHEREAS**, by virtue of the Property's location directly on the Hudson River the waterfront area of the Property possesses great scenic, aesthetic and recreational qualities for the public enjoyment; and

**WHEREAS**, as a condition to the Permit, Grantor must provide for public access over a portion of the Property including its water's edge, by creating and maintaining in perpetuity a walkway as well as parking spaces reserved for use by the public (collectively "Easement Areas"), as more specifically shown on the site plan prepared by Paulus, Sokolowski and Sartor LLC, and dated July 7, 2011 attached hereto as Exhibit A and made a part hereof, along with the legal description of the Waterfront Walkway Easement and Waterfront Access Easement prepared by Paulus, Sokolowski and Sartor LLC and dated January 27, 2014 and attached hereto as Exhibit B and made a part hereof; and

**WHEREAS**, the Grantee is authorized by N.J.S.A. 13:11-9 to formulate comprehensive policies for the conservation of natural resources, to promote environmental protection, and prevent pollution of the environment of the State, and is authorized by N.J.S.A. 13:8B-3 to acquire and enforce conservation restrictions; and

**WHEREAS**, the Grantor, having the authority to do so, intends to enter into this Grant of Conservation Restriction/Easement in order to grant to the Grantee the conservation restriction / easement on the Easement Area for passive recreational use by the public (the "Conservation Restriction / Easement").

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

**NOW THEREFORE**, in consideration for the issuance of the Permit and for the valuable consideration the receipt and sufficiency of which is hereby acknowledged, and the facts recited above and the terms, conditions and restrictions contained herein, the Grantor hereby agrees that the Property shall be subject in perpetuity to the following conveyances, covenants and restrictions in favor of the Grantee:

1. Grantor hereby conveys transfers, assigns and grants to the Grantee a Conservation Restriction/Easement with respect to that portion of the Property as shown in Exhibit A and as described in Exhibit B.
2. The parties agree that the Conservation Restriction / Easement shall be in full force and effect as to the entire Easement Areas as shown in Exhibit A and described in Exhibit B, including those areas upon which the public parking spaces and the walkway(s) have not yet been constructed as of the date of this Conservation Restriction / Easement, and will be accessible to the public at all times in perpetuity.
3. Nothing contained in this Conservation Restriction / Easement shall be deemed or construed to give or grant to the Grantee, the public, or anyone else, any rights to use any portion of the Property other than the Easement Areas.
4. Grantor, its successors and assigns, shall maintain the Easement Areas pursuant to the Maintenance Plan, attached hereto as Exhibit C made a part hereof.
5. The Easement Areas shall be available for public passive recreational purposes. Recreational uses shall not include any activity that violates federal, state, county or municipal law. No construction shall be permitted within the Easement Areas, other than the walkway and parking spaces reserved for use by the public consistent with the Permit. Grantor shall have the right to access the easement land in order to comply with any New Jersey Department of Environmental Protection remediation, operation and maintenance, or alterations as may be required. Grantor shall also retain right to conduct temporary closing of easement land to public access during construction activities.
6. The Easement Areas shall be available for waterfront public access purposes, being those passive recreational activities including, but not limited to, jogging, bicycling, walking, viewing, fishing and other similar passive recreational activities consistent with and compatible with public enjoyment of the Easement Areas preserved by the Conservation Restriction / Easement herein granted.
7. In no event shall the Grantor charge a fee for access to or use of any portion of the Easement Areas, including for use of parking spaces reserved by the Conservation Restriction / Easement herein granted.
8. In no event shall Grantor erect, place or maintain any gate or any obstruction whatsoever across any portion of the Easement Areas that blocks impedes physical access to the

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

Easement Areas by the public at any time except as expressly permitted herein or as may be required by applicable governmental authorities.

9. The Grantor shall not construct, install or maintain any structure, building or other improvement within the Easement Areas, except those appearing on plans and specifications approved by the Grantee in writing pursuant to the Permit. Grantor shall have the right to access the easement land in order to comply with any New Jersey Department of Environmental Protection remediation, operation and maintenance, or alterations as may be required. Grantor shall also retain right to conduct temporary closing of easement land to public access during construction activities.
10. The boundaries of the Easement Area shall be marked as noted on the approved site plan (Exhibit A), within 30 days of receipt of No Further Action determination from Grantor, for area subject to site remediation requirements. Examples include the edge of a walkway, curbing, fence post, pipe in the ground, survey markers, or a shrub or tree line.
11. Grantor's liability with respect to the Easement Area is subject to the limitations contained in N.J.S.A. 2A:42A-8 and 2A:42A-8.1 (Landowner Liability Act).
12. Any activity on or use of the Easement Areas by Grantor that is inconsistent with the Public Trust Doctrine, the purposes of this Conservation Restriction / Easement, or not in conformance with the final plans and specifications approved by the Grantee in writing pursuant to the Permit cited herein or any other permit subsequently issued by the Grantee regulating the Property shall be prohibited.
13. In the event of a conflict between this Conservation Restriction / Easement and the final plans and specifications approved by the Grantee in writing pursuant to the Permit, the latter shall govern.
14. This Conservation Restriction / Easement shall be a burden upon and shall run with the Property, and shall bind Grantor, its successors and/or assigns as their interest may appear, in perpetuity.
15. Grantor shall provide the Grantee telephonic and written notice of any transfer or change in ownership of any portion of the Easement Areas, including but not limited to the name and address of the new owner, and including but not limited to any later-formed condominium or home-owner association.
16. In addition to, and not in limitation of, any other rights of the Grantee hereunder or at law or in equity, if the Grantee determines that a breach, default or violation ("Violation") of this Conservation Restriction / Easement has occurred or that a Violation is threatened, the Grantee shall give written notice to Grantor of such Violation, setting forth the specifics thereof, and demand corrective action sufficient to cure the Violation. If the Grantor fails to cure the Violation within a reasonable time after receipt of notice thereof from the Grantee, or under circumstances where the Violation cannot reasonably be cured within a time period dictated by the Grantee, fails to begin curing such Violation within the time period dictated

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

by the Grantee, or fails to continue diligently to cure such Violation until finally cured, the Grantee may bring an action at law or in equity in a court of competent jurisdiction:

- (a) to rejoin and/or cure such Violation,
- (b) to enter upon the Easement Areas and to take action to terminate and/or cure such Violation and or to cause the restoration of that portion of the Easement Areas affected by such Violation to the condition that existed prior thereto, or
- (c) to seek or enforce such other legal and/or equitable relief or remedies as the Grantee deems necessary or desirable to ensure compliance with the terms, conditions, covenants, obligations and purpose of this Conservation Restriction / Easement.

17. If the Grantee, in its reasonable discretion, determines that exigent circumstances require immediate action to prevent or mitigate significant, material, and irreparable damage to the Easement Areas, the Grantee may pursue its remedies under paragraph 16 above without waiting for the period provided for cure to expire and with at least verbal notice to the Grantor of such event. The Grantee's rights under this paragraph shall apply equally in the event of either actual or threatened Violations of the terms of this Conservation Restriction / Easement. Grantor agrees that the Grantee's remedies at law for any Violation of the terms of this Conservation Restriction / Easement are inadequate and that the Grantee shall be entitled to the injunctive relief described in this paragraph, both prohibitive and mandatory, in addition to such other relief which the Grantee may be entitled, including specific performance. The above language shall in no event be interpreted to derogate or diminish the Grantee's rights and powers under the laws of the State of New Jersey for the protection of public health, safety and welfare. In addition, the foregoing shall not apply in event or events of force majeure.
18. Enforcement of the terms of this Conservation Restriction / Easement shall be at the discretion of the Grantee and any forbearance by the Grantee to exercise its rights under this Conservation Restriction / Easement in the event of any Violation by Grantor shall not be deemed or construed to be a waiver by the Grantee of such term or of any subsequent Violation or of any of the Grantee's rights under this Conservation Restriction / Easement. No delay or omission by the Grantee in the exercise of any right or remedy upon any Violation by Grantor shall impair such right or remedy or be construed as a waiver of such right or remedy.
19. Grantor agrees to reimburse the Grantee for any reasonable, actual costs incurred by the Grantee in enforcing the terms of this Conservation Restriction / Easement against Grantor in the event of an uncured default, and including, without limitation, the reasonable costs of suit and attorneys' fees.
20. The Grantee reserves the right to transfer, assign, or otherwise convey the Conservation Restriction / Easement to governmental entity to assume the benefits and obligations of the Grantee hereunder, subject to advance written notice hereof to the Grantor.

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

21. Any notice, demand, request, consent, approval or communication under this Conservation Restriction / Easement shall be sent by certified mail, return receipt requested or reliable overnight courier, addressed as follows:

To the Grantor:  
i.park Ridgewater LLC  
485 W. Putnam Ave.  
Greenwich, CT 06830  
Attention: Joseph Coffey  
(203) 661-0055

To the Grantee:

State of New Jersey  
Department of Environment Protection  
Division of Land Use Regulation  
And its successors and assigns  
As of the date of this Conservation Restriction / Easement, Grantee's address  
for purposes of notice is:  
501 East State Street  
P.O. Box 439  
Trenton, NJ 08625-0439  
Attention: Director, Division of Land Use Regulation  
(609) 984-3444

In addition, any notice relating to paragraph 15 shall be addressed as follows:

To the Department:

State of New Jersey  
Department of Environmental Protection  
Coastal & Land Use Compliance & Enforcement  
And its successors and assigns  
As of the date of this Conservation Restriction / Easement, Grantee's address  
for purposes of notice relating to paragraph 15 is:  
401 East State Street  
P.O. Box 422  
Trenton, NJ 08625-0422  
Attention: Manager, Coastal & Land Use Compliance & Enforcement  
(609) 984-4581

22. A party may change the address or person to whom notices to it are required to be given by notice given in the manner above provided.
23. Taxes, Insurance.

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

- a. Grantor retains all responsibilities and shall bear all costs and liabilities of any kind related to the ownership, operation, upkeep and maintenance of the Easement Areas. Grantor shall keep the Easement Areas free of any liens arising out of any work performed for, materials furnished to, or obligations incurred by Grantor.
- b. The Grantor agrees to pay any real estate taxes or other assessments levied on the Easement Areas. If the Grantor becomes delinquent in payment of said taxes or assessments, such that a lien against the land is created, the Grantee, at its option, shall, after written notice to the Grantor, have the right to purchase and acquire the Grantor's interest in said Easement Areas, or to take such other actions as may be necessary to protect the Grantee's interest in the Easement Areas and to assure the continued enforceability of this Conservation Restriction / Easement.

### 24. Miscellaneous.

- a. The laws of the State of New Jersey shall govern the interpretation and performance of this Conservation Restriction / Easement.
- b. If any provision of this Conservation Restriction / Easement or the application thereof to any person or circumstance is found to be invalid, the remainder of the provisions of this Conservation Restriction / Easement, or the application of such provision to persons or circumstances other than those as to which it is found to be invalid, as the case may be, shall not be affected thereby.
- c. This Conservation Restriction / Easement and the Permit set forth the entire agreement of the parties with respect to the Conservation Restriction / Easement and supersede all prior discussions, negotiations, understandings or agreements relating to the easement, all of which are merged herein. No alteration or variation of this Conservation Restriction / Easement shall be valid or binding unless contained in writing executed by the parties hereto.
- d. Should there be more than one Grantor, the obligations imposed by this Conservation Restriction / Easement upon each Grantor shall be joint and several.
- e. The covenants, terms, conditions and restrictions of this Conservation Restriction / Easement shall be binding upon and inure to the benefit of, the parties hereto and all parties having or acquiring any right, title or interest in any portion of the Property, including holders of subdivision deeds, and shall continue as a servitude running in perpetuity with the Property.
- f. The captions in this Conservation Restriction / Easement have been inserted solely for convenience of reference and are not a part of this Conservation Restriction / Easement and shall have no effect upon construction or interpretation.

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

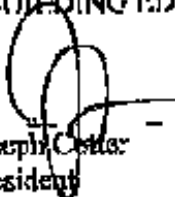

- g. Execution of this Conservation Restriction / Easement does not constitute a waiver of the rights or ownership interest of the State of New Jersey in public property or under the Public Trust Doctrine.
25. The Grantor reserves unto itself the right to undertake the minimal modifications of the Easement Area that are approved by the Grantee. The Grantee may approve the modification under the following conditions and with the following documentation:
- a. The modification results in an increased level of protection of the regulated resource; or
  - b. The modification results in equivalent areas of resources protected; and
  - c. The modification does not compromise the original protected resource.
26. If the Grantee approves the Grantor's proposed modification, the Grantor shall amend this instrument by preparing and submitting to the Grantee for review and approval:
- a. A revised Plan and Metes and Bounds description for the area to be preserved under the modified Conservation Restriction / Easement (hereinafter the "Modification Documents"); and
  - b. An Amended Conservation Restriction / Easement that reflects the modifications to this original Conservation Restriction / Easement, the justification for the modification and that also includes the deed book and page of the title deed for the property or properties subject to the modified Conservation Restriction / Easement set forth in the Modification Documents.
27. The Grantor shall record the documents listed in paragraph 26, above, in the same manner and place as this original Conservation Restriction / Easement was recorded.
28. This Grant of Conservation Restriction / Easement may only be removed pursuant to N.J.S.A. 13:81B-1 et seq.

**GRANT OF CONSERVATION RESTRICTION / EASEMENT**

**TO HAVE AND TO HOLD** unto the State of New Jersey Department of Environmental Protection its successors and assigns forever. The covenants, terms, conditions restrictions and purposes imposed with this Conservation Restriction / Easement shall not only be binding upon the Grantor but also its agent, personal representatives, assigns and all other successors to it in interest and shall continue as a servitude running in perpetuity with the Property.

**IN WITNESS WHEREOF** the Grantor has set its hand and seal on the day and year first above written and directs that this instrument be recorded in the office of the Bergen County Clerk.

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

### EXHIBIT C MAINTENANCE PLAN

1. Grantor agrees to maintain the Basement Areas at Grantor's expense.
2. Parking spaces reserved for the public cannot be removed without prior written approval by the Department.
3. Maintenance" includes:
  - (a) removal of snow, ice, leaves, litter, debris, graffiti, and unauthorized signage from the Basement Areas,
  - (b) regular emptying of trash receptacles,
  - (c) maintaining the surface of tile Basement Areas and the area underneath in good repair, reconstruction of any portion of the Basement Areas that may be necessary due to deterioration or destruction of the Basement Areas due to any cause including but not limited to wear and tear, fire, storm, subsidence or flood,
  - (d) maintenance and regular cleaning of drainage basins, grates or any other structure that may be designed to receive surface water runoff from the Basement Areas, maintenance of any lighting fixtures, trash receptacles and benches appearing on the final plans approved by the Department in writing pursuant to Permit No.[INSERT NUMBER] or any permit subsequently issued by the Department regulating the Property, and any other action consistent with these obligations which is necessary to effectuate permanent and convenient public access to the Basement Areas.

RE: Waterfront Development Permit, Flood Hazard Area Verification, and Flood Hazard Area Individual Permit  
D.L.R. File No.: 0713-06-00012 WPD 070001 (Hazard), FVA 080001 & 080002 (respectively)  
Applicant: National R/W/Sources  
Project Name: Uniflex Site Redevelopment Phase II  
Block: 99; Lots: 1, 2 thru 5  
Location: Borough of Hopewater, Bergen County

Dear Ms. McLoughlin

The Division of Land Use Regulation, acting under the provisions of the New Jersey Coastal Zone Management Rules (N.J.A.C. 7:27-1.1 et seq.), and the Flood Hazard Area Control Act Rules (N.J.A.C. 7:23-1.1 et seq.), has decided to conditionally approve your applications for a Waterfront Development Permit, Flood Hazard Area Individual Permit, and Flood Hazard Area Verification.

The proposed project under Phase II of the redevelopment involves the construction of ten (10) mixed-use buildings (8 high-rise structures), parking garages, parking lot areas, the renovation of an existing building, 750 linear feet of Hudson River Waterfront Walkway, a 10-foot wide perpendicular access to the waterfront walkway, 700 linear feet of rip-rap stabilization, three (3) stormwater outfall structures, and related stormwater facilities/amenities, as described in the attached permit.

Please review this approval and note any conditions which may have been imposed and promptly return the attached acceptance form to the Division at the above address. In order to promote inter-governmental cooperation in the management of our natural resources, a copy of this decision shall be shared with appropriate local and federal agencies.

If you or anyone else is aggrieved by this permit decision, an administrative hearing may be requested by writing to the following address: Office of Legal Affairs, Department of Environmental Protection, P. O. Box 402, Trenton, NJ 08625-0402, Attention: Adjudicatory Hearing Requests. Your hearing request must include a copy of an Administrative Hearing Request Checklist and all information identified in Section III of that list. Pursuant to N.J.A.C. 7:2A-5.1, your request for an administrative hearing must be received by the department within 30 days of publication of notice of the permit decision in the DEP Register.

If you should have any questions on this decision or letter, please contact Justin Tarragan in writing at NJDEP, Division of Land Use Regulation, P.O. Box 439, Trenton, NJ 08625, or by calling (609) 777-0454. Please include the Division's file no. in all future correspondence.

Sincerely,

Commissioner Jisa P. Jackson  
Bureau of Ocean Growth and Redevelopment

**STANDARD CONDITIONS:**

1. **Extent of approval:** This document grants permission to perform certain activities that are regulated by the State of New Jersey. The approved work is described by the text of this permit and is further detailed by the approved drawings listed below. All work must conform to the requirements, conditions and limitations of this permit and all approved drawings. You must keep a copy of this permit and all approved drawings readily available for inspection at the work site. Approved work may be altered only with the prior written approval of the Division. If you alter the project without prior approval, or perform work beyond the authorization of this permit, you may be in violation of State law and may be subject to fines and penalties.
2. **Acceptance of permit:** If you begin any activity approved by this permit, you thereby accept this document in its entirety and agree to adhere to all terms and conditions. If you do not accept or agree with this document in its entirety, do not begin construction. You are entitled to request an appeal within a limited time as detailed on the attached *Administrative Hearing Request Checklist and Proceeding Notice*. You may also contact the project manager shown on the first page if you have any questions or concerns about this document.
3. **Recording with County Clerk:** You must record this permit in the Office of the County Clerk for each county involved in this project. You must also mail or fax a copy of the first page of this permit to the Division showing the received stamp from each County Clerk within 30 days of the issuance date (or 90 days if multiple counties are involved). The Division's address and fax number are shown on the first page of this permit.
4. **Notice of Construction:** You must notify the Division in writing at least 7 days before you begin any work approved by this permit. The Division's address and fax number are shown on the first page of this permit. Please direct your letter to the project manager shown on the first page.
5. **Expiration date:** All activities authorized by this permit must be completed by the expiration date shown on the first page. At that time, this permit will automatically become invalid and none of the approved work may begin or continue until a replacement permit is granted. (Some coastal permits may qualify for an extension of the expiration date. Please contact the Division for further information.)
6. **Rights of the State:** This permit is revocable and subject to modification by the State with due cause. The State may inspect the work site and may suspend construction if work does not comply with this permit. This permit does not grant proprietary rights. The issuance of this permit shall not affect any action by the State on future applications, nor affect the title or ownership of property, nor make the State a party in any suit or question of ownership.
7. **Other responsibilities:** You must obtain all necessary local, Federal and other State approvals before you begin work. All work must be stabilized in accordance with the *Standards for Soil Erosion and Sediment Control in New Jersey*, and all fill material must be free of toxic pollutants in toxic amounts as defined in section 307 of the Federal Act.

**SPECIAL CONDITIONS IN ADDITION TO THE STANDARD CONDITIONS:**

6. The permittee must construct approximately 750 linear feet of the Hudson River Waterfront Walkway concurrent with the construction of the project. In addition, prior to commencing any activities authorized by this permit, the permittee shall create and deliver a Deed of Conservation Easement to recordable form that clearly delineates the proposed public waterfront walkway, and perpendicular access approved as part of this permit. This area should be used as public access facilities open to the general public on a 24-hour basis, to be maintained and managed by the permittee (or its assigns) in perpetuity. The deed restriction shall include the entire proposed public access walkway plan approved hereto. In addition, a public access walkway connecting to the adjacent neighborhood shall be included, such that when public access becomes available at

these sites, the access can be easily connected. This area shall also be addressed in the deed restriction for easement and all future owners of the subject property. The restriction shall be included on the deed, and recorded in the office of the County Clerk (the REGISTER OF DEEDS AND MORTGAGES), in the county wherein the lands included in the waiver are located. The restriction shall run with the land and be binding upon all successive owners. All individual lot surveys shall show the approved proposed public access walkway boundaries. Any regulated activities undertaken on the site before a copy of the recorded restriction is submitted to the Division will be considered in violation of the Waterfront Development Law. The easement restriction shall also include a requirement to maintain overbanks, trash receptacles, benches, lighting, and railing along the entire waterfront walkway and signage to be maintained in perpetuity. The permittee shall submit a revised plan illustrating the benches and bench description of the entire proposed public access area.

9. In order to protect anadromous fish species during their migratory run, any activities that may introduce sediments or which could cause an increase in the natural level of turbidity into the Hudson River are prohibited between April 1 and June 30 of each year. The Division reserves the right to suspend all regulated activities on the should it be determined that the applicant has not taken proper measures to cause sediment compliance with this condition.
10. All excavated material shall be disposed in a lawful manner and outside any regulated flood plain, open water, freshwater wetlands or adjacent transition areas, and in such a way as to not interfere with the positive drainage of the receiving area.
11. The Decision to grant this stream encroachment permit did not include a structural review of the proposed activities with regard to the International Building Code; nor did it include a comparative review of any local flood ordinances which may apply. As such, the proposed structure may not fully comply with the provisions of the International Building Code or meet the requirements of the appropriate local flood ordinances. Consequently, the construction official for the municipality in which this project is located may reserve the right to modify the design of, or deny the erection of these structures which do not meet the appropriate local ordinances or construction codes which are within local jurisdiction.
12. Any discharge of dredged or fill material shall consist of clean, saltable material free from toxic pollutants in toxic amounts, and shall comply with all applicable Division's rules and specifications regarding use of dredged or fill material.
13. No material shall be deposited or dewatered in freshwater wetlands, transition areas, State open waters or other environmentally sensitive areas, other than what has been approved on the plans.
14. All necessary local, Federal and other state approvals must be obtained by the applicant prior to the commencement of the herein-permitted activities. Approvals from the following will be required:
  - a. NHDHP, Site Remediation Program
15. Activities below the Mean High Water Line of the Hudson River are prohibited.
16. Prior to the commencement of regulated activities on-site, the permittee shall submit for review and approval the traffic report to the Bergen County Traffic Engineer to determine whether the project is consistent with the County's traffic regulations.

**STANDARD CONDITIONS:**

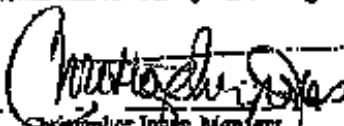

1. **Extent of approval:** This document grants permission to perform certain activities that are regulated by the State of New Jersey. The approved work is described by the text of this permit and is further detailed by the approved drawings listed below. All work must conform to the requirements, conditions and limitations of this permit and all approved drawings. You must keep a copy of this permit and all approved drawings readily available for inspection at the work site. Approved work may be altered only with the prior written approval of the Division. If you alter the project without prior approval, or expand work beyond the description of this permit, you may be in violation of State law and may be subject to fines and penalties.
2. **Acceptance of permit:** If you begin any activity approved by this permit, you thereby accept this document in its entirety and agree to adhere to all terms and conditions. If you do not accept or agree with this document in its entirety, do not begin construction. You are entitled to request an appeal within a limited time as detailed on the attached *Administrative Hearing Request Checklist and Tracking Form*. You may also contact the project manager shown on the first page if you have any questions or concerns about this document.
3. **Recording with County Clerk:** You must record this permit in the Office of the County Clerk for each county involved in this project. You must also mail or fax a copy of the front page of this permit to the Division showing the received stamp from each County Clerk within 30 days of the issuance date (or 90 days if multiple counties are involved). The Division's address and fax number are shown on the first page of this permit.
4. **Notice of Construction:** You must notify the Division in writing, at least 7 days before you begin any work approved by this permit. The Division's address and fax number are shown on the first page of this permit. Please direct your letter to the project manager shown on the first page.
5. **Expiration date:** All activities authorized by this permit must be completed by the expiration date shown on the first page. At that time, this permit will automatically become invalid and none of the approved work may begin or continue until a replacement permit is granted. (Some coastal permits may qualify for an extension of the expiration date. Please contact the Division for further information.)
6. **Rights of the State:** This permit is revocable and subject to modification by the State with due cause. The State may inspect the work site and may suspend construction if work does not comply with this permit. This permit does not grant property rights. The issuance of this permit shall not affect any action by the State on future applications, nor affect the title or ownership of property, nor make the State a party in any suit or question of ownership.
7. **Other responsibilities:** You must obtain all necessary local, Federal and other State approvals before you begin work. All work must be stabilized in accordance with the *Standards for Soil Erosion and Sediment Control in New Jersey*, and all fill material must be free of toxic pollutants in toxic amounts as defined in section 307 of the Federal Act.

**SPECIAL CONDITIONS IN ADDITION TO THE STANDARD CONDITIONS:**

8. The permittee was construct approximately 750 linear feet of the Hudson River Waterfront Walkway concurrent with the construction of the project. In addition, prior to commencing any activities authorized by this permit, the permittee shall execute and deliver a Deed of Conservation Easement in recordable form that clearly delineates the proposed public waterfront walkway, and perpendicular access approved as part of this permit. This area should be noted as public access facilities open to the general public on a 24-hour basis, to be maintained and managed by the permittee (or its assignee) in perpetuity. The deed restriction shall include the entire proposed public access walkway plus approved access. In addition, a public access walkway connecting to the adjacent neighborhood shall be included, such that when public access becomes available at

cross street, the access can be easily converted. This area shall also be addressed in the deed restriction for control and all future owners of the subject property. The restriction shall be included on the deed, and recorded in the office of the County Clerk (the REGISTRAR OF DEEDS AND MORTGAGES), in the county wherein the lands included in the waiver are located. The restriction shall run with the land and be binding upon all successive owners. All individual lot surveys shall show the approved proposed public access walkway boundaries. Any regulated activities undertaken on the site before a copy of the recorded restriction is submitted to the Division will be considered in violation of the Waterfront Development Law. The conservation restriction shall also include a requirement to maintain overlooks, high receptacles, benches, lightings, and railing along the entire waterfront walkway and signage to be maintained in perpetuity. The permittee shall submit a revised plan illustrating the routes and layout description of the entire proposed public access area.

9. In order to protect anadromous fish species during their migratory run, any activities that may introduce sediments or which could cause an increase in the natural level of turbidity into the Hudson River are prohibited between April 1 and June 30 of each year. The Division reserves the right to suspend all regulated activities on site should it be determined that the applicant has not taken proper precautions to ensure continuous compliance with this condition.
10. All excavated material shall be disposed in a lawful manner and outside any regulated flood plain, open water, freshwater wetlands or adjacent transition areas, and in such a way as to not interfere with the positive drainage of the receiving area.
11. The decision to grant this stream encroachment permit did not include a structural review of the proposed activities with regard to the International Building Code; nor did it include a comparative review of any local flood ordinances which may apply. As such, the proposed structures may not fully comply with the provisions of the International Building Code or meet the requirements of the appropriate local flood ordinances. Consequently, the construction official for the municipality in which this project is located may reserve the right to modify the design of, or delay the erection of those structures which do not meet the appropriate flood ordinances or construction codes which are within local jurisdiction.
12. Any discharge of dredged or fill material shall consist of clean, suitable material free from toxic pollutants in toxic amounts, and shall comply with all applicable Division's rules and specifications regarding use of dredged or fill material.
13. No material shall be deposited or dewatered in freshwater wetlands, transition areas, State open waters or other environmentally sensitive areas, other than what has been approved in the plan.
14. All necessary local, Federal and other state approvals must be obtained by the applicant prior to the commencement of the herein permitted activities. Approvals from the following will be required:
  - a. NIDMP, Site Remediation Program
15. Activities below the Mean High Water Line of the Hudson River are prohibited.
16. Prior to the commencement of regulated activities on-site, the permittee shall submit for review and approval the traffic report to the Bergen County Traffic Engineer to determine whether the project is consistent with the County's traffic regulations.

**WATERFRONT DEVELOPMENT  
AND  
FLOOD HAZARD AREA ENVIRONMENTAL REPORT**

**Applicant:** National RE/Sources  
**Project location:** Lindever Redevelopment Phase II, Borough of Ridgewood, Bergen County  
**DULUR File No.:** 0217-06-0001.2; WFD 04001 (Upland), FIA 080601 (Ver.), & MIA 080002 (EP)

The Rules on Coastal Area Management (N.J.S.A. 13:29-1 et seq.) require that a permit be obtained from the Division for the construction of certain facilities, including the construction of a public facility between the mean high water line of any tidal water and a point 500 feet landward of the mean high water line. In addition, the Flood Hazard Area Control Act Rules (N.J.S.A. 58:16A-50 et seq.) require that a permit be obtained from the Division governing human disturbance to the land and vegetation in the flood hazard area of a regulated water, as described at N.J.A.C. 7:27-3, and in the riparian zone of a regulated water, as described at N.J.A.C. 7:13-4.

**PROJECT DESCRIPTION:**

The applicant, National RE/Sources, Inc., proposes a Phase II redevelopment project on a brownfield site in the Borough of Ridgewood, Bergen County. Specifically, the proposed project involves the construction of ten (10) mixed-use buildings (8 high rise structures), parking garages, parking lot areas, the renovation of an existing building, 750 linear feet of Hudson River Waterfront Walkway, a 10-foot wide perpendicular access to the waterfront walkway, 700 linear feet of rip rap stabilization, three (3) stormwater outfall structures, and related stormwater facility construction.

This 49.85-acre (21.3 acre upland) site is bound to the north and south by private properties, to the west by River Road, and to the east by the Hudson River. The purpose of Phase II is to create a mixed-use waterfront community of housing, commercial business, public open space and waterfront amenities on a waterfront site that has been left vacant or underutilized.

**ADMINISTRATIVE HISTORY:**

- A Waterfront Development Permit (DULUR file no. 0217-06-0001.1; WFD 060501) was issued by the Division on May 8, 2006 for the construction of Phase I as described in the approved permit.
- Any inland tributaries that may have touched Lots 3 & 4 was covered by a Grant to Lever Brothers Company, dated November 1, 1964, located in Liber X-6 at page 103, Tidelands file no. 82-6620.
- Four large Grants were issued for Lots 1 & 2, and they are: 1) Grant to Water Front Improvement Company, dated April 14, 1904, located in Liber P at page 673; 2) Grant to Meakin and Lyons, dated March 30, 1859, located in Liber M at page 556; 3) Grant to Argam Tannin Company, dated September 7, 1911, located in Liber O at page 417; and 4) Grant to Colby and Company, dated February 27, 1912, located in Liber O at page 447.
- An overall Grant was issued to Lever Brothers Company, dated November 16, 1984, located in Liber X-6 at page 106, Tidelands file no. 82-0551.
- A Remedial Investigation Report and Remedial Action Work Plan was submitted to the NJDEP - Site Remediation Program (SRP) on or around February 1, 2006. The reports are currently under SRP's review. The SRA Case no. is E20040267.
- According to a memo, dated March 3, 2008, from the Division of Watershed Management, the proposed project is consistent with the Northeast Water Quality Management Plan as long as they don't expand past the current outline of the dock (which they are not currently proposing), and that they discharge their wastewater to Ridgewood MIA sewer service area (which they are).

The proposed project is shown on site plans entitled:

"ONLINE VIEW WITH RICHVIEW VIEWING", BUREAU OF EDGEWATER, BERGEN COUNTY, NEW JERSEY", dated August 7, 2006, last revised May 12, 2008, and prepared by PAULUS, SOKOLOWSKI AND BARTOR, L.L.C.

#### WATERFRONT DEVELOPMENT ELEMENTS:

This parcel is conditionally authorized under and in compliance with the Rules on Coastal Zone Management for Prime Fishing Areas (7:7B-3.4), Intertidal and Subtidal Shallows (7:7B-3.15), Filled Water's Rule (7:7B-3.23), Flood Hazard Areas (7:7B-3.25), Riparian Zones (7:7B-3.26), Historic and Archaeological Resources (7:7B-3.25), Endangered or Threatened Wildlife or Vegetation Species Habitats (7:7B-3.28), Special Hazard Areas (7:7B-3.41), Hudson River Waterfront Area (7:7B-3.48), Land and Water Subject to Public Trust Rights (7:7B-3.50), Quilts and Tablets (7:7B-4.17), Imperious Cover Requirements that apply to Sites in the Upland Waterfront Development and CAZRA Areas (7:7B-5.3), Vegetative Cover Requirements that apply to Sites in the Upland Waterfront Development and CAZRA Areas (7:7B-5.4), Imperious Cover Limits for a Site in the Upland Waterfront Development Area (7:7B-5A.9), Vegetative Cover Percentages for a Site in the Upland Waterfront Development Area (7:7B-5A.10), Secondary Impact (7:7B-6.3), Riparian Use rules (7:7B-7.2), Translocation Use Rule (7:7B-7.5), Coastal Engineering (7:7B-7.11), Light Pole Structures (7:7B-7.14), Water Quality (7:7B-8.4), Stormwater Management (7:7B-8.7), Public Trust Rights (7:7B-8.11), Seismic Resources and Design (7:7B-8.12), Buffers and Compatibility of Uses (7:7B-8.13), and Traffic (7:7B-8.14).

The State of New Jersey Coastal Management Program defines substantive policies to guide public decisions concerning significant proposed development and management of resources in New Jersey's Coastal Zone. The analysis of this coastal parcel application is based upon the Rules on Coastal Zone Management (RCZM) (N.J.A.C. 7:7B-1.1 et seq.), adopted effective September, 1978, last revised April 1, 2008. This analysis will refer to applicable policies by administrative code citation.

#### Prime Fishing Areas (7:7B-3.4):

(a) *Prime fishing areas include tidal water areas and water's edge areas that have a demonstrable history of supporting a significant local quantity of recreational or commercial fishing activity. The area includes all coastal jetties and groins, public fishing piers or docks and artificial reefs.*

According to the applicant, the subject site does not have a demonstrable history of supporting recreational fisheries. However, due to the proposed redevelopment of the currently vacant site (i.e. shoreline stabilization, and public access to the waterfront area), benefit to fishing in the area will likely increase. The applicant has demonstrated compliance with the Rule.

#### Intertidal and Subtidal Shallows (7:7B-3.15):

(a) *Intertidal and subtidal shallows means all permanently or temporarily submerged areas from the spring high water line to a depth of four feet below mean low water*

(b) Development, filling, new dredging or other disturbance is discouraged but may be permitted in accordance with (c), (d), (e), and (f) and with N.J.A.C. 7:7E-4.2 through 4.20.

The applicant proposes rip rap bank stabilization along approximately 700 linear feet of the existing bulkhead. Stabilization of the bulkhead will all be above the mean high water line. No disturbance to intertidal and subtidal shallows is being proposed. The applicant has demonstrated compliance with the Rule.

#### Filled Water's Edge (7:7E-3.23):

(a) Filled water's edges are existing filled areas lying between wetlands or water areas, and either the upland limits of fill, or the first paved public road or railroad landward of the adjacent water area, whichever is closer to the water. Some existing or former dredged material disposal sites and navigation fill areas are filled water's edge.

(b) In waterfront areas in-land outside of the CAZRA where the water dependent use may be a public walkway, provided the upland walkway right-of-way is at least 30 feet wide, unless there are existing on-site physical constraints which cannot be removed or altered to meet this requirement.

(c) The development shall comply with the requirements for impervious cover and vegetative cover that apply to the site under N.J.A.C. 7:7E-5 and either N.J.A.C. 7:7E-5A or 5B.

(d) On all filled water's edge sites, development must comply with the lands and waters subject to Public Trust Rights Rule, N.J.A.C. 7:7E-3.50, and the Public Trust Rights Rule, N.J.A.C. 7:7E-8.11.

Based on the NJDEP jurisdiction mapping, the project site is determined to be Filled Water's Edge. Since the proposed project is not considered to be water dependent, the applicant proposes to develop a public waterfront walkway within a right-of-way that is 30 feet wide along the water's edge. As part of this Phase II redevelopment, approximately 750 linear feet of waterfront walkway will be constructed. The Phase II waterfront walkway will tie directly into the previously Division approved Phase I waterfront walkway. Impervious cover and vegetative cover under N.J.A.C. 7:7E-5, 5A or 5B, and the Public Access to the Waterfront Rule under N.J.A.C. 7:7E-8.11 are addressed below. The applicant has demonstrated compliance with this Rule.

#### Flood Hazard Areas (7:7E-3.25):

(a) Flood hazard areas are the flowway and flood fringe area around rivers, creeks and streams as delineated by the Department under the Flood Hazard Area Control Act (N.J.S.A. 58:16A-30 et seq.); and areas defined or delineated as an A or V zone by the Federal Emergency Management Agency (FEMA). They are areas subject to either fluvial or fluvial flooding. Where flood hazard areas have been delineated by both the Department and FEMA, the Department delineation shall be used. Where flood hazard areas have not been delineated by the Department or FEMA, limits of the 100-year flood plain will be established by computation on a case-by-case basis.

(b) Retention and detention basins developed specifically for storm water management purposes are conditionally acceptable provided they are constructed in accordance with the Stormwater Management rule (N.J.A.C. 7:7E-8.1).

(c) Development in a flood hazard area shall comply with the requirements for impervious cover and vegetative cover under N.J.A.C. 7:7E-5 and either N.J.A.C. 7:7E-5A or 5B, as applicable.

The Hudson River is a tidal water body. The Flood Hazard Areas have been previously delineated by Federal Emergency Management Agency (FEMA). The entire subject site is located below the FEMA 100-year floodplain and is classified in Zone A1. The Division's engineer will ensure that the proposed structure will be located on an elevation in accordance with the Division's regulations. The Division engineer's comments are incorporated at the end of this report. Impervious cover and vegetative cover under N.J.A.C. 7:7E-5, 5A or 5B are addressed below. The applicant has demonstrated compliance with this Rule.

#### Riparian Zones (7:7E-3.26):

(a) A riparian zone exists along every regulated water, except there is no riparian zone along the Atlantic ocean nor along any non-tidal lagoons, stormwater management basins, or oceanfront barrier island, spit or peninsula. Regulated waters are defined in the Flood Hazard Area Control Act rules at N.J.A.C. 7:13-2.2.

(v) The riparian zone includes the land and vegetation within each regulated water described in (a) above, as well as the land and vegetation within a certain distance of each regulated water as described in (c) below. The portion of the riparian zone that lies outside of a regulated water is measured inland from the top of bank.

(c) The width of the riparian zone along each regulated water described in (a) above is as follows:  
3. The riparian zone is 50 feet wide along both sides of all waters not identified in (c)1 or (c)2 above.

(d) Development in riparian zones shall conform with the requirements for a flood hazard area individual permit under the Flood Hazard Area Control Act rules at N.J.A.C. 7:13-9, 10 and 11 or, in the alternative as applicable, a flood hazard area permit by-right at N.J.A.C. 7:13-7 or a flood hazard area general permit at N.J.A.C. 7:13-4.

(f) If endangered under the national wildlife or species habitat is present in the riparian zone such that the area is also an endangered or threatened wildlife or plant species habitat special area in accordance with N.J.A.C. 7:2E-3.38, then the requirements of N.J.A.C. 7:2E-3.38, Endangered or Threatened Wildlife or Plant Species Habitats, shall apply.

The subject site is located adjacent to the Hudson River. In accordance with N.J.A.C. 7:13-2.2, the Hudson River is a regulated water: not related to C-1 water, and non-trout related. Therefore, a 50-foot riparian zone exists along the water's edge of the subject site. The proposed redevelopment project located within the riparian zone is addressed under the Flood Hazard Area Control Act Rules (N.J.A.C. 7:13-9, 10 and 11) below. In addition, no endangered under the national wildlife or species habitat is present within the riparian zone. The applicant has demonstrated compliance with this rule.

#### Historic and Archaeological Resources (7:2E-3.36):

(a) Historic and archaeological resources include objects, structures, sites, ruins, buildings, neighborhoods, districts, and man-made or man-modified features of the landscape and seascape, including historic and prehistoric archaeological sites, which either are on or are eligible for inclusion on the New Jersey or National Register of Historic Places.

(b) Development that detracts from, encroaches upon, damages, or destroys the value of historic and archaeological resources is discouraged. Development that incorporates historic and archaeological resources in sensitive adaptive reuse is encouraged.

The National Park Service National register for Historic Places Database, the NIDWP Historic Preservation Office and the National Register of Historic Places Database did not list the subject property as historic places. The applicant has demonstrated compliance with this rule.

#### Endangered or Threatened Wildlife or Vegetation Species Habitat (7:2E-3.38):

(a) Endangered or threatened wildlife or plant species habitats are areas known to be inhabited on a seasonal or permanent basis by or to be critical at any stage in the life cycle of any wildlife or plant identified as "endangered" or "threatened" species on official Federal or State lists of endangered or threatened species, or under active consideration for State or Federal listing. The definition of endangered or threatened wildlife or plant species habitats include a sufficient buffer area to ensure continued survival of the population of the species.

According to the NIDWP I-Map, no suitable habitat is known on this site for documented endangered and threatened species. The applicant has demonstrated compliance with this rule.

#### Special Hazard Areas (7:2E-3.41):

(a) Special hazard areas include areas with a known actual or potential hazard to public health, safety, and welfare, or to public or private property, such as the navigable air space around airports and seaplane landing areas, potential evacuation routes and areas where hazardous substances as defined at N.J.S.A. 58:10-23.1(b)-k are used or disposed, including adjacent areas and areas of hazardous material contamination.

- (b) *Coastal development, especially residential and other-intensive economic development, within special hazard areas is discouraged. All development within special hazard areas must include appropriate mitigative measures to protect the public health and safety.*
- (c) *Approvals from the Department's Division of Solid and Hazardous Waste shall be obtained prior to the commencement of any intensive activities or clean-up activities at contaminated sites.*

Generic (G) and isolated pockets of volatile organic (VO) contaminated soils have been detected at the subject site. VOs that require remediation by the NCDHP Site Remediation Program (SRP) will be addressed through excavation or in-place treatment. The NCDHP SRP has allowed the applicant to place a classification exception area (CEEA), a deed restriction, on the groundwater contamination. A consultation agreement was submitted to SRP and the applicant is currently working closely with them. Details to the remediation activities will be incorporated in Phase I of the project. A Remedial Investigation Report and Remedial Action Work Plan was submitted to the NCDHP SRP on or around February 1, 2006. The reports are currently under SRP Remediation's review. The ISRA Case no. is S20040261. A condition regarding the applicant to obtain approval from SRP prior to the commencement of any regulatory activities will be included in the permit. The applicant has demonstrated compliance with this Rule.

#### Hudson River Waterfront Area (7:7C-3.4f):

(b) *Hudson River Waterfront Area development shall be consistent with all other applicable Coastal Zone Management rules with particular attention given to N.J.A.C. 7:7E-3.36, Public Open Space, N.J.A.C. 7:7F 3.79 Special hazard areas, N.J.A.C. 7:7E-3.41 Special urban area, N.J.A.C. 7:7F 7.14 High rise structures, N.J.A.C. 7:7E 8.11 Public Access to the Waterfront, N.J.A.C. 7:7E-8.12 scenic Resources and Design, and N.J.A.C. 7:7E-8.4 Water Quality.*

(c) *All waterfront development along the Hudson River shall develop, maintain and manage a section of the Hudson Waterfront Walkway coincident with the shoreline of the development property. The developer shall, by appropriate instrument of conveyance, create a conservation easement in favor of the Department. The conservation easement shall define the physical parameters of the walkway and the allowable uses, address the maintenance and management duties and identify the responsible party. Development of such project's public access system shall conform to its special area policy and to the Hudson Waterfront Walkway Planning and Design Guidelines (1984), and the Hudson Waterfront Walkway Design Standards (1989).*

(f) *Applications which vary in detail from the standards of this rule are discouraged, but will be considered for approval if they would provide greater public access and/or protection of natural or scenic resources than would be afforded by strict compliance with this rule. Applicants proposing a development which varies in detail from the standards of this rule are encouraged to contact the Department for guidance when conceptual plans have been prepared.*

As part of the Phase II redevelopment, the applicant proposes to construct approximately 750 linear feet of Hudson River Walkway. The 750 linear feet of Hudson River Walkway proposed under Phase II will coincide with the previously approved 1,150 linear feet of Hudson River Walkway under Phase I (D) I.R. file no. 0213-06 C001.1; WFD 060001). The Division has determined that the design of the proposed waterfront walkway conforms with the Hudson Waterfront Walkway Planning and Design Guidelines (1984), and the Hudson Waterfront Walkway Design Standards (1989), with the 16-foot wide walkway and it's amenities. The applicant has demonstrated compliance with this Rule.

#### Lands and Waters Subject to Public Trust Rights (7:7F-3.50):

(c) *Lands and waters subject to public trust rights are tidal waterways and their shores, including both lands now or formerly below the mean high water line, and shores above the mean high water line. Tidal waterways and their shores are subject to the Public Trust Doctrine and are held in trust by the State for the benefit of all the people, allowing the public to fully enjoy these lands and waters for a variety of public uses.*

(f) *Development that adversely affects lands and waters subject to public trust rights is discouraged.*

(d) *Public access to lands and waters subject to public trust rights shall be provided in accordance with the public trust rights rule, N.J.A.C. 7:2B-8.11.*

Since the subject site is located adjacent to the Hudson River, it is subject to the Public Trust Doctrine and must allow the public to fully enjoy these lands and waters. There was no public waterfront access on the site due to its previous plume/industrial usage. With the current redevelopment project, the proposed waterfront walkway will provide adequate access to the Hudson River for the public and local residents. The Public Trust Rights Rule (N.J.A.C. 7:2B-8.11) is addressed below. The applicant has demonstrated compliance with this Rule.

Outfalls and Intakes (7:2B-4.17)

(a) *Outfalls and intakes are pipe openings that are located in water areas for the purpose of intake of water or discharge of effluent including sewage, stormwater and industrial effluents.*

(b) *Outfalls and intakes are conditionally acceptable provided that the use associated with the intake or outfall meets applicable Coastal Zone Management rules.*

The applicant proposes the installation of three new stormwater outfall structures along the water's edge. The stormwater outfall structures will be installed above the Mean High Water Line. No impacts to freshwater wetlands and transition areas are proposed. A Stormwater Management Plan was submitted to the Division for review. The applicant has demonstrated compliance with this Rule.

Impervious Cover Limits for a Site in the Upland Waterfront Development Area (7:2B-5A.9)

(a) *If a site or portion of a site is unaffected, as determined under N.J.A.C. 7:2B-5.5, the impervious cover limit is the limit of (b) 1, 2 or 3 below, whichever is higher:*

1. *The average of the net land area on the site or portion, as determined under N.J.A.C. 7:2B-5.7(d), multiplied by the impervious cover percentage in Table R below for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:2B-5.A3;*
2. *For a site located in the northern waterfront region or urban edge region, as determined under N.J.A.C. 7:2B-5A.7(b), the amount of existing impervious cover located on a site as determined under (a) below; or*
3. *For a site located in a region other than those identified at (b) 1 above, the average covered by buildings and/or asphalt or concrete pavement legally existing on the site at the time the application is submitted to the Department.*

According to N.J.A.C. 7:2B-5.5, the subject site is considered unaffected. Therefore, an unaffected site that is located in the urban edge region, and with a high development intensity, the allowable impervious coverage is 90%. The total average of the site is 49.85 acres, but the total net land area is 21.3 acres. Therefore, for the entire project (Phase I and Phase II), the applicant is allowed a maximum of 20.83 acres of impervious coverage. The total impervious coverage proposed for Phase I and Phase II is 17.2 acres (78.1%). The applicant has demonstrated compliance with this Rule.

Vegetative Cover Percentages for a Site in the Upland Waterfront Development Area (7:2B-5A.10)

(a) *The area (in acres) on a site in the upland waterfront development area in which trees and/or herbaceous vegetation shall be planted or preserved is calculated as follows:*

1. *To determine the area (in acres) of tree preservation and/or tree planting on the site:*
  - i. *Identify the forested and/or unaffected portions of the site, as determined under N.J.A.C. 7:2B-5.5;*
  - ii. *If a site or portion of a site identified at (a) i has more than one development intensity, further divide that site or portion into smaller portions based on their respective development intensities;*

- iii. For each forested site or portion identified at (i)11 above, multiply the acreage of the net land area on the site or portion, as determined under N.J.A.C. 7:7E-5.3(d), by the tree preservation and tree planting percentages in Table F for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7E-5A-B; and
- iv. For each reforested site or portion identified at (i)11 above, multiply the acreage of the net land area on the site or portion, as determined under N.J.A.C. 7:7E-5.3(d), by the tree planting percentage in Table G below for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7E-5A-B.

The project site is unforested, is located in the urban area region, and has a high development intensity; therefore, the required tree preservation and/or planting percentage is 10% for the entire site, Phase I and Phase II. 10% of the total net land area (21.3 acres) is 2.13 acres. Under Phase I, the applicant proposes to provide 2.9 % (0.67 acres) of the required 10% (2.13 acres). Under Phase II, the applicant proposes to provide 5.31 acres of landscaping and other purposes uses. The total landscaping and other purposes uses proposed for the entire site will be 5.98 acres (25.9 %). The applicant has demonstrated compliance with this Rule.

#### Secondary Impacts (7:7E-6.3):

(a) *Secondary impacts are the effects of additional development likely to be carried out as a result of the approval of a particular proposal. Secondary impacts can also include traffic increases, increased recreational demand and any other offsite impacts generated by certain activities which affect the site and surrounding region.*

This phase of the proposed project is the final build-out of the entire site. At the completion of Phase II, the redevelopment of the former pharmaceutical site will be a mixed-use development consisting of residential, commercial, and retail opportunities. The project site is located in a highly urbanized area. The surrounding towns are previously developed with similar usage. No adverse secondary impacts are anticipated as a result of this project. The applicant has demonstrated compliance with this Rule.

#### Housing Use rules (7:7E-7.3):

- (a) *"Housing" includes single family detached houses, multi-family units with apartments or town houses, high rise buildings and mixed use developments.*
- (a) *Standards relevant to water area and water's edge housing are as follows:*
  - 1. *Housing is conditionally acceptable in the filled water's edge, provided that it meets the requirements of the Filled Water's Edge rule (N.J.A.C. 7:7E-3.23) and the Public Access to the Waterfront Rule (N.J.A.C. 7:7E-6.11). The residential development shall comply with the requirements for impervious cover and vegetative cover that apply to the site under N.J.A.C. 7:7E-5 and either N.J.A.C. -5A or 5B, except on bay islands where the requirements of the Bay Island Certificate rule (N.J.A.C. 7:7E-3.21) shall apply.*
  - 2. *On sites with existing shore protection structures, the residential structure shall be set back a minimum of 25 feet from the non-front shore protection structures, and a minimum of 15 feet from shore protection structures elsewhere. This distance shall be measured from the waterward face of the bulkhead or seawall and from the top of slope on the seaward side of the revetment.*

The proposed redevelopment includes the construction of mixed-use buildings located on a site adjacent to the Hudson River. The existing shoreline protection is in a form of loose rip rap and bulkheads. The applicant proposed to enhance the existing shoreline protection by placing additional rip rap along the slope shoreline to further stabilize the area. All the shoreline stabilization activity will be conducted above the Mean High Water Line. The proposed mixed-use buildings will be located over 30 feet from landward face of the rip rap stabilization area.

In addition, Filled Water's Edge (7:7B-3.24), Public Access to the Watershed (Public Trust Rights) (7:7B-8.11), and Requirements for Impermeable Cover and Vegetative Cover (7:7B-5) is addressed separately under each Rule. The applicant has demonstrated compliance with this Rule.

**Transportation Use Rule (7:7B-4.5):**

(i) *Standards relevant to bicycle and foot paths are as follows:*

1. *The construction of internal bicycle paths, foot paths and sidewalks in residential, commercial, and industrial developments is required to the maximum extent practicable.*
2. *Linear bicycle and foot paths are encouraged along the edges of all water bodies, and from the water body to the nearest public road, provided they would not disturb riparian areas or subject the user to danger.*
3. *Existing bicycle and foot paths shall be continued around development when it is not practical to pass through development.*

The proposed mixed-use redevelopment will result in the construction of several internal roadways, and sidewalks through the watershed community. The proposed sidewalks will be approximately 5 feet to 8 feet wide. In addition, under Phase II, approximately 750 linear feet of waterfront walkway will be constructed and will be connected to the previously approved Phase I, 835 linear feet of waterfront walkway. The applicant has demonstrated compliance with this Rule.

**Coastal Engineering (7:7B-7.1):**

(i) *Coastal engineering includes a variety of structural and non-structural measures to manage water erosion and the shoreline for natural effects of erosion, storms, and sediment and sand movements. Beach nourishment, sand fences, sediment control on dunes, stabilization of dunes, dune revegetation projects, dredged material disposal and the construction of retaining structures such as bulkheads, gabions, revetments and groynes are examples of coastal engineering.*

(ii) *Standards relevant to structural shore protection are as follows:*

1. *The construction of new shore protection structures or expansion or fortification of existing shore protective structures, including, but not limited to, jetties, groynes, seawalls, bulkheads, gabions and other retaining structures to reduce longshore transport and/or to prevent tidal waters from reaching erodible material is acceptable only if it meets all of the following five conditions:*
  - i. *The structure is essential to protect water dependent uses or heavily used public recreation beach areas in danger from tidal waters or erosion, or the structure is essential to protect existing structures and infrastructure in developed shorefront areas in danger from erosion, or the structure is essential to mitigate, through, for example, the construction of a retained earthen berm, the projected erosion in an erosion hazard area along a headland and provide erosion protection for a development that is otherwise acceptable under the Coastal Zone Management rules;*
  - ii. *The structure will not cause significant adverse impacts on the local shoreline and sand supply;*
  - iii. *The structure will not create or exacerbate shoreline sand movement downdrift, including erosion or shoaling;*
  - iv. *The structure will cause minimum feasible adverse impact to living marine and estuarine resources;*
  - v. *The structure is consistent with the State's Shore Protection Master Plan;*

As part of the mixed-use redevelopment project, the applicant proposed the fortification of the existing long rip-rap/shoreline structure. The proposed activity will involve the placement of additional rip-rap along approximately 700 linear feet of existing shoreline for further stabilization. The fortification of the existing shoreline

is crucial to the anticipated heavy public usage of the Tribeca River Waterfront Walkway. All the shoreline stabilization activity will be conducted along the Mean High Water Line, therefore, no living marine and estuarine resources will be adversely impacted. The applicant has demonstrated compliance with this Rule.

**High-Rise Structures (7:7E-7.4A):**

- (a) *High-rise structures are structures which are more than six stories or more than 60 feet in height as measured from existing preconstruction ground level.*
- (b) *The standards for high-rise structures are as follows:*
1. *High-rise structures are encouraged to locate in an urban area of existing high density, high-rise and/or intense settlements;*
  2. *High-rise structures within the view of coastal waters shall be separated from coastal waters by at least one public road or an equivalent area (at least 50 feet) physically and visually open to the public except as provided by N.J.A.C. 7:7E-7.4A;*
  3. *The longest lateral dimension of any high-rise structure must be oriented perpendicular to the beach or coastal waters, except for a high-rise structure that is located in the Redevelopment Zone of the City of Long Branch and authorized pursuant to the Long Branch Redevelopment Zone Permit of N.J.A.C. 7:7E-7.4.*
  4. *The proposed structure must not block the view of dunes, beaches, harbors, skylines, rivers, inlets, bays, or oceans that are currently enjoyed by existing residential structures, public roads or pathways, to the maximum extent practicable;*
  6. *The proposed structure must be in character with the surrounding transitional heights and residential densities, or be in character with a municipal comprehensive development scheme requiring or enforcing on height and density which is consistent with all applicable Coastal Zone Management rules; and*
  7. *The proposed structure must not have an adverse impact on air quality, traffic, and existing infrastructure.*
  8. *The proposed structure must be architecturally designed so as to not cause deflation of the beach and dune system or other coastal environmental waterward of the structure.*

The proposed Phase II redevelopment will involve the construction of 10 mixed-use buildings on the subject site. Of the 10 proposed buildings, three will be eight (8) story high-rise structures. They are identified on the site plan as Building B, Building C-1, Building C-2, Building D, Building F, Building G, and 2 sections of Building A. Two additional high-rise structures (part of Building A) are proposed over a new parking garage. The longest lateral dimension of all the proposed high-rise towers are oriented perpendicular to the Hudson River. Three view corridors flow from River Road to the Hudson River and NYC skyline are available along the northern property boundary, between Building B2 and Building A, and along the southern property boundary. In addition, the high-rise buildings are located at least 50 feet from the water's edge in order to provide a separation between the Hudson River and the proposed redevelopment. The applicant has demonstrated compliance with this Rule.

**Water Quality (7:7E-8.4) and Stormwater Management (7:7E-8.7):**

(a) *As required by Section 307(j) of the National Coastal Zone Management Act (P.L. 92-583), Federal, State and local water quality requirements established under the Clean Water Act (33-U.S.C. 1251) shall be the water resource standards of the coastal management program.*

(b) *Stormwater runoff is the flow of water on the surface of the ground, resulting from precipitation. Standards relevant to stormwater management system design are set forth in this rule.*

These Rules are addressed in the attached Division Engineer's Report.

**Public Trust Rights (7:7E-8.11):**

(a) Public trust rights in tidal waterways and their shores (public trust rights) established by the Public Trust Doctrine include public access, which is the ability of the public to pass physically and visually to, from and along lands and waters subject to public trust rights as defined in N.J.A.C. 7:7F 3.50, and to use those lands and waters for activities such as swimming, sunbathing, fishing, surfing, sport diving, bird watching, walking and boating. Public trust rights also include the right to perpendicular and linear access. Public accessways and public access areas provide a means for the public to pass along and use lands and waters subject to public trust rights.

(b) Except as otherwise provided in (c) below, development on or adjacent to all tidal waterways and their shores shall provide on-site, permanent, unobstructed public access to the tidal waterway and its shores at all times, including both visual and physical access. Specific requirements for sites located along the Arthur Kill, Kill Van Kull west of Bayonne Bridge, Newark Bay, Delaware River from the Traction Motor Bridge to the CAPRA boundary, Elizabeth River, Hackensack River, Passaic River, Rahway River, Raritan River, Cohansey River in Bridgeton City, and Maurice River in Millsville City are found in (c) below. Public accessways and public access areas shall:

1. Include perpendicular access and a linear area along the tidal waterway and its entire shores; and
2. If located in a natural area of a tidal waterway, be designed to minimize the impacts to the natural area and tidal waterway including impacts to habitat value, vegetation and water quality.

(c) Except as provided in (d) below, in addition to the requirements of (b) above, the perpendicular access and linear area provided for sites located along the Arthur Kill, Kill Van Kull west of Bayonne Bridge, Newark Bay, Delaware River from the Traction Motor Bridge to the CAPRA boundary, Elizabeth River, Hackensack River, Passaic River, Rahway River, Raritan River, Cohansey River in Bridgeton City, and Maurice River in Millsville City, shall comply with the following. The standards for public access along the Hudson River Waterfront Area are set forth in N.J.A.C. 7:7F 3.4B.

1. The linear area shall consist of a walkway that meets the following:
  - i. The minimum width of walkway free of obstruction shall be 16 feet; and
  - ii. An area a minimum of 30 feet wide, including the walkway area, shall be permanently protected by a conservation restriction; and
2. The perpendicular access shall consist of a walkway that meets the following:
  - i. The minimum width of the walkway free of obstruction shall be 10 feet;
  - ii. An area a minimum of 20 feet wide, including the walkway area shall be permanently protected by a conservation restriction; and
  - iii. The linear dimension between perpendicular accessways shall not exceed one-half mile as measured generally parallel to the waterway; and
3. The Department may reduce the walkway width requirements in (c)1 and 2) above, as necessary to protect endangered and threatened wildlife or waterfowl species habitat, critical wildlife habitat or defined in N.J.A.C. 7:7 3.39, natural areas or existing infrastructure.

(d) Public access must be available on a nondiscriminatory basis. All establishments, including municipalities, clubs, resorts, condominium associations, homeowners associations and beach clubs, which control access to tidal waterways and their shores shall comply with the Law Against Discrimination, N.J.S.A. 10:5 ) at any.

(e) Public access to tidal waterways and their shores shall be clearly marked. Department approved public access signs shall be installed at each public accessway, public access area and/or public parking area at the development site and maintained in perpetuity by the permittee and his successors in title and interest. N.J.A.C. 7:7B-4.17(p) contains the standards for signs for municipalities that participate in Shore Protection Program funding. Subsection (q) below contains the standards for signs for municipalities, counties and nonprofit that receive Green Acres funding for a Green Acres project site.

(f) Activities that have the effect of discouraging or preventing the exercise of public trust rights are prohibited. These activities include, but are not limited to, tagging photographic identification, requiring a

liability waiver, requiring the purchase of drinks or food from a specific vendor, or prohibiting bringing beach equipment such as blankets or beach chairs.

(j) Parking shall be provided for the public to access tidal waterways and their shores, except where public access is not required in accordance with (f) above or the project is limited in scope in accordance with (f)(7). Subsection (f)(7) below contains the parking standards for municipalities that participate in Shore Protection Program funding. Subsection (g) below contains the parking standards for municipalities, counties and nonprofits that receive Green Acres funding for a Green Acres project site. All other development shall provide parking as follows:

2. The area set aside for off-street parking shall be dedicated for public access parking through the recording of a conservation restriction maintaining the parking spaces in perpetuity; and
3. The area set aside for on-street parking shall be dedicated for public access parking through municipal ordinances.

(k) Development on or adjacent to tidal waterways and their shores shall provide barrier free access where feasible and warranted by the character of the site.

(l) Development on or adjacent to tidal waterways and their shores shall incorporate fishing access and associated facilities to the maximum extent practicable within the area provided for public access. In the case of a beach, fishing access shall not be required in areas designated for swimming during hours designated for swimming.

(m) The area set aside for public access to tidal waterways and their shores shall be permanently dedicated for public use through the recording of a Department approved conservation restriction under the New Jersey Conservation Restriction and Historic Preservation Restriction Act, N.J.S.A. 13:27-1 et seq., maintaining the publicly dedicated areas in perpetuity. Subsection (p) below contains the conservation restriction standards for municipalities that participate in Shore Protection Program funding. Subsection (q) below contains the conservation restriction standards for municipalities, counties and nonprofits that receive Green Acres funding for a Green Acres project site. N.J.A.C. 7:27B N.J.A.C. 7:27B contains the recording requirements for all conservation restrictions.

(n) No authorization or approval under this chapter shall be deemed to relinquish public rights of access to and use of lands and waters subject to public trust rights.

Under the Phase I redevelopment (DEWP File no. 0215-06-0001.2), the Division authorized the construction of approximately 1,135 linear feet of permanent waterfront walkway on the subject site. The previous authorization also required the construction of 750 linear feet of "interior" waterfront walkway located in the Phase II section of the site. In addition, a 20-foot wide easement with a 10-foot perpendicular walkway located through the center of the site was also approved. The intent approval of the "interior" waterfront walkway located in Phase II was to ensure that the entire site will establish public access to the waterfront area, even though only a portion of the site was approved at that time.

Under the current Phase II redevelopment project, the applicant proposes the permanent construction of the previously required 750 linear feet of "interior" waterfront walkway within a 30-foot wide easement, and a 16-foot wide walkway. In addition, the previously approved 20-foot wide easement with a 10-foot perpendicular walkway will be relocated to the southern property boundary. Both linear areas will be barrier free for a minimum of 10 feet, and will be made available to the public at all times. The applicant is providing 4 waterfront walkway directional signs and 70 parking stalls for public waterfront walkway uses located approximately 40 feet from the waterfront walkway. The new waterfront walkway will also provide opportunities for the public to engage in recreational activities (e.g., fishing) that were not made available due to its previous pharmaceutical usage. A condition will be placed in the permit requiring the applicant to record a Department approved conservation restriction under the N.J. Conservation Restriction and Historic Preservation Restriction Act, N.J.S.A. 13:27-1 et seq., maintaining the areas set aside for public access to the Hudson River in perpetuity. The applicant has demonstrated compliance with this Rule.

Scenic Resources and Design (7:27B-8.12):

- (a) Scenic resources include the views of the natural and/or built landscape.

- (b) Large-scale elements of building and site design are defined as the elements that comprise the developed landscape such as site geometry, zoning, height and bulk structures.
- (c) New coastal development that is visually compatible with its surroundings in terms of building and site design, and enhances scenic resources is encouraged. New coastal development that is not visually compatible with existing scenic resources in terms of large scale elements of building and site design is discouraged.

The large-scale elements of the proposed project in terms of height and dimensions are consistent with the surrounding high rise structures in the area. The Phase II redevelopment project will involve the restoration of an area that has historically been unavailable to the public due to its pharmaceutical research and development use. The new waterfront walkway facility will provide visual and physical access to the Hudson River and the New York skyline. The applicant has demonstrated compliance with this Rule.

**Buffers and Compatibility of Uses (7:7E-3.13):**

- (a) Buffers are natural or manmade areas, structures, or objects that serve to separate distinct uses or areas. Compatibility of uses is the ability for uses to exist together without aesthetic or functional conflicts.
- (b) Development shall be compatible with adjacent land uses to the maximum extent practicable.
1. Development that is likely to adversely affect adjacent areas, particularly Special Areas N.J.A.C. 7:27-3, or residential or recreation uses, is prohibited unless the impact is mitigated by an adequate buffer. The purpose, width and type of the required buffer shall vary depending upon the type and degree of impact and the type of adjacent area to be affected by the development, and shall be determined on a case-by-case basis.
  2. The standards for wetland buffers are found at N.J.A.C. 7:2E-3.2B.
  3. The following apply to buffer treatment:
    - i. All buffer areas shall be planted with appropriate vegetative species, either through primary planting or supplemental planting. This landscaping shall include use of mixed, native vegetative species, with sufficient size and density to create a solid visual screen within five years from the date of planting.
    - ii. Buffer areas which are forested may require supplemental vegetative plantings to ensure that acceptable visual and physical separation is achieved.
    - iii. Buffer areas which are non-forested will require dense vegetative plantings with mixed evergreen and deciduous trees and shrubs. Evergreens must be at least eight feet tall at time of planting; deciduous trees must be at least three inches caliper, balled and burlapped; shrubs must be at least three to four feet in height.

As mentioned above, the site was previously for pharmaceutical research and development use, therefore prohibiting the public to enjoy the waterfront area. The current Phase II redevelopment project involves the creation of a mixed-use environment that is compatible with the aesthetic and the function of the surrounding uses and areas. In addition, in order to separate the commercial office usage of the adjacent and the mixed-use environment of the proposed project, the applicant proposes to plant evergreen trees (approximately 7-8 feet in height), along the northern property boundary. The applicant has demonstrated compliance with this Rule.

**Traffic (7:7E-3.14):**

- (a) Traffic is the movement of vehicles, pedestrians or ships along a route. Coastal development shall be designed, located and operated in a manner to cause the least possible disturbance to traffic systems.
- (b) Coastal development shall be designed, located and operated in a manner to cause the least possible disturbance to traffic systems.
1. Alternative means of transportation, that is, public and private mass transportation facilities and services, shall be considered and, where feasible, incorporated into the design and management of a proposed development, to reduce the number of individual vehicle trips generated as a result of the facility. Examples of alternative means of

transportation include: van pooling, staggered working hours and installation of ancillary public transportation facilities such as bus shelters.

(b) When the level of service of traffic systems is disturbed by approved development, the necessary design modifications or funding contribution toward an area wide traffic improvement shall be prepared and implemented in conjunction with the coastal development, the satisfaction of the New Jersey Department of Transportation and any regional agencies.

(c) Any development that causes a location on a roadway to operate in excess of capacity Level D is discouraged. A developer shall undertake mitigation or other corrective measures as may be necessary so that the traffic levels in any affected intersection remain at capacity Level D or better. A developer may, by incorporating design modifications or by contributing to the cost of traffic improvements, be able to address traffic problems resulting from the development, in which case development would be conditionally acceptable. Determinations of traffic loads which will be generated will be made by the New Jersey Department of Transportation.

The applicant identified River Road as an Urban Minor Arterial with two lanes in each direction and a posted speed limit of 35 miles per hour. In the traffic impact study provided in the application, it identified that the residential and commercial traffic is significant during peak AM and PM and Saturday hours. The addition of the proposed mixed-use project could have significant impacts on the vehicular traffic of River Road. The applicant's traffic consultant reviewed potential traffic impacts during build and post-build. It was determined that there would be no change to the existing level of service values with the construction of the project, and therefore, the project would not have a significant impact to the roadway network. A condition will be placed in the permit requiring the applicant to obtain approval from the county traffic engineer for the proposed project prior to the commencement of regulated activity on site. The applicant has demonstrated compliance with this Rule.

#### FLOOD HAZARD ABATEMENT

##### General Provisions for Verifications (7:13-6.1):

(a) A verification is a document containing the Department's approval of the flood hazard area design flood elevation on a site, includes either a flood hazard area limit or an indication that the entire site is in a flood hazard area, and may also include a floodway limit and/or a riparian zone limit, if applicable.

The nearest watercourse to the subject site is the Hudson River, which is located immediately east of the site. The riparian zone on the subject site is 50 feet from the top of the River's bank. The flood hazard area limit is addressed in the attached Division Engineer's Report.

##### Requirements for a Regulated Activity in a Riparian Zone (7:13-10.2):

(a) This section sets forth specific design and construction standards that apply to any regulated activity proposed in a riparian zone.

(b) In cases where an applicant proposes to redevelop a site within 25 feet of any top of bank or edge of water, all existing impervious surfaces within 25 feet of the top of bank or edge of water shall be repaired and the riparian zone to this area shall be adequately stabilized and replanted with indigenous, non-invasive vegetation, except in the following cases:

2. The applicant proposes to construct a public walkway within 7.5 feet of the top of bank or edge of water, provided the walkway is constructed of permeable material where feasible, and provided the remainder of the area within 25 feet of the top of bank or edge of water is restored, stabilized and replanted with indigenous, non-invasive vegetation.

As part of the Phase II redevelopment project, the applicant proposes the construction of approximately 750 linear feet of waterfront walkway. The 16 foot wide waterfront walkway will be located within the 25 foot top of the river's bank. For the construction of the waterfront walkway and its amenities, all existing impervious surfaces within 25 feet top of the river's bank will be removed. The applicant proposes to landscape the remainder 9 feet of the 25-foot riparian buffer with shade trees.

##### Requirements for a Regulated Activity In or Along a Water with Wetland Resources (7:13-10.5):

(c) *This section sets forth specific design and construction standards that apply to any regulated activity proposed in the channel and/or riparian zone of a regulated water containing fishery resources.*

In order to protect anadromous fish species during their migratory run, the bank stabilization activity and any upland activity that may potentially introduce sediments into the Hudson River are prohibited between April 1 and June 30 of each year. All proposed activities are located above the Mean High Water Line of the Hudson River. A timing restriction will be included in the permit.

**Requirements for a Regulated Activity in a Documented Habitat for Threatened or Endangered Species (7:13-10.6)**

(a) *This section sets forth specific design and construction standards that apply to any regulated activity proposed in a documented habitat for a threatened or endangered species.*

According to the NHDOT Map, the subject site is not a documented habitat for threatened or endangered species. In addition, no concerns were received from the NHDOT's Division of Fish & Wildlife.

**Individual Permit Requirements for Various Regulated Activities (7:13-11):**

**Requirements that Apply to All Regulated Activities (7:13-11.1):**

(a) *This section sets forth specific design and construction standards that apply to any regulated activity proposed in any regulated area.*

(b) *The Department shall issue an individual permit for a regulated activity only if it determines that the regulated activity is not likely to cause significant and adverse effects on the following:*

1. Water quality;
2. aquatic biota;
3. Water supply;
4. Flooding;
5. Drainage;
6. Channel stability;
7. Threatened and endangered species or their current or documented historic habitat;
8. Navigation;
9. Energy production; and
10. Fishery resources.

The Division's review of this Flood Hazard Area application has concluded that the project as proposed will not cause significant and adverse effects in any of the areas mentioned above.

**Requirements for Stormwater Management (7:13-11.2):**

(a) *This section sets forth stormwater management requirements and specific design and construction standards that apply to any major development, as defined at N.J.A.C. 7:8-1.2.*

The applicant proposes stormwater management as part of the redevelopment. The stormwater management requirements, specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for Excavation, Fill and Grading Activities (7:13-11.3):**

(a) *This section sets forth specific design and construction standards that apply to any excavation, fill and/or grading proposed in any regulated area.*

The applicant proposes activities involving excavation, fill and grading as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for a Structure (7:13-11.4):**

- (c) This section sets forth specific design and construction standards that apply to any structure proposed in any regulated area.
- (d) The Department shall issue an individual permit to construct or reconstruct a structure only if the entire structure is designed and constructed to be suitably anchored in order to:
1. Resist impact from water and debris during the flood hazard area design flood;

The applicant proposes several structures as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

Requirements for a Building (7:13-11.5):

- (a) The requirements in this section apply to a building that is constructed or reconstructed in the following areas:
1. A flood hazard area; and

The proposed project is located within the flood hazard area of the Hudson River.

- (c) The Department shall issue an individual permit to construct or reconstruct a building of any kind only if the following requirements are satisfied:
1. Any new building is located at least 25 feet from any top of bank or edge of water.

The proposed mixed use buildings under Phase II are located a minimum of 25 feet from the top of the Hudson River's bank.

- (d) The Department shall issue an individual permit to construct or reconstruct a habitable building that is neither a private residence nor a public building, only if one of the following requirements is satisfied:

The applicant proposes several habitable buildings as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

Requirements for a Railroad, Roadway or Parking Area (7:13-11.6):

- (a) This section sets forth specific design and construction standards that apply to any railroad, roadway or parking area proposed in a flood hazard area.

The applicant proposes several parking areas as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

Requirements for a Stormwater Outfall Structure (7:13-11.10):

- (a) This section sets forth specific design and construction standards that apply to any stormwater outfall structure proposed in any regulated area.

The applicant proposes three new stormwater outfall structures as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

CONCLUSION:

Based on the information contained in the application and shown on the submitted plans, the project is conditionally acceptable under the Rules on Coastal Zone Management (N.J.A.C. 7:21) and the environmental standards set forth in the Flood Hazard Control Act Rules (N.J.A.C. 7:13).

After printing this label:

- 1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
- 2. Fold the address page along the horizontal line.
- 3. Place the label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

**Warnings:** Use only the printed original label for shipping purposes. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

**Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on [fedex.com](http://fedex.com). FedEx will not be responsible for any claim in excess of \$100 per package, whenever the result of loss, damage, delay, non-delivery, misdelivery, or mis-formation, unless you declare a higher value, pay an additional charge, incurment your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income, lost profit, attorney's fees, costs, and other forms of damage whether direct or indirect, consequential or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for terms of extraordinary value is \$1,000, n.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Witness claims must be filed within strict time limits. See current FedEx Service Guide.**

**STANDARD CONDITIONS:**

1. **Extent of approval:** This document grants permission to perform certain activities that are regulated by the State of New Jersey. The approved work is described by the text of this permit and is further detailed by the approved drawings listed below. All work must conform to the requirements, conditions and limitations of this permit and all approved drawings. You must keep a copy of this permit and all approved drawings readily available for inspection at the work site. Approved work may be altered only with the prior written approval of the Division. If you alter the project without prior approval, or expand work beyond the description of this permit, you may be in violation of State law and may be subject to fines and penalties.
2. **Acceptance of permit:** If you begin any activity approved by this permit, you thereby accept this document in its entirety and agree to adhere to all terms and conditions. If you do not accept or agree with this document in its entirety, do not begin construction. You are entitled to request an appeal within a limited time as detailed on the attached *Administrative Hearing Request Checklist and Tracking Form*. You may also contact the project manager shown on the first page if you have any questions or concerns about this document.
3. **Recording with County Clerk:** You must record this permit in the Office of the County Clerk for each county involved in this project. You must also mail or fax a copy of the front page of this permit to the Division showing the received stamp from each County Clerk within 30 days of the issuance date (or 90 days if multiple counties are involved). The Division's address and fax number are shown on the first page of this permit.
4. **Notice of Construction:** You must notify the Division in writing at least 7 days before you begin any work approved by this permit. The Division's address and fax number are shown on the first page of this permit. Please direct your letter to the project manager shown on the first page.
5. **Expiration date:** All activities authorized by this permit must be completed by the expiration date shown on the first page. At that time, this permit will automatically become invalid and none of the approved work may begin or continue until a replacement permit is granted. (Some coastal permits may qualify for an extension of the expiration date. Please contact the Division for further information.)
6. **Rights of the State:** This permit is revocable and subject to modification by the State with due cause. The State may inspect the work site and may suspend construction if work does not comply with this permit. This permit does not grant property rights. The issuance of this permit shall not affect any action by the State on future applications, nor affect the title or ownership of property, nor make the State a party in any suit or question of ownership.
7. **Other responsibilities:** You must obtain all necessary local, Federal and other State approvals before you begin work. All work must be stabilized in accordance with the *Standards for Soil Erosion and Sediment Control in New Jersey*, and all fill material must be free of toxic pollutants in toxic amounts as defined in section 307 of the Federal Act.

**SPECIAL CONDITIONS IN ADDITION TO THE STANDARD CONDITIONS:**

8. The permittee must construct approximately 750 linear feet of the Hudson River Waterfront Walkway concurrent with the construction of the project. In addition, prior to commencing any activities authorized by this permit, the permittee shall execute and deliver a Deed of Conservation Easement in recordable form that clearly delineates the proposed public waterfront walkway, and perpendicular access approved as part of this permit. This area should be noted as public access facilities open to the general public on a 24-hour basis, to be maintained and managed by the permittee (or its assigns) in perpetuity. The deed restriction shall include the entire proposed public access walkway plan approved hereon. In addition, a public access walkway connecting to the adjacent neighbors shall be included, such that when public access becomes available at

those sites, the access can be easily connected. This area shall also be addressed in the deed restriction for current and all future owners of the subject property. The restriction shall be included on the deed, and recorded in the office of the County Clerk (the REGISTRAR OF DEEDS AND MORTGAGES), in the county wherein the lands included in the waiver are located. The restriction shall run with the land and be binding upon all successive owners. All individual lot surveys shall show the approved proposed public access walkway boundaries. Any regulated activities undertaken on the site before a copy of the recorded restriction is submitted to the Division will be considered in violation of the Waterfront Development Law. The conservation restriction shall also include a requirement to maintain overlooks, trash receptacles, benches, lightings, and railing along the entire waterfront walkway and signage to be maintained in perpetuity. The permittee shall submit a revised plan illustrating the meter and bounds description of the entire proposed public access area.

9. In order to protect anadromous fish species during their migratory run, any activities that may introduce sediments or which could cause an increase in the natural level of turbidity into the Hudson River are prohibited between April 1 and June 30 of each year. The Division reserves the right to suspend all regulated activities on site should it be determined that the applicant has not taken proper precautions to ensure continuous compliance with this condition.
10. All excavated material shall be disposed in a lawful manner and outside any regulated flood plain, open water, freshwater wetlands or adjacent transition areas, and in such a way as to not interfere with the positive drainage of the receiving area.
11. The decision to grant this stream encroachment permit did not include a structural review of the proposed activities with regard to the International Building Code; nor did it include a comparative review of any local flood ordinances which may apply. As such, the proposed structure/s may not fully comply with the provisions of the International Building Code or meet the requirements of the appropriate local flood ordinances. Consequently, the construction official for the municipality in which this project is located may reserve the right to modify the design of, or deny the erection of those structures which do not meet the appropriate flood ordinances or construction codes which are within local jurisdiction.
12. Any discharge of dredged or fill material shall consist of clean, suitable material free from toxic pollutants in toxic amounts, and shall comply with all applicable Division's rules and specifications regarding use of dredged or fill material.
13. No material shall be deposited or dewatered in freshwater wetlands, transition areas, State upon waters or other environmentally sensitive areas, other than what has been approved on the plans.
14. All necessary local, Federal and other state approvals must be obtained by the applicant prior to the commencement of the herein-permitted activities. Approvals from the following will be required:
  - a. NIDEP, Site Remediation Program
15. Activities below the Mean High Water Line of the Hudson River are prohibited.
16. Prior to the commencement of regulated activities on site, the permittee shall submit for review and approval the traffic report to the Bergen County Traffic Engineer to determine whether the project is consistent with the County's traffic regulations.

**WATERFRONT DEVELOPMENT**  
**AND**  
**FLOOD HAZARD AREA ENVIRONMENTAL REPORT**

Applicant: National R/Sources  
Project/Location: Unilever Redevelopment Phase II, Borough of Edgewater, Bergen County  
DLUR File No.: 0213-06 0001.2; WFD 070001 (Upland), FHA 080002 (Ver.), & FHA 080002  
(IP)

The Rules on Coastal Zone Management (N.J.S.A. 13:19-1 et seq.) require that a permit be obtained from the Division for the construction of certain facilities, including the construction of a public facility between the mean high water line of any tidal waters and a point 500 feet landward of the mean high water line. In addition, the Flood Hazard Area Control Act Rules (N.J.S.A. 58:16A-50 et seq.) require that a permit be obtained from the Division governing human disturbance to the land and vegetation in the flood hazard area of a regulated water, as described at N.J.A.C. 7:13-3, and in the riparian zone of a regulated water, as described at N.J.A.C. 7:13-4.

**PROJECT DESCRIPTION:**

The applicant, National R/Sources, Inc., proposes a Phase II redevelopment project on a Brownfield site in the Borough of Edgewater, Bergen County. Specifically, the proposed project involves the construction of ten (10) mixed-use buildings (8 high-rise structures), parking garages, parking lot areas, the renovation of an existing building, 750 linear feet of Hudson River Waterfront Walkway, a 10 foot wide perpendicular access to the waterfront walkway, 700 linear feet of rip rap stabilization, three (3) stormwater outfall structures, and related stormwater facilities/amenities.

This 49.85-acre (21.3-acre upland) site is bound to the north and south by private properties, to the west by River Road, and to the east by the Hudson River. The purpose of Phase II is to create a mixed-use waterfront community of housing, commercial business, public open space and waterfront amenities on a waterfront site that has been left vacant or underutilized.

**ADMINISTRATIVE HISTORY:**

- A Waterfront Development Permit (DLUR file no. 0213-06-0001.1; WFD 060001) was issued by the Division on May 8, 2006 for the construction of Phase I as described in the approved permit.
- Any inland tributaries that may have touched Lots 3 & 4 were covered by a Grant to Lever Brothers Company, dated November 1, 1984, located in Liber X-6 at page 192, Tidelands file no. 82-0620.
- Four large Grants were issued for Lots 1 & 5, and they are: 1) Grant to Water Front Improvement Company, dated April 14, 1904, located in Liber P at page 675; 2) Grant to Martin and Lynea, dated March 30, 1899, located in Liber M at page 556; 3) Grant to Argam Tamin Company, dated September 7, 1911, located in Liber O at page 417; and 4) Grant to Colby and Company, dated February 27, 1902, located in Liber O at page 417.
- An overall Grant was issued to Lever Brothers Company, dated November 16, 1984, located in Liber X-6 at page 186, Tidelands file no. 82-0551.
- A Remedial Investigation Report and Remedial Action Work Plan was submitted to the NJDEP – Site Remediation Program (SRP) on or around February 1, 2006. The reports are currently under SRP's review. The ISRA Case no. is E20040267.
- According to a memo, dated March 3, 2008, from the Division of Watershed Management, the proposed project is consistent with the Northeast Water Quality Management Plan as long as they don't expand past the current outline of the dock (which they are not currently proposing), and that they discharge their wastewater to Edgewater MUA sewer service area (which they are).

The proposed project is shown on site plans entitled:

"UNIVERSITY SITE REDEVELOPMENT, BOROUGH OF EDGEWATER, BERGEN COUNTY, NEW JERSEY",  
dated August 7, 2006, last revised May 12, 2008, and prepared by PAULUS, SOKOLOWSKI AND SAKTOR,  
LLC.

7. "WATERFRONT WALKWAY DETAILS" (Sheet C-13);
8. "SITE DETAILS" (Sheet C-14);
9. "LANDSCAPE LIGHTING & COUNTY DETAILS" (Sheet C-15);
10. "LANDSCAPE NOISE AND PLANT LIST" (Sheet C-16);
11. "STORMWATER DETAILS" (Sheet C-17); and
12. "SCS NOTES & DETAILS" (Sheet C-19)

#### **WATERFRONT DEVELOPMENT ELEMENT:**

This permit is conditionally authorized under and in compliance with the Rules on Coastal Zone Management for Prime Fishing Areas (7:7E-3.4), Intertidal and Subtidal Shallows (7:7E-3.15), Filled Water's Edge (7:7E-3.23), Flood Hazard Areas (7:7E-3.25), Biparian Zones (7:7E-3.26), Historic and Archaeological Resources (7:7E-3.36), Endangered or Threatened Wildlife or Vegetation Species Habitats (7:7E-3.38), Special Hazard Areas (7:7E-3.41), Hudson River Waterfront Area (7:7E-3.48), Land and Waters Subject to Public Trust Rights (7:7E-3.50), Outfalls and Intakes (7:7E-4.17), Impervious Cover Requirements that apply to Sites in the Upland Waterfront Development and CAPRA Areas (7:7E-5.3), Vegetative Cover Requirements that apply to Sites in the Upland Waterfront Development and CAPRA areas (7:7E-5.4), Impervious Cover Limits for a Site in the Upland Waterfront Development Area (7:7E-5A.9), Vegetative Cover Percentages for a Site in the Upland Waterfront Development Area (7:7E-5A.10), Secondary Impacts (7:7E-6.3), Housing Use rules (7:7E-7.2), Transportation Use Rule (7:7E-7.5), Coastal Engineering (7:7E-7.11), High Rise Structures (7:7E-7.14), Water Quality (7:7E-8.4), Stormwater Management (7:7E-8.7), Public Trust Rights (7:7E-8.11), Scenic Resources and Design (7:7E-8.12), Buffers and Compatibility of Uses (7:7E-8.13), and Traffic (7:7E-8.14).

The State of New Jersey Coastal Management Program defines substantive policies to guide public decisions concerning significant proposed development and management of resources in New Jersey's Coastal Zone. The analysis of this coastal permit application is based upon the Rules on Coastal Zone Management (RCZM) (N.J.A.C. 7:7E-1.1 et seq.), adopted effective September, 1978, last revised April 7, 2008. This analysis will refer to applicable policies by administrative code section.

#### **Prime Fishing Areas (7:7E-3.4):**

(a) *Prime fishing areas include tidal water areas and water's edge areas that have a demonstrable history of supporting a significant local quantity of recreational or commercial fishing activity. The area includes all coastal jetties and groins, public fishing piers or docks and artificial reefs.*

According to the applicant, the subject site does not have a demonstrable history of supporting recreational fisheries. However, due to the proposed redevelopment of the currently vacant site (ie, shoreline stabilization, and public access to the waterfront area), benefit to fishing in the area will likely increase. The applicant has demonstrated compliance with the Rule.

#### **Intertidal and Subtidal Shallows (7:7E-3.15):**

(a) *Intertidal and subtidal shallows means all permanently or temporarily submerged areas from the spring high water line to a depth of four feet below mean low water.*

(b) *Development, filling, new dredging or other disturbance is discouraged but may be permitted in accordance with (c), (d), (e), and (f) and with N.J.A.C. 7:7E-4.2 through 4.28.*

The applicant proposes rip-rap bank stabilization along approximately 700 linear feet of the existing bulkhead. Stabilization of the bulkhead will all be above the mean high water line. No disturbance to intertidal and subtidal shallows is being proposed. The applicant has demonstrated compliance with the Rule.

**Filled Water's Edge (7:7E-3.23):**

(a) *Filled water's edge areas are existing filled areas lying between wetlands or water areas, and either the upland limit of fill, or the first paved public road or railroad landward of the adjacent water area, whichever is closer to the water. Some existing or former dredged material disposal sites and excavation fill areas are filled water's edge.*

(f) *In waterfront areas located outside of the CAFRA zone the water dependent use may be a public walkway, provided the upland walkway right-of-way is at least 30 feet wide, unless there are existing onsite physical constraints which cannot be removed or altered to meet this requirement.*

(g) *The development shall comply with the requirements for impervious cover and vegetative cover that apply to the site under N.J.A.C. 7:7E-5 and either N.J.A.C. 7:7E-5A or 5B.*

(i) *On all filled water's edge sites, development must comply with the lands and waters subject to Public Trust Rights Rule, N.J.A.C. 7:7E-3.50, and the Public Trust Rights Rule N.J.A.C. 7:7E-8.11.*

Based on the NJDEP Tidelands mapping, the project site is considered to be Filled Water's Edge. Since the proposed project is not considered to be water dependent, the applicant proposes to develop a public waterfront walkway within a right-of-way that is 30 feet wide along the water's edge. As part of this Phase II redevelopment, approximately 750 linear feet of waterfront walkway will be constructed. The Phase II waterfront walkway will tie directly into the previously Division approved Phase I waterfront walkway. Impervious cover and vegetative cover under N.J.A.C. 7:7E-5, 5A or 5B, and the Public Access to the Waterfront Rule under N.J.A.C. 7:7E-8.11 are addressed below. The applicant has demonstrated compliance with this Rule.

**Flood Hazard Areas (7:7E-3.25):**

(a) *Flood hazard areas are the floodway and flood fringe area around rivers, creeks and streams as delineated by the Department under the Flood Hazard Area Control Act (N.J.S.A. 58:16A-50 et seq.); and areas defined or delineated as an A or V zone by the Federal Emergency Management Agency (FEMA). They are areas subject to either tidal or fluvial flooding. Where flood hazard areas have been delineated by both the Department and FEMA, the Department delineation shall be used. Where flood hazard areas have not been delineated by the Department or FEMA, limits of the 100 year flood plain will be established by computation on a case-by-case basis.*

(e) *Retention and detention basins developed specifically for storm water management purposes are conditionally acceptable provided they are constructed in accordance with the Stormwater Management rule (N.J.A.C. 7:7E-8.7).*

(g) *Development in a flood hazard area shall comply with the requirements for impervious cover and vegetative cover under N.J.A.C. 7:7E-5 and either N.J.A.C. 7:7E-5A or 5B, as applicable.*

The Hudson River is a tidal water body. The Flood hazard areas have been previously delineated by Federal Emergency Management Agency (FEMA). The entire subject site is located below the FEMA 100-year floodplain and is classified in Zone A1. The Division's engineer will ensure that the proposed structures will be located on an elevation in accordance with the Division's regulations. The Division engineer's comments are incorporated at the end of this report. Impervious cover and vegetative cover under N.J.A.C. 7:7E-5, 5A or 5B are addressed below. The applicant has demonstrated compliance with this Rule.

**Riparian Zones (7:7E-3.26):**

(a) *A riparian zone exists along every regulated water, except there is no riparian zone along the Atlantic ocean nor along any manmade lagoon, stormwater management basin, or oceanfront barrier island, spit or peninsula. Regulated waters are defined in the Flood Hazard Area Control Act rules at N.J.A.C. 7:13-2.2.*

(b) The riparian zone includes the land and vegetation within each regulated water described in (a) above, as well as the land and vegetation within a certain distance of each regulated water as described in (c) below. The portion of the riparian zone that lies outside of a regulated water is measured landward from the top of bank.

(c) The width of the riparian zone along each regulated water described in (a) above is as follows:

3. The riparian zone is 50 feet wide along both sides of all waters not identified in (c) 1 or (c) 2 above.

(e) Development in riparian zones shall conform with the requirements for a flood hazard area individual permit under the Flood Hazard Area Control Act rules at N.J.A.C. 7:13-9, 10 and 11 or, in the alternative as applicable, a flood hazard area permit-by-rule at N.J.A.C. 7:13-7 or a flood hazard area general permit at N.J.A.C. 7:13-8.

(f) If endangered and/or threatened wildlife or species habitat is present in the riparian zone such that the area is also an endangered or threatened wildlife or plant species habitat special area in accordance with N.J.A.C. 7:7E-3.38, then the requirements of N.J.A.C. 7:7E-3.38, Endangered or threatened wildlife or plant species habitats, shall apply.

The subject site is located adjacent to the Hudson River. In accordance to N.J.A.C. 7:13 2.2, the Hudson River is a regulated water not related to C-1 water, and non-trout related. Therefore, a 50-foot riparian zone exists along the water's edge of the subject site. The proposed redevelopment project located within the riparian zone is addressed under the Flood Hazard Area Control Act Rules (N.J.A.C. 7:13-9, 10 and 11) below. In addition, no endangered and/or threatened wildlife or species habitat is present within the riparian zone. The applicant has demonstrated compliance with this Rule.

#### Historic and Archaeological Resources (7:7E-3.36):

(a) Historic and archaeological resources include objects, structures, shipwrecks, buildings, neighborhoods, districts, and man-made or man-modified features of the landscape and seascape, including historic and prehistoric archaeological sites, which either are on or are eligible for inclusion on the New Jersey or National Register of Historic Places.

(b) Development that detracts from, encroaches upon, damages, or destroys the value of historic and archaeological resources is discouraged. Development that incorporates historic and archaeological resources in sensitive adaptive reuse is encouraged.

The National Park Service National register for Historic Places Database, the NJDEP Historic Preservation Office and the National Register of Historic Places Database did not list the subject property as historic places. The applicant has demonstrated compliance with this Rule.

#### Endangered or Threatened Wildlife or Vegetation Species Habitats (7:7E-3.38):

(a) Endangered or threatened wildlife or plant species habitats are areas known to be inhabited on a seasonal or permanent basis by or to be critical at any stage in the life cycle of any wildlife or plant identified as "endangered" or "threatened" species on official Federal or State lists of endangered or threatened species, or under active consideration for State or Federal listing. The definition of endangered or threatened wildlife or plant species habitats include a sufficient buffer area to ensure continued survival of the population of the species.

According to the NJDEP 1 Map, no suitable habitat is known on this site for documented endangered and threatened species. The applicant has demonstrated compliance with this Rule.

#### Special Hazard Areas (7:7E-3.41):

(a) Special hazard areas include areas with a known actual or potential hazard to public health, safety, and welfare, or to public or private property, such as the navigable air space around airports and seaplane landing areas, potential evacuation zones and areas where hazardous substances as defined at N.J.S.A. 58:10-23.11b-k are used or disposed, including adjacent areas and areas of hazardous material contamination.

(b) Coastal development, especially residential and labor-intensive economic development, within special hazard areas is discouraged. All development within special hazard areas must include appropriate mitigating measures to protect the public health and safety.

(c) Approvals from the Department's Division of Solid and Hazardous Waste shall be obtained prior to the commencement of any hazardous substance investigations or clean-up activities at contaminated sites.

Historic fill and isolated pockets of volatile organic (VO) contaminated soils have been detected at the subject site. VOs that require remediation by the NJDEP Site Remediation Program (SRP) will be addressed through excavation or in-place treatment. The NJDEP SRP has allowed the applicant to place a classification exception areas (CEAs), a deed restriction, on the groundwater contaminants. A remediation agreement was submitted to SRP and the applicant is currently working closely with them. Details to the remediation activities will be incorporated in Phase II of the project. A Remedial Investigation Report and Remedial Action Work Plan was submitted to the NJDEP SRP on or around February 1, 2006. The reports are currently under Site Remediation's review. The ISRA Case no. is 1:20040267. A condition requiring the applicant to obtain approval from SRP prior to the commencement of any regulated activities will be included in the permit. The applicant has demonstrated compliance with this Rule.

#### **Hudson River Waterfront Area (7:7E-3.48):**

(c) Hudson River Waterfront Area development shall be consistent with all other applicable Coastal Zone Management rules with particular attention given to N.J.A.C. 7:7E 3.38, Public open space, N.J.A.C. 7:7E-3.39 Special hazards areas, N.J.A.C. 7:7E-3.41 Special urban area, N.J.A.C. 7:7E-7.14 High rise structures, N.J.A.C. 7:7E-8.11 Public Access to the Waterfront, N.J.A.C. 7:7E 8.12 Scenic Resources and Design, and N.J.A.C. 7:7E 8.4 Water Quality.

(e) All waterfront development along the Hudson River shall develop, maintain and manage a section of the Hudson Waterfront Walkway coincident with the shoreline of the development property. The developer shall, by appropriate instrument of conveyance, create a conservation easement in favor of the Department. The conservation easement shall define the physical parameters of the walkway and the allowable uses, address the maintenance and management duties and identify the responsible party. Development of each project's public access system shall conform to this special area policy and to the Hudson Waterfront Walkway Planning and Design Guidelines (1984), and the Hudson Waterfront Walkway Design Standards (1989).

(f) Applications which vary in detail from the standards of this rule are discouraged, but will be considered for approval if they would provide greater public access and/or protection of natural or scenic resources than would be afforded by strict compliance with this rule. Applicants proposing a development which varies in detail from the standards of this rule are encouraged to contact the Department for guidance when conceptual plans have been prepared.

As part of the Phase II redevelopment, the applicant proposes to construct approximately 750 linear feet of Hudson River Walkway. The 750 linear feet of Hudson River Walkway proposed under Phase II will coincide with the previously approved 1,150 linear feet of Hudson River Walkway under Phase I (DLJRP file no. 0213-06-0001.1; WFD 060001). The Division has determined that the design of the proposed waterfront walkway conforms with the Hudson Waterfront Walkway Planning and Design Guidelines (1984), and the Hudson Waterfront Walkway Design Standards (1989), with the 16-foot wide walkway and its amenities. The applicant has demonstrated compliance with this Rule.

#### **Lands and Waters Subject to Public Trust Rights (7:7E-3.50):**

(a) Lands and waters subject to public trust rights are tidal waterways and their shores, including both lands now or formerly below the mean high water line, and shores above the mean high water line. Tidal waterways and their shores are subject to the Public Trust Doctrine and are held in trust by the State for the benefit of all the people, allowing the public to fully enjoy these lands and waters for a variety of public uses.

(b) Development that adversely affects lands and waters subject to public trust rights is discouraged.

(d) Public access to lands and waters subject to public trust rights shall be provided in accordance with the public trust rights rule, N.J.A.C. 7:7E 8.11.

Since the subject site is located adjacent to the Hudson River, it is subject to the Public Trust Doctrine and must allow the public to fully enjoy these lands and waters. There was no public waterfront access on the site due to its previous pharmaceutical usage. With the current redevelopment project, the proposed waterfront walkway will provide adequate access to the Hudson River for the public and local residence. The Public Trust Rights Rule (N.J.A.C. 7:7E-8.11) is addressed below. The applicant has demonstrated compliance with this Rule.

**Outfalls and Intakes (7:7E-4.17):**

- (a) *Outfalls and intakes are pipe openings that are located in water areas for the purpose of intake of water or discharge of effluent including sewage, stormwater and industrial effluent;*
- (b) *Outfalls and intakes are conditionally acceptable provided that the use associated with the intake or outfall meets applicable Coastal Zone Management rules.*

The applicant proposes the installation of three new stormwater outfall structures along the water's edge. The stormwater outfall structures will be installed above the Mean High Water Line. No impacts to freshwater wetlands and transition area are proposed. A Stormwater Management Plan was submitted to the Division for review. The applicant has demonstrated compliance with this Rule.

**Impervious Cover Limits for a Site in the Upland Waterfront Development Area (7:7E-5A.9):**

- (b) *If a site or portion of a site is unforested, as determined under N.J.A.C. 7:7E-5.5, the impervious cover limit is the limit at (b)1, 2 or 3 below, which ever is higher:*
  - 1. *The acreage of the net land area on the site or portion, as determined under N.J.A.C. 7:7E-5.3(d), multiplied by the impervious cover percentage in Table K below for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7E-5.A6;*
  - 2. *For a site located in the northern waterfront region or urban area region, as determined under N.J.A.C. 7:7E-5A2(d), the amount of existing impervious cover located on a site as determined under (c) below; or*
  - 3. *For a site located in a region other than those identified at (b)2 above, the acreage covered by buildings and/or asphalt or concrete pavement legally existing on the site at the time the application is submitted to the Department.*

According to N.J.A.C. 7:7E-5.5, the subject site is considered unforested. Therefore, an unforested site that is located in the urban area region, and with a high development intensity, the allowable impervious coverage is 90%. The total acreage of the site is 49.85 acres, but the total net land area is 21.3 acres. Therefore, for the entire project (Phase I and Phase II), the applicant is allowed a maximum of 20.83 acres of impervious coverage. The total impervious coverage proposed for Phase I and Phase II is 17.12 acres (74.1%). The applicant has demonstrated compliance with this Rule.

**Vegetative Cover Percentages for a Site in the Upland Waterfront Development Area (7:7E-5A.10):**

- (a) *The area (in acres) on a site in the upland waterfront development area in which trees and/or herb/shrub vegetation shall be planted or preserved is calculated as follows:*
  - i. *To determine the area (in acres) of tree preservation and/or tree planting on the site:*
    - 1. *Identify the forested and/or unforested portions of the site, as determined under N.J.A.C. 7:7E-5.5;*
    - ii. *If a site or portion of a site identified at (a)i has more than one development intensity, further divide that site or portion into smaller portions based on their respective development intensities;*
    - iii. *For each forested site or portion identified at (a)i1 above, multiply the acreage of the net land area on the site or portion, as determined under N.J.A.C. 7:7E-5.3(d), by the tree preservation and tree planting percentage in Table F for the*

- development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7E 5A8; and*
- iv. *For each unforested site or portion identified at (a)iii above, multiply the acreage of the net land area on the site or portion, as determined under N.J.A.C. 7:7E-5.3(d), by the tree planting percentage in Table G below for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7E 5A 8.*

The project site is unforested, is located in the urban area region, and has a high development intensity, therefore, the required tree preservation and/or planting percentage is 10% for the entire site, Phase I and Phase II. 10% of the total net land area (21.3 acres) is 2.13 acres. Under Phase I, the applicant proposed to provide 2.9 % (0.67 acres) of the required 10% (2.13 acres). Under Phase II, the applicant proposes to provide 5.31 acres landscaping and other pervious surfaces. The total landscaping and other pervious surfaces proposed for the entire site will be 5.98 acres (25.9 %). The applicant has demonstrated compliance with this Rule.

**Secondary Impacts (7:7E-6.3):**

(a) *Secondary impacts are the effects of additional development likely to be constructed as a result of the approval of a particular proposal. Secondary impacts can also include traffic increase, increased recreational demand and any other offsite impacts generated by onsite activities which affect the site and surrounding region.*

This phase of the proposed project is the final built-out of the entire site. At the completion of Phase II, the redevelopment of this former pharmaceutical site will be a mixed use development consisting of residential, commercial, and retail opportunities. The project site is located in a highly urbanized area. The surrounding towns are previously developed with similar usage. No adverse secondary impacts are anticipated as a result of this project. The applicant has demonstrated compliance with this Rule.

**Housing Use rules (7:7E-7.2):**

(a) *"Housing" includes single family detached house, multi-family units with apartments or town houses, high rise buildings and mixed use developments.*

(a) *Standards relevant to water area and water's edge housing are as follows:*

3. *Housing is conditionally acceptable in the filled water's edge, provided that it meets the requirements of the Filled Water's Edge rule (N.J.A.C. 7:7E-3.23) and the Public Access to the Waterfront Rule (N.J.A.C. 7:7E 8.11). The residential development shall comply with the requirements for impervious cover and vegetative cover that apply to the site under N.J.A.C. 7:7E 5 and either N.J.A.C. 5A or 5B, except on bay islands where the requirements of the Bay Island Corridor rule (N.J.A.C. 7:7E-3.21) shall apply.*
5. *On sites with existing shore protection structures, the residential structure shall be set back a minimum of 25 feet from the meanfront shore protection structures, and a minimum of 15 feet from shore protection structure elsewhere. This distance shall be measured from the waterward face of the bulkhead or seawall and from the top of slope on the seaward side of the seawall.*

The proposed redevelopment includes the construction of mixed-use buildings located on a site adjacent to the Hudson River. The existing shoreline protection is in a form of loose rip-rap and boulders. The applicant proposed to enhance the existing shoreline protection by placing additional rip-rap along the slope shoreline to further stabilize the area. All the shoreline stabilization activity will be conducted above the Mean High Water Line. The proposed mixed use buildings will be located over 30 feet from landward face of the rip-rap stabilization area. In addition, Filled Water's Edge (7:7E-3.23), Public Access to the Waterfront Rules/Public Trust Rights (7:7E-8.11), and Requirements for Impervious Cover and Vegetative Cover (7:7E-5) are address separately under each Rule. The applicant has demonstrated compliance with this Rule.

**Transportation Use Rule (7:7E-7.5):**

- (b) *Standards relevant to bicycle and foot paths are as follows:*
1. *The construction of internal bicycle paths, foot paths and sidewalks in residential, commercial, and industrial developments is required to the maximum extent practicable.*
  2. *Linear bicycle and foot paths are encouraged along the edges of all water bodies, and from the water body to the nearest public road, provided they would not disturb Special Areas or subject the user to danger.*
  3. *Existing bicycle and foot paths shall be continued around development when it is not practical to pass through development.*

The proposed mixed-use redevelopment will result in the construction of several internal roadways, and sidewalks through the waterfront community. The internal sidewalks will be approximately 5 feet to 8 feet wide. In addition, under Phase II, approximately 750 linear feet of waterfront walkway will be constructed and will be connected to the previously approved Phase I, 835 linear feet of waterfront walkway. The applicant has demonstrated compliance with this Rule.

**Coastal Engineering (7:7E-7.11):**

(a) *Coastal engineering includes a variety of structural and non-structural measures to manage water areas and the shoreline for natural effects of erosion, storms, and sediment and sand movements. Beach nourishment, sand fences, pedestrian control on dunes, stabilization of dunes, dune restoration projects, dredged material disposal and the construction of retaining structures such as bulkheads, gubions, revetments and seawalls are all examples of coastal engineering.*

- (c) *Standard relevant to structural shore protection are as follows:*
1. *The construction of new shore protection structures or expansion or fortification of existing shore protection structures, including, but not limited to, jetties, groins, seawalls, bulkheads, gubions and other retaining structures to retard longshore transport and/or to prevent tidal waters from reaching erodible material is acceptable only if it meets all of the following five conditions:*
    - i. *The structure is essential to protect water dependent uses or heavily used public recreation beach areas in danger from tidal waters or erosion, or the structure is essential to protect existing structures and infrastructure in developed shorefront areas in danger from erosion, or the structure is essential to mitigate, through, for example, the construction of a retained earthen berm, the projected erosion in an erosion hazard area along a headland and provide erosion protection for a development that is otherwise acceptable under the Coastal Zone Management rules;*
    - ii. *The structure will not cause significant adverse impacts on the local shoreline and sand supply;*
    - iii. *The structure will not create net adverse shoreline sand movement downdrift, including erosion or shoaling;*
    - iv. *The structure will cause minimum feasible adverse impact to living marine and estuarine resources;*
    - v. *The structure is consistent with the State's Shore Protection Master Plan;*

As part of the mixed-use redevelopment project, the applicant proposed the fortification of the existing loose rip-rap/boulder shoreline. The proposed activity will involve the placement of additional rip-rap along approximately 700 linear feet of existing shoreline for further stabilization. The fortification of the existing shoreline is crucial to the anticipated heavy public usage of the Hudson River Waterfront Walkway. All the shoreline stabilization activity will be conducted above the Mean High Water Line, therefore, no living marine and estuarine resources will be adversely impacted. The applicant has demonstrated compliance with this Rule.

**High-Rise Structures (7:7F-7.14):**

(a) *High-rise structures are structures which are more than six stories or more than 60 feet in height as measured from existing preconstruction ground level.*

(b) *The standards for high rise structures are as follows:*

1. *High rise structures are encouraged to locate in an urban area of existing high density, high rise and/or intense settlements;*
2. *High-rise structures within the view of coastal waters shall be separated from coastal waters by at least one public road or an equivalent area (at least 50 feet) physically and visually open to the public except as provided by N.J.A.C. 7:2E-3.48;*
3. *The longest lateral dimension of any high-rise structure must be oriented perpendicular to the beach or coastal waters, except for a high-rise structure that is located in the Redevelopment Zone of the City of Long Branch and authorized pursuant to the Long Branch Redevelopment Zone Permit at N.J.A.C. 7:7E-7.4.*
4. *The proposed structure must not block the view of dunes, beaches, horizons, skylines, rivers, inlets, bays, or wetlands that are currently enjoyed by existing residential structures, public roads or pathways, to the maximum extent practicable;*
6. *The proposed structure must be in character with the surrounding transitional heights and residential densities, or be in character with a municipal comprehensive development scheme requiring an increase in height and density which is consistent with all applicable Coastal Zone Management rules; and*
7. *The proposed structure must not have an adverse impact on air quality, traffic, and existing infrastructure.*
8. *The proposed structure must be architecturally designed so as to not cause deflation of the beach and dune system or other coastal environmental waterward of the structure.*

The proposed Phase II redevelopment will involve the construction of 10 mixed-use buildings on the subject site. Of the 10 proposed buildings, there will be eight (8) stand along high-rise structures. They are identified on the site plan as Building B, Building C-1, Building C-2, Building D, Building F, Building G, and 2 sections of Building A. Two additional high-rise structures (part of Building A) are proposed over a new parking garage. The longest lateral dimension of all the proposed high-rise towers are oriented perpendicular to the Hudson River. Three view corridors from River Road to the Hudson River and NYC skyline are available along the northern property boundary, between Building K2 and Building A, and along the southern property boundary. In addition, the high rise buildings are located at least 50 feet from the water's edge in order to provide a separation between the Hudson River and the proposed redevelopment. The applicant has demonstrated compliance with this Rule.

#### **Water Quality (7:7E-8.4) and Stormwater Management (7:7E-8.7):**

(a) *As required by Section 307(f) of the Federal Coastal Zone Management Act (P.L. 92-583), Federal, State and local water quality requirements established under the Clean Water Act (33 U.S.C. 1251) shall be the water resource standards of the coastal management program.*

(a) *Stormwater runoff is the flow of water on the surface of the ground, resulting from precipitation. Standards relevant to stormwater management system design are set forth in this rule.*

These Rules are addressed in the attached Division Engineer's Report.

#### **Public Trust Rights (7:7E-8.11):**

(a) *Public trust rights to tidal waterways and their shores (public trust rights) established by the Public Trust Doctrine include public access which is the ability of the public to pass physically and visually to, from and along lands and waters subject to public trust rights as defined in N.J.A.C. 7:7E-3.50, and to use these lands and waters for activities such as swimming, sunbathing, fishing, surfing, sport diving, bird watching, walking and*

bouting. Public trust rights also include the right to perpendicular and linear access. Public accessways and public access areas provide a means for the public to pass along and use lands and waters subject to public trust rights.

(d) Except as otherwise provided at (f) below, development on or adjacent to all tidal waterways and their shores shall provide on-site, permanent, unobstructed public access to the tidal waterway and its shores at all times, including both visual and physical access. Specific requirements for sites located along the Arthur Kill, Kill Van Kull west of Bayonne Bridge, Newark Bay, Delaware River from the Trenton Makes Bridge to the CAFRA boundary, Elizabeth River, Hackensack River, Passaic River, Rahway River, Raritan River, Cohamsey River in Bridgeton City, and Maurice River in Millville City are found at (e) below. Public accessways and public access areas shall:

1. include perpendicular access and a linear area along the tidal waterway and its entire shore; and
2. if located in a natural area of a tidal waterway, be designed to minimize the impacts to the natural area and tidal waterway including impacts to habitat value, vegetation and water quality.

(e) Except as provided in (f) below, in addition to the requirements of (d) above, the perpendicular access and linear area provided for sites located along the Arthur Kill, Kill Van Kull west of Bayonne Bridge, Newark Bay, Delaware River from the Trenton Makes Bridge to the CAFRA boundary, Elizabeth River, Hackensack River, Passaic River, Rahway River, Raritan River, Cohamsey River in Bridgeton City, and Maurice River in Millville City, shall comply with the following. The standards for public access along the Hudson River Waterfront Area are set forth at N.J.A.C. 7:7E 3.46:

1. The linear area shall consist of a walkway that meets the following:
  - i. The minimum width of walkway free of obstruction shall be 16 feet; and
  - ii. An area a minimum of 30 feet wide, including the walkway area, shall be permanently protected by a conservation restriction; and
2. The perpendicular access shall consist of a walkway that meets the following:
  - i. The minimum width of the walkway free of obstruction shall be 10 feet;
  - ii. An area a minimum of 20 feet wide, including the walkway area shall be permanently protected by a conservation restriction; and
  - iii. The linear distance between perpendicular accessways shall not exceed one-half mile as measured generally parallel to the waterway; and
3. The Department may reduce the walkway width requirements at (e) 1i and 2i above, as necessary to protect endangered and threatened wildlife or vegetation species habitat, critical wildlife habitat as defined at N.J.A.C. 7:7-3.39, natural areas or existing infrastructure.

(g) Public access must be available on a nondiscriminatory basis. All establishments, including municipalities, counties, marinas, condominium associations, homeowner associations and beach clubs, which control access to tidal waterways and their shores shall comply with the Law Against Discrimination, N.J.S.A. 10:5-1 et seq.

(h) Public access to tidal waterways and their shores shall be clearly marked. Department approved public access signs shall be installed at each public accessway, public access area and/or public parking area at the development site and maintained in perpetuity by the permittee and its successors in title and interest. N.J.A.C. 7:7E 8.11(p) contains the standards for signs for municipalities that participate in Shore Protection Program funding. Subsection (g) below contains the standards for signs for municipalities, counties and nonprofits that receive Green Acres funding for a Green Acres project site.

(i) Activities that have the effect of discouraging or preventing the exercise of public trust rights are prohibited. These activities include, but are not limited to, requiring photographic identification, requiring a liability waiver, requiring the purchase of drinks or food from a specific vendor, or prohibiting bringing beach equipment such as blankets or beach chairs.

(j) Parking shall be provided for the public to access tidal waterways and their shores, except where public access is not required in accordance with (f) above or the project is limited in scope in accordance with (f) 7. Subsection (p) below contains the parking standards for municipalities that participate in Shore Protection Program funding. Subsection (q) below contains the parking standards for municipalities, counties and nonprofits that receive Green Acres funding for a Green Acres project site. All other development shall provide parking as follows:

2. The area set aside for off-street parking shall be dedicated for public access parking through the recording of a conservation restriction maintaining the parking spaces in perpetuity; and
3. The area set aside for on street parking shall be dedicated for public access parking through municipal ordinance.

(k) Development on or adjacent to tidal waterways and their shores shall provide barrier free access where feasible and warranted by the character of the site.

(l) Development on or adjacent to tidal waterways and their shores shall incorporate fishing access and associated amenities to the maximum extent practicable within the area provided for public access. In the case of a beach, fishing access shall not be required in areas designated for swimming during hours designated for swimming.

(m) The areas set aside for public access to tidal waterways and their shores shall be permanently dedicated for public use through the recording of a Department approved conservation restriction under the New Jersey Conservation Restriction and Historic Preservation Restriction Act, N.J.S.A. 13:8B-1 et seq., maintaining the publicly dedicated areas in perpetuity. Subsection (p) below contains the conservation restriction standards for municipalities that participate in Shore Protection Program funding. Subsection (n) below contains the conservation restriction standards for municipalities, counties and nonprofits that receive Green Acres funding for a Green Acres project. The N.J.A.C. 7:27B-8A.4 contains the recording requirements for all conservation restrictions.

(n) No authorization or approval under this chapter shall be deemed to relinquish public rights of access to and use of lands and waters subject to public trust rights.

Under the Phase I redevelopment (D.L.U.H file no. 0213-06-0001.2), the Division authorized the construction of approximately 1,135 linear feet of permanent waterfront walkway on the subject site. The previous authorization also required the construction of 750 linear feet of "interim" waterfront walkway located in the Phase II section of the site. In addition, a 20-foot wide easement with a 10-foot perpendicular walkway located through the center of the site was also approved. The intent approval of the "interim" waterfront walkway located in Phase II was to ensure that the entire site will establish public access to the waterfront area, even though only a portion of the site was approved at that time.

Under the current Phase II redevelopment project, the applicant proposes the permanent construction of the previously required 750 linear feet of "interim" waterfront walkway within a 30-foot wide easement, and a 16-foot wide walkway. In addition, the previously approved 20 foot wide easement with a 10-foot perpendicular walkway will be relocated to the southern property boundary. Both linear areas will be barrier free for a minimum of 10 feet, and will be made available to the public at all times. The applicant is providing 4 waterfront walkway directional signs and 20 parking stalls for public waterfront walkway users located approximately 40 feet from the waterfront walkway. The free waterfront walkway will also provide opportunities for the public to engage in recreational activities (ie, fishing) that were not made available due to its previously pharmaceutical usage. A condition will be placed in the permit requiring the applicant to record a Department approved conservation restriction under the N.J. Conservation Restriction and Historic Preservation Restriction Act, N.J.A.S. 13:8B-1 et seq., maintaining the areas set aside for public access to the Hudson River in perpetuity. The applicant has demonstrated compliance with this Rule.

#### Scenic Resources and Design (7:27B-9.12):

- (a) Scenic resources include the views of the natural and/or built landscape.
- (b) Large-scale elements of building and site design are defined as the elements that compose the developed landscape such as size, geometry, massing, height and bulk structures.
- (c) New coastal development that is visually compatible with its surroundings in terms of building and site design, and enhances scenic resources is encouraged. New coastal development that is not visually compatible with existing scenic resources in terms of large-scale elements of building and site design is discouraged.

The large scale elements of the proposed project in terms of height and dimension are consistent with the surrounding high-rise structures in the area. The Phase II redevelopment project will involve the restoration of an area that has historically been unavailable to the public due to its pharmaceutical research and development use.

The new waterfront walkway on-site will provide visual and physical access to the Hudson River and the New York skyline. The applicant has demonstrated compliance with this Rule.

**Buffers and Compatibility of Uses (7:7E-8.13):**

(a) *Buffers are natural or manmade areas, structures, or objects that serve to separate distinct uses or areas. Compatibility of uses is the ability for uses to exist together without aesthetic or functional conflicts.*

(b) *Development shall be compatible with adjacent land uses to the maximum extent practicable.*

1. *Development that is likely to adversely affect adjacent uses, particularly Special Areas N.J.A.C. 7:7E-3, or residential or recreation uses, is prohibited unless the impact is mitigated by an adequate buffer. The purpose, width and type of the required buffer shall vary depending upon the type and degree of impact and the type of adjacent area to be affected by the development, and shall be determined on a case-by-case basis.*
2. *The standards for wetland buffers are found at N.J.A.C. 7:7E-3.2R.*
3. *The following apply to buffer treatment:*
  - i. *All buffer areas shall be planted with appropriate vegetative species, either through primary planting or supplemental planting. This landscaping shall include use of mixed, native vegetative species, with sufficient size and density to create a solid visual screen within five years from the date of planting.*
  - ii. *Buffer areas which are forested may require supplemental vegetative plantings to ensure that acceptable visual and physical separation is achieved.*
  - iii. *Buffer areas which are non-forested will require dense vegetative plantings with mixed evergreen and deciduous trees and shrubs. Evergreens must be at least eight feet tall at time of planting; deciduous trees must be at least three inches caliper, halled and lurchapped; shrubs must be at least three to four feet in height.*

As mentioned above, the site was previously for pharmaceutical research and development use, therefore prohibiting the public to enjoy the waterfront area. The current Phase II redevelopment project involves the creation of a mixed-use environment that is compatible with the aesthetic and the function of the surrounding uses and areas. In addition, in order to separate the commercial office usage of the adjacent and the mixed-use environment of the proposed project, the applicant proposes to plant Evergreen trees (approximately 7-8 feet in height), along the northern property boundary. The applicant has demonstrated compliance with this Rule.

**Traffic (7:7E-8.14):**

(a) *Traffic is the movement of vehicles, pedestrians or ships along a route. Coastal development shall be designed, located and operated in a manner to cause the least possible disturbance to traffic systems.*

(b) *Coastal development shall be designed, located and operated in a manner to cause the least possible disturbance to traffic systems.*

1. *Alternative means of transportation, that is, public and private mass transportation facilities and services, shall be considered and, where feasible, incorporated into the design and management of a proposed development, to reduce the number of individual vehicle trips generated as a result of the facility. Examples of alternative means of transportation include: van pooling, staggered working hours and installation of ancillary public transportation facilities such as bus shelters.*

(c) *When the level of service of traffic systems is disturbed by approved development, the necessary design modifications or funding contribution toward an area wide traffic improvement shall be prepared and implemented in conjunction with the coastal development, the satisfaction of the New Jersey Department of Transportation and any regional agencies.*

(d) *Any development that causes a location on a roadway to operate in excess of capacity Level D is discouraged. A developer shall undertake mitigation or other corrective measures as may be necessary so that the traffic levels at any affected intersection remain at capacity Level D or better. A developer may, by incorporating*

*design modification or by contributing to the cost of traffic improvements, be able to address traffic problems resulting from the development, in which case development would be conditionally acceptable. Determinations of traffic levels which will be generated will be made by the New Jersey Department of Transportation.*

The applicant identified River Road as an Urban Minor Arterial with two lanes in each direction and a posted speed limit of 35 miles per hour. In the traffic impact study provided in the application, it identified that the northbound and southbound traffic is significant during peak AM and PM and Saturday hours. The addition of the proposed mixed-use project could have significant impacts on the vehicular traffic of River Road. The applicant's traffic consultant reviewed potential traffic impacts during build and no-build. It was determined that there would be no change to the existing level of service values with the construction of the project, and therefore, the project would not have a significant impact to the roadway network. A condition will be placed in the permit requiring the applicant to obtain approval from the county traffic engineer for the proposed project prior to the commencement of regulated activity on-site. The applicant has demonstrated compliance with this Rule.

### **FLOOD HAZARD AREA ELEMENT:**

#### **General Provisions for Verifications (7:13-6.1):**

*(a) A verification is a document containing the Department's approval of the flood hazard area design flood elevation on a site, includes either a flood hazard area limit or an indication that the entire site is in a flood hazard area, and may also include a floodway limit and/or a riparian zone limit, if applicable.*

The nearest watercourse to the subject site is the Hudson River, which is located immediately east of the site. The riparian zone on the subject site is 50 feet from the top of the River's bank. The flood hazard area limit is addressed in the attached Division Engineer's Report.

#### **Requirements for a Regulated Activity in a Riparian Zone (7:13-10.2):**

*(a) This section sets forth specific design and construction standards that apply to any regulated activity proposed in a riparian zone.*

*(v) In cases where an applicant proposes to redevelop a site within 25 feet of any top of bank or edge of water, all existing impervious surface within 25 feet of the top of bank or edge of water shall be removed and the riparian zone in this area shall be adequately stabilized and replanted with indigenous, non-invasive vegetation, except in the following cases:*

2. *The applicant proposes to construct a public walkway within 25 feet of the top of bank or edge of water, provided the walkway is constructed of permeable material where feasible, and provided the remainder of the area within 25 feet of the top of bank or edge of water is restored, stabilized and replanted with indigenous, non-invasive vegetation.*

As part of the Phase II redevelopment project, the applicant proposes the construction of approximately 750 linear feet of waterfront walkway. The 16-foot wide waterfront walkway will be located within the 25 feet top of the river's bank. For the construction of the waterfront walkway and its amenities, all existing impervious surface within 25 feet top of the river's bank will be removed. The applicant proposes to landscape the remainder 9 feet of the 25 foot riparian buffer with shade trees.

#### **Requirements for a Regulated Activity in or Along a Water with Fishery Resources (7:13-10.5):**

*(a) This section sets forth specific design and construction standards that apply to any regulated activity proposed in the channel and/or riparian zone of a regulated water containing fishery resources.*

In order to protect anadromous fish species during their migratory run, the bank stabilization activity and any upland activity that may potentially introduce sediments into the Hudson River are prohibited between April 1 and June 30 of each year. All proposed activities are located above the Mean High Water Line of the Hudson River. A timing restriction will be included in the permit.

#### **Requirements for a Regulated Activity in a Documented Habitat for Threatened or Endangered Species (7:13-10.6):**

(a) *This section sets forth specific design and construction standards that apply to any regulated activity proposed in a documented habitat for a threatened or endangered species.*

According to the NIDEF L-Map, the subject site is not a documented habitat for threatened or endangered species. In addition, no comments were received from the NIDEF's Division of Fish & Wildlife.

#### **Individual Permit Requirements For Various Regulated Activities (7:13-11):**

##### **Requirements that Apply to All Regulated Activities (7:13-11.1):**

(a) *This section sets forth specific design and construction standards that apply to any regulated activity proposed in any regulated area.*

(b) *The Department shall issue an individual permit for a regulated activity only if it determines that the regulated activity is not likely to cause significant and adverse effects on the following:*

1. *Water quality;*
2. *aquatic biota;*
3. *Water supply;*
4. *Flooding;*
5. *Drainage;*
6. *Channel stability;*
7. *Threatened and endangered species or their current or documented historic habitats;*
8. *Navigation;*
9. *Energy production; and*
10. *Fishery resources*

The Division's review of this Flood Hazard Area application has concluded that the project as proposed will not cause significant and adverse effects in any of the areas mentioned above.

##### **Requirements for Stormwater Management (7:13-11.2):**

(a) *This section sets forth stormwater management requirements and specific design and construction standards that apply to any major development, as defined at N.J.A.C. 7:8 1.2.*

The applicant proposes stormwater management as part of the redevelopment. The stormwater management requirements, specific design and construction standards are addressed in the attached Division Engineer's Report.

##### **Requirements for Excavation, Fill and Grading Activities (7:13-11.3):**

(a) *This section sets forth specific design and construction standards that apply to any excavation, fill and/or grading proposed in any regulated area.*

The applicant proposes activities involving excavation, fill and grading as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

##### **Requirements for a Structure (7:13-11.4):**

(a) *This section sets forth specific design and construction standards that apply to any structure proposed in any regulated area.*

(b) *The Department shall issue an individual permit to construct or reconstruct a structure only if the entire structure is designed and constructed to be suitably anchored in order to:*

1. *Resist impact from water and debris during the flood hazard area design flood;*

The applicant proposes several structures as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

##### **Requirements for a Building (7:13-11.5):**

(b) *The requirements in this section apply to a building that is constructed or reconstructed in the following areas:*

1. *A flood hazard area; and*

The proposed project is located within the flood hazard area of the Hudson River.

(c) *The Department shall issue an individual permit to construct or reconstruct a building of any kind only if the following requirements are satisfied:*

1. *Any new building is located at least 25 feet from any top of bank or edge of water.*

The proposed mixed-use buildings under Phase II are located a minimum of 25 feet from the top of the Hudson River's bank.

(h) *The Department shall issue an individual permit to construct or reconstruct a habitable building that is neither a private residence nor a public building, only if one of the following requirements is satisfied:*

The applicant proposes several habitable buildings as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for a Railroad, Roadway or Parking Area (7:13-11.6):**

(a) *This section sets forth specific design and construction standards that apply to any railroad, roadway or parking area proposed in a flood hazard area.*

The applicant proposes several parking areas as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for a Stormwater Outfall Structure (7:13-11.10):**

(a) *This section sets forth specific design and construction standards that apply to any stormwater outfall structure proposed in any regulated area.*

The applicant proposes three new stormwater outfall structures as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**CONCLUSION:**

Based on the information contained in the application and shown on the submitted plans, the project is conditionally acceptable under the Rules on Coastal Zone Management (N.J.A.C. 7:7E) and the environmental standards set forth in the Flood Hazard Control Act Rules (N.J.A.C. 7:13).

STATE OF NEW JERSEY  
DEPARTMENT OF ENVIRONMENTAL PROTECTION  
(See Issuing Division below)  
PERMIT\*

The New Jersey Department of Environmental Protection grants this permit in accordance with your application, attachments accompanying same application, and applicable laws and regulations. This permit is also subject to the further conditions and stipulations enumerated in the supporting documents which are agreed to by the permittee upon acceptance of the permit.

Permit No. D213-06-0001.1 - WFD 0600(D) (Upland) Application No. Same as Permit No.

Issuance Date: Effective Date Expiration Date

Name and Address of Applicant Elizabeth McLoughlin Paulus, Sokolowski and Sartor, J.J.C. 67 Mountain Blvd. Extension Warren, NJ 07059	Name and Address of Owner IPARK Edgewater, LLC 485 West Putnam Ave. Greenwich, CT 06830	Name and Address of Operator Same as Applicant
---	--	---

Location of Activity/Facility (Street Address) Unilever Site Redevelopment, Phase I Lots: 1 & 5 Block: 99 Twp: Borough of Edgewater County: Bergen	Issuing Division Land Use Regulation Program	Statute(s) N.J.S.A. 12:5-3 N.J.S.A. 58:16A-50
---	---	---

Type of Permit: Waterfront Development (Upland) and Water Quality Certificate	Maximum Approved Capacity, If applicable N/A
---	---

This permit grants permission, as proposed under Phase I of the redevelopment project, to expand an existing police station, to convert two existing, vacant laboratory buildings into residential lofts, to stabilize 835 linear feet of rip rap bank, to construct a new stormwater system, to construct approximately 1,150 linear feet of a new permanent waterfront walkway, a 10 ft. wide perpendicular access to the waterfront walkway, and its amenities. In addition, approximately 750 linear feet of an "interim" waterfront walkway for the Phase II portion of the site will be constructed.

- The activities authorized by this permit are shown on the conceptual plans entitled:
- "UNILEVER SITE REDEVELOPMENT BOROUGH OF EDGEWATER BERGEN COUNTY, NEW JERSEY", dated November 23, 2005, last revised December 21, 2005, and prepared by PAULUS, SOKOLOWSKI AND SARTOR, J.J.C.
  - "GENERAL NOTES AND LEGEND" (Sheet C-02);

  - "WATER QUALITY MAINTENANCE AND OPERATION REPORT PREPARED FOR NATIONAL RESOURCES AT UNILEVER RESEARCH SITE 45 RIVER ROAD EDGEWATER, NEW JERSEY", dated March 28, 2006, unreviewed, and prepared by P S & S Engineering.

issued 5/8/06  
according to NJEMS

This permit is authorized under, and in compliance with the Rules on Coastal Zone Management, N.J.A.C. 7:7b 1.1 et seq.

By issuance of this permit, the State of New Jersey does not relinquish titlelands ownership or claim to any portion of the subject property or adjacent properties.

SRP-VI 00014275

<p>The permittee shall allow an authorized Program representative the right to inspect the construction pursuant to N.J.A.C. 7:27-1.5(b)4.</p>	
<p>Prepared By: _____          Justin C. Tamegro</p> <p>(See page 5 for Manager's signature.)</p>	
<p>Approved by the Department of Environmental Protection</p>	
<p>Name (Print or Type) _____</p>	<p>Title _____</p>
<p>Signature _____</p>	<p>Title _____</p>

This permit is issued subject to and provided that the following conditions can be met to the satisfaction of the Division of Land Use Regulation. All Administrative Conditions must be met prior to construction unless otherwise specified. The issuance of this permit does not relinquish any Tidelands claims, if any. All Physical Conditions are subject to on-site compliance inspection. Please notify the Bureau of Enforcement, (401 East State Street, P.O. Box 422, Trenton, New Jersey 08625), in writing at least 10 days prior to commencement of construction of site preparation.

**I. Administrative and Physical Conditions:**

- The applicant must construct the "interim" and "permanent" Hudson River Waterfront Walkway concurrent with the construction of the project as illustrated on the approved plan: "UNILEVER SITE REDEVELOPMENT BOROUGH OF EDgewater BERGEN COUNTY, NEW JERSEY SITE PLAN", dated November 23, 2005, last revised April 11, 2006, and prepared by PAULUS, SOKOLOWSKI AND SARTOR, I.L.L.C.. Prior to commencement of construction, the permittee must submit walkway design plans for review and written approval that conform with the Hudson Waterfront Walkway Plan and Design guidelines (1984) and Hudson River Waterfront Design Standards (1989). In addition, prior to commencing any activities authorized by this permit, the permittee shall execute and deliver a Deed of Conservation Easement in recordable form that clearly delineates the proposed permanent and interim public waterfront walkway, and the 20 ft. wide perpendicular access to the Hudson Walkway. This area should be noted as public access facilities open to the general public or a 24 hour bus, to be maintained and managed by the permittee (or its assigns) in perpetuity. Said Easement shall provide that the "interim" waterfront walkway requirement shall remain in effect until a Waterfront Development Permit is issued for Phase II of Block 99 and Lots 1 & 5. At that time, the obligation to construct and maintain the Waterfront Walkway shall pass to those aforementioned lots, and permittee, or its successor in title, may unilaterally record a discharge of the portion of the Easement relative to the "interim" waterfront access. Said discharge shall not affect the parcel designated as "permanent" waterfront walkway as illustrated on the approved plan mentioned above.
- Pursuant to the N.J.A.C. 7:27-5A.9, the permittee must provide 10% of vegetative cover for the proposed activity. Under this Waterfront Development Permit, the permittee is providing 2.9% (0.67 acres) of vegetative cover under Phase I. In future development under Phase II, on the same block and lots, the permittee must provide a minimum of 7.1% (1.64 acres) of vegetative cover.
- Pursuant to the NJDEP's Bureau of Water Systems and Well Permitting, any water mains over 12 inches in diameter and 1,500 ft. in length will require an Individual Water Main Extension Permit, as does anything not allowed by the Master Permit issued to United Water. The Bureau of Water Systems and Well Permitting can be contacted at (609) 292-2957.
- This Waterfront Development Permit does not authorize any activities under the Mean High Water Line.

**II. General Conditions:**

5. This permit is revocable, or subject to modification or change at any time, pursuant to the applicable regulations, when in the judgement of the Department of Environmental Protection of the State of New Jersey such revocation, modification or change shall be necessary.
6. The issuance of the permit shall not be deemed to affect in any way action by the Department of Environmental Protection of the State of New Jersey on any future application.
7. The works, facilities, and/or activities shown by plans and/or other engineering data, which are this day approved, subject to the conditions herewith established, shall be constructed and/or executed in conformity with such plans and/or engineering data and the said conditions.
8. No change in plans or specifications shall be made except with the prior written permission of the Department of Environmental Protection of the State of New Jersey.
9. The granting of this permit shall not be construed to in any way affect the title or ownership of property, and shall not make the Department of Environmental Protection of the State a party in any suit or question of ownership.
10. This permit does not waive the obtaining of Federal or other State or local government consent when necessary. This permit is not valid and no work shall be undertaken until such time as all other required approvals and permits have been obtained.
11. A copy of this permit shall be kept at the work site, and shall be exhibited upon request of any person.
12. In cases of conflict, the conditions of this permit shall supersede the plans and/or engineering data.
13. **Limit and Extent of Approval:**
  - a. This approval grants permission to the applicant and/or its agents to undertake an activity regulated by the State of New Jersey as described by the text of this permit and as detailed by the herein approved plans. Any construction, grading, removal of vegetation, or other activity at this site that affects a regulated area, other than specifically approved by this permit or as detailed by the approved drawings, shall require additional approvals from the Department. The commencement of such regulated activities without the appropriate approvals shall be in violation of State law.
  - b. All activities authorized by this permit shall be completed within five years of the issuance date as listed on the first page of this document. At that time, this approval, if not previously revoked, shall automatically become null and void, and none of the activities referenced herein may commence or continue until a new approval has been granted by the Department.

**13. Method of Construction**

- a. All activities approved by this permit shall be performed under the supervision and direction of a Professional Engineer licensed in the State of New Jersey, and shall be undertaken using the best management practices available. Furthermore, the site shall be subject to inspection at any time by representatives of the Department to ensure the continuous application of the provisions of this permit.
- c. All activities authorized by this permit shall be stabilized in accordance with the *Standards for Soil Erosion and Sediment Control in New Jersey* (obtainable from local Soil Conservation District offices), or equal engineering specifications, to prevent eroded soil and sediment from entering adjacent waterways and wetlands at any time during and subsequent to construction. The Department reserves the right to order the suspension of any activity if unacceptable levels of erosion or turbidity

result from the same.

**14. Responsibilities of Applicant**

- a. The granting of this permit does not in any way relieve the applicant and/or its agents from the responsibility for damages caused by any construction or activities hereby approved, nor does the Department accept responsibility for any structural designs.
  - b. No construction authorized by this permit may begin until the enclosed permit acceptance form has been signed by the applicant and is returned to the Department. By signing and submitting this form, the applicant accepts this permit in its entirety and agrees to adhere to all of its terms and conditions. Please be advised that this permit may be declared null and void should it be determined that adequate measures had not been taken by the applicant and/or its agents to ensure the continuous implementation of these terms and conditions.
  - c. Within ten (10) days of the receipt of this permit by the applicant, this permit shall be recorded in its entirety in the office of the County Clerk or the Registrar of Deeds and Mortgages for each county where this permit is located. Verified notice of this action shall be forwarded to the Department immediately thereafter.
15. The permittee shall allow the Program the right to inspect the construction site and also shall provide the Bureau of Coastal and Land Use Enforcement, NJDEP with written notification 7 days prior to the start of the authorized work.
16. This authorization is valid for five years from the date of this letter unless more stringent standards are adopted by rule prior to this date.

**WATERFRONT DEVELOPMENT ENVIRONMENTAL REPORT**

**Applicant:** National RJ/Sources  
**Project/Location:** Unilever Site Redevelopment, Phase I - 45 River Road  
**File No.:** 0213-06-0001.1; WFD 060001 (Upland)

The Rules on Coastal Zone Management (N.J.S.A. 13:19-1 *et seq.*) require that a permit be obtained from the Department for the construction of certain facilities, including the construction of a public facility between the mean high water line of any tidal waters and a point 500 feet landward of the mean high water line.

The applicant, National RJ/Sources, proposes Phase I of the redevelopment project, which involves the expansion of an existing police station, the conversion of two existing, vacant laboratory buildings into residential lofts, 835 linear feet of rip-rap bank stabilization, the construction of a new stormwater system, approximately 1,150 linear feet of a new permanent waterfront walkway, and its amenities. In addition, approximately 750 linear feet of an "interim" waterfront walkway for the Phase II portion of the site will be constructed.

The proposed project is shown on site plans entitled:

1. "UNILEVER SITE REDEVELOPMENT BOROUGH OF EDGEWATER BERGEN COUNTY, NEW JERSEY", dated November 23, 2005, last revised December 21, 2005, and prepared by PAULUS, SOKOLOWSKI AND SARTOR, I.L.C.
  - a. "GENERAL NOTES AND LEGEND" (Sheet C-02);
  - b. "CONSTRUCTION PHASING PLAN" (Sheet C-03);
  - c. "DEMOLITION PLAN" (Sheet C-04);
  - d. "GRADING AND UTILITY PLAN" (Sheet C-06);
  - e. "LANDSCAPING AND LIGHTING PLAN" (Sheet C-07);
  - f. "SOIL EROSION & SEDIMENT CONTROL PLAN" (Sheet C-08);
  - g. "WATERFRONT WALKWAY DETAILS" (Sheet C-09);
  - h. "SITE DETAILS" (Sheets C-10 and C-11);
  - i. "UTILITY DETAILS" (Sheet C-12) and;
  - j. "SCS NOTES & DETAILS" (Sheet C-13).
2. "UNILEVER SITE REDEVELOPMENT BOROUGH OF EDGEWATER BERGEN COUNTY, NEW JERSEY SITE PLAN", dated November 23, 2005, last revised April 11, 2006, and prepared by PAULUS, SOKOLOWSKI AND SARTOR, I.L.C.
3. "WATER QUALITY MAINTENANCE AND OPERATION REPORT PREPARED FOR NATIONAL RESOURCES AT UNILEVER RESEARCH SITE 45 RIVER ROAD EDGEWATER, NEW JERSEY", dated March 28, 2006, unrevised, and prepared by P S & S Engineering.

**Administrative History:**

- According to the NIDEP Tidelands Map no. 714-2184, Lot 1, Block 99 is not affected by any tidelands claims being that it is inland of the Hudson River and no former tributaries appear to affect it. In addition, Lot 5, Block 99 appear to be subject to a grant issued to Lever Brothers Company, 11/1/1984, recorded in Liber X-6 p.102. A more detailed NJGIN State Aerial Imagery 2002 is included in the file.
- A Remedial Investigation Report and Remedial Action Work Plan was submitted to the NIDEP - Site Remediation Program on or around February 1, 2006. The reports are currently under Site Remediation's review. The ISRA Case no. is R20040267.

This permit is conditionally authorized under and in compliance with the Rules on Coastal Zone Management for Intertidal and Subtidal Shallows (7:7E-3.15), Filled Water's Edge (7:7E-3.23), Wetlands (7:7E-3.27), Wetland Buffers (7:7E-3.28), Historic and Archaeological Resources (7:7E-3.36), Endangered

or Threatened Wildlife or Vegetation Species Habitats (7:7E-3.38), Special Hazard Areas (7:7E-3.41), Hudson River Waterfront Area (7:7E-3.48), Outfalls and Intakes (7:7E-4.17), Impervious Cover Requirements that apply to Sites in the Upland Waterfront Development and CAFRA Areas (7:7E-5.3), Vegetative Cover Requirements that apply to Sites in the Upland Waterfront Development and CAFRA Areas (7:7E-5.4), Impervious Cover Limits for a Site in the Upland Waterfront Development Area (7:7E-5A.9), Vegetative Cover Percentages for a Site in the Upland Waterfront Development Area (7:7E-5A.10), Secondary Impacts (7:7E-6.3), Housing Codes (7:7E-7.2), Transportation Use Rule (7:7E-7.5), Coastal Engineering (7:7E-7.11), High-Rise Structures (7:7E-7.14), Water Quality (7:7E-8.4), Stormwater Management (7:7E-8.7), Public Access to the Waterfront (7:7E-8.11), Sismic Resources and Design (7:7E-8.12), Buffers and Compatibility of Uses (7:7E-8.13), and Traffic (7:7E-8.14).

The State of New Jersey Coastal Management Program defines substantive policies to guide public decisions concerning significant proposed development and management of resources in New Jersey's Coastal Zone. The analysis of this coastal permit application is based upon the Rules on Coastal Zone Management (RCZM) (N.J.A.C. 7:7E-1.1 et seq.), adopted effective September, 1978, last revised August 19, 1996. This analysis will refer to applicable policies by administrative code section.

**Intertidal and Subtidal Shallows (7:7E-3.15):**

*Intertidal and subtidal shallows means all permanently or temporarily submerged areas from the spring high water line to a depth of four feet below mean low water. Mitigation shall be required for the destruction of intertidal and subtidal shallows at a ratio of 1:1 through the creation of intertidal and subtidal shallows on the site of the destruction. For the purposes of this section, creation means excavating upland to establish the characteristics, habitat and functions of an intertidal and subtidal shallows.*

The applicant proposes bank stabilization along approximately 835 linear feet of the existing bulkhead. No disturbance to intertidal and subtidal shallows is being proposed. Stabilization of the bulkhead will all be above the mean high water line.

**Filled Water's Edge (7:7E-3.23):**

*(a) Filled water's edge areas are existing filled areas lying between wetlands or water areas, and either the upland limit of fill, or the first paved public road or railroad landward of the adjacent water area, whichever is closer to the water. Some existing or former dredged material disposal sites and excavation fill areas are filled water's edge.*

*(f) In waterfront areas located outside of the CAFRA zone the water dependent use may be a public walkway, provided the upland walkway right-of-way is at least 30 feet wide, unless there are existing onsite physical constraints which cannot be removed or altered to meet this requirement.*

*(i) On all filled water's edge sites, development must comply with the Public Access to the Waterfront Rule (N.J.A.C. 7:7E-8.11). Public access to the waterfront will not be required at single family or duplex residential lots along the waterfront, which are not part of a larger development.*

Based on the NJDEP Tidelands mapping, the project site is considered to be Filled Water's Edge. To comply with this rule, the applicant proposes the developed land use closest to the water's edge to be a public waterfront walkway. The applicant is providing a 30-foot wide easement with a 16-foot wide permanent and interim walkway along the water's edge of the entire site. Approximately 1,135 linear feet of the permanent waterfront walkway will be constructed in the Phase I portion of the project. In addition, approximately 750 linear feet of an "interim" waterfront walkway will be constructed in the "Phase II" portion of the project. The permanent construction of the Phase II waterfront walkway will take place concurrent with the Phase II construction activities. Public access to the waterfront is provided via perpendicular sidewalks off of River Road. Public access was not compatible with the previous pharmaceutical use of the site, therefore, public access to the waterfront area is essential to this proposed

project. In addition, there are currently no water dependent activities on-site and the applicant is not proposing any water dependent activities.

**Wetlands (7:7E-3.27) and Wetland Buffers (7:7E-3.28):**

*Wetlands or wetland means an area that is inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions, commonly known as hydrophytic vegetation.*

*Wetland buffer or transition area means an area of land adjacent to a wetland which minimizes adverse impacts on the wetlands or serves as an integral component of the wetlands ecosystem.*

A site visit was not conducted due to good photos. There is no evidence of wetlands and/or transition areas on the subject site.

**Historic and Archaeological Resources (7:7F-3.36):**

*Historic and archaeological resources include objects, structures, shipwrecks, buildings, neighborhoods, districts, and man-made or man-modified features of the landscape and seascape, including historic and prehistoric archaeological sites, which either are on or are eligible for inclusion on the New Jersey or National Register of Historic Places. Development that detracts from, encroaches upon, damages, or destroys the value of historic and archaeological resources is discouraged. Development that incorporates historic and archaeological resources in sensitive adaptive reuse is encouraged.*

The National Park Service National register for Historic Places Database, the NJDHP Historic Preservation Office and the National Register of Historic Places Database did not list the subject property as historic places.

**Endangered or Threatened Wildlife or Vegetation Species Habitats (7:7E-3.39):**

*Endangered or threatened wildlife or plant species habitats are areas known to be inhabited on a seasonal or permanent basis by or to be critical at any stage in the life cycle of any wildlife or plant identified as "endangered" or "threatened" species on official Federal or State lists of endangered or threatened species, or under active consideration for State or Federal listing. The definition of endangered or threatened wildlife or plant species habitats include a sufficient buffer area to ensure continued survival of the population of the species.*

*Critical wildlife habitats are specific areas known to serve an essential role in maintaining wildlife, particularly in wintering, breeding, and migrating. Development that would directly or through secondary impacts on the relevant site or in the surrounding region adversely affect critical wildlife habitats is discouraged.*

No suitable habitat is known on this site for documented endangered and threatened species.

**Special Hazard Areas (7:7E-3.41):**

(a) *Special hazard areas include areas with a known actual or potential hazard to public health, safety, and welfare, or to public or private property, such as the navigable air space around airports and seaplan landing areas, potential evacuation zones and areas where hazardous substances as defined in N.J.S.A. 56:10-23.11b-k are used or disposed, including adjacent areas and areas of hazardous material contamination.*

(b) *Coastal development, especially residential and labor intensive economic development, within special hazard areas is discouraged. All development within special hazard areas must include appropriate mitigating measures to protect the public health and safety.*

*(c) Approvals from the Department's Division of Solid and Hazardous Waste shall be obtained prior to the commencement of any hazardous substance investigations or clean up activities at contaminated sites.*

Historic fill and isolated pockets of volatile organic (VO) contaminated soils have been detected at the subject site. VOs that require remediation by the NJDEP Site Remediation Program (SRP) will be addressed through excavation or in place treatment. The NJDEP SRP has allowed the applicant to place a classification exception areas (CEAs), deed restrictions, on the groundwater contaminates. A remediation agreement was submitted to SRP and the applicant is currently working closely with them. Details to the remediation activities will be incorporated in Phase II of the project. A Remedial Investigation Report and Remedial Action Work Plan was submitted to the NJDEP -- Site Remediation Program on or around February 1, 2006. The reports are currently under Site Remediation's review. The ISRA Case no. is E2006-0267.

**Hudson River Waterfront Area (7:7E-3.4B):**

*Hudson River Waterfront Area development shall be consistent with all other applicable Coastal Zone Management rules with particular attention give to N.J.A.C. 7:7E-3.38, Public open space, N.J.A.C. 7:7E-3.39 Special hazards areas, N.J.A.C. 7:7E-3.41 Special urban area, N.J.A.C. 7:7E-7.14 High rise structures, N.J.A.C. 7:7E-8.11 Public Access to the Waterfront, N.J.A.C. 7:7E-8.12 Scenic Resources and Design, and N.J.A.C. 7:7E-8.4 Water Quality.*

Phase I of the project involves renovating two former laboratory buildings to residential lofts. In addition, approximately 1,135 linear feet of permanent waterfront walkway is being proposed. The applicant is also proposing 750 linear feet of "interim" waterfront walkway in the Phase II portion of the site. Public parking will be available on-site. The applicant will be required the deed restrict the entire waterfront walkway (permanent and interim) prior to any regulated activities on-site.

**Outfalls and Intakes (7:7E-4.17):**

*Outfalls and intakes are pipe openings that are located in water areas for the purpose of intake of water or discharge of effluent including sewage, stormwater and industrial effluents. Outfalls and intakes are conditionally acceptable provided that the use associated with the intake or outfall meets applicable Coastal Zone Management rules.*

No new outfalls are being proposed at this time.

**Impervious Cover Requirements that apply to Sites in the Upland Waterfront Development and CAFRA Areas (7:7E-5.3):** See section (7:7E-5A.9) below.

**Vegetative Cover Requirements that apply to Sites in the Upland Waterfront Development and CAFRA Areas (7:7E-5.4):** See section (7:7E-5A.10) below.

**Impervious Cover Limits for a Site in the Upland Waterfront Development Area (7:7E-5A.9):**

*If a site or portion of a site is unforested, as determined under N.J.A.C. 7:7E-5.5, the impervious cover limit is the limit at (b)1, 2 or 3 below, which ever is higher:*

- 1. The acreage of the net land area on the site or portion, as determined under N.J.A.C. 7:7E-5.3(d), multiplied by the impervious cover percentage in Table E below for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7E-5A.8;*
- 2. For a site located in the northern waterfront region or urban area region, as determined under N.J.A.C. 7:7E-5A.2(d), the amount of existing impervious cover located on a site as determined under (c) below; or*

3. *For a site located in a region other than those identified at (b)2 above, the acreage covered by buildings and/or asphalt or concrete pavement legally existing on the site at the time the application is submitted to the Department.*

According to N.J.A.C. 7:7E-5.5, the subject site is considered unforested. Therefore, an unforested site that is located in the urban area region, and with a high development intensity, the allowable impervious coverage is 90%. The total acreage of the site is 49.85 acres, but the total net land area is 23.14 acres. For Phase I and Phase II of the project, the applicant is required to provide 10 % (2.31 acres) of the net land area for impervious cover.

**Vegetative Cover Percentages for a Site in the Upland Waterfront Development Area (7:7E-5A.10):**

- The area (in acres) on a site in the upland waterfront development area in which trees and/or herb/shrub vegetation shall be planted or preserved is calculated as follows:*
10. *To determine the area (in acres) of tree preservation and/or tree planting on the site:*
- i. *Identify the forested and/or unforested portions of the site, as determined under N.J.A.C. 7:7E-5.5;*
  - ii. *If a site or portion of a site identified at (a)11 has more than one development intensity, further divide that site or portion into smaller portions based on their respective development intensities;*
  - iii. *For each forested site or portion identified at (a)11 above, multiply the acreage of the net land area on the site or portion, as determined under N.J.A.C. 7:7E-5.3(a), by the tree preservation and tree planting percentage in Table F for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7E-5A8; and*
  - iv. *For each unforested site or portion identified at (a)11 above, multiply the acreage of the net land area on the site or portion, as determined under N.J.A.C. 7:7E-5.3(d), by the tree planting percentage in Table G below for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7E-5A 8.*

The project site is unforested, is located in the urban area region, and has a high development intensity, therefore, the required tree preservation and/or planting percentage is 10% for Phase I and Phase II of this project (entire site). 10% of the total net land area (23.14 acres) is 2.31 acres. For Phase I, the applicant proposes to provide 2.9 % (0.67 acre) of the required 10% (2.31 acres). 0.10 acre will be herb/shrub vegetation and the remaining 0.57 acre will be tree preservation/planting. The remaining required 7.1% (1.64 acres) will be satisfied under the Phase II portion of the project.

**Secondary Impacts (7:7E-6.3):**

*Secondary impacts are the effects of additional development likely to be constructed as a result of the approval of a particular proposal. Secondary impacts can also include traffic increase, increased recreational demand and any other offsite impacts generated by onsite activities which affect the site and surrounding region.*

This phase of the proposed project will result in further development, but future development will occur on the same lot and block, by the same applicant for the same use. The ultimate goal of the overall project is to redevelop a commercial site to a residential site with retail, a new waterfront walkway and its amenities for the public to enjoy. The previous pharmaceutical use of the site restricted the public of the waterfront usage.

**Housing Use rules (7:7E-7.2):**

*New housing acceptable under this rule shall be consistent with the Public Access to the Waterfront Rule (N.J.A.C. 7:7E-8.11), including provisions of fishing access appropriate.*

*Housing is conditionally acceptable in the filled water's edge, provided that it meets the requirements of the Filled Water's Edge rule (N.J.A.C. 7:7E-3.23) and the Public Access to the Waterfront Rule (N.J.A.C. 7:7E-6.11). The residential development shall comply with the requirements for impervious cover and vegetative cover that apply to the site under N.J.A.C. 7:7E-5 and either N.J.A.C. 5A or 5B, except on bay islands where the requirements of the Bay Island Corridor rule (N.J.A.C. 7:7E-3.21) shall apply.*

The proposed project has been demonstrated to be in compliance with the Filled Waters Edge Rule (7:7E-3.23), Public Access to the Waterfront Rules (7:7E-6.11), and requirements for impervious cover and vegetative cover (7:7E-5).

**Transportation Use Rule (7:7E-7.5):**

*There are standards relevant to roads, standards relevant to public transportation, standards relevant to bicycle and foot paths, and standards relevant to parking facilities set forth in this rule.*

No new roads will be construction under the proposed project. The subject site is located along River Road. A walkway is also being proposed along the water's edge of the subject site.

**Coastal Engineering (7:7E-7.11):**

*Coastal engineering includes a variety of structural and non-structural measures to manage water areas and the shoreline for natural effects of erosion, storms, and sediment and sand movements. Beach nourishment, sand fences, pedestrian control on dunes, stabilization of dunes, dune restoration projects, dredged material disposal and the construction of retaining structures such as bulkheads, gabions, revetments and seawalls are examples of coastal engineering.*

The applicant proposes to stabilize the existing rip-rap shoreline with additional rip-rap. Approximately 835 linear feet of the shoreline will be stabilized with rip-rap above the mean high water line. No filling is being proposed and no intertidal/subtidal shallows will be disturbed.

**High-Rise Structures (7:7E-7.14):**

- (a) *High-rise structures are structures which are more than six stories or more than 60 feet in height as measured from existing preconstruction ground level.*
- (b) *The standards for high rise structures are as follows:*
- High-rise structures are encouraged to locate in an urban area of existing high density, high-rise and/or intense settlements;*
  - High-rise structures within the view of coastal waters shall be separated from coastal waters by at least one public road or an equivalent area (at least 50 feet) physically and visually open to the public, except as provided by N.J.A.C. 7:7E 3.48;*
  - The longest lateral dimension of any high rise structure must be oriented perpendicular to the beach or coastal waters, except for a high rise structure that is located in the Redevelopment Zone of the City of Long Branch and authorized pursuant to the Long Branch Redevelopment Zone Permit at N.J.A.C. 7:7E-7.4.*
  - The proposed structure must not block the view of dunes, beaches, horizons, skylines, rivers, inlets, bays, or oceans that are currently enjoyed by existing residential structures, public roads or pathways, to the maximum extent practicable;*
  - High-rise structures outside of the Hudson River waterfront special area as defined by N.J.A.C. 7:7E 3.48 shall not overshadow the dry sand beach between 10:00 A.M. and 4:00 P.M between June 1 and September 20, and shall not overshadow waterfront parks year round;*
  - The proposed structure must be in character with the surrounding transitional heights and residential densities, or be in character with a municipal comprehensive*

- development scheme requiring an increase in height and density which is consistent with all applicable Coastal Zone Management rules; and*
7. *The proposed structure must not have an adverse impact on air quality, traffic, and existing infrastructure.*
  8. *The proposed structure must be architecturally designed so as to not cause deflation of the beach and dune system or other coastal environmental waterward of the structure.*

Phase I of the redevelopment project proposed no new high rise structures. The two existing buildings are approximately 46 and 44 feet in height, therefore, they are not considered high rise structures. Their height will remain unchanged during the construction process.

**Water Quality (7:7K-8.4) and Stormwater Management (7:7K-8.7):**

*As required by Section 307(f) of the Federal Coastal Zone Management Act (P.L. 92 383), Federal, State and local water quality requirements established under the Clean Water Act (33 U.S.C. 1251) shall be the water resource standards of the coastal management program.*

*Stormwater runoff is the flow of water on the surface of the ground, resulting from precipitation. Standards relevant to stormwater management system design are set forth in this rule.*

According to the Program's engineer, there is not reduction of impervious area, however in the existing impervious area, the project will include 0.35 acre of new impervious area requiring compliance with stormwater management quality standards. The site is in Brownfields area and therefore, the applicant is proposing Storm Filter and Vortices Units, pre-manufactured treatment devices for 0.38 acres designed as per approved standards. This will be connected to the existing pipeline discharging to the Hudson River.

As the site is in Brownfields site and adjacent to the Hudson River, the quantity reduction and recharge will not apply. Low Impact Development checklist has been submitted. The engineer has submitted stormwater maintenance plan for this project. Since the water quality treatment is addressed, there are no other engineering concerns.

**Public Access to the Waterfront (7:7K-8.11):**

*Public access to the waterfront is the ability of all members of the community at large to pass physically and visually to, from and along the ocean shore and other waterfronts.*

*Coastal development adjacent to all coastal waters, including both natural and developed waterfront areas, shall provide permanent perpendicular and linear access to the waterfront to the maximum extent practicable, including both visual and physical access. Development that limits public access and the diversity of the waterfront experiences is discouraged.*

Under Phase I, approximately 1,135 linear feet of permanent waterfront walkway is being proposed. The project will provide full access to the waterfront. In addition, there will be perpendicular access from River Road to the waterfront via a network of outdoor sidewalks. In addition, approximately 750 linear feet of "interim" waterfront walkway is being proposed for the water's edge along the Phase II portion. Parking for patrons of the walkway will be available on-site. The applicant will be required to deed restrict the entire walkway (permanent and interim) prior to any regulated activities on-site.

**Scenic Resources and Design (7:7K-8.12):**

*Scenic resources include the views of the natural and/or built landscape. Large scale elements of building and site design are defined as the elements that compose the developed landscape such as size, geometry, massing, height and bulk structures.*

*New coastal development that is visually compatible with its surroundings in terms of building and site design, and enhances scenic resources is encouraged. New coastal development that is not*

*visually compatible with existing scenic resources in terms of large scale elements of building and site design is discouraged.*

The Phase I redevelopment will involve the restoration of an area that has historically been unavailable to the public due to its pharmaceutical research and development use. The proposed project will be open to the public through a waterfront walkway with amenities and parking.

**Buffers and Compatibility of Uses (7:7E-8.13):**

*Buffers are natural or manmade areas, structures, or objects that serve to separate distinct uses or areas. Compatibility of uses is the ability for uses to exist together without aesthetic or functional conflicts.*

As mentioned above, the site was previously for research and development use, therefore prohibiting the public to enjoy the waterfront area. Currently the property to the south is vacant and the property to the north is a pier. Several parcels to the north of the subject site is more developed with a movie theater and other developments.

**Traffic (7:7E-8.14):**

*Traffic is the movement of vehicles, pedestrians or ships along a route. Coastal development shall be designed, located and operated in a manner to cause the least possible disturbance to traffic systems.*

Approximately 230 stalls will be available for residential parking, 73 for the police station, and 14 will for the public. The proposed residential buildings will include new parking areas for the anticipated increase in traffic.

## **ENGINEERING REPORT**

**File No. 0213-06-0001.1 (WFD)**

**Project: Unilever site Redevelopment**

**Stream: Hudson River**

The applicant has applied for the Water Front Development permit for the Phase 1 construction of the Edgewater Borough Municipal Building/Police Station and associated 73 space parking lot along with the conversion of the two (2) existing building for use as Lofts with parking areas and walkways and this file is sent to us requesting comments on the Stormwater Management proposed.

Out of 49.85 acres, upland area of 23.85 acres is usable. Phase 1, in addition to the above work will also include 835' of riprap for shore protection. Although there is net reduction of impervious area, in the existing impervious area, the project will include 0.35 acre of new impervious area requiring compliance with stormwater management quality standards. The site is in Brownfields area and therefore, the applicant is proposing Storm Filter and Vortechinics Units, pre-manufactured treatment devices for 0.38 acres designed as per approved standards. This will be connected to the existing pipeline discharging to the Hudson River.

As the site is in Brownfields site and adjacent to the Hudson River, the quantity reduction and recharge will not apply.

Low Impact Development checklist has been submitted.

The engineer has submitted stormwater maintenance plan for this project.

Since the water quality treatment is addressed, there are no other engineering concerns.

**Recommendation: Approval**

Following drawings prepared by Paulus, Sokolowski and Sartor, LLC, dated November 23, 2005, last revised December 21, 2005, may be included along with other WFD drawings.

- 1) Construction Phasing Plan, sheet no. C-03,
- 2) Demolition Plan, sheet no. C-04,
- 3) Site Plan, sheet no. C 05,
- 4) Grading and Utility Plan, sheet no. C-06,
- 5) Site Details, sheet no. C-10, & C-11 and
- 6) Utility Details sheet no. C-12.

Await separate Maintenance plan on 3/28/06

In addition to the above, "WATER QUALITY MAINTENANCE AND OPERATION REPORT PREPARED FOR NATIONAL RESOURCES AT UNILEVER RESEARCH SITE 45 RIVER ROAD EDGEWATER, NEW JERSEY", prepared by P S & S Engineering, dated March 28, 2006, unrevised, may be approved.

Prepared by: PS&S

NJDOP File No.: 0213-06-0001.2 WFD 070001

GRANT OF CONSERVATION RESTRICTION / EASEMENT  
(Public Access To The Waterfront)

This Grant of Conservation Restriction is made this 12th day of February 2014 by iPark Edgewater LLC, whose address is 485 W. Putnam Avenue, Greenwich, Connecticut 06830, hereinafter referred to as "Grantor", in favor of the State of New Jersey, Department of Environmental Protection, hereinafter referred to as the "Grantee".

WITNESSETH:

WHEREAS, the Grantor is the owner in fee simple of certain real property located in the Borough of Edgewater, County of Bergen, New Jersey designated as Lot(s) 1,3,4 and 5, Block 99 on the official Tax Map of the Borough of Edgewater County (hereinafter "the Property"); and

WHEREAS, the Grantee has issued to Grantor Permit #0213-06-0001.2 WFD 070001 (the "Permit"), attached hereto as Exhibit D made a part hereof, which permits certain construction described therein, and requires among other conditions public access to the waterfront, pursuant to the Waterfront Development Law, N.J.S.A. 12:5; and

WHEREAS, by virtue of the Property's location directly on the Hudson River the waterfront area of the Property possesses great scenic, aesthetic and recreational qualities for the public enjoyment; and

WHEREAS, as a condition to the Permit, Grantor must provide for public access over a portion of the Property including its water's edge, by creating and maintaining in perpetuity a walkway as well as parking spaces reserved for use by the public (collectively "Easement Areas"), as more specifically shown on the site plan prepared by Paulus, Sokolowski and Sartor LLC, and dated July 7, 2011 attached hereto Exhibit A and made a part hereof, along with the legal description of the Waterfront Walkway Easement and Waterfront Access Easement prepared by Paulus, Sokolowski and Sartor LLC and dated January 27, 2014 and attached hereto as Exhibit B and made a part hereof; and

WHEREAS, the Grantee is authorized by N.J.S.A. 13:11-9 to formulate comprehensive policies for the conservation of natural resources, to promote environmental protection, and prevent pollution of the environment of the State, and is authorized by N.J.S.A. 13:8B-3 to acquire and enforce conservation restrictions; and

WHEREAS, the Grantor, having the authority to do so, intends to enter into this Grant of Conservation Restriction/Easement in order to grant to the Grantee the conservation restriction / easement on the Easement Area for passive recreational use by the public (the "Conservation Restriction/Easement").

Attn: Dan Ponnessi

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

**NOW THEREFORE**, in consideration for the issuance of the Permit and for the valuable consideration the receipt and sufficiency of which is hereby acknowledged, and the facts recited above and the terms, conditions and restrictions contained herein, the Grantor hereby agrees that the Property shall be subject in perpetuity to the following conveyances, covenants and restrictions in favor of the Grantee:

1. Grantor hereby conveys transfers, assigns and grants to the Grantee a Conservation Restriction/Easement with respect to that portion of the Property as shown in Exhibit A and as described in Exhibit B.
2. The parties agree that the Conservation Restriction / Easement shall be in full force and effect as to the entire Easement Areas as shown in Exhibit A and described in Exhibit B, including those areas upon which the public parking spaces and the walkway(s) have not yet been constructed as of the date of this Conservation Restriction / Easement, and will be accessible to the public at all times in perpetuity.
3. Nothing contained in this Conservation Restriction / Easement shall be deemed or construed to give or grant to the Grantee, the public, or anyone else, any rights to use any portion of the Property other than the Easement Areas.
4. Grantor, its successors and assigns, shall maintain the Easement Areas pursuant to the Maintenance Plan, attached hereto as Exhibit C made a part hereof.
5. The Easement Areas shall be available for public passive recreational purposes. Recreational uses shall not include any activity that violates federal, state, county or municipal law. No construction shall be permitted within the Easement Areas, other than the walkway and parking spaces reserved for use by the public consistent with the Permit. Grantor shall have the right to access the easement land in order to comply with any New Jersey Department of Environmental Protection remediation, operation and maintenance, or alterations as may be required. Grantor shall also retain right to conduct temporary closing of easement land to public access during construction activities.
6. The Easement Areas shall be available for waterfront public access purposes, being those passive recreational activities including, but not limited to, jogging, bicycling, walking, viewing, fishing and other similar passive recreational activities consistent with and compatible with public enjoyment of the Easement Areas preserved by the Conservation Restriction / Easement herein granted.
7. In no event shall the Grantor charge a fee for access to or use of any portion of the Easement Areas, including for use of parking spaces reserved by the Conservation Restriction / Easement herein granted.
8. In no event shall Grantor erect, place or maintain any gate or any obstruction whatsoever across any portion of the Easement Areas that blocks impedes physical access to the

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

Easement Areas by the public at any time except as expressly permitted herein or as may be required by applicable governmental authorities.

9. The Grantor shall not construct, install or maintain any structure, building or other improvement within the Easement Areas, except those appearing on plans and specifications approved by the Grantee in writing pursuant to the Permit. Grantor shall have the right to access the easement land in order to comply with any New Jersey Department of Environmental Protection remediation, operation and maintenance, or alterations as may be required. Grantor shall also retain right to conduct temporary closing of easement land to public access during construction activities.
10. The boundaries of the Easement Area shall be marked as noted on the approved site plan (Exhibit A), within 30 days of receipt of No Further Action determination from Grantor, for area subject to site remediation requirements. Examples include the edge of a walkway, curbing, fence post, pipe in the ground, survey markers, or a shrub or tree line.
11. Grantor's liability with respect to the Easement Area is subject to the limitations contained in N.J.S.A. 2A:42A-8 and 2A:42A-8.1 (Landowner Liability Act).
12. Any activity on or use of the Easement Areas by Grantor that is inconsistent with the Public Trust Doctrine, the purposes of this Conservation Restriction / Easement, or not in conformance with the final plans and specifications approved by the Grantee in writing pursuant to the Permit cited herein or any other permit subsequently issued by the Grantee regulating the Property shall be prohibited.
13. In the event of a conflict between this Conservation Restriction / Easement and the final plans and specifications approved by the Grantee in writing pursuant to the Permit, the latter shall govern.
14. This Conservation Restriction / Easement shall be a burden upon and shall run with the Property, and shall bind Grantor, its successors and/or assigns as their interest may appear, in perpetuity.
15. Grantor shall provide the Grantee telephonic and written notice of any transfer or change in ownership of any portion of the Easement Areas, including but not limited to the name and address of the new owner, and including but not limited to any later-formed condominium or home-owner association.
16. In addition to, and not in limitation of, any other rights of the Grantee hereunder or at law or in equity, if the Grantee determines that a breach, default or violation ("Violation") of this Conservation Restriction / Easement has occurred or that a Violation is threatened, the Grantee shall give written notice to Grantor of such Violation, setting forth the specifics thereof, and demand corrective action sufficient to cure the Violation. If the Grantor fails to cure the Violation within a reasonable time after receipt of notice thereof from the Grantee, or under circumstances where the Violation cannot reasonably be cured within a time period dictated by the Grantee, fails to begin curing such Violation within the time period dictated

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

by the Grantee, or fails to continue diligently to cure such Violation until finally cured, the Grantee may bring an action at law or in equity in a court of competent jurisdiction:

- (a) to enjoin and/or cure such Violation,
- (b) to enter upon the Easement Areas and to take action to terminate and/or cure such Violation and or to cause the restoration of that portion of the Easement Areas affected by such Violation to the condition that existed prior thereto, or
- (c) to seek or enforce such other legal and/or equitable relief or remedies as the Grantee deems necessary or desirable to ensure compliance with the terms, conditions, covenants, obligations and purpose of this Conservation Restriction / Easement.

17. If the Grantee, in its reasonable discretion, determines that urgent circumstances require immediate action to prevent or mitigate significant, material, and irreparable damage to the Easement Areas, the Grantee may pursue its remedies under paragraph 16 above without waiting for the period provided for cure to expire and with at least verbal notice to the Grantor of such event. The Grantee's rights under this paragraph shall apply equally in the event of either actual or threatened Violations of the terms of this Conservation Restriction / Easement. Grantor agrees that the Grantee's remedies at law for any Violation of the terms of this Conservation Restriction / Easement are inadequate and that the Grantee shall be entitled to the injunctive relief described in this paragraph, both prohibitive and mandatory, in addition to such other relief which the Grantee may be entitled, including specific performance. The above language shall in no event be interpreted to derogate or diminish the Grantee's rights and powers under the laws of the State of New Jersey for the protection of public health, safety and welfare. In addition, the foregoing shall not apply in event or events of force majeure.
18. Enforcement of the terms of this Conservation Restriction / Easement shall be at the discretion of the Grantee and any forbearance by the Grantee to exercise its rights under this Conservation Restriction / Easement in the event of any Violation by Grantor shall not be deemed or construed to be a waiver by the Grantee of such term or of any subsequent Violation or of any of the Grantee's rights under this Conservation Restriction / Easement. No delay or omission by the Grantee in the exercise of any right or remedy upon any Violation by Grantor shall impair such right or remedy or be construed as a waiver of such right or remedy.
19. Grantor agrees to reimburse the Grantee for any reasonable, actual costs incurred by the Grantee in enforcing the terms of this Conservation Restriction / Easement against Grantor in the event of an uncured default, and including, without limitation, the reasonable costs of suit and attorneys' fees.
20. The Grantee reserves the right to transfer, assign, or otherwise convey the Conservation Restriction / Easement to governmental entity to assume the benefits and obligations of the Grantee hereunder, subject to advance written notice thereof to the Grantor.

**GRANT OF CONSERVATION RESTRICTION / EASEMENT**

21. Any notice, demand, request, consent, approval or communication under this Conservation Restriction / Easement shall be sent by certified mail, return receipt requested or reliable overnight courier, addressed as follows:

To the Grantor:  
Lark Ridgewater LLC  
485 W. Putnam Ave.  
Greenwich, CT 06830  
Attention: Joseph Cotter  
(203) 661-0055

To the Grantee:

State of New Jersey  
Department of Environment Protection  
Division of Land Use Regulation  
And its successors and assigns  
As of the date of this Conservation Restriction / Easement, Grantee's address for purposes of notice is:  
501 East State Street  
P.O. Box 439  
Trenton, NJ 08625-0439  
Attention: Director, Division of Land Use Regulation  
(609) 984-3444

In addition, any notice relating to paragraph 15 shall be addressed as follows:

To the Department:

State of New Jersey  
Department of Environmental Protection  
Coastal & Land Use Compliance & Enforcement  
And its successors and assigns  
As of the date of this Conservation Restriction / Easement, Grantee's address for purposes of notice relating to paragraph 15 is:  
401 East State Street  
P.O. Box. 422  
Trenton, NJ 08625-0422  
Attention: Manager, Coastal & Land Use Compliance & Enforcement  
(609) 984-4581

22. A party may change the address or person to whom notices to it are required to be given by notice given in the manner above provided.

23. Taxes, Insurance.

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

- a. Grantor retains all responsibilities and shall bear all costs and liabilities of any kind related to the ownership, operation, upkeep and maintenance of the Basement Areas. Grantor shall keep the Basement Areas free of any liens arising out of any work performed for, materials furnished to, or obligations incurred by Grantor.
- b. The Grantor agrees to pay any real estate taxes or other assessments levied on the Basement Areas. If the Grantor becomes delinquent in payment of said taxes or assessments, such that a lien against the land is created, the Grantee, at its option, shall, after written notice to the Grantor, have the right to purchase and acquire the Grantor's interest in said Basement Areas, or to take such other actions as may be necessary to protect the Grantee's interest in the Basement Areas and to assure the continued enforceability of this Conservation Restriction / Easement.

### 24. Miscellaneous.

- a. The laws of the State of New Jersey shall govern the interpretation and performance of this Conservation Restriction / Easement.
- b. If any provision of this Conservation Restriction / Easement or the application thereof to any person or circumstance is found to be invalid, the remainder of the provisions of this Conservation Restriction / Easement, or the application of such provision to persons or circumstances other than those as to which it is found to be invalid, as the case may be, shall not be affected thereby.
- c. This Conservation Restriction / Easement and the Permit set forth the entire agreement of the parties with respect to the Conservation Restriction / Easement and supersede all prior discussions, negotiations, understandings or agreements relating to the easement, all of which are merged herein. No alteration or variation of this Conservation Restriction / Easement shall be valid or binding unless contained in writing executed by the parties hereto.
- d. Should there be more than one Grantor, the obligations imposed by this Conservation Restriction / Easement upon each Grantor shall be joint and several.
- e. The covenants, terms, conditions and restrictions of this Conservation Restriction / Easement shall be binding upon and inure to the benefit of, the parties hereto and all parties having or acquiring any right, title or interest in any portion of the Property, including holders of subdivision deeds, and shall continue as a servitude running in perpetuity with the Property.
- f. The captions in this Conservation Restriction / Easement have been inserted solely for convenience of reference and are not a part of this Conservation Restriction / Easement and shall have no effect upon construction or interpretation.

## GRANT OF CONSERVATION RESTRICTION / EASEMENT

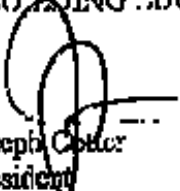

- g. Execution of this Conservation Restriction / Easement does not constitute a waiver of the rights or ownership interest of the State of New Jersey in public property or under the Public Trust Doctrine.
25. The Grantor reserves unto itself the right to undertake de minimis modifications of the Easement Area that are approved by the Grantee. The Grantee may approve the modification under the following conditions and with the following documentation:
- a. The modification results in an increased level of protection of the regulated resource; or
  - b. The modification results in equivalent areas of resources protected; and
  - c. The modification does not compromise the original protected resource.
26. If the Grantee approves the Grantor's proposed modification, the Grantor shall amend this instrument by preparing and submitting to the Grantee for review and approval:
- a. A revised Plan and Metes and Bounds description for the area to be preserved under the modified Conservation Restriction / Easement (hereinafter the "Modification Documents"); and
  - b. An Amended Conservation Restriction / Easement that reflects the modifications to this original Conservation Restriction / Easement, the justification for the modification and that also includes the deed book and page of the title deed for the property or properties subject to the modified Conservation Restriction / Easement set forth in the Modification Documents.
27. The Grantor shall record the documents listed in paragraph 26, above, in the same manner and place as this original Conservation Restriction / Easement was recorded.
28. This Grant of Conservation Restriction / Easement may only be removed pursuant to N.J.S.A. 13:8B-1 et seq.

**GRANT OF CONSERVATION RESTRICTION / EASEMENT**

**TO HAVE AND TO HOLD** unto the State of New Jersey Department of Environmental Protection its successors and assigns forever. The covenants, terms, conditions restrictions and purposes imposed with this Conservation Restriction / Easement shall not only be binding upon the Grantor but also its agent, personal representatives, assigns and all other successors to it in interest and shall continue as a servitude running in perpetuity with the Property.

**IN WITNESS WHEREOF** the Grantor has set its hand and seal on the day and year first above written and directs that this instrument be recorded in the office of the Bergen County Clerk.

GRANT OF CONSERVATION RESTRICTION / EASEMENT

EXHIBIT C  
MAINTENANCE PLAN

1. Grantor agrees to maintain the Easement Areas at Grantor's expense.
2. Parking spaces reserved for the public cannot be removed without prior written approval by the Department.
3. Maintenance includes:
  - (a) removal of snow, ice, leaves, litter, debris, graffiti, and unauthorized signage from the Easement Areas,
  - (b) regular emptying of trash receptacles,
  - (c) maintaining the surface of the Easement Areas and the area underneath in good repair, reconstruction of any portion of the Easement Areas that may be necessary due to deterioration or destruction of the Easement Areas due to any cause including but not limited to wear and tear, fire, storm, subsidence or flood,
  - (d) maintenance and regular cleaning of drainage basins, grates or any other structure that may be designed to receive surface water runoff from the Easement Areas, maintenance of any lighting fixtures, trash receptacles and benches appearing on the final plans approved by the Department in writing pursuant to Permit No. [INSERT NUMBER] or any permit subsequently issued by the Department regulating the Property, and any other action consistent with these obligations which is necessary to effectuate permanent and convenient public access to the Easement Areas.

RE: Waterfront Development Permit, Flood Hazard Area Verification, and Flood Hazard Area Individual Permit  
DLUR File No: 0213-06-0001.2-WFD 070001 (Upland), FHA 080001 & 080002 (respectively)  
Applicant: National KB/Sources  
Project Name: Unifree Site Redevelopment Phase II  
Block 99; Lot 1, 3 thru 5  
Location: Borough of Edgewater, Bergen County

Dear Ms. McLoughlin:

The Division of Land Use Regulation, acting under the provisions of the New Jersey Coastal Zone Management Rules (N.J.A.C. 7:7B-1.1 et seq.), and the Flood Hazard Area Control Act Rules (N.J.A.C. 7:13-1.1 et seq.), has decided to conditionally approve your applications for a Waterfront Development Permit, Flood Hazard Area Individual Permit, and Flood Hazard Area Verification.

The proposed project under Phase II of the redevelopment involves the construction of ten (10) mixed-use buildings (8 high-rise structures), parking garages, parking lot areas, the renovation of an existing building, 750 linear feet of Hudson River Waterfront Walkway, a 18-foot wide perpendicular access to the waterfront walkway, 700 linear feet of rip stabilization, three (3) stormwater control structures, and related stormwater facilities/structures, as described in the attached permit.

Please review this approval and note any conditions which may have been imposed and promptly return the attached acceptance form to the Division at the above address. In order to promote inter-governmental cooperation in the management of our natural resources, a copy of this decision shall be shared with appropriate local and federal agencies.

If you or anyone else is aggrieved by this permit decision, an administrative hearing may be requested by writing to the following address: Office of Legal Affairs, Department of Environmental Protection, P. O. Box 402, Trenton, NJ 08625-0402, Attention: Adjudicatory Hearing Request. Your hearing request must include a copy of an Administrative Hearing Request checklist and all information identified in Section III of that list. Pursuant to N.J.A.C. 7:7A-5.1, your request for an administrative hearing must be received by the department within 30 days of publication of notice of the permit decision in the DEP Bulletin.

If you should have any questions on this decision or letter, please contact Jessica Terragno in writing at NJDEP, Division of Land Use Regulation, P.O. Box 439, Trenton, NJ 08625, or by calling (609) 777-0454. Please include the Division's file no. in all future correspondence.

Sincerely,

Paulus Sokolowski & Sartor

**STANDARD CONDITIONS:**

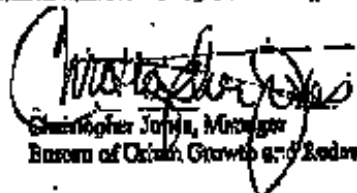

1. **Extent of approval:** This document grants permission to perform certain activities that are regulated by the State of New Jersey. The approved work is described by the text of this permit and is further detailed by the approved drawings listed below. All work must conform to the requirements, conditions and limitations of this permit and all approved drawings. You must keep a copy of this permit and all approved drawings readily available for inspection at the work site. Approved work may be altered only with the prior written approval of the Division. If you alter the project without prior approval, or expand work beyond the description of this permit, you may be in violation of State law and may be subject to fines and penalties.
2. **Acceptance of permit:** If you begin any activity approved by this permit, you hereby accept this document in its entirety and agree to adhere to all terms and conditions. If you do not accept or agree with this document in its entirety, do not begin construction. You are entitled to request an appeal within a limited time as detailed on the attached *Administrative Hearing Request Checklist and Tracking Form*. You may also contact the project manager shown on the first page if you have any questions or concerns about this document.
3. **Recording with County Clerk:** You must record this permit in the Office of the County Clerk for each county involved in this project. You must also mail or fax a copy of the first page of this permit to the Division showing the recorded stamp from each County Clerk within 30 days of the issuance date (or 90 days if multiple counties are involved). The Division's address and fax number are shown on the first page of this permit.
4. **Notice of Construction:** You must notify the Division in writing at least 7 days before you begin any work approved by this permit. The Division's address and fax number are shown on the first page of this permit. Please direct your letter to the project manager shown on the first page.
5. **Expiration date:** All activities authorized by this permit must be completed by the expiration date shown on the first page. At that time, this permit will automatically become invalid and none of the approved work may begin or continue until a replacement permit is granted. (Some special permits may qualify for an extension of the expiration date. Please contact the Division for further information.)
6. **Rights of the State:** This permit is revocable and subject to modification by the State with due cause. The State may inspect the work site and may suspend construction if work does not comply with this permit. This permit does not grant property rights. The issuance of this permit shall not affect any action by the State on future applications, nor affect the title or ownership of property, nor make the State a party in any suit or question of ownership.
7. **Other responsibilities:** You must obtain all necessary local, Federal and other State approvals before you begin work. All work must be stabilized in accordance with the *Standards for Soil Erosion and Sediment Control in New Jersey*, and all fill material must be free of toxic pollutants in toxic amounts as defined in section 307 of the Federal Act.

**SPECIAL CONDITIONS IN ADDITION TO THE STANDARD CONDITIONS:**

8. The permittee must create not approximately 750 linear feet of the Hudson River Watershed Walkway consistent with the construction of the project. In addition, prior to commencing any activities authorized by this permit, the permittee shall execute and deliver a *Deed of Conservation Easement* in recordable form that clearly delineates the proposed public watershed walkway, and perpendicular access approved as part of this permit. This area should be noted as public access facilities open to the general public on a 24-hour basis, to be maintained and managed by the permittee (or its assigns) in perpetuity. The deed restriction shall include the entire proposed public access walkway plot approved herein. In addition, a public access walkway connecting to the adjacent neighbors shall be included, such that when public access becomes available at

Construction, the access can be easily constructed. This area shall also be addressed in the deed restriction for current and all future owners of the subject property. The restriction shall be recorded on the deed, and recorded in the office of the County Clerk (the REGISTRAR OF DEEDS AND MORTGAGES), in the county wherein the lands included in the waiver are located. The restriction shall run with the land and be binding upon all successive owners. All individual lot surveys shall show the approved proposed public access walkway boundaries. Any regulated activities undertaken on the site before a copy of the recorded restriction is submitted to the Division will be considered in violation of the Waterfront Development Law. The conservation restriction shall also include a requirement to maintain overhead, trash receptacles, benches, lightings, and railings along the entire waterfront walkway and signage to be maintained in perpetuity. The permittee shall submit a revised plan illustrating the notes and bounds description of the site's proposed public access area.

9. In order to protect anadromous fish species during their migratory run, any activities that may introduce sediments or which could cause an increase in the natural level of turbidity into the Hudson River are prohibited between April 1 and June 30 of each year. The Division reserves the right to suspend all regulated activities on site should it be determined that the applicant has not taken proper precautions to ensure continuous compliance with this condition.
10. All excavated material shall be disposed in a lawful manner and outside any regulated flood plain, open water, freshwater wetlands or adjacent transition areas, and in such a way as to not interfere with the positive drainage of the receiving area.
11. The decision to grant the stream encroachment permit did not include a structural review of the proposed activities with regard to the International Building Code; nor did it include a comprehensive review of any local flood ordinances which may apply. As such, the proposed structures may not fully comply with the provisions of the International Building Code or meet the requirements of the appropriate local flood ordinances. Consequently, the construction official for the municipality in which this project is located may reserve the right to modify the design of, or deny the erection of those structures which do not meet the appropriate flood ordinances or construction codes which are within local jurisdiction.
12. Any discharge of dredged or fill material shall consist of clean, suitable material free from toxic pollutants in toxic amounts, and shall comply with all applicable discharge rules and specifications regarding use of dredged or fill material.
13. No material shall be deposited or discharged in freshwater wetlands, transition areas, State open waters or other environmentally sensitive areas, other than what has been approved on the plans.
14. All necessary local, Federal and other state approvals must be obtained by the applicant prior to the commencement of the herein-permitted activities. Approvals from the following will be required:
  - a. NJDHP, Site Remediation Program
15. Activities below the Mean High Water Line of the Hudson River are prohibited.
16. Prior to the commencement of regulated activities on-site, the permittee shall submit for review and approval the traffic report to the Bergen County Traffic Engineers to determine whether the project is consistent with the County's traffic regulations.

6. **Rights of the State:** This permit is revocable and subject to modification by the State with due cause. The State may inspect the work site and may suspend construction if work does not comply with this permit. This permit does not grant property rights. The issuance of this permit shall not effect any action by the State on future applications, nor affect the title or ownership of property, nor make the State a party in any suit or question of ownership.
7. **Other responsibilities:** You must obtain all necessary local, Federal and other State approvals before you begin work. All work must be stabilized in accordance with the *Standards for Soil Erosion and Sediment Control in New Jersey*, and all fill material must be free of toxic pollutants in toxic amounts as defined in section 307 of the Federal Act.

**SPECIAL CONDITIONS IN ADDITION TO THE STANDARD CONDITIONS:**

8. The permittee must construct approximately 750 linear feet of the Hudson River Waterfront Walkway concurrent with the construction of the project. In addition, prior to commencing any activities authorized by this permit, the permittee shall create and deliver a Deed of Conservation Easement in recordable form that clearly delineates the proposed public waterfront walkway, and perpendicular access approved as part of this permit. This area should be noted as public access facilities open to the general public on a 24-hour basis, to be maintained and managed by the permittee (or its assigns) in perpetuity. The deed restrictions shall include the entire proposed public access walkway plus approved berms. In addition, a public access walkway connecting to the adjacent neighborhood shall be included, such that when public access becomes available at

those sites, the access can be easily converted. This area shall also be addressed in the deed restriction for current and all future owners of the subject property. The restriction shall be included on the deed, and recorded in the office of the County Clerk (the REGISTERAR OF DEEDS AND MORTGAGES), in the county wherein the lands included in the waiver are located. The restriction shall run with the land and be binding upon all successive owners. All individual lot surveys shall show the approved proposed public access walkway boundaries. Any regulated activities undertaken on the site before a copy of the recorded restriction is submitted to the Division will be considered in violation of the Waterfront Development Law. The conservation restriction shall also include a requirement to maintain eyelets, trash receptacles, benches, lightings, and railing along the entire waterfront walkway and signage to be maintained in perpetuity. The permittee shall submit a revised plan illustrating the notes and boundary description of the entire proposed public access area.

9. In order to protect anadromous fish species during their migratory run, any activities that may introduce sediments or which could cause an increase in the natural level of turbidity into the Hudson River are prohibited between April 1 and June 30 of each year. The Division reserves the right to suspend all regulated activities on site should it be determined that the applicant has not taken proper precautions to ensure continuous compliance with this condition.
10. All excavated material shall be disposed in a lawful manner and outside any regulated flood plain, open water, freshwater wetlands or adjacent transition areas, and in such a way as to not interfere with the positive drainage of the receiving area.
11. The decision to grant this stream encroachment permit did not include a structural review of the proposed activities with regard to the International Building Code; nor did it include a comparative review of any local flood ordinances which may apply. As such, the proposed structures may not fully comply with the provisions of the International Building Code or meet the requirements of the appropriate local flood ordinances. Consequently, the construction official for the municipality in which this project is located may reserve the right to modify the design of, or deny the erection of those structures, which do not meet the appropriate flood ordinances or construction codes which are within local jurisdiction.
12. Any discharge of dredged or fill material shall consist of clean, suitable material free from toxic pollutants in toxic amounts, and shall comply with all applicable Division's rules and specifications regarding use of dredged or fill material.
13. No material shall be deposited or dewatered in freshwater wetlands, transition areas, State open water or other environmentally sensitive areas, other than what has been approved on the plans.
14. All necessary local, Federal and other state approvals must be obtained by the applicant prior to the commencement of the herein-permitted activities. Approvals from the following will be required:
  - i. NIDRP, Site Remediation Program
15. Activities below the Mean High Water Line of the Hudson River are prohibited.
16. Prior to the commencement of regulated activities on-site, the permittee shall submit for review and approval the traffic report to the Bergen County Traffic Engineer to determine whether the project is consistent with the County's traffic regulations.

**WATERFRONT DEVELOPMENT  
AND  
FLOOD HAZARD AREA ENVIRONMENTAL REPORT**

Applicant: National RE/Sources  
Project Location: Unisphere Redevelopment Phase II, Borough of Edgewater, Bergen County  
D.L.R. File No.: 0213 06-0001.2; WFD 070001 (Upland), PHA 080001 (Var.), & PHA 080002 (TP)

The rules on Coastal Zone Management (N.J.S.A. 13:15-1 et seq.) require that a permit be obtained from the Division for the construction of certain facilities, including the construction of a public facility between the mean high water line of any tidal water and a point 500 feet landward of the mean high water line. In addition, the Flood Hazard Area Control Act Rules (N.J.S.A. 58:16A-50 et seq.) require that a permit be obtained from the Division preventing human disturbance to the land and vegetation in the flood hazard area of a regulated water, as described at N.J.A.C. 7:13-3, and in the riparian zone of a regulated water, as described at N.J.A.C. 7:13-4.

**PROJECT DESCRIPTION:**

The applicant, National RE/Sources, Inc., proposes a Phase II redevelopment project on a Brownfield site in the Borough of Edgewater, Bergen County. Specifically, the proposed project involves the construction of ten (10) mixed-use buildings (8 high rise structures), parking garages, parking lot areas, the renovation of an existing building, 750 linear feet of Hudson River Waterfront Walkway, a 10-foot wide perpendicular access to the waterfront walkway, 700 linear feet of rip-rap stabilization, three (3) stormwater outfall structures, and related stormwater facilities/structures.

This 49.85-acre (21.3-acre upland) site is bound to the north and south by private properties, to the west by River Road, and to the east by the Hudson River. The purpose of Phase II is to create a mixed-use waterfront community of housing, commercial business, public open space and waterfront amenities on a waterfront site that has been left vacant or underutilized.

**ADMINISTRATIVE HISTORY:**

- A Waterfront Development Permit (D.L.U.R. file no. 0213-06-0001.1; WFD 060001) was issued by the Division on May 8, 2006 for the construction of Phase I as described in the approved permit.
- Any island tributaries that may have touched Lots 3 & 4 were covered by a Grant to Laver Brothers Company, dated November 1, 1984, located in Liber X 6 at page 102, Tidelands file no. 82-0620.
- Four large Grants were issued for Lots 1 & 5, and they are: 1) Grant to Water Front Improvement Company, dated April 14, 1984, located in Liber P at page 675; 2) Grant to Martin and Lyne, dated March 30, 1989, located in Liber M at page 556; 3) Grant to Arpan Tania Company, dated September 7, 1911, located in Liber O at page 417; and 4) Grant to Colby and Company, dated February 27, 1982, located in Liber O at page 417.
- An overall Grant was issued to Laver Brothers Company, dated November 16, 1984, located in Liber X-6 at page 186, Tidelands file no. 82-0551.
- A Remedial Investigation Report and Remedial Action Work Plan was submitted to the NJDEP Site Remediation Program (SRP) on or around February 1, 2006. The reports are currently under SRP's review. The ISRA Case no. is E20040269.
- According to a memo, dated March 3, 2008, from the Division of Watershed Management, the proposed project is consistent with the Northwest Water Quality Management Plan as long as they don't expand past the current outline of the dock (which they are not currently proposing), and that they discharge their wastewater to Edgewater MUA sewer service area (which they are).

The proposed project is shown on site plans entitled:

"DNJCEVIA R SITE DEVELOPMENT, BOROUGH OF EDGEWATER, BERGEN COUNTY, NEW JERSEY", dated August 7, 2008, last revised May 12, 2008, and prepared by FAHLLIS, BOKOJ, DOWSKI AND SARTOR, LLC.

#### WATERFRONT DEVELOPMENT ELEMENTS

This permit is conditionally authorized under and in compliance with the Rules on Coastal Zone Management for Prime Fishing Areas (7:7B-3.4), Intertidal and Subtidal Shallows (7:7B-3.15), Filled Water's Edge (7:7B-3.23), Marsh Hazard Areas (7:7B-3.25), Riparian Zones (7:7B-3.26), Historic and Archaeological Resources (7:7B-3.35), Redesignated Threatened Wildlife or Vegetation Species Habitats (7:7B-3.38), Special Hazard Areas (7:7B-3.41), Hudson River Waterfront Area (7:7B-3.48), Land and Wastes Subject to Public Trust Rights (7:7B-3.50), Openfile and Junkie (7:7B-4.17), Imperative Cover Requirements that apply to Sites in the Upland Waterfront Redevelopment and CARBA Areas (7:7B-5.3), Vegetative Cover Requirements that apply to Sites in the Upland Waterfront Redevelopment and CARBA areas (7:7B-5.4), Imperative Cover Limits for a Site in the Upland Waterfront Redevelopment Area (7:7B-5A.9), Vegetative Cover Percentages for a Site in the Upland Waterfront Redevelopment Area (7:7B-5A.10), Secondary Impact (7:7B-6.3), Hoopline Use rules (7:7B-7.2), Transportation Use Rule (7:7B-7.5), Coastal Resilience (7:7B-7.11), High-Rise Structures (7:7B-7.14), Water Quality (7:7B-8.4), Stormwater Management (7:7B-8.7), Public Trust Rights (7:7B-8.11), Scale Resources and Design (7:7B-8.12), Buffers and Compatibility of Uses (7:7B-8.13), and Traffic (7:7B-8.14).

The State of New Jersey Coastal Management Program defines substantive policies to guide public decisions concerning significant proposed development and management of resources in New Jersey's Coastal Zone. The analysis of this coastal permit application is based upon the Rules on Coastal Zone Management (RCZM) (N.J.A.C. 7:7B-1.1 *et seq.*), adopted effective September, 1978, last revised April 7, 2008. This analysis will refer to applicable policies by administrative code section.

#### Prime Fishing Areas (7:7B-3.4):

(a) *Prime fishing areas include tidal water areas and water's edge areas that have a demonstrable history of supporting a significant local quantity of recreational or commercial fishing activity. The area includes all coastal jetties and groves, public fishing piers or docks and artificial reefs.*

According to the applicant, the subject site does not have a demonstrable history of supporting recreational fisheries. However, due to the proposed redevelopment of the currently vacant site (i.e. shoreline stabilization, and public access to the waterfront area), benefit to fishing in the area will likely increase. The applicant has demonstrated compliance with the Rule.

#### Intertidal and Subtidal Shallows (7:7B-3.15):

(a) *Intertidal and subtidal shallows means all permanently or temporarily submerged areas from the spring high water line to a depth of four feet below mean low water.*

(b) *Development, filling, new dredging or other disturbance is discouraged but may be permitted in accordance with (c), (d), (e), and (f) and with N.J.A.C. 7:27E-4.2 through 4.20.*

The applicant proposes to rep bank stabilization along approximately 700 linear feet of the existing bulkhead. Stabilization of the bulkhead will all be above the mean high water line. No disturbance to intertidal and subtidal shallows is being proposed. The applicant has demonstrated compliance with this Rule.

**Filled Water's Edge (7:27E-3.23):**

(a) *Filled water's edge means an existing filled area lying between wetlands or water areas, and either the upland limit of fill, or the first paved public road or railroad landward of the adjacent water area, whichever is closer to the water. Some existing or former dredged material disposal sites and excavation fill areas are filled water's edge.*

(b) *In waterfront areas located outside of the CAPRA zone, the water dependent use may be a public walkway, provided the upland walkway right-of-way is at least 50 feet wide, unless there are existing on-site physical constraints which cannot be removed or altered to meet this requirement.*

(c) *The development shall comply with the requirements for impervious cover and vegetative cover that apply to the site under N.J.A.C. 7:27E-5 and either N.J.A.C. 7:27E-5A or 5B.*

(d) *On all filled water's edge sites, development must comply with the limits and waters subject to Public Trust Rights Rule, N.J.A.C. 7:27E-3.50, and the Public Trust Rights Rule N.J.A.C. 7:27E-8.11.*

Based on the NIDDP Tidelands mapping, the project site is considered to be Filled Water's Edge. Since the proposed project is not considered to be water dependent, the applicant proposes to develop a public waterfront walkway within a right-of-way that is 30 feet wide along the water's edge. As part of this Phase II environmental, approximately 750 linear feet of waterfront walkway will be constructed. The Phase II waterfront walkway will tie directly into the previously Division approved Phase I waterfront walkway. Impervious cover and vegetative cover under N.J.A.C. 7:27E-5, 5A or 5B, and the Public Access to the Waterfront Rule under N.J.A.C. 7:27E-8.11 are addressed below. The applicant has demonstrated compliance with this Rule.

**Flood Hazard Areas (7:27E-3.25):**

(a) *Flood hazard areas are the floodway and flood fringe areas around rivers, creeks and streams as delineated by the Department under the Flood Hazard Area Control Act (N.J.S.A. 18:16A-50 et seq.); and areas defined or delineated as an A or a F zone by the Federal Emergency Management Agency (FEMA). They are areas subject to either tidal or fluvial flooding. Where flood hazard areas have been delineated by both the Department and FEMA, the Department delineation shall be used. Where flood hazard areas have not been delineated by the Department or FEMA, limits of the 100-year flood plain will be established by computation on a case-by-case basis.*

(b) *Retention and detention basins developed specifically for storm water management purposes are conditionally acceptable provided they are constructed in accordance with the Stormwater Management rule (N.J.A.C. 7:27E-8.7).*

(c) *Development in a flood hazard area shall comply with the requirements for impervious cover and vegetative cover under N.J.A.C. 7:27E-5 and either N.J.A.C. 7:27E-5A or 5B, as applicable.*

The Hudson River is a tidal water body. The flood hazard areas have been previously delineated by Federal Emergency Management Agency (FEMA). The entire subject site is located below the FEMA 100-year floodplain and is classified in Zone AH. The Division's engineer will ensure that the proposed structure will be located on an elevation in accordance with the Division's regulations. The Division engineer's comments are incorporated at the end of this report. Impervious cover and vegetative cover under N.J.A.C. 7:27E-5, 5A, or 5B are addressed below. The applicant has demonstrated compliance with this Rule.

**Riparian Zones (7:27E-3.26):**

(a) *A riparian zone exists along every regulated water, except there is no riparian zone along the Atlantic ocean use along any nautical lagoon, stormwater management basin, or oceanfront barrier island, spill or port facility. Regulated waters are defined in the Flood Hazard Area Control Act rules of N.J.A.C. 7:13-2.2.*

(b) The riparian zone includes the land and vegetation within each regulated water described in (a) above, as well as the land and vegetation within a certain distance of such regulated water as described in (c) below. The portion of the riparian zone that lies outside of a regulated water is measured landward from the top of bank.

(c) The width of the riparian zone along each regulated water described in (a) above is as follows:  
3. The riparian zone is 50 feet wide along both sides of all waters not identified in (a) or (b) above.

(d) Development in riparian zones shall conform with the requirements for a flood hazard area individual parcel under the Flood Hazard Area Control Act rules at N.J.A.C. 7:13-9, 10 and 11 or, to the alternative as applicable, a flood hazard area parcel-by-parcel at N.J.A.C. 7:13-7 or a flood hazard area general permit at N.J.A.C. 7:13-8.

(e) If endangered and/or threatened wildlife or species habitat is present in the riparian zone such that the area is also an endangered or threatened wildlife or plant species habitat special area in accordance with N.J.A.C. 7:2E-3.32, then the requirements of N.J.A.C. 7:2E-3.32, Endangered or Threatened Wildlife or Plant Species Habitat, shall apply.

The subject site is located adjacent to the Hudson River. In accordance to N.J.A.C. 7:13-2.2, the Hudson River is a regulated water, not related to C-1 water, and non-trout related. Therefore, a 50-foot riparian zone exists along the water's edge of the subject site. The proposed redevelopment project located within the riparian zone is addressed under the Flood Hazard Area Control Act Rules (N.J.A.C. 7:13-9, 10 and 11) below. In addition, no endangered and/or threatened wildlife or species habitat is present within the riparian zone. The applicant has demonstrated compliance with this Rule.

#### Historic and Archaeological Resources (7:13-3.36):

(a) Historic and archaeological resources include objects, structures, sites, districts, buildings, neighborhoods, districts, and man-made or non-modified features of the landscape and seascape, including historic and prehistoric archaeological sites, which either are on or are eligible for inclusion on the New Jersey or National Register of Historic Places.

(b) Development that disrupts, encroaches upon, damages, or destroys the value of historic and archaeological resources is discouraged. Development that incorporates historic and archaeological resources in a mutually adaptive reuse is encouraged.

The National Park Service National Register for Historic Places Database, the NJDEP Historic Preservation Office and the National Register of Historic Places Database did not list the subject property as historic places. The applicant has demonstrated compliance with this Rule.

#### Endangered or Threatened Wildlife or Vegetation Species Habitats (7:2E-3.34):

(a) Endangered or threatened wildlife or plant species habitats are areas known to be inhabited on a seasonal or permanent basis by or to be critical at any stage in the life cycle of any wildlife or plant identified as "endangered" or "threatened" species on official Federal or State lists of endangered or threatened species, or under active consideration for State or Federal listing. The definition of endangered or threatened wildlife or plant species habitats include a sufficient buffer area to assure continued survival of the population of the species.

According to the NJDEP 1-Map, no suitable habitat is known on this site for documented endangered and threatened species. The applicant has demonstrated compliance with this Rule.

#### Special Hazard Areas (7:13-3.41):

(a) Special hazard areas include areas with a known actual or potential hazard to public health, safety, and welfare, or to public or private property, such as the navigable air space around airports and seaports, landing areas, potential evacuation routes and areas where hazardous substances as defined at N.J.A.C. 15:27-23.11b-k are used or disposed, including adjacent areas and areas of hazardous material contamination.

- (b) Coastal development, especially residential and labor-intensive economic development, within special hazard areas is discouraged. All development within special hazard areas must include appropriate mitigating measures to protect the public health and safety.
- (c) Approvals from the Department's Division of Solid and Hazardous Waste shall be obtained prior to the commencement of any hazardous substance investigations or clean-up activities at contaminated sites.

Trivalent El and isolated pockets of volatile organic (VO) contaminated soils have been detected at the subject site. VOCs that require remediation by the NJDEP Site Remediation Program (SRP) will be addressed through excavation or in-place treatment. The NJDEP SRP has allowed the applicant to place a delineation exception areas (DEAs), a deed restriction, on the groundwater contamination. A remediation agreement was submitted to SRP and the applicant is currently working closely with them. Details to the remediation activities will be incorporated in Phase II of the project. A Remedial Investigation Report and Remedial Action Work Plan was submitted to the NJDEP SRP on or around February 1, 2005. The reports are currently under Site Remediation's review. The ISRA Case no. is E20040257. A condition requiring the applicant to obtain approval from SRP prior to the commencement of any regulated activities will be included in the permit. The applicant has demonstrated compliance with this Rule.

#### Hudson River Waterfront Area (7:7E-3.4B):

- (a) Hudson River Waterfront Area development shall be consistent with all other applicable Coastal Zone Management rules with particular attention given to N.J.A.C. 7:7E-3.9B, Public open space, N.J.A.C. 7:7E-3.39 Special hazard areas, N.J.A.C. 7:7E-3.41 Special urban area, N.J.A.C. 7:7E-7.14 High rise structures, N.J.A.C. 7:7E-8.11 Public Access to the Waterfront, N.J.A.C. 7:7E-8.12 Scenic Resources and Design, and N.J.A.C. 7:7E-8.4 Water Quality.
- (b) All waterfront development along the Hudson River shall develop, maintain, and manage a section of the Hudson Waterfront Walkway adjacent with the shoreline of the development property. The developer shall, by appropriate instrument of conveyance, create a conservation easement in favor of the Department. The conservation easement shall define the physical parameters of the walkway and the allowable uses, address the maintenance and management duties and identify the responsible party. Development of such project's public access systems shall conform to this special area policy and in the Hudson Waterfront Walkway Planning and Design Guidelines (1984), and the Hudson Waterfront Walkway Design Standards (1989).
- (c) Applications which vary in detail from the standards of this rule are discouraged, but will be considered for approval if they would provide greater public access and/or protection of natural or scenic resources than would be afforded by strict compliance with this rule. Applicants preparing a development which varies in detail from the standards of this rule are encouraged to contact the Department for guidance when conceptual plans have been prepared.

As part of the Phase II redevelopment, the applicant proposes to construct approximately 750 linear feet of Hudson River Walkway. The 750 linear feet of Hudson River Walkway proposed under Phase II will coincide with the previously approved 1,150 linear feet of Hudson River Walkway under Phase I (DURF File No. 0213-06-0001.3; WFD 050001). The Division has determined that the design of the proposed waterfront walkway conforms with the Hudson Waterfront Walkway Planning and Design Guidelines (1984), and the Hudson Waterfront Walkway Design Standards (1989), with the 16-foot wide walkway and its amenities. The applicant has demonstrated compliance with this Rule.

#### Lands and Waters Subject to Public Trust Rights (7:7K-3.50)

- (a) Lands and waters subject to public trust rights are tidal waterways and their shores, including both lands now or formerly below the mean high water line, and shores above the mean high water line. Tidal waterways and their shores are subject to the Public Trust Doctrine and are held in trust by the State for the benefit of all the people, allowing the public to fully enjoy these lands and waters for a variety of public uses.
- (b) Development that adversely affects lands and waters subject to public trust rights is discouraged.

(b) *Public access to lands and waters subject to public trust rights shall be provided in accordance with the public trust rights rule, N.J.A.C. 7:7B-8.11.*

Since the subject site is located adjacent to the Hudson River, it is subject to the Public Trust Doctrine and must allow the public to fully enjoy these lands and waters. There was no public waterfront access on the site due to its previous pharmaceutical usage. With the current redevelopment project, the proposed waterfront walkway will provide adequate access to the Hudson River for the public and local residents. The Public Trust Rights Rule (N.J.A.C. 7:7B-8.11) is addressed below. The applicant has demonstrated compliance with this Rule.

**Outfalls and Intakes (7:7B-4.17)**

(a) *Outfalls and intakes are pipe openings that are located in water areas for the purpose of intake of water or discharge of effluent including sewage, stormwater and industrial effluents.*

(b) *Outfalls and intakes are conditionally acceptable provided that the use associated with the intake or outfall meets applicable Coastal Zone Management rules.*

The applicant proposes the installation of three new stormwater outfall structures along the water's edge. The stormwater outfall structures will be installed above the Mean High Water Line. No impacts to freshwater wetlands and transition areas are proposed. A Stormwater Management Plan was submitted to the Division for review. The applicant has demonstrated compliance with this Rule.

**Impervious Cover Limits for a Site in the Upland Waterfront Development Area (7:7B-5A.9)**

(a) *If a site or portion of a site is unforested, as determined under N.J.A.C. 7:7B-5.5, the impervious cover limit is the limit of (a)1, 2 or 3 below, whichever area is highest:*

1. *The average of the net land area on the site or portion, as determined under N.J.A.C. 7:7B-5.3 (a), multiplied by the impervious cover percentage in Table B below for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:7B-5A.8;*
2. *For a site located in the northern waterfront region or urban area region, as determined under N.J.A.C. 7:7B-5A.2(d), the amount of existing impervious cover located on a site as determined under (a) below; or*
3. *For a site located in a region other than those identified at (a)2 above, the average covered by buildings and/or asphalt or concrete pavement legally existing on the site at the time the application is submitted to the Department.*

According to N.J.A.C. 7:7B-5.5, the subject site is unforested. Therefore, an unforested site that is located in the urban area region, and with a high development intensity, the allowable impervious coverage is 90%. The total coverage of the site is 49.85 acres, but the total net land area is 21.3 acres. Therefore, for the entire project (Phase I and Phase II), the applicant is allowed a maximum of 20.83 acres of impervious coverage. The total impervious coverage proposed for Phase I and Phase II is 17.12 acres (74.1%). The applicant has demonstrated compliance with this Rule.

**Vegetative Cover Percentages for a Site in the Upland Waterfront Development Area (7:7B-5A.10)**

(a) *The area (in acres) on a site in the upland waterfront development area in which trees and/or herbaceous vegetation shall be planted or preserved is calculated as follows:*

1. *To determine the area (in acres) of tree preservation and/or tree planting on the site:
  - i. *Identify the forested and/or unforested portions of the site, as determined under N.J.A.C. 7:7B-5.5;*
  - ii. *If a site or portion of a site identified at (a)1i has more than one development intensity, further divide that site or portion into smaller portions based on their respective development intensities;**

- ii. For each forested site or portion identified in (a)ii above, multiply the acreage of the wetland area on the site or portion, as determined under N.J.A.C. 7:2B-5.3(d), by the tree preservation and tree planting percentages in Table F for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:2B-5A8; and
- iv. For each unforestad site or portion identified in (a)ii above, multiply the acreage of the wetland area on the site or portion, as determined under N.J.A.C. 7:2B-5.3(d), by the tree planting percentages in Table G below for the development intensity that applies to the site or portion, as determined under N.J.A.C. 7:2B-5A-8.

The project site is unforestad, is located in the urban area region, and has a high development intensity. Therefore, the required tree preservation and tree planting percentage is 10% for the entire site. Phase I and Phase II, 10% of the total net total area (21.3 acres) is 2.13 acres. Under Phase I, the applicant proposed to provide 2.9% (0.67 acre) of the required 10% (2.13 acres). Under Phase II, the applicant proposes to provide 5.31 acres landscaping and other previous surfaces. The total landscaping and other previous surfaces proposed for the entire site will be 5.98 acres (25.9%). The applicant has demonstrated compliance with this Rule.

#### Secondary Impacts (7:2B-6.3):

(a) Secondary impacts are the effects of additional development likely to be constructed as a result of the approval of a particular proposal. Secondary impacts can also include traffic increase, increased recreational demand and any other off-site impacts generated by onsite activities which affect the site and surrounding region.

This phase of the proposed project is the final build-out of the entire site. At the completion of Phase II, the redevelopment of this former pharmaceutical site will be a mixed-use development consisting of residential, commercial, and retail opportunities. The project site is located in a highly urbanized area. The surrounding towns are previously developed with similar usage. No adverse secondary impacts are anticipated as a result of this project. The applicant has demonstrated compliance with this Rule.

#### Housing (7:2B-7.2):

- (a) "Housing" includes single family detached houses, multi-family units with apartments or town houses, high-rise buildings and mixed use developments.
- (b) Standards relevant to water area and water's edge housing are as follows:
  3. Housing is conditionally acceptable in the filled water's edge, provided that it meets the requirements of the Filled Water's Edge rule (N.J.A.C. 7:2B-3.23) and the Public Access to the Waterfront Rule (N.J.A.C. 7:2B-3.11). The residential development shall comply with the requirements for impervious cover and vegetative cover that apply to the site under N.J.A.C. 7:2B-5 and either N.J.A.C. -5A or 5B, except on bay islands where the requirements of the Bay Island Corridor rule (N.J.A.C. 7:2B-3.21) shall apply.
  5. On sites with existing shore protection structures, the residential structure shall be set back a minimum of 25 feet from the seaward shore protection structures, and a minimum of 15 feet from shore protection structure elsewhere. This distance shall be measured from the waterward face of the bulkhead or seawall and from the top of slope on the seaward side of the revetment.

The proposed redevelopment includes the construction of mixed-use buildings located on a site adjacent to the Hudson River. The existing shoreline protection is in a form of loose rip-rap and boulders. The applicant proposed to enhance the existing shoreline protection by placing additional rip-rap along the slope shoreline to further stabilize the area. All the shoreline stabilization activity will be conducted above the Mean High Water Line. The proposed mixed-use buildings will be located over 30 feet from landward face of the rip rap stabilization area.

In addition, Flood Water's Edge (1:7B-3.29), Public Access to the Waterfront Parks/Trails Trust Rights (1:7B-8.11), and Requirements for Injurious Cover and Vegetative Cover (1:7B-5) are address separately under each Rule. The applicant has demonstrated compliance with this Rule.

**Transportation Use Rule (1:7B-7.5):**

- (b) Standards relevant to bicycle and foot paths are as follows:
1. The construction of internal bicycle paths, foot paths, and sidewalks in residential, commercial, and industrial development is required to the maximum extent practicable.
  2. Linear bicycle and foot paths are encouraged along the edges of all water bodies, and from the water body to the nearest public road, provided they would not disturb Special Area or subject the user to danger.
  3. Existing bicycle and foot paths shall be continued around development when it is not practical to pass through development.

The proposed mixed-use redevelopment will result in the construction of several internal roadways, and sidewalks through the waterfront community. The internal sidewalks will be approximately 5 feet to 8 feet wide. In addition, under Phase II, approximately 750 linear feet of waterfront walkway will be constructed and will be connected to the previously approved Phase I, 835 linear feet of waterfront walkway. The applicant has demonstrated compliance with this Rule.

**Coastal Engineering (1:7B-7.11):**

(a) Coastal engineering includes a variety of structural and non-structural measures to manage water areas and the shoreline for natural effects of erosion, storms, and sediment and sand movements. Beach nourishment, sand fences, pedestrian curbs on dunes, stabilization of dunes, dune restoration projects, dredged material disposal and the construction of retaining structures such as bulkheads, gabions, revetments and seawalls are examples of coastal engineering.

(b) Standards relevant to structural shore protection are as follows:

1. The construction of new shore protection structures or expansion or fortification of existing shore protection structures, including, but not limited to, fences, groins, seawalls, bulkheads, gabions and other retaining structures to reduce longshore transport and/or to prevent tidal water from reaching sensitive material is acceptable only if it meets all of the following five conditions:
  - i. The structure is essential to protect water dependent uses or heavily used public recreation beach areas in danger from tidal water or erosion, or the structure is essential to protect existing structures and infrastructure in developed shoreline areas in danger from erosion, or the structure is essential to mitigate through, for example, the construction of a retained southern berm, the projected erosion in an erosion hazard area along a beach and provide erosion protection for a development that is otherwise acceptable under the Coastal Zone Management rules;
  - ii. The structure will not cause significant adverse impacts on the local shoreline and sand supply;
  - iii. The structure will not create net erosion/shoreline and sediment downdrift, including erosion or shoaling;
  - iv. The structure will cause minimum feasible adverse impact to living marine and estuarine resources;
  - v. The structure is consistent with the State's Shore Protection Master Plan;

As part of the mixed-use redevelopment project, the applicant proposed the fortification of the existing beach rip-rap/shoreline structure. The proposed activity will involve the placement of additional rip-rap along approximately 700 linear feet of existing shoreline for further stabilization. The fortification of the existing shoreline

is related to the anticipated heavy public usage of the Hudson River Waterfront Walkway. All the dune-line stabilization activity will be conducted above the Mean High Water line, therefore, no living marine and estuarine resources will be adversely impacted. The applicant has demonstrated compliance with this Rule.

**High-Rise Structures (7:7E-7.1A):**

- (a) *High-rise structures are structures which are more than six stories or more than 60 feet in height as measured from existing preconstruction ground level.*
- (b) *The standards for high-rise structures are as follows:*
- 1. High-rise structures are encouraged to locate in an urban area of existing high density, high-rise and/or intense settlements;*
  - 2. High-rise structures within the view of coastal waters shall be separated from coastal waters by at least one public road or an equivalent area (at least 50 feet) physically and visually open to the public except as provided by N.J.A.C. 7:7E-3.4B;*
  - 3. The longest lateral dimension of any high-rise structure must be oriented perpendicular to the beach or coastal water, except for a high rise structure that is located in the Redevelopment Zone of the City of Long Branch and authorized pursuant to the Long Branch Redevelopment Zone Permit at N.J.A.C. 7:7E-7.4.*
  - 4. The proposed structure must not block the view of dunes, beaches, horizons, skylines, rivers, inlets, bays, or oceans that are currently enjoyed by existing residential structures, public roads or pathways, to the maximum extent practicable;*
  - 5. The proposed structure must be in character with the surrounding transitional heights and residential densities, or be in character with a municipal comprehensive development scheme requiring an increase in height and density which is consistent with all applicable Coastal Zone Management rules; and*
  - 6. The proposed structure must not have an adverse impact on air quality, traffic, and existing infrastructure.*
  - 7. The proposed structure must be architecturally designed so as to not cause deflation of the beach and dune system or other coastal environmental wetland of the structure.*

The proposed Phase II redevelopment will involve the construction of 10 mixed-use buildings on the subject site. Of the 10 proposed buildings, there will be eight (8) stories along high-rise structures. They are identified on the site plan as Building B, Building C-1, Building C-2, Building D, Building E, Building G, and 2 sections of Building A. Two additional high rise structures (part of Building A) are proposed over a new parking garage. The longest lateral dimension of all the proposed high rise towers are oriented perpendicular to the Hudson River. These views consist from River Road to the Hudson River and NYC skyline are available along the northern property boundary, between Building E2 and Building A, and along the southern property boundary. In addition, the high-rise buildings are located at least 50 feet from the water's edge in order to provide a separation between the Hudson River and the proposed redevelopment. The applicant has demonstrated compliance with this Rule.

**Water Quality (7:7E-3.4) and Stormwater Management (7:7E-9.7):**

(a) *As required by Section 307(c) of the Federal Coastal Zone Management Act (P.L. 92-583), Federal, State and local water quality requirements established under the Clean Water Act (33 U.S.C. 1251) shall be the water resource standards of the coastal management program.*

(a) *Stormwater runoff is the flow of water on the surface of the ground, resulting from precipitation. Standards relevant to stormwater management system design are set forth in this rule.*

These Rules are attached in the attached Division Engineer's Report.

**Public Trust Rights (7:7E-8.11):**

(a) Public trust rights to tidal waterways and their shores (public trust rights) established by the Public Trust Doctrine include public access which is the ability of the public to pass physically and visually to, from and along lands and waters subject to public trust rights as defined at N.J.A.C. 7:7E-3.39, and to use these lands and waters for activities such as swimming, sunbathing, fishing, surfing, sport diving, bird watching, walking and boating. Public trust rights also include the right to perpendicular and linear access. Public accessways and public access areas provide a means for the public to pass along and use lands and waters subject to public trust rights.

(b) Except as otherwise provided in (f) below, development on or adjacent to all tidal waterways and their shores shall provide on-site, permanent, unobstructed public access to the tidal waterway and its shores at all times, including both visual and physical access. Specific requirements for sites located along the Arthur Kill, Kill Van Kull west of Bayonne Bridge, Newark Bay, Delaware River from the Trenton Lakes Bridge to the CAMRA boundary, Elizabeth River, Hackensack River, Passaic River, Rahway River, Raritan River, Coahansy River in Bridgeton City, and Maurice River in Millville City are found at (c) below. Public accessways and public access areas shall:

1. Include perpendicular access and a Buffer Area along the tidal waterway and its entire shores; and
2. If located in a natural area of a tidal waterway, be designed to minimize the impacts to the natural area and tidal waterway including impacts to habitat value, vegetation and water quality.

(c) Except as provided in (f) below, in addition to the requirements of (b) above, the perpendicular access and linear access provided for sites located along the Arthur Kill, Kill Van Kull west of Bayonne Bridge, Newark Bay, Delaware River from the Trenton Lakes Bridge to the CAMRA boundary, Elizabeth River, Hackensack River, Passaic River, Rahway River, Raritan River, Coahansy River in Bridgeton City, and Maurice River in Millville City, shall comply with the following. The standards for public access along the Hudson River Waterfront Area are set forth at N.J.A.C. 7:7E-3.48.

1. The linear area shall consist of a walkway that meets the following:
  - i. The minimum width of walkway free of obstruction shall be 16 feet; and
  - ii. An area a minimum of 30 feet wide, including the walkway area, shall be permanently protected by a conservation restriction; and
2. The perpendicular access shall consist of a walkway that meets the following:
  - i. The minimum width of the walkway free of obstruction shall be 10 feet;
  - ii. An area a minimum of 20 feet wide, including the walkway area shall be permanently protected by a conservation restriction; and
  - iii. The linear distance between perpendicular accessways shall not exceed one-half mile as measured generally parallel to the waterway; and
3. The Department may reduce the walkway width requirements at (c)1i and 2i above, as necessary to protect endangered and threatened wildlife or vegetation species habitat, critical wildlife habitat as defined at N.J.A.C. 7:7-3.19, natural areas or existing infrastructure.

(d) Public access must be available on a nondiscriminatory basis. All establishments, including municipalities, counties, marinas, condominium associations, homeowners' associations and beach clubs, which control access to tidal waterways and their shores shall comply with the Law Against Discrimination, N.J.S.A. 10:5-1 et seq.

(e) Public access to tidal waterways and their shores shall be clearly marked. Department approved public access signs shall be installed at each public accessway, public access area and/or public parking area at the development site and maintained in perpetuity by the permittee and its successors in title and interest. N.J.A.C. 7:7E-8.1(f) contains the standards for signs for municipalities that participate in Shore Protection Program funding. Subsection (g) below contains the standards for signs for municipalities, counties and municipalities that receive Green Acres funding for a Green Acres project site.

(f) Activities that have the effect of discouraging or preventing the exercise of public trust rights are prohibited. These activities include, but are not limited to, restricting photographic identification, requiring a

*liability waiver, requiring the purchase of drinks or food from a specific vendor, or prohibiting bringing beach equipment such as bicycles or beach chairs.*

(f) *Parking shall be provided for the public to access tidal waterways and their shores, except when a public access is not required in accordance with (j)6 above or the project is limited in scope in accordance with (j)7. Subsection (f) below contains the parking standards for municipalities that participate in Shore Protection Program funding. Subsection (g) below contains the parking standards for municipalities, counties and nonprofits that receive Green Acres funding for a Green Acres project site. All other development shall provide parking as follows:*

2. *The area set aside for off-street parking shall be dedicated for public access parking through the recording of a conservation restriction maintaining the parking spaces in perpetuity; and*
3. *The area set aside for on-street parking shall be dedicated for public access parking through municipal ordinance.*

(k) *Development on or adjacent to tidal waterways and their shores shall provide barrier free access where feasible and warranted by the character of the site.*

(l) *Development on or adjacent to tidal waterways and their shores shall incorporate fishing access and associated amenities to the maximum extent practicable within the area provided for public access. In the case of a beach, fishing access shall not be required in areas designated for swimming during hours designated for swimming.*

(m) *The areas set aside for public access to tidal waterways and their shores shall be permanently dedicated for public use through the recording of a Department approved conservation restriction under the New Jersey Conservation Restriction and Historic Preservation Restriction Act, N.J.S.A. 13:8B-1 et seq., maintaining the publicly dedicated areas in perpetuity. Subsection (f) below contains the conservation restriction standards for municipalities that participate in Shore Protection Program funding. Subsection (g) below contains the conservation restriction standards for municipalities, counties and nonprofits that receive Green Acres funding for a Green Acres project site. N.J.A.C. 7:26-8.5A contains the recording requirements for all conservation restrictions.*

(n) *No authorization or approval under this Chapter shall be deemed to relinquish public rights of access to and use of lands and waters subject to public trust rights.*

Under the Phase I redevelopment (DURF file no. 2213-06-001.2), the Division authorized the construction of approximately 1,235 linear feet of permanent waterfront walkway on the subject site. The previous authorization also required the construction of 750 linear feet of "interior" waterfront walkway located in the Phase II section of the site. In addition, a 20-foot wide easement with a 10-foot perpendicular walkway located through the center of the site was also approved. The intent approval of the "interior" waterfront walkway located in Phase II was to ensure that the entire site will establish public access to the waterfront area, even though only a portion of the site was approved at that time.

Under the current Phase II redevelopment project, the applicant proposes the permanent construction of the previously required 750 linear feet of "interior" waterfront walkway within a 30-foot wide easement, and a 20-foot wide walkway. In addition, the previously approved 20-foot wide easement with a 10-foot perpendicular walkway will be relocated to the southern property boundary. Both linear areas will be beach-free for a minimum of 10 feet, and will be made available to the public at all times. The applicant is providing 4 waterfront walkway directional signs and 20 parking stalls for public waterfront walkway users located approximately 40 feet from the waterfront walkway. The five waterfront walkway will also provide opportunities for the public to engage in recreational activities (i.e. fishing) that were not made available due to its previous pharmaceutical usage. A condition will be placed in the permit requiring the applicant to record a Department approved conservation restriction under the N.J. Conservation Restriction and Historic Preservation Restriction Act, N.J.A.S. 13:8B-1 et seq., maintaining the areas set aside for public access to the Hudson River in perpetuity. The applicant has demonstrated compliance with this Rule.

**Scenic Resources and Design (712-9.12):**

- (a) *Scenic resources include the views of the natural and/or built landscape.*

- (b) *Large-scale elements of building and site design are defined as the elements that compose the developed landscape such as size, geometry, massing, height and bulk structures.*
- (c) *New coastal development that is visually compatible with its surroundings in terms of building and site design, and enhances scenic resources is encouraged. New coastal development that is not visually compatible with existing scenic resources in terms of large scale elements of building and site design is discouraged.*

The large-scale elements of the proposed project in terms of height and thickness are consistent with the surrounding high-rise structures in the area. The Phase II redevelopment project will involve the restoration of an area that has historically been unavailable to the public due to its pharmaceutical research and development use. The new waterfront walkway on-site will provide visual and physical access to the Hudson River and the New York skyline. The applicant has demonstrated compliance with this Rule.

**Buffers and Compatibility of Uses (7:7E-8.13)**

- (a) *Buffers are natural or manmade areas, structures, or objects that serve to separate distinct uses or areas. Compatibility of uses is the ability for uses to exist together without aesthetic or functional conflicts.*
- (b) *Development shall be compatible with adjacent land uses to the maximum extent practicable.*
1. *Development that is likely to adversely affect adjacent areas, particularly Special Area N.J.A.C. 7:7E-3, or residential or recreation uses, is prohibited unless the impact is mitigated by an adequate buffer. The purpose, width and type of the required buffer shall vary depending upon the type and degree of impact and the type of adjacent area to be affected by the development, and shall be determined on a case-by-case basis.*
  2. *The standards for wetland buffers are found at N.J.A.C. 7:7E-3.2B.*
  3. *The following apply to buffer treatment:*
    - i. *All buffer areas shall be planted with appropriate vegetation species, either through primary planting or supplemental planting. This landscaping shall include use of natural, native vegetative species, with sufficient size and density to create a solid visual screen within five years from the date of planting.*
    - ii. *Buffer areas which are forested may require supplemental vegetative plantings to ensure that acceptable visual and physical separation is achieved.*
    - iii. *Buffer areas which are non-forested will require dense vegetative plantings with mixed evergreen and deciduous trees and shrubs. Evergreens must be at least eight feet tall at time of planting; deciduous trees must be at least three inches caliper, balled and burlapped; shrubs must be at least three to four feet in height.*

As mentioned above, the site was previously for pharmaceutical research and development use, therefore prohibiting the public to enjoy the waterfront area. The current Phase II redevelopment project involves the creation of a mixed-use environment that is compatible with its neighbors and the function of the surrounding uses and areas. In addition, in order to separate the commercial office wings of the adjacent and the mixed-use environment of the proposed project, the applicant proposes to plant Evergreen trees (approximately 1-8 feet in height), along the northern property boundary. The applicant has demonstrated compliance with this Rule.

**Driftle (7:7E-8.14)**

- (a) *Traffic is the movement of vehicles, pedestrians or ships along a route. Coastal development shall be designed, located and operated in a manner to cause the least possible disturbance to traffic systems.*
- (b) *Coastal development shall be designed, located and operated in a manner to cause the least possible disturbance to traffic systems.*
1. *Alternative means of transportation, that is, public and private mass transportation facilities and services, shall be considered and, where feasible, incorporated into the design and management of a proposed development, to reduce the number of individual vehicle trips generated as a result of the facility. Examples of alternative means of*

transportation include: van pooling, staggered working hours and installation of auxiliary public transportation facilities such as bus shelters.

(c) When the level of service of traffic systems is disturbed by approved development, the necessary design modifications or funding contributions toward an overall traffic improvement shall be proposed and implemented in conjunction with the coastal development, the satisfaction of the New Jersey Department of Transportation and any regional agencies.

(d) Any development that causes a location on a roadway to operate in excess of capacity Level D is discouraged. A developer shall undertake mitigation or other corrective measures as may be necessary so that the traffic levels at any affected intersection remain at capacity Level D or better. A developer may, by incorporating design modifications or by contributing to the cost of traffic improvements, be able to address traffic problems resulting from the development, in which case development would be conditionally acceptable. Determinations of traffic levels which will be generated will be made by the New Jersey Department of Transportation.

The applicant identified River Road as an Urban Minor Arterial with two lanes in each direction and a posted speed limit of 35 miles per hour. In the traffic impact study provided in the application, it identified that the weekday and weekend traffic is significant during peak AM and PM and Saturday hours. The addition of the proposed sub-area project could have significant impacts on the vehicular traffic of River Road. The applicant's traffic consultant reviewed potential traffic impacts during build and no-build. It was determined that there would be no change to the existing level of service values with the construction of the project, and therefore, the project would not have a significant impact to the roadway network. A condition will be placed in the permit requiring the applicant to obtain approval from the county traffic engineer for the proposed project prior to the commencement of regulated activity on-site. The applicant has demonstrated compliance with this rule.

#### FLOOD HAZARD AREA ELEMENT:

##### General Provisions for Verifications (713-6.1):

(b) A verification is a document containing the Department's approval of the flood hazard area analysis flood elevation on a site, includes either a flood hazard warning limit or an indication that the entire site is in a flood hazard area, and may also include a floodway limit and/or a riparian zone limit, if applicable.

The nearest watercourse to the subject site is the Hudson River, which is located immediately east of the site. The riparian zone on the subject site is 50 feet from the top of the River's bank. The flood hazard warning limit is addressed in the attached Division Engineer's Report.

##### Requirements for a Regulated Activity in a Riparian Zone (713-10.2):

(a) This section sets forth specific design and construction standards that apply to any regulated activity proposed in a riparian zone.

(b) In cases where an applicant proposes to redevelop a site within 25 feet of any top of bank or edge of water, all existing impervious surfaces within 25 feet of the top of bank or edge of water shall be removed and the riparian zone in this area shall be adequately stabilized and replanted with indigenous, non-invasive vegetation, except in the following cases:

2. The applicant proposes to construct a public walkway within 25 feet of the top of bank or edge of water, provided the walkway is constructed of permeable material where feasible, and provided the remainder of the area within 25 feet of the top of bank or edge of water is restored, stabilized and replanted with indigenous, non-invasive vegetation.

As part of the Phase II redevelopment project, the applicant proposes the construction of approximately 750 linear feet of waterfront walkway. The 16-foot wide waterfront walkway will be located within the 25 foot top of the river's bank. For the construction of the waterfront walkway and its amenities, all existing impervious surfaces within 25 feet top of the river's bank will be removed. The applicant proposes to landscape the remainder 9 feet of the 25-foot riparian buffer with shade trees.

##### Requirements for a Regulated Activity In or Along a Water with Fishery Resources (713-10.5):

(c) *This section sets forth specific design and construction standards that apply to any regulated activity proposed in the channel and/or riparian zone of a regulated water containing fishery resources.*

In order to protect non-commercial fish species during their migratory run, the bank stabilization activity and any upland activity that may potentially introduce sediments into the Hudson River are prohibited between April 1 and June 30 of each year. All proposed activities are located above the Mean High Water Line of the Hudson River. A timing restriction will be included in the permit.

**Requirements for a Regulated Activity in a Documented Habitat for Threatened or Endangered Species (7:13-10.6):**

(c) *This section sets forth specific design and construction standards that apply to any regulated activity proposed in a documented habitat for a threatened or endangered species.*

According to the NIDDP filing, the subject site is not a documented habitat for threatened or endangered species. In addition, no comments were received from the NIDDP's Division of Fish & Wildlife.

**Individual Permit Requirements For Various Regulated Activities (7:13-11):**

**Requirements that Apply to All Regulated Activities (7:13-11.1):**

(a) *This section sets forth specific design and construction standards that apply to any regulated activity proposed in any regulated area.*

(b) *The Department shall issue an individual permit for a regulated activity only if it determines that the regulated activity is not likely to cause significant and adverse effects on the following:*

1. *Water quality;*
2. *aquatic biota;*
3. *Water supply;*
4. *Flooding;*
5. *Drainage;*
6. *Channel stability;*
7. *Threatened and endangered species or their current or documented historic habitats;*
8. *Navigation;*
9. *Energy production; and*
10. *Fishery resources*

The Division's review of this Flood Hazard Area application has concluded that the project as proposed will not cause significant and adverse effects in any of the areas mentioned above.

**Requirements for Stormwater Management (7:13-11.2):**

(a) *This section sets forth stormwater management requirements and specific design and construction standards that apply to any major development, as defined at N.Y.A.C. 7:3-1.2.*

The applicant proposes stormwater management as part of the redevelopment. The stormwater management requirements, specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for Excavation, Fill and Grading Activities (7:13-11.3):**

(a) *This section sets forth specific design and construction standards that apply to any excavation, fill and/or grading proposed in any regulated area.*

The applicant proposes activities involving excavation, fill and grading as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for a Structure (7:13-11.4):**

- (a) This section sets forth specific design and construction standards that apply to any structures proposed in any regulated area.
- (b) The Department shall issue an individual permit to construct or reconstruct a structure only if the entire structure is designed and constructed to be suitably anchored in order to:
1. Resist impact from water and debris during the flood hazard area design flood;

The applicant proposes several structures as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for a Building (7:13-11.5):**

- (b) The requirements in this section apply to a building that is constructed or reconstructed in the following areas:
1. A flood hazard area; and

The proposed project is located within the flood hazard area of the Hudson River.

- (c) The Department shall issue an individual permit to construct or reconstruct a building of any kind only if the following requirements are satisfied:
1. Any new building is located at least 25 feet from any top of bank or edge of water.

The proposed mixed-use buildings under Phase II are located a minimum of 25 feet from the top of the Hudson River's bank.

- (d) The Department shall issue an individual permit to construct or reconstruct a habitable building that is neither a private residence nor a public building, only if one of the following requirements is satisfied:

The applicant proposes several habitable buildings as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for a Railroad, Roadway or Parkway Area (7:13-11.6):**

- (a) This section sets forth specific design and construction standards that apply to any railroad, roadway or parking area proposed in a flood hazard area.

The applicant proposes several parking areas as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**Requirements for a Stormwater Outfall Structure (7:13-11.10):**

- (a) This section sets forth specific design and construction standards that apply to any stormwater outfall structure proposed in any regulated area.

The applicant proposes three new stormwater outfall structures as part of the redevelopment. The specific design and construction standards are addressed in the attached Division Engineer's Report.

**CONCLUSION:**

Based on the information contained in the application and shown on the submitted plans, the project is conditionally acceptable under the Rules on Coastal Zone Management (N.J.A.C. 7:13) and the environmental standards set forth in the Flood Hazard Control Act Rules (N.J.A.C. 7:15).

**After printing this label:**

1. Use the "Print" button on this page to print your label to your asset or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

**Warning:** Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on [index.fedex.com](http://index.fedex.com). FedEx will not be responsible for any claim, in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or mis-formation unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Mitigations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Max claim for items of extraordinary value is \$1,000 or the authorized declared value. Recoverable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

 Receive Date: 19800818  
 Handler Name: UNILEVER RESEARCH US  
 Federal Waste Generator Code: 1  
 Generator Code Description: Large Quantity Generator  
 Source Type: Notification

**Waste Code Details**

Hazardous Waste Code: D000  
 Waste Code Description: DESCRIPTION

Hazardous Waste Code: D001  
 Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D002  
 Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D003  
 Waste Code Description: REACTIVE WASTE

Hazardous Waste Code: D004  
 Waste Code Description: ARSENIC

Hazardous Waste Code: F002  
 Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F003  
 Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Hazardous Waste Handler Details**

**Sequence No:** 2  
**Receive Date:** 20030723  
**Handler Name:** UNILEVER RESEARCH & DEVELOPMENT  
**Federal Waste Generator Code:** 1  
**Generator Code Description:** Large Quantity Generator  
**Source Type:** Notification

**Waste Code Details**

<b>Hazardous Waste Code:</b>	D001
<b>Waste Code Description:</b>	IGNITABLE WASTE
<b>Hazardous Waste Code:</b>	D002
<b>Waste Code Description:</b>	CORROSIVE WASTE
<b>Hazardous Waste Code:</b>	D003
<b>Waste Code Description:</b>	REACTIVE WASTE
<b>Hazardous Waste Code:</b>	D004
<b>Waste Code Description:</b>	ARSENIC
<b>Hazardous Waste Code:</b>	D005
<b>Waste Code Description:</b>	BARIUM
<b>Hazardous Waste Code:</b>	D006
<b>Waste Code Description:</b>	CADMIUM
<b>Hazardous Waste Code:</b>	D007
<b>Waste Code Description:</b>	CHROMIUM

<b>Hazardous Waste Code:</b>			D043			
<b>Waste Code Description:</b>			VINYL CHLORIDE			
<b>Hazardous Waste Code:</b>			D092			
<b>Waste Code Description:</b>			DESCRIPTION			
<b>Hazardous Waste Code:</b>			F002			
<b>Waste Code Description:</b>			THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.			
<b>Hazardous Waste Code:</b>			F003			
<b>Waste Code Description:</b>			THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.			
<b>Hazardous Waste Code:</b>			F004			
<b>Waste Code Description:</b>			THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.			
<b>Hazardous Waste Code:</b>			F005			
<b>Waste Code Description:</b>			THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.			
<b>Hazardous Waste Code:</b>			F027			
<b>Waste Code Description:</b>			DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)			
<b>Hazardous Waste Code:</b>			P001			
<b>Waste Code Description:</b>			2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%			
<b>Hazardous Waste Code:</b>			P002			
<b>Waste Code Description:</b>			1-ACETYL-2-THIOUREA (OR) ACETAMIDE, N-(AMINOTHIOXOMETHYL)-			
<b>Hazardous Waste Code:</b>			P003			
<b>Waste Code Description:</b>			2-PROPENAL (OR) ACROLEIN			
<b>Hazardous Waste Code:</b>			P004			
<b>Waste Code Description:</b>			1,4,5,8-DIMETHANONAPHTHALENE, 1,2,3,4,10,10-HEXA-CHLORO-1,4,4A,5,8,8A,-HEXAHYDRO-, (1ALPHA, 4ALPHA, 4ABETA, 5ALPHA, 8ALPHA, 8ABETA)- (OR) ALDRIN			
<b>Hazardous Waste Code:</b>			P005			
<b>Waste Code Description:</b>			2-PROPEN-1-OL (OR) ALLYL ALCOHOL			
<b>Hazardous Waste Code:</b>			P006			
<b>Waste Code Description:</b>			ALUMINUM PHOSPHIDE (R,T)			

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>

<b>Scheduled Compliance Date:</b>		19850822				

Return to Compliance: Observed  
 Actual Return to Compl: 19851029  
 Violation Responsible Agency: State

**Enforcement Details**

Enforcement Type: 310  
 Enforcement Type Description: FINAL 3008(A) COMPLIANCE ORDER  
 Enforcement Action Date: 19850807  
 Enf Disposition Status:  
 Disposition Status Date:  
 Enforcement Lead Agency: State  
 Proposed Penalty Amount: 3875  
 Final Amount: 3875  
 Paid Amount: 3875

**Violation Details**

Found Violation: Yes  
 Citation:  
 Violation Short Description: TSD - Manifest/Records/Reporting  
 Violation Type: 264.E  
 Violation Determined Date: 19850515  
 Scheduled Compliance Date:  
 Return to Compliance: Unverifiable  
 Actual Return to Compl: 19870402  
 Violation Responsible Agency: State

**Violation Details**

Found Violation: No  
 Citation:  
 Violation Short Description: TSD - Closure/Post-Closure  
 Violation Type: 264.G  
 Violation Determined Date: 19850318  
 Scheduled Compliance Date: 19850810  
 Return to Compliance: Observed  
 Actual Return to Compl: 19850830  
 Violation Responsible Agency: EPA

**Enforcement Details**

Enforcement Type: 120  
 Enforcement Type Description: WRITTEN INFORMAL  
 Enforcement Action Date: 19850607  
 Enf Disposition Status:  
 Disposition Status Date:  
 Enforcement Lead Agency: EPA  
 Proposed Penalty Amount:  
 Final Amount:  
 Paid Amount:

**Evaluation Details**

A numeric estimate of the relative severity of a hazardous substance release or potential release based on: (1) the relative potential of substances to cause hazardous situations; (2) the likelihood and rate at which the substances may affect human and environmental receptors; and (3) the severity and magnitude of potential effects. The score is computed using the hazard ranking system (HRS).

**RAT Def:** Response action that requires expeditious attention to reduce imminent and substantial dangers to human health, welfare, or the environment or an emergency response required within hours or days to address acute situations involving actual or potential threat to human health, the environment, or real or personal property due to the release of a hazardous substance. Characterization of a removal action as removal, not immediate removal or planned removal, started at the beginning of FY 1987. This code now takes the place of immediate removal (IR) and planned removal (PR).

Used Oil Refiner:		No				
Used Oil Burner:		No				
Used Oil Market Burner:		No				
Used Oil Spec Marketer:		No				

#### Hazardous Waste Handler Details

**Sequence No:** 1  
**Receive Date:** 19800818  
**Handler Name:** ALL COUNTY ENVIRONMENTAL SERVICE CORP  
**Source Type:** Notification  
**Federal Waste Generator Code:** 1  
**Generator Code Description:** Large Quantity Generator

#### Waste Code Details

**Hazardous Waste Code:** D000  
**Waste Code Description:** DESCRIPTION

**Hazardous Waste Code:** D001  
**Waste Code Description:** IGNITABLE WASTE

**Hazardous Waste Code:** D002  
**Waste Code Description:** CORROSIVE WASTE

**Hazardous Waste Code:** F001  
**Waste Code Description:** THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Hazardous Waste Code:** F002  
**Waste Code Description:** THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Hazardous Waste Code:** F003  
**Waste Code Description:** THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Hazardous Waste Code:** F004  
**Waste Code Description:** THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Hazardous Waste Code:** F005  
**Waste Code Description:** THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K009 DISTILLATION BOTTOMS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K011 BOTTOM STREAM FROM THE WASTEWATER STRIPPER IN THE PRODUCTION OF ACRYLONITRILE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K013 BOTTOM STREAM FROM THE ACETONITRILE COLUMN IN THE PRODUCTION OF ACRYLONITRILE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K014 BOTTOMS FROM THE ACETONITRILE PURIFICATION COLUMN IN THE PRODUCTION OF ACRYLONITRILE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K015 STILL BOTTOMS FROM THE DISTILLATION OF BENZYL CHLORIDE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K016 HEAVY ENDS OR DISTILLATION RESIDUES FROM THE PRODUCTION OF CARBON TETRACHLORIDE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K017 HEAVY ENDS (STILL BOTTOMS) FROM THE PURIFICATION COLUMN IN THE PRODUCTION OF EPICHLOROHYDRIN.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K018 HEAVY ENDS FROM THE FRACTIONATION COLUMN IN ETHYL CHLORIDE PRODUCTION.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K019 HEAVY ENDS FROM THE DISTILLATION OF ETHYLENE DICHLORIDE IN ETHYLENE DICHLORIDE PRODUCTION.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K020 HEAVY ENDS FROM THE DISTILLATION OF VINYL CHLORIDE IN VINYL CHLORIDE MONOMER PRODUCTION.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K021 AQUEOUS SPENT ANTIMONY CATALYST WASTE FROM FLUOROMETHANE PRODUCTION.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K022 DISTILLATION BOTTOM TARS FROM THE PRODUCTION OF PHENOL/ACETONE FROM CUMENE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K023 DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K024 DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K025 DISTILLATION BOTTOMS FROM THE PRODUCTION OF NITROBENZENE BY THE NITRATION OF BENZENE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K026 STRIPPING STILL TAILS FROM THE PRODUCTION OF METHYL ETHYL PYRIDINES.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K027 CENTRIFUGE AND DISTILLATION RESIDUES FROM TOLUENE DIISOCYANATE PRODUCTION.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K028 SPENT CATALYST FROM THE HYDROCHLORINATOR REACTOR IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K029 WASTE FROM THE PRODUCT STEAM STRIPPER IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.	
<b>Hazardous Waste Code:</b> <b>Waste Code Description:</b>					K030 COLUMN BOTTOMS OR HEAVY ENDS FROM THE COMBINED PRODUCTION OF TRICHLOROETHYLENE AND PERCHLOROETHYLENE.	
<b>Hazardous Waste Code:</b>					K048	

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
<b>Waste Code Description:</b>					DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>				K049		
<b>Waste Code Description:</b>					SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>				K050		
<b>Waste Code Description:</b>					HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>				K051		
<b>Waste Code Description:</b>					API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>				K052		
<b>Waste Code Description:</b>					TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>				K083		
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM ANILINE PRODUCTION.	
<b>Hazardous Waste Code:</b>				K085		
<b>Waste Code Description:</b>					DISTILLATION OR FRACTIONATION COLUMN BOTTOMS FROM THE PRODUCTION OF CHLOROBENZENES.	
<b>Hazardous Waste Code:</b>				K086		
<b>Waste Code Description:</b>					SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.	
<b>Hazardous Waste Code:</b>				K087		
<b>Waste Code Description:</b>					DECANTER TANK TAR SLUDGE FROM COKING OPERATIONS.	
<b>Hazardous Waste Code:</b>				K093		
<b>Waste Code Description:</b>					DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.	
<b>Hazardous Waste Code:</b>				K094		
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.	
<b>Hazardous Waste Code:</b>				K095		
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.	
<b>Hazardous Waste Code:</b>				K101		
<b>Waste Code Description:</b>					DISTILLATION TAR RESIDUES FROM THE DISTILLATION OF ANILINE-BASED COMPOUNDS IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.	
<b>Hazardous Waste Code:</b>				K103		
<b>Waste Code Description:</b>					PROCESS RESIDUES FROM ANILINE EXTRACTION FROM THE PRODUCTION OF ANILINE.	
<b>Hazardous Waste Code:</b>				K105		
<b>Waste Code Description:</b>					SEPARATED AQUEOUS STREAM FROM THE REACTOR PRODUCT WASHING STEP IN THE PRODUCTION OF CHLOROBENZENES.

					PRODUCTION.	
<b>Hazardous Waste Code:</b>					K020	
<b>Waste Code Description:</b>					HEAVY ENDS FROM THE DISTILLATION OF VINYL CHLORIDE IN VINYL CHLORIDE MONOMER PRODUCTION.	
<b>Hazardous Waste Code:</b>					K021	
<b>Waste Code Description:</b>					AQUEOUS SPENT ANTIMONY CATALYST WASTE FROM FLUOROMETHANE PRODUCTION.	
<b>Hazardous Waste Code:</b>					K022	
<b>Waste Code Description:</b>					DISTILLATION BOTTOM TARS FROM THE PRODUCTION OF PHENOL/ACETONE FROM CUMENE.	
<b>Hazardous Waste Code:</b>					K023	
<b>Waste Code Description:</b>					DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.	
<b>Hazardous Waste Code:</b>					K024	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.	
<b>Hazardous Waste Code:</b>					K025	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF NITROBENZENE BY THE NITRATION OF BENZENE.	
<b>Hazardous Waste Code:</b>					K026	
<b>Waste Code Description:</b>					STRIPPING STILL TAILS FROM THE PRODUCTION OF METHYL ETHYL PYRIDINES.	
<b>Hazardous Waste Code:</b>					K027	
<b>Waste Code Description:</b>					CENTRIFUGE AND DISTILLATION RESIDUES FROM TOLUENE DIISOCYANATE PRODUCTION.	
<b>Hazardous Waste Code:</b>					K028	
<b>Waste Code Description:</b>					SPENT CATALYST FROM THE HYDROCHLORINATOR REACTOR IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.	
<b>Hazardous Waste Code:</b>					K029	
<b>Waste Code Description:</b>					WASTE FROM THE PRODUCT STEAM STRIPPER IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.	
<b>Hazardous Waste Code:</b>					K030	
<b>Waste Code Description:</b>					COLUMN BOTTOMS OR HEAVY ENDS FROM THE COMBINED PRODUCTION OF TRICHLOROETHYLENE AND PERCHLOROETHYLENE.	
<b>Hazardous Waste Code:</b>					K048	
<b>Waste Code Description:</b>					DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>					K049	
<b>Waste Code Description:</b>					SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>					K051	
<b>Waste Code Description:</b>					API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>					K052	
<b>Waste Code Description:</b>					TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>					K083	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM ANILINE PRODUCTION.	
<b>Hazardous Waste Code:</b>					K085	
<b>Waste Code Description:</b>					DISTILLATION OR FRACTIONATION COLUMN BOTTOMS FROM THE PRODUCTION OF CHLOROBENZENES.	
<b>Hazardous Waste Code:</b>					K086	
<b>Waste Code Description:</b>					SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.	
<b>Hazardous Waste Code:</b>					K087	
<b>Waste Code Description:</b>					DECANTER TANK TAR SLUDGE FROM COKING OPERATIONS.	
<b>Hazardous Waste Code:</b>					K093	
<b>Waste Code Description:</b>					DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.	
<b>Hazardous Waste Code:</b>					K094

**Waste Code Details**

**Hazardous Waste Code:** D000  
**Waste Code Description:** DESCRIPTION

**Hazardous Waste Code:** D002  
**Waste Code Description:** CORROSIVE WASTE

**Hazardous Waste Code:** F001  
**Waste Code Description:** THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Hazardous Waste Code:** F002  
**Waste Code Description:** THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Hazardous Waste Code:** F003  
**Waste Code Description:** THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
					SOLVENT MIXTURES.	
<b>Hazardous Waste Code:</b>					F004	
<b>Waste Code Description:</b>					THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
<b>Hazardous Waste Code:</b>					F005	
<b>Waste Code Description:</b>					THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
<b>Hazardous Waste Code:</b>					K009	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.	
<b>Hazardous Waste Code:</b>					K010	
<b>Waste Code Description:</b>					DISTILLATION SIDE CUTS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.	
<b>Hazardous Waste Code:</b>					K013	
<b>Waste Code Description:</b>					BOTTOM STREAM FROM THE ACETONITRILE COLUMN IN THE PRODUCTION OF ACRYLONITRILE.	
<b>Hazardous Waste Code:</b>					K014	
<b>Waste Code Description:</b>					BOTTOMS FROM THE ACETONITRILE PURIFICATION COLUMN IN THE PRODUCTION OF ACRYLONITRILE.	
<b>Hazardous Waste Code:</b>					K015	
<b>Waste Code Description:</b>					STILL BOTTOMS FROM THE DISTILLATION OF BENZYL CHLORIDE.	
<b>Hazardous Waste Code:</b>					K016	
<b>Waste Code Description:</b>					HEAVY ENDS OR DISTILLATION RESIDUES FROM THE PRODUCTION OF CARBON TETRACHLORIDE.	
<b>Hazardous Waste Code:</b>					K017	
<b>Waste Code Description:</b>					HEAVY ENDS (STILL BOTTOMS) FROM THE PURIFICATION COLUMN IN THE PRODUCTION OF EPICHLOROHYDRIN.	
<b>Hazardous Waste Code:</b>					K018	
<b>Waste Code Description:</b>					HEAVY ENDS FROM THE FRACTIONATION COLUMN IN ETHYL CHLORIDE PRODUCTION.	
<b>Hazardous Waste Code:</b>					K019	
<b>Waste Code Description:</b>					HEAVY ENDS FROM THE DISTILLATION OF ETHYLENE DICHLORIDE IN ETHYLENE DICHLORIDE PRODUCTION.	
<b>Hazardous Waste Code:</b>					K020	
<b>Waste Code Description:</b>					HEAVY ENDS FROM THE DISTILLATION OF VINYL CHLORIDE IN VINYL CHLORIDE MONOMER PRODUCTION.	
<b>Hazardous Waste Code:</b>					K021	
<b>Waste Code Description:</b>					AQUEOUS SPENT ANTIMONY CATALYST WASTE FROM FLUOROMETHANE PRODUCTION.	
<b>Hazardous Waste Code:</b>					K022	
<b>Waste Code Description:</b>					DISTILLATION BOTTOM TARS FROM THE PRODUCTION OF PHENOL/ACETONE FROM CUMENE.	
<b>Hazardous Waste Code:</b>					K023	
<b>Waste Code Description:</b>					DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.	
<b>Hazardous Waste Code:</b>					K024	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.	
<b>Hazardous Waste Code:</b>					K025	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF NITROBENZENE BY THE NITRATION OF BENZENE.	
<b>Hazardous Waste Code:</b>					K026	
<b>Waste Code Description:</b>					STRIPPING STILL TAILS FROM THE PRODUCTION OF METHYL ETHYL PYRIDINES.	
<b>Hazardous Waste Code:</b>					K027	

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
<b>Waste Code Description:</b>					CENTRIFUGE AND DISTILLATION RESIDUES FROM TOLUENE DIISOCYANATE PRODUCTION.	
<b>Hazardous Waste Code:</b>					K028	
<b>Waste Code Description:</b>					SPENT CATALYST FROM THE HYDROCHLORINATOR REACTOR IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.	
<b>Hazardous Waste Code:</b>					K029	
<b>Waste Code Description:</b>					WASTE FROM THE PRODUCT STEAM STRIPPER IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.	
<b>Hazardous Waste Code:</b>					K030	
<b>Waste Code Description:</b>					COLUMN BOTTOMS OR HEAVY ENDS FROM THE COMBINED PRODUCTION OF TRICHLOROETHYLENE AND PERCHLOROETHYLENE.	
<b>Hazardous Waste Code:</b>					K048	
<b>Waste Code Description:</b>					DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>					K049	
<b>Waste Code Description:</b>					SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>					K051	
<b>Waste Code Description:</b>					API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>					K052	
<b>Waste Code Description:</b>					TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.	
<b>Hazardous Waste Code:</b>					K083	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM ANILINE PRODUCTION.	
<b>Hazardous Waste Code:</b>					K085	
<b>Waste Code Description:</b>					DISTILLATION OR FRACTIONATION COLUMN BOTTOMS FROM THE PRODUCTION OF CHLOROBENZENES.	
<b>Hazardous Waste Code:</b>					K086	
<b>Waste Code Description:</b>					SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.	
<b>Hazardous Waste Code:</b>					K087	
<b>Waste Code Description:</b>					DECANTER TANK TAR SLUDGE FROM COKING OPERATIONS.	
<b>Hazardous Waste Code:</b>					K093	
<b>Waste Code Description:</b>					DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.	
<b>Hazardous Waste Code:</b>					K094	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.	
<b>Hazardous Waste Code:</b>					K095	
<b>Waste Code Description:</b>					DISTILLATION BOTTOMS FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.	
<b>Hazardous Waste Code:</b>					K101	
<b>Waste Code Description:</b>					DISTILLATION TAR RESIDUES FROM THE DISTILLATION OF ANILINE-BASED COMPOUNDS IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.	
<b>Hazardous Waste Code:</b>					K103	
<b>Waste Code Description:</b>					PROCESS RESIDUES FROM ANILINE EXTRACTION FROM THE PRODUCTION OF ANILINE.	
<b>Hazardous Waste Code:</b>					K105	
<b>Waste Code Description:</b>					SEPARATED AQUEOUS STREAM FROM THE REACTOR PRODUCT WASHING STEP IN THE PRODUCTION OF CHLOROBENZENES.

**Location Longitude:** -73.994543

**Violation/Evaluation Summary**

**Note:** NO RECORDS: As of Jan 2022, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

**Handler Summary**

**Importer Activity:** No  
**Mixed Waste Generator:** No  
**Transporter Activity:** No  
**Transfer Facility:** No  
**Onsite Burner Exemption:** No  
**Furnace Exemption:** No  
**Underground Injection Activity:** No  
**Commercial TSD:** No  
**Used Oil Transporter:** No  
**Used Oil Transfer Facility:** No  
**Used Oil Processor:** No  
**Used Oil Refiner:** No  
**Used Oil Burner:** No  
**Used Oil Market Burner:** No  
**Used Oil Spec Marketer:** No

**Hazardous Waste Handler Details**

**Sequence No:** 1  
**Receive Date:** 19930202  
**Handler Name:** RIVER ROAD AMERICAN SERVICE  
**Source Type:** Notification  
**Federal Waste Generator Code:** 3  
**Generator Code Description:** Very Small Quantity Generator

**Waste Code Details**

**Hazardous Waste Code:** D001  
**Waste Code Description:** IGNITABLE WASTE  
  
**Hazardous Waste Code:** D018  
**Waste Code Description:** BENZENE

**Hazardous Waste Handler Details**

**Sequence No:** 1  
**Receive Date:** 20060101  
**Handler Name:** RIVER ROAD AMERICAN SERVICE  
**Source Type:** Implementer  
**Federal Waste Generator Code:** N  
**Generator Code Description:** Not a Generator, Verified

**Hazardous Waste Handler Details**

**Sequence No:** 2  
**Receive Date:** 20070101  
**Handler Name:** RIVER ROAD AMERICAN SERVICE  
**Source Type:** Implementer  
**Federal Waste Generator Code:** N  
**Generator Code Description:** Not a Generator, Verified

**Violation/Evaluation Summary**

**Note:** VIOLATION or UNDETERMINED: There are VIOLATION or UNDETERMINED details or records associated with this facility (EPA ID) in the Compliance Monitoring and Enforcement table dated Jan, 2022.

**Violation Details**

**Found Violation:** Yes  
**Citation:**  
**Violation Short Description:** Generators - General  
**Violation Type:** 262.A  
**Violation Determined Date:** 19940517  
**Scheduled Compliance Date:** 19940617  
**Return to Compliance:** Observed  
**Actual Return to Compl:** 19940629  
**Violation Responsible Agency:** State

**Enforcement Details**

**Enforcement Type:** 120  
**Enforcement Type Description:** WRITTEN INFORMAL  
**Enforcement Action Date:** 19940517  
**Enf Disposition Status:**  
**Disposition Status Date:**  
**Enforcement Lead Agency:** State  
**Proposed Penalty Amount:**  
**Final Amount:**  
**Paid Amount:**

**Evaluation Details**

**Evaluation Start Date:** 19940629  
**Evaluation Type Description:** NON-FINANCIAL RECORD REVIEW  
**Violation Short Description:** Generators - General  
**Return to Compliance Date:** 19940629  
**Evaluation Agency:** State

**Evaluation Start Date:** 19940517  
**Evaluation Type Description:** CASE DEVELOPMENT INSPECTION  
**Violation Short Description:** Generators - General  
**Return to Compliance Date:** 19940629

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

### **Standard Environmental Record Sources**

#### **Federal**

##### **Formerly Utilized Sites Remedial Action Program:**

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

**Government Publication Date: Mar 4, 2017**

##### **National Priority List:**

[NPL](#)

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Jan 25, 2022**

##### **National Priority List - Proposed:**

[PROPOSED NPL](#)

Sites proposed - by the EPA, the state agency, or concerned citizens - for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Jan 25, 2022**

##### **Deleted NPL:**

[DELETED NPL](#)

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Jan 25, 2022**

**SEMS List 8R Active Site Inventory:**

[SEMS](#)

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date: Feb 24, 2022**

**SEMS List 8R Archive Sites:**

[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date: Feb 24, 2022**

**Inventory of Open Dumps, June 1985:**

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date: Jun 1985**

**Comprehensive Environmental Response, Compensation and Liability Information System -**

[CERCLIS](#)

**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date: Oct 25, 2013**

**EPA Report on the Status of Open Dumps on Indian Lands:**

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date: Dec 31, 1998**

**CERCLIS - No Further Remedial Action Planned:**

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date: Oct 25, 2013**

**CERCLIS Liens:**

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Jan 30, 2014**

**RCRA CORRACTS-Corrective Action:**

[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date: Jan 31, 2022**

**RCRA non-CORRACTS TSD Facilities:**

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date: Jan 31, 2022**

**RCRA Generator List:**

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Jan 31, 2022**

**RCRA Small Quantity Generators List:**

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Jan 31, 2022**

**RCRA Very Small Quantity Generators List:**

[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date: Jan 31, 2022**

**RCRA Non-Generators:**

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Jan 31, 2022**

**RCRA Sites with Controls:**

[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

**Government Publication Date: Jan 31, 2022**

**Federal Engineering Controls-ECs:**

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Dec 30, 2021**

**Federal Institutional Controls- ICs:**

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date: Dec 30, 2021**

**Land Use Control Information System:**

[LUCIS](#)

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

**Government Publication Date:** Sep 1, 2006

**Institutional Control Boundaries at NPL sites:**

[NPL IC](#)

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

**Government Publication Date:** Jan 25, 2022

**Emergency Response Notification System:**

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1982-1986

**Emergency Response Notification System:**

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1987-1989

**Emergency Response Notification System:**

[ERNS](#)

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

**Government Publication Date:** Dec 31, 2021

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date:** Aug 20, 2021

**FEMA Underground Storage Tank Listing:**

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date:** Dec 31, 2017

**Facility Response Plan:**

[FRP](#)

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date:** Dec 2, 2020

**Historical Gas Stations:**

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

**Government Publication Date:** Jul 1, 1930

**Petroleum Refineries:**

REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date:** Jul 10, 2020

**Petroleum Product and Crude Oil Rail Terminals:**

BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

**Government Publication Date:** Apr 28, 2020

**LIEN on Property:**

SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date:** Feb 24, 2022

**Superfund Decision Documents:**

SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date:** Nov 16, 2021

**State**

**Site Remediation Program Delisted Sites List:**

DELISTED SRP

A list of sites that once appeared on the Site Remediation Program site list from the New Jersey Department of Environmental Protection (NJDEP) Data Miner but are no longer on the list.

**Government Publication Date:** Nov 11, 2021

**Known Contaminated Sites in New Jersey:**

SHWS

The Known Contaminated Sites List (KCSNJ) for New Jersey are those sites and properties where contamination of soil or ground water has been confirmed at levels equal to or greater than applicable standards. This list of Known Contaminated Sites may include sites where remediation is either currently under way, required but not yet initiated, or has been completed. Record details from GIS Open Data KCSNJ and New Jersey Department of Environmental Protection (NJDEP) Site Remediation Program KCSNJ Active, Pending, and Closed Sites reports. This database is state equivalent CERCLIS.

**Government Publication Date:** Mar 25, 2022

**Registry of Inactive Hazardous Waste Disposal Sites in New York State:**

SHWS

State-and tribal- equivalent CERCLIS. State Superfund Program (Inactive Hazardous Waste Disposal Site Remedial Program) (IHWDS) - Oversees the identification, investigation and cleanup of sites where consequential amounts of hazardous waste exist. These sites go through a process of investigation, evaluation, cleanup and monitoring that has several distinct stages. This list is made available by New York State Department of Environmental Conservation's State Superfund Program.

**Government Publication Date:** Mar 17, 2022

**Delisted Known Contaminated Sites:**

DSHW

The listing of sites removed from Known Contaminated Sites in New Jersey (KCSNJ). KCSNJ is an inventory that includes all sites in New Jersey with confirmed contamination. Sites are classified as either 'Active Sites with Confirmed Contamination', 'Pending Sites with Confirmed Contamination', or 'Closed Sites with Remediated Contamination'. Active Sites are those sites having one or more active cases (with any number of pending and/or closed cases). Pending Sites are those sites having one or more pending cases, no active cases, and any number of closed cases. Closed sites are those sites having only closed cases (sites in this category have no active or pending cases). This database is state equivalent CERCLIS.

**Government Publication Date:** Mar 25, 2022

**Delisted Registry of Inactive Hazardous Waste Disposal Sites in New York:**

DELISTED SHWS

This database contains a Registry of Inactive Hazardous Waste Disposal sites which have been removed from New York Department of Environmental Conservation's Environmental Site Remediation database.

**Hazardous Substance Waste Disposal Sites:**

HSWDS

A list of sites included in Hazardous Substance Waste Disposal Site Study reports made available by the New York Department of Environmental Conservation Division of Hazardous Waste Remediation. Provides information regarding the evolving status of hazardous substance waste disposal sites in New York.

Government Publication Date: Oct 24, 2003

**Site Re-Evaluation:**

RE EVAL

The sites listed were removed from the Department of Environmental Protection (DEP) Known Contaminated Sites in New Jersey (KCSNJ) report for reevaluation by the Site Remediation Program. These pending sites were a group of contaminated sites awaiting the execution of an oversight document, such as a Memorandum of Agreement or Administrative Consent Order, or the availability of resources for a publicly funded action prior to assignment to a specific remedial bureau. Due to the longevity that some of these sites had in this status and the possibility that some of the pending environmental concerns may have been addressed through subsequent remedial activities, the Department started reevaluating the pending environmental issues against the site's remedial history and current conditions. This database is state equivalent CERCLIS.

Government Publication Date: Sept 2007

**Solid Waste Facilities and Landfills:**

SWF/LF

The New Jersey Department of Environmental Protection (DEP) Solid and Hazardous Waste Management Program maintains the New Jersey Landfill database. The information has been compiled from several data sources and includes not only registered landfills, but also suspected illegal and preregulatory sites. The DEP describes the list as a work in progress.

Government Publication Date: Feb 14, 2022

**Vapor Intrusion Legacy Site List:**

VAPOR

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion. This list is made available by Department of Environmental Conservation's Vapor Intrusion Legacy Site List. This database is state equivalent CERCLIS.

Government Publication Date: Dec 31, 2018

**Non-Operating Landfills List:**

NON OLF

List of Non-Operating Landfills, including those having suspected or known contamination. The landfills included in this list are non-operating and historic landfills identified by, or reported to, the Department of Environmental Protection. The Site Remediation Program developed this inventory, through collaboration with local and regional environmental agencies, community representatives, and through review of historic materials, to prevent injury to human and ecological resources.

Government Publication Date: Jul 2007

**Solid Waste Facilities and Landfills:**

SWF/LF

Solid Waste Information Management System (SWIMS) is an inventory containing active and inactive facilities throughout the state. This list is made available by Department of Environmental Conservation's Solid Waste Information Management System (SWIMS).

Government Publication Date: Oct 26, 2021

**Site Remediation Program:**

SITE REMEDIATION

List of Site Remediation Program sites from the New Jersey Department of Environmental Protection (NJDEP) Data Miner. Includes: cases where contamination is suspected, but not yet confirmed (including potential LUST cases); publicly funded as well as privately funded sites; sites with Underground Storage Tank (UST) contamination and remediation (LUST); Superfund sites, Brownfields, Licensed Site Remediation Professional (LSRP) sites; and sites under the Industrial Site Recovery Act (ISRA).

Government Publication Date: Nov 11, 2021

**Inactive Landfill Facilities:**

LANDFILL INACTIVE

List of inactive landfills in the State of New York. This data is made available by the New York State Department of Environmental Conservation (DEC). DEC notes that these are preliminary data and should not be regarded as a complete inventory of all landfills in the State, and also that site locations and attributes are preliminary and should not be relied upon without independent verification.

Government Publication Date: Nov 1, 2021

**Waste Tire Facilities:**

WASTE TIRE

This list of active Waste Tire Facilities is maintained by the New York State Department of Environmental Conservation. Waste tire storage facilities (WTSF) store waste tires or portions of waste tires. Most of these facilities require Part 360 permits, but under certain conditions a registration maybe available.

Government Publication Date: Mar 24, 2021

**Recycling Facilities:**

[RECYCLING](#)

The Department of Environmental Conservation (DEC), Division of Materials Management (DMM), Bureau of Permitting and Planning regulates solid waste management facilities in accordance with 6 NYCRR Part 360. Information pertaining to those facilities is maintained with the Division's Solid Waste Information Management System (SWIMS) database. The Facility List is a dataset related to solid waste management facilities operating in the state, and includes such information as facility location, contact names and associated information, waste types managed, and regulatory information.

Government Publication Date: Mar 24, 2021

**LUST- Leaking Underground Storage Tanks:**

[LUST](#)

A listing of the regulated Underground Storage Tank (UST) contamination cases recorded by the Department of Environmental Protection (DEP) Site Remediation and Waste Management (SRWM) program. Contains remedial and non-remedial information on sites subject to the Underground Storage of Hazardous Substances Act.

Government Publication Date: Dec 8, 2021

**UST Active Remediation:**

[UST REM](#)

A List of regulated Underground Storage Tanks (USTs) that have a cleanup underway, this data made available by State of New Jersey Department of Environmental Protection.

Government Publication Date: Feb 4, 2022

**Leaking Storage Tanks:**

[LST](#)

This database contains records of chemical and petroleum spill incidents. They include leaking aboveground storage tanks or leaking underground storage tanks, with incidents of tank test failures, tank failures and tank overflow. This list is made available by New York State Department of Environmental Conservation's Spill Response Program.

Government Publication Date: Jan 20, 2022

**Historic LUST- Leaking Underground Storage Tanks:**

[HIST LUST](#)

Historic Leaking Underground Storage Tanks. Spill records taken from Pre-2002 Incidents database (historic). This is no longer maintained or updated by the New Jersey Department of Environmental Protection (DEP).

Government Publication Date: Dec 1, 2002

**Delisted Leaking Storage Tanks:**

[DELISTED LST](#)

List of Leaking Storage Tank sites which has been removed from New York Department of Environmental Conservation's Spill Response Program

Government Publication Date: Jan 20, 2022

**Delisted Leaking or Remediation Storage Tanks:**

[DELISTED LST](#)

Sites removed from the Site Remediation and Waste Management (SRWM) program's Underground Storage Tank (UST) contamination cases or the Department of Environmental Protection (DEP)'s list of Underground Storage Tank (UST) Active Remediation.

Government Publication Date: Feb 4, 2022

**Underground Storage Tanks- UST-Petroleum Bulk Storage (PBS):**

[UST](#)

Facilities within the Petroleum Bulk Storage (PBS) that have underground storage tanks. Underground petroleum storage facilities with a combined storage capacity over eleven hundred (1,100) gallons. This list is made available by New York Department of Environmental Conservation's Environmental Site Database Search.

Government Publication Date: Mar 17, 2022

**The Bulk Storage Program Database - AST:**

[AST](#)

Facilities within the Petroleum Bulk Storage (PBS) that have aboveground storage tanks. Aboveground petroleum storage facilities with a combined storage capacity over eleven hundred (1,100) gallons. This list is made available by New York State Department of Environmental conservation's Petroleum Bulk Storage (PBS) program.

Government Publication Date: Mar 17, 2022

**Delisted Storage Tank Remediation:**

[DELIST STR](#)

This database contains a list of the inactive tanks removed from the New Jersey Department of Environmental Protection (DEP)'s UST Active Remediation database.

Government Publication Date: Jul 07, 2016

**Underground Storage Tanks:**

UST

List of Underground Storage Tank (UST)s regulated by the New Jersey Department of Environmental Protection (DEP) under their Underground Storage Tank Program.

**Government Publication Date: Jun 22, 2021**

**Petroleum Bulk Storage:**

TANKS

The Bulk Storage Program Database maintains the registrations of active and inactive bulk storage sites statewide. This database includes Petroleum Bulk Storage (PBS) tanks where no information is available on whether they are ASTs or USTs. This list is made available by Department of Environmental Conservation's Petroleum Bulk Storage (PBS) program.

**Government Publication Date: Mar 17, 2022**

**Delisted Storage Tanks:**

DELISTED TNK

This database contains a list of storage tank sites that were removed from the New Jersey Department of Environmental Protection (DEP) under their Underground Storage Tank Program.

**Government Publication Date: Jun 22, 2021**

**Major Oil Storage Facilities (MOSF):**

MOSF

In 1977, the New York State Legislature passed the "Oil Spill Prevention, Control and Compensation Act" (Article 12 of the Navigation Law). This law regulates all oil terminals and transport vessels operating in the waters of the State which have a storage capacity of 400,000 gallons or more. (Terminals and vessels with a capacity of 400,000 gallons or more are commonly referred to as major oil storage facilities or MOSFs). This list is made available by Department of Environmental Conservation's Major Oil Storage Facility (MOSF) Program.

**Government Publication Date: Mar 17, 2022**

**Chemical Bulk Storage (CBS):**

CBS

Facilities that store regulated hazardous substances in underground tanks. "Hazardous substance" means any substance listed as hazardous or acutely hazardous in 6 NYCRR Part 597 or a mixture thereof. This list is made available by Department of Environmental Conservation's Chemical Bulk Storage (CBS) Program.

**Government Publication Date: Mar 17, 2022**

**Major Facilities:**

MAJOR FAC

List of major & minor facilities recorded by the Department of Environmental Protection (DEP) Bureau of Release Prevention. The Spill Compensation and Control Act (the Spill Act, N.J.S.A. 58:10-23.11), establishes storage capacity as the basis for determining if a facility is major and thus subject to the Spill Act's planning requirements. A major facility is defined as a facility with a total, aggregate storage capacity of 20,000 gallons or more of hazardous substances other than petroleum products; 200,000 gallons or more of all hazardous substances including petroleum products; or an equivalent measure for substances not commonly measured by volume. This list also includes the status of minor facilities.

**Government Publication Date: Feb 4, 2022**

**Declaration of Environmental Restrictions / Deed Notices:**

DEED

List of all Declaration of Environmental Restrictions / Deed Notices (DER/DN) issued within the Department of Environmental Protection (DEP) Site Remediation and Waste Management (SRWM) program. "DER/DN" refers to a document that provides notice of specific real property contamination issues in accordance with N.J.A.C. 7:26 E, Appendix E.

**Government Publication Date: Jan 19, 2021**

**Delisted Storage Tanks:**

DELISTED TANKS

List of Storage Tank sites which has been removed from New York Department of Environmental Conservation's Environmental Site Database.

**Government Publication Date: Mar 17, 2022**

**Sites with a Classification Exception Area:**

CEA

Sites with a Classification Exception Area (CEA) issued within the Department of Environmental Protection (DEP) Site Remediation and Waste Management (SRWM) program. A CEA is an area where one or more constituent standards and designated uses are suspended in accordance with N. J.A.C. 7:9 C-1.6.

**Government Publication Date: Jan 19, 2021**

**Delisted County Records:**

DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

**Government Publication Date: Dec 15, 2021**

**Registry of Engineering Controls in New York State:**

ENG

Registry of Engineering Controls in New York State taken from the Environmental Site Remediation Database.

**Government Publication Date: Mar 17, 2022**

**Publicly Funded Cleanups Site Status Report 2003:**

PUB FUNDED

The Publicly Funded Cleanup Site Status Report (2003) details efforts by the New Jersey Department of Environmental Protection's (NJDEP) Site Remediation and Waste Management Program (SRWM) to investigate and clean up contaminated properties using public funds.

**Government Publication Date: Dec 1, 2003**

**Registry of Institutional Controls in New York State:**

INST

Registry of Institutional Controls in New York State taken from the Environmental Site Remediation Database.

**Government Publication Date: Mar 17, 2022**

**Brownfields:**

BROWNFIELDS

Any former or current commercial or industrial site, currently vacant or underutilized and on which there has been, or there is suspected to have been, a discharge of a contaminant. In 1997, the "Brownfield and Contaminated Site Remediation Act" (P.L. 1997, c.278 ) established the New Jersey Brownfields Redevelopment Task Force. The NJ Brownfields Redevelopment Task Force is served and managed by the Brownfields Program in the Office for Planning Advocacy.

**Government Publication Date: Mar 24, 2022**

**Brownfield Development Areas Polygons:**

BFLD DEV

A list of Brownfield Development Areas (BDAs) in New Jersey. A brownfield is any former or current commercial or industrial site that is currently vacant or underutilized and on which there has been, or there is suspected to have been, a discharge of contamination. Under the BDA approach, New Jersey Department of Environmental Protection (NJDEP) works with selected communities affected by multiple brownfields to design and implement remediation and reuse plans for these properties simultaneously. This data set is made available by the New Jersey Department of Environmental Protection Bureau of GIS.

**Government Publication Date: Aug 11, 2021**

**Voluntary Cleanup Agreements:**

VCP

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites. This list is made available by Department of Environmental Conservation's Voluntary Cleanup Program.

**Government Publication Date: Mar 17, 2022**

**Environmental Restoration Program Listing:**

ERP

Environmental Restoration Program - Provides municipalities with financial assistance for site investigation and remediation at eligible brownfield sites. In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (Bond Act). Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. This list is made available by Department of Environmental Conservation's Environmental Restoration Program.

**Government Publication Date: Mar 17, 2022**

**Voluntary Cleanup Program Sites:**

VCP

The New Jersey Department of Environmental Protection (NJDEP)'s Voluntary Cleanup Program (VCP) was eliminated when the Site Remediation Reform Act was signed into law on May 7, 2009.

**Government Publication Date: May 7, 2009**

**Brownfields Site List (Subset of Site Remediation):**

BROWNFIELDS

Brownfield Cleanup Program was developed to enhance private-sector cleanups of brownfields and to reduce development pressure on "Greenfields". A Brownfield site is real property, the redevelopment or reuse of which may be complicated by the presence or potential presence of a contaminant. Contaminants include hazardous waste and/or petroleum. This list is made available by Department of Environmental Conservation's Brownfield Cleanup Program.

**Government Publication Date: Mar 17, 2022**

**Tribal**

**Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands:**

INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 2, which includes New York and New Jersey. There are no LUST records in New York at this time.

**Government Publication Date: Jan 28, 2016**

**Leaking Underground Storage Tanks on Indian Lands:**

INDIAN LUST

Leaking Underground Storage Tanks (LUSTs) in Region 2. There are no LUST records in New Jersey at this time.

**Government Publication Date: Jan 28, 2016**

**Underground Storage Tanks (USTs) on Indian Lands:**

INDIAN UST

USTs on Tribal/Indian Lands in Region 2, which includes New York and New Jersey.

**Government Publication Date: Apr 04, 2016**

**Underground Storage Tanks (USTs) on Indian Lands:**

INDIAN UST

Underground Storage Tanks (USTs) in Region 2. There are no UST records in New Jersey at this time.

**Government Publication Date: Apr 4, 2016**

**Delisted Tribal Leaking Storage Tanks:**

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

**Government Publication Date: Oct 12, 2021**

**Delisted Tribal Underground Storage Tanks:**

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

**Government Publication Date: Oct 13, 2021**

**County**

**NYC OER Cleanup Sites:**

OER CLEANUP

Properties remediated under oversight of the New York City (NYC) Mayor's Office of Environmental Remediation (OER), both in the E-Designation program and the NYC Voluntary Cleanup Program. Includes sites completed and in progress.

**Government Publication Date: Mar 16, 2022**

**Additional Environmental Record Sources**

**Federal**

**Facility Registry Service/Facility Index:**

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

**Government Publication Date: Nov 2, 2020**

**Toxics Release Inventory (TRI) Program:**

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

**Government Publication Date: Aug 24, 2021**

**Perfluorinated Alkyl Substances (PFAS) Releases:**

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

**PFOA/PFOS Contaminated Sites:**

[PFAS NPL](#)

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Jan 11, 2022

**Perfluorinated Alkyl Substances (PFAS) Water Quality:**

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

**SSEHRI PFAS Contamination Sites:**

[PFAS SSEHRI](#)

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

Government Publication Date: Dec 12, 2019

**Hazardous Materials Information Reporting System:**

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

**National Clandestine Drug Labs:**

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 22, 2021

**Toxic Substances Control Act:**

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

**Hist TSCA:**

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

**FTTS Administrative Case Listing:**

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**FTTS Inspection Case Listing:**

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

**Potentially Responsible Parties List:**

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Mar 30, 2022

**State Coalition for Remediation of Drycleaners Listing:**

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

**Integrated Compliance Information System (ICIS):**

ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Oct 14, 2021

**Drycleaner Facilities:**

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2021

**Delisted Drycleaner Facilities:**

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2021

**Formerly Used Defense Sites:**

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: May 26, 2021

**Former Military Nike Missile Sites:**

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

**PHMSA Pipeline Safety Flagged Incidents:**

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

**Material Licensing Tracking System (MLTS):**

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Government Publication Date: May 11, 2021**

**Historic Material Licensing Tracking System (MLTS) sites:**

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

**Government Publication Date: Jan 31, 2010**

**Mines Master Index File:**

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

**Government Publication Date: Nov 2, 2021**

**Surface Mining Control and Reclamation Act Sites:**

[SMCRA](#)

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

**Government Publication Date: Dec 18, 2020**

**Mineral Resource Data System:**

[MRDS](#)

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

**Government Publication Date: Mar 15, 2016**

**Uranium Mill Tailings Radiation Control Act Sites:**

[URANIUM](#)

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

**Government Publication Date: Mar 4, 2017**

**Alternative Fueling Stations:**

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

**Government Publication Date: Dec 21, 2021**

**Superfunds Consent Decrees:**

[CONSENT DECREES](#)

A list of Superfund consent decrees made available by the Department of Justice, Environment & Natural Resources Division (ENRD).

**Government Publication Date: Sep 30, 2018**

**Registered Pesticide Establishments:**

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

**Government Publication Date: Apr 13, 2021**

**Polychlorinated Biphenyl (PCB) Notifiers:**

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

**Government Publication Date: Jan 20, 2022**

**State**

**Underground Injection Control Wells:**

[UIC](#)

A well permit is required from the Division of Mineral Resources for any brine disposal well deeper than 500 feet. This includes any operation to drill, deepen, plug back or convert a well. Regardless of well depth, the NYSDEC Division of Water must be contacted for a determination of whether a SPDES permit is necessary to operate any brine disposal well.

**Government Publication Date: Aug 6, 2018**

**Manufactured Gas Plants:**

[MGP](#)

A list of former Manufactured Gas Plants (MGP) made available by the New York Department of Environmental Conservation (NYSDEC). From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel. Former MGP structures such as gas holders, tar separators, wells, and tanks were often susceptible to spills and leaks. As a result, these structures were a significant source of contamination from the release of tar and other toxic by-products.

**Government Publication Date: Oct 16, 2019**

**Hazardous Material Incident database:**

[SPILLS](#)

Hazardous Material Incident database. Incidents reported to the Department of Environmental Protection's Environmental Action Line.

**Government Publication Date: Dec 8, 2021**

**Spill Incidents Database:**

[NY SPILLS](#)

Spill Incidents Database has records dating back to 1978. This database contains records of chemical and petroleum spill incidents. The DEC Spill Response program receives and compiles reports of hazardous material spills occurring anywhere in New York State. These reports are submitted through the Spill Hotline and other mechanisms, and entered by DEC spill response staff into the state's official data base of Spill Incidents Reports. This list is made available by New York State Department of Environmental Conservation's Spill Response Program.

**Government Publication Date: Jan 20, 2022**

**Historic Incidents:**

[HIS SPILL](#)

Pre-2003 Spill incident records. This is no longer maintained or updated by the New Jersey Department of Environmental Protection (DEP).

**Government Publication Date: Dec 1, 2002**

**Data Miner Sites:**

[ALL SITES](#)

A list of facilities and sites of environmental interest included in the New Jersey Department of Environmental Protection (NJDEP) Data Miner database. NJ Data Miner is compilation of data from various programs, and includes Air Quality Permitting and Reporting, Compliance and Enforcement, Hazardous Waste Manifest, Incidents and Complaints, Radon, and others.

**Government Publication Date: Nov 11, 2021**

**PFAS Remedial Sites:**

[PFAS CONTAM](#)

List of sites being addressed under one of the New York Department of Environmental Conservation (DEC) Division of Environmental Remediation (DER)'s remedial programs, where the waste or contaminant of concern is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

**Government Publication Date: Mar 17, 2022**

**Per- and Polyfluoroalkyl Substances (PFAS):**

[PFAS](#)

A list of sites surveyed by the New York Department of Environmental Conservation to determine locations that manufacture, use, store, or release into the environment materials containing Per- and Polyfluoroalkyl Substances (PFAS). Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Some PFAS are difficult to break down and persist in the environment that may cause harm to the public. This list is made available by the Department of Environmental Conservation of New York State.

**Government Publication Date: Jan 16, 2019**

**Chromate Waste Sites:**

**CHROMATE**

List of sites within New Jersey where chromate contamination of soil or ground water has been identified. This list of chromate waste sites includes sites where remediation is either currently under way, required but not yet initiated or has been completed. The information is obtained from data submissions produced by the various remedial programs within NJDEP using information supplied by the party responsible for the site

**Government Publication Date: Jun 2013**

**Landfill Investigations PFAS Sampling Results:**

**PFAS LANDFILL**

A list of inactive landfill sites that have been investigated for Per- and Polyfluoroalkyl Substances (PFAS) in the state of New York made available by the New York State Department of Environmental Conservation.

**Government Publication Date: Jun 30, 2020**

**Dry Cleaning Facilities:**

**DRYCLEANERS**

A list of registered drycleaners. This list is made available by the Department of Environmental Protection.

**Government Publication Date: Feb 25, 2022**

**Delisted Drycleaning Facility List:**

**DELISTED DRYCLEANERS**

A list of sites which were once dry cleaning facilities registered with New Jersey Department of Environmental Protection but are no longer used as dry cleaning facilities.

**Government Publication Date: Feb 25, 2022**

**Registered Dry Cleaner Facilities:**

**DRYCLEANERS**

The Division of Air Resources of the Department of Environmental Conservation (DEC) tracks all registered dry cleaner facilities.

**Government Publication Date: Mar 15, 2022**

**Delisted Dry Cleaner Facilities:**

**DELISTED DRYCLEANERS**

Sites removed from the list of dry cleaner facilities registered with the Department of Environmental Conservation (DEC)'s Division of Air Resources.

**Government Publication Date: Mar 15, 2022**

**Per- and Polyfluoroalkyl Substances (PFAS):**

**PFAS**

A list of incidents reported to the Department of Environmental Protection's Environmental Action Line, where one or more of the substances are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

**Government Publication Date: Dec 8, 2021**

**Industrial Site Recovery Act Database:**

**ISRA**

A list of Industrial Site Recovery Act (ISRA) cases made available by the New Jersey Department of Environmental Protection. The Industrial Site Recovery Act (ISRA) requires owners of facilities with specific industrial classifications to investigate and remediate prior to property transfers when the business ceases operations or is sold.

**Government Publication Date: Feb 9, 2022**

**Hazardous Waste Manifest - Facilities:**

**NY MANIFEST**

List of facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), with which no manifests are associated. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records.

**Government Publication Date: Jan 20, 2022**

**Pollutant Discharge Elimination System:**

**PDES**

New Jersey Pollutant Discharge Elimination System (NJPDDES) surface water discharge pipe GIS point coverage compiled from GPSed locations, NJPDDES databases, and permit applications. This coverage contains the surface water discharge points and the receiving waters coordinates for the active as well as terminated pipes.

**Government Publication Date: Jan 13, 2022**

**New Jersey Environmental Management System (NJEMS) Sites:**

**NJEMS**

New Jersey Environmental Management System (NJEMS) Sites are regulated by NJ Department of Environmental Protection (NJDEP) under one or more regulatory permitting or enforcement programs, or sites that are otherwise of some interest to the NJDEP program. This database is published by NJDEP.

**Government Publication Date: Mar 14, 2022**

**Receivers from Hazardous Waste Manifests:**

[REC MANIFEST](#)

List of receiver facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), which are identified as a receiver in associated manifests. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records. Hazardous Waste Code Descriptions are from NY Part 371.4 (6 CRR-NY 371.4) Identification and Listings of Hazardous Waste, unless otherwise noted.  
**Government Publication Date: Jan 20, 2022**

**Generators from Hazardous Waste Manifests:**

[GEN MANIFEST](#)

List of generator facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), which are identified as a generator in associated manifests. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records. Hazardous Waste Code Descriptions are from NY Part 371.4 (6 CRR-NY 371.4) Identification and Listings of Hazardous Waste, unless otherwise noted.  
**Government Publication Date: Jan 20, 2022**

**New York City E-Designated Sites:**

[E DESIGNATION](#)

List of sites with an E-Designation - a NYC zoning map designation that indicates the presence of an environmental requirement pertaining to potential hazardous materials contamination, window/wall noise attenuation, or air quality impacts on a particular tax lot. The New York City Office of Environmental Remediation administers the E-Designation Environmental Review Program to avoid significant adverse impacts to human health or the environment through exposure to these hazards.  
**Government Publication Date: Oct 1, 2021**

**Registered Cooling Towers:**

[COOLING TOWERS](#)

Locations of cooling towers registered with New York State, made available by the Center for Environmental Health. In August 2015, the New York State Department of Health released emergency regulations requiring the owners of cooling towers to register them with New York State. These data are self-reported by owners and/or property managers of cooling towers in service in New York State.  
**Government Publication Date: Mar 8, 2022**

**Tier 2 Report:**

[TIER 2](#)

A list of Tier 2 facilities in the state of New York. This is a list of facilities which have reported hazardous substances provided by Homeland Security and Emergency Services.  
**Government Publication Date: Jan 28, 2019**

**NY DEC Projects of Interest:**

[PROJECTS](#)

A list of permits for notable projects - permit applications that have received a lot of public attention - made available by the New York Department of Environmental Conservation (DEC).  
**Government Publication Date: Nov 26, 2021**

**Air Permitted Facilities:**

[AIR PERMITS](#)

This list of issued state facility air permits is maintained by the New York State Department of Environmental Conservation. Owners or operators of emission sources that are subject to 6 NYCRR Subpart 201-5 must obtain a State facility permit. Draft permits are official versions of permits whose initial development is complete, public notice given, and made available for public review and comment. These permits are prepared by the Division of Air Resources regional staff of the New York Department of Environmental Conservation. Please note: An Issued permit is valid for a stated period of time. Modifications may be made to an issued permit for the remainder of the active permit.  
**Government Publication Date: Dec 22, 2021**

**Liens Listing:**

[LIEN](#)

New York Environmental Protection and Spill Compensation Fund (Oil Spill Fund) places liens on properties that are sites of oil spills when the owners are responsible parties and fail to pay for cleanup. The Office of the State Comptroller provides this listing of liens information from the Oil Spill Fund.  
**Government Publication Date: May 20, 2020**

**Tribal**

**No Tribal additional environmental record sources available for this State.**

**County**

***No County additional environmental record sources available for this State.***

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

New York State Department of Environmental Protection Eel Project Intern

New York-New Jersey Trail Conference Geographic Information Systems Intern

## Experience Summary

Ms. Connolly is currently a Staff Assessor for Partner Engineering and Science Inc. (Partner). Her responsibilities include completing Phase I Environmental Site Assessments and Environmental Desktop Reports for a variety of clients during the commercial real estate process. Ms. Connolly performs all assessment according to ASTM Standards and the US Environmental Protection Agency's All Appropriate Inquiry (AAI), as well as customized formats, which allows her to provide accurate and thorough site assessments to exceed client expectations.

Ms. Connolly has worked for the New York State Department of Environmental Conservation as an Eel Project Intern, researching juvenile American Eels, "glass eels," which inhabit the Hudson River and the river's various tributaries. Ms. Connolly has experience working for the New York New Jersey Trail Conference as a summer intern. There she worked closely with Trail Conference Staff in mapping local invasive plant species in several New York and New Jersey local and state parks. Ms. Connolly also has completed relevant college coursework, including Principles of Environmental Assessment, Environmental Investigation and Remediation, Environmental Law, and Environmental Science and Human Values at Marist College.

## Project Experience

*Edgerton Apartments, Queens, New York.* Phase I Environmental Site Assessment prepared for NewPoint Real Estate Capital LLC. Site included a 7-story, 164,360-square foot mixed commercial and multi-family residential use complex.

*Falcon Apartments, Brooklyn, New York.* Phase I Environmental Site Assessment prepared for NewPoint Real Estate Capital LLC. Site included an 11-story, 112,712-square foot, multi-family residential complex.

*Lambertville Station and Lambertville Inn, Lambertville, New Jersey.* Phase I Environmental Site Assessment prepared for Genesis Investment Properties, LLC. Site included three-building, 39,924-square foot hotel consisting of 46 units, a restaurant, and storage area.

## Bridget Connolly

---

*Claude R. Boyd-Spencer Funeral Homes, West Islip, New York.* Phase I Environmental Site Assessment prepared for Firsttrust Bank. Site included a 6,400-square foot commercial building for funeral services.

*65 Newkirk Street, Jersey City, New Jersey.* Phase I Environmental Site Assessment prepared for Citibank, N.A. Site included a 6-story, 31,650-square foot, multi-family residential complex.

Phase I Environmental Site Assessments  
Transaction Screen Assessments  
Historical Records and Database Reviews  
Peer Reviews

## Experience Summary

Ms. Clayton has 20 years of experience in the environmental service industry consisting of due diligence assessments for a variety of property types with focus on the needs and requirements of a number of reporting standards including ASTM standards, Environmental Protection Agency (EPA)'s All Appropriate Inquiry (AAI), New Jersey Department of Environmental (NJDEP) Technical Regulations and customized client formats. Specifically, Ms. Clayton has performed Phase I Environmental Site Assessments, Preliminary Assessments, Phase II and Phase III Subsurface Investigations and Remediation (excavation oversight) activities.

Specifically, Ms. Clayton has served as a Project Assessor performing such tasks as soil and groundwater characterization and sampling, oversight of underground storage tank (UST) removal activities and excavation of contaminated soils. Additionally, Ms. Clayton has conducted site reconnaissance surveys for the purpose of identifying potential areas of concern (AOCs)/recognized environmental conditions (RECs) in accordance with ASTM Standards and NJDEP Technical Regulations. Duties also included informing the public about what actions are taking place at the various sites as well as technical management during the assessment, remediation design, and remedial implementation activities.

Ms. Clayton has conducted various soil investigation activities throughout the State of New Jersey. This involves the collection of soil samples at discrete intervals, vertically and horizontally to delineate the extent of impacted subsurface soils. These activities include oversight of licensed drillers advancing sampling equipment into subsurface soils at predetermined locations, and the interpretation of soil cores that have been extracted. Soil investigations also consist of identification and removal of USTs with appropriate post-excavation sampling per applicable regulations.

She has also provided oversight for installation of temporary and permanent monitoring wells by a licensed driller in locations that indicate contamination has reached groundwater; and oversight of long term monitoring of groundwater to determine if natural attenuation is occurring or if more active measures, such chemical and microbial injections need to take place.

## Kimberly Clayton

---

In addition, Ms. Clayton manages Phase I Environmental Site Assessments for numerous properties including gasoline stations, dry cleaners, manufacturing sites, industrial/warehouse facilities, hotels, office buildings, retail shopping centers, automotive repair facilities, and multi-use commercial/residential buildings. Ms. Clayton also serves as a technical reviewer on environmental due diligence assessments.

### Project Experience

*Bound Brook Board of Education, New Jersey* - Conducted a site reconnaissance survey of two schools associated with churches. The schools were intended to be subdivided from the church structures. The site inspections identified potential AOCs and a NJDEP Preliminary Assessment Report was prepared with recommendations/findings. Specifically, observations from the site reconnaissance survey indicated the presence of a UST. Subsequently a geophysical survey was conducted to identify the size and orientation of the tank and a licensed driller advanced soil borings around the indicated location of the tank to identify if subsurface soils were impacted by the tank contents. All laboratory results came back below the applicable NJDEP Soil Remediation Standards. Based on the proposed redevelopment, removal of the UST was recommended.

*Preliminary Assessments, Various Properties throughout New Jersey* - Ms. Clayton has conducted Preliminary Assessments for the following clients per NJDEP Technical Regulations in an attempt to identify potential AOCs:

- Lynch Industries
- AIC Ventures
- Ener-G Rudox
- Lockheed Martin Corporation

*Environmental Reports and Environmental Quality Assurance/Control (QA/QC), Nationwide* - Ms. Clayton has helped prepare and conduct quality assurance/quality control (QA/QC) reviews for Transaction Screen Assessments, Historical Records And Database Review (HRDR), Peer Review Reports, Phase I Environmental Site Assessments and Limited Phase I Environmental Site Assessments for industrial, commercial, residential and undeveloped properties for private entities, municipalities and banks including but not limited to:

- Greystone Servicing Corporation
- Ten-X
- California Bank & Trust
- HomeStreet Commercial Capital

*Phase I Environmental Site Assessments, Nationwide* - Ms. Clayton has managed Phase I Environmental Site Assessments and Database Review Reports for assigned clients, Citibank, N.A. and Regions Bank.

- Regions Bank – WD Townley & Son Lumber Co. – Phase I Environmental Site Assessment following Small Business Association (SBA) loan guidelines in Henderson, TX
- Regions Bank – Palmer Fabricating Co. Inc. – Phase I Environmental Site Assessment in Fort Payne, AL
- Citibank, N.A. – Mason Industries – Phase I Environmental Site Assessment for a manufacturing facility in Hauppauge, NY
- Citibank, N.A. – Bronx Park (Bronx NY) Phase II and Phase II – Phase I Environmental Site Assessments for multiple residential apartment buildings per Freddie Mac regulations

OSHA 40-Hour HAZWOPER  
OSHA 8-Hour HAZWOPER Refresher, Current  
Hazardous Waste Site Supervisor

## Highlights

20 years of experience in environmental consulting and contracting, industrial hygiene services, and due diligence services  
20 years of experience in Phase I and Phase II Environmental Site Assessments  
Soil and groundwater contamination investigations and remediation  
3 years of experience with Property Condition Assessments

## Experience Summary

Ms. Sauer is a Relationship Manager focusing on due diligence products for commercial real estate transactions. She services private and institutional equity investors, developers, financial institutions, Fannie Mae Lenders, and Freddie Mac Lenders with environmental site assessments, property condition assessments, seismic studies, construction monitoring, and remedial design/implementation. Ms. Sauer has served as an environmental scientist, project manager, senior author, or client manager for projects associated with thousands of real estate transactions, and is familiar with the due diligence requirements of a varied number of reporting standards, including the current standard ASTM E1527-13, EPA's All Appropriate Inquiry (AAI). She works closely with property managers, legal counsel, regulatory agencies, and special asset groups at banks providing insight into the risks and liabilities associated with properties and assistance in structuring various transactions.

In addition to due diligence assessments, Ms. Sauer has also performed and managed Phase II site investigations, underground storage tank management and closure activities, remedial investigations, and cleanups under various regulatory programs. The clients serviced for these projects included industrial and commercial clients, financial institutions, real estate developers, individual investors, municipal agencies, and non-profit organizations. Furthermore, Ms. Sauer has prepared and successfully implemented soil and groundwater remedial investigation, and remedial action work plans for the cleanup of facilities including industrial facilities, gasoline service stations, dry cleaner facilities, and vacant and/or undeveloped properties. Management responsibilities included consulting clients, negotiating with regulatory agencies, and using innovative remedial technologies for cost effective mitigation of project sites.

Her additional responsibilities include supervision of regional staff and overall responsibility of project scope/design, project and task implementation/execution, budget and schedule management and reporting. Ms. Sauer's Mid-Atlantic regional expertise and general expertise perfectly complements the wide variety of Partner project and client types.

## **Project Experience**

*Regions Bank, Various US locations.* Serves as Client Point Contact for performance of Phase I-II environmental site assessments, asbestos surveys, lead-based paint surveys as well as all due diligence reporting through Regions Small Business Administration (SBA) lending program. Managed all phases of report management and client interaction with Regions Bank's Environmental Risk Management group located in Birmingham, Alabama.

*Wendy's, Various US locations.* Serves as Client Point Contact for performance of Phase I-II environmental site assessments, asbestos surveys/abatement, lead-based paint surveys/abatement, geotechnical assessments, as well as UST removals and other remedial activities. Managed all phases of report management and client interaction with the Wendy's corporate team, including real estate, legal, and the construction groups for acquisition and new construction as well as renovation projects.

*Freddie Mac Due Diligence Portfolio, Multi-family properties in New York and New Jersey.* Project Manager for the due diligence services to secure Freddie Mac funding for 27 multi-family properties. The client needed cost-effective assessments for this high-profile acquisition project. Ms. Sauer's responsibilities included technical oversight, quality control reviews, as well as maintaining budgets and schedules.

*Brownfield Site Cleanup, Edison, NJ.* Project Manager for the site assessment and remediation of a former filling station that contained several large underground storage tanks and fueling stations. Ms. Sauer oversaw the tank removals, and subsequent soil remediation and demolition of the filling station. A state-of-the-art automobile dealership was constructed, while soil and groundwater investigations continued. Groundwater contamination concentration trends were tracked by periodic monitoring after the contaminated source soils were removed. In order to recoup costs, the site was entered into the State Brownfields program
